3782. PROPOSED RULE TO EXEMPT ELECTRONIC VIDEO GAMES FROM ELECTRICAL TOY REGULATIONS

Legal Authority: 15 USC 1261 Federal Hazardous Substances Act; 15 USC 1262 Federal Hazardous Substances Act

CFR Citation: 16 CFR 1505

Legal Deadline: None

Abstract: In correspondence dated December 21, 1983, the Consumer Electronic Group of the Electronic Industries Association petitioned the Commission to amend the regulation on electrical toys to exempt electronic video games from coverage. The Commission granted the petition on September 27, 1988, and expects to publish a proposed exemption later in 1989.

3783. HOUSEHOLD SUBSTANCES CONTAINING METHYLENE CHLORIDE; STATUS AS HAZARDOUS SUBSTANCES; PROPOSED RULE

Legal Authority: 15 USC 1261 Federal Hazardous Substances Act; 15 USC 1262 Federal Hazardous Substances Act

CFR Citation: 16 CFR 1500.12(a)(2)

Legal Deadline: None

Abstract: On August 20, 1986, the Commission proposed a rule to declare that household products containing methylene chloride are hazardous substances under the Federal Hazardous Substances Act. These products include some paint strippers and spray paints. The Commission's concern arises from animal tests showing that methylene chloride is a carcinogen by inhalation and studies indicating a significant human exposure as a result of reasonably foreseeable use of products containing methylene chloride. The initiation of this rulemaking proceeding granted one part of a petition (HP 85-1) from the Consumer Federation of America. The staff provided an analysis of the comments on the proposed rule to the Commission in June 1987. In August 1987, the Commission determined that there was insufficient controversy over the status of methylene chloride as a hazardous substance; therefore, the Commission suspended the rulemaking and issued a statement of enforcement policy stating the Commission's view that household products that contain methylene chloride and that expose consumers to significant levels of methylene chloride are (cont.)

3784. POISON PREVENTION PACKAGING ACT REQUIREMENTS FOR CERTAIN EFFERVESCENT ACETAMINOPHEN TABLETS, PROPOSED AMENDMENT OF EXEMPTION

Legal Authority: 15 USC 1471 et seq Poison Prevention Packaging Act

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: Regulations implementing the Poison Prevention Packaging Act exempt effervescent acetaminophen tablets containing less than 10 per cent acetaminophen from requirements for child-resistant packaging. In the Federal Register of October 20, 1988, the Commission published a proposed amendment of those regulations to increase the acetaminophen content of tablets exempted from requirements for child-resistant packaging from less than ten per cent to not more than 15 per cent. In September 1989, the staff expects to transmit a briefing package to the Commission which analyzes comments received in response to the proposed amendment and contains a draft notice to issue the proposed amendment on final basis.

3785. POISON PREVENTION PACKAGING ACT REQUIREMENTS FOR CERTAIN UNFLAVORED ASPIRIN IN POWDER FORM, PROPOSED AMENDMENT OF EXEMPTION

Legal Authority: 15 USC 1471 et seq Poison Prevention Packaging Act

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: Regulations issued under provisions of the Poison Prevention Packaging Act exempt certain unflavored aspirin in powder form which is packaged in unit doses providing not more than 13 grains of aspirin per unit dose from requirements for child-resistant packaging. In the Federal Register of October 20, 1988, the Commission proposed an amendment of those regulations to exempt unflavored aspirin in powder form which is packaged in unit doses providing not more than 15.4 grains of aspirin per dose from requirements for child-resistant packaging. In September 1989, the staff expects to transmit a briefing package to the Commission which analyzes comments received in response to the proposed amendment and contains a draft notice to issue the proposed amendment on a final basis.

3786. POISON PREVENTION PACKAGING ACT REQUIREMENTS FOR CERTAIN MEDROXYPROGESTERONE ACETATE TABLETS, PROPOSED AMENDMENT OF EXEMPTION

Legal Authority: 15 USC 1471 et seq Poison Prevention Packaging Act

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: In the Federal Register of October 20, 1988, the Commission proposed a rule under provisions of the Poison Prevention Packaging Act to exempt medroxyprogesterone acetate tablets dispensed in mnemonic packages containing not more than 100 milligrams of the drug from requirements for child-resistant packaging. The Commission published this proposal after granting a petition from Ayerst Laboratories. In September 1989, the staff expects to transmit a briefing package to the Commission which analyzes comments received in response to the proposal and contains a draft notice to issue the proposed rule on a final basis.

3788. APPLICATION FOR EXEMPTION FROM PREEMPTION; PROPOSED RULE

Legal Authority: 15 USC 2075 Consumer Product Safety Act; 15 USC 1261n Federal Hazardous Substances Act; 15 USC 1203 Flammable Fabrics Act; 15 USC 1476 Poison Prevention Packaging Act

CFR Citation: 16 CFR 1061; 16 CFR 1604; 16 CFR 1704

Legal Deadline: None

Abstract: In the Federal Register of December 26, 1988, the Commission published a proposed regulation to establish procedures for submission and consideration of applications by state and local governments for exemption from preemption by statutes, standards, and regulations of the Consumer Product Safety Commission. The proposed regulation would implement provisions of the Consumer Product Safety Act, the Federal Hazardous Substances Act, the Flammable Fabrics Act, and the Poison Prevention Packaging Act which authorize state and local governments to petition the Commission for exemption from preemption of state and local laws by requirements enforced by the Consumer Product Safety Commission, and specify the conditions under which the Commission may grant such petitions.

Farm Credit Administration

Semiannual Regulatory Agenda

FARM CREDIT ADMINISTRATION (FCA)

VOL 54 ISS 208 OCT 30 1989 UMI

FARM CREDIT ADMINISTRATION (FCA)

FARM CREDIT ADMINISTRATION

12 CFR Ch. VI

Unified Agenda of Federal Regulations

AGENCY: Farm Credit Administration.

ACTION: Department unified agenda of regulations and review list.

SUMMARY: The Farm Credit Administration (FCA), as an independent regulatory agency in voluntary compliance with Executive Order 12291, sets forth the following agenda of regulations, which it will have under development and review during the period of October 1989 through April 1990.

FOR FURTHER INFORMATION CONTACT: Cindy R. Nicholson, Office of General Counsel, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small entities. The FCA is an independent regulatory agency that is exempt from the provisions of Executive Order 12291. Additionally, FCA regulations, which apply to Farm Credit banks and associations and certain other federally chartered entities, generally do not and will not have a substantial impact on "small entities" as that term is defined in the Regulatory Flexibility Act.

While FCA is an independent agency exempt from Executive Order 12291, we believe that participating in this joint publication will further the public interest by including FCA in a single source of information concerning current and projected rulemaking and reviews of existing regulations.

Dated: August 25, 1989.

David A. Hill,

Secretary, Farm Credit Administration Board.

Federal Communications Commission

Semiannual Regulatory Agenda

VOL 54 ISS 208 OCT 30 1989 UMI

FEDERAL COMMUNICATIONS COMMISSION (FCC)

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

Unified Agenda of Federal Regulations; October 1989

AGENCY: Federal Communications Commission.

ACTION: Publication of the Unified Agenda of Federal Regulations.

SUMMARY: Twice a year, the Commission publishes a list in the Unified Agenda of those major items and other significant proceedings under development or review that pertain to the Regulatory Flexibility Act. The agenda also provides the CFR citations and legal authorities which govern these proceedings. The Regulatory Flexibility Act (94 Stat. 1167: 5 U.S.C. 605) includes notations on the applicability of the Regulatory Flexibility Act to each item.

The Unified Agenda is published in the **Federal Register** in April and October of each year.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Tenecia Moncrief, Office of Managing Director, (202) 632-3906.

SUPPLEMENTARY INFORMATION:

Unified Agenda of Major and Other Significant Proceedings

The Commission encourages public participation in the FCC rulemaking process. To help keep the public informed of significant rulemaking proceedings, the Commission has prepared an agenda of important proceedings now in progress. OMB publishes the Unified Agenda in the **Federal Register** in April and October of each year.

The following terms may be helpful in understanding the status of the proceedings included in this report:

A Docket Number - is assigned to a proceeding if the Commission has issued either a Notice of Proposed Rulemaking or a Notice of Inquiry in regard to the matter under consideration. Since January 1, 1978, the Commission has used docket numbers which consist of the last two digits of the calendar year in which the docket was established plus a sequential number which begins at 1 with the first docket initiated during a calendar year (e.g., Docket 80-1 or Docket 83-1). The abbreviation for the responsible Bureau usually precedes the docket number, as in "MM Docket 79-164," which indicates that the responsible Bureau is the Mass Media Bureau. When a docket number consists of only five digits (e.g., Docket 29622), this indicates that the docket was established before January 1, 1978.

Notice of Inquiry (NOI) - issued by the Commission when it is seeking information on a broad subject or trying to generate ideas on a given topic. A comment period is specified during which all interested parties may submit comments.

Notice of Proposed Rulemaking (NPRM) - issued by the Commission when it is proposing a specific change to the FCC Rules and Regulations. Before any changes are actually made, interested parties may submit written comments on the proposals.

Memorandum Opinion and Order (MO&O) - issued by the Commission to deny a petition for rulemaking, conclude an inquiry, modify a decision, or deny a petition for reconsideration of a decision.

Rulemaking (RM) Number - assigned to a proceeding after the appropriate Bureau/Office has reviewed a petition for rulemaking but before the Commission has taken action on the petition.

Report & Order (R&O) - issued by the Commission to state a new or amended rule or state that the FCC Rules will not be changed.

Donna R. Searcy,

Secretary, Federal Communications Commission.

COMMON CARRIER BUREAU—Prerule Stage

Sequence Number	Title	Regulation Identifier Number

3804. SATELLITE COMMUNICATIONS

Significance: Agency Priority

Legal Authority: 47 USC 303; 47 USC 553

CFR Citation: 47 CFR 25

Legal Deadline: None

Abstract: The Commission seeks to develop a record and to solicit comments on the proposed rules. These proposed rules are designed to implement recommendations made by the joint industry/government Advisory Committee on 2 degree satellite spacing; and they will codify basic applications requirements for satellite services. The proposed rules would apply to all entities including small entities who seek authorization under Part 25 of the Commission's rules to construct and operate Fixed-Satellite communications facilities. The proposed rules would establish operational and technical procedures designed to alleviate adjacent satellite interference and may increase the reporting and cost burdens on all satellite licensees. The rules codifying basic applications requirements are codifications of existing policies. Will impose no additional burdens, and may, in fact, reduce the burden by eliminating several current requirements. In order to be effective, these rules must apply to all licensees and thus there is no significant alternative.

Legal Deadline: Final, Statutory, May 16, 1989. Other, Statutory, July 27, 1989. Hearing Aid Compatibility Act of 1988 Telecommunications Accessibility Enhancement Act of 1988

Abstract: This proceeding consists of two phases; one dealing with the telephone hearing aid compatibility issue and the other addressing the implementation of an interstate relay system for users of telecommunications devices for the deaf (TDDs). In Phase One, consistent with P.L. 100-394, the FCC adopted rules on May 4, 1989, requiring nearly all telephones manufactured in or imported into this country after August 16, 1989, to be hearing aid compatible. On July 27, 1989, the FCC concluded its NOI in Phase Two of this proceeding by finding that an interstate TDD relay system is in the public interest and issuing a FNPRM. The FNPRM offers two approaches for providing interstate relay service: one requiring all interexchange carriers subject to Sec. 69.116(a) of the rules to individually or jointly provide the service, and the other assigning the managerial and operation responsibilities of the system to the National Exchange Carrier Association.

Abstract: This proceeding addresses the statutory restrictions which prohibit telephone companies from providing cable television service within their telephone service areas. The FCC has tentatively concluded that the statutory restrictions should be repealed. The Commission solicited comments and will decide whether to recommend to Congress whether the restrictions should be repealed. The Commission also issued an NPRM to modify the standards of affiliation between cable companies and telephone companies.

Legal Deadline: None

Abstract: The Commission has adopted final rules that implement price cap regulation for American Telephone and Telegraph Company. The price cap rules replace rate of return regulation, which sets limits on carrier earnings, with a system of regulation that directly limits the prices a carrier can charge for service. The Commission found that price cap regulation will provide incentive for AT&T to become more efficient and innovative, and will benefit consumers by creating a system that will result in aggregate prices that are lower than aggregate prices would have been under rate or return. The Commission has also adopted a Second Further Notice of Proposed Rulemaking containing a specific plan for implementing a modified form of price cap regulation for local exchange carriers' interstate rates.

Legal Deadline: NPRM, Statutory, October 20, 1986. Other, Statutory, September 14, 1987.
Further Notice of Proposed Rulemaking

Abstract: This proceeding looks to establish a means by which radio emissions might be encoded with a distinct automatically transmitted identifier to benefit orderly management of the radio spectrum by identifying the source of radio frequency interference to other radio signals. For video satellite uplink stations regulated under Part 25 of the Commission's rules, it proposes rules regarding such identifiers. There are no significant alternatives being considered that are consistent with stated objectives. Every operator of a satellite video uplink would be required to purchase and operate a device to insert identification on all transmissions. Approximately 1,000 stations would be involved. Each encoder would cost under $2000. Operating upkeep expenses should be minimal.

3831. RADIO MULTIPLE OWNERSHIP & CROSS OWNERSHIP RULES

Significance: Agency Priority

Legal Authority: 47 USC 154; 47 USC 303

CFR Citation: 47 CFR 73.3555

Legal Deadline: None

Abstract: In its 2nd R&O in this proceeding, the FCC established new waiver procedure with respect to the common ownership of radio and television stations in the same market. Under this procedure, the FCC determined that it would look with favor upon waiver applications in the top 25 TV markets (1) where there would be at least 30 "voices" following the proposed combination, and (2) where the proposed combination involved a "failed" station. Reconsideration requested.

VOL 54 ISS 208 OCT 30 1989 UMI

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC)

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Ch. III

Semiannual Agenda of Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is hereby publishing items for the October 1989 regulatory agenda. The agenda contains information about FDIC's current and projected rulemakings, existing regulations under review, and completed rulemakings.

FOR FURTHER INFORMATION CONTACT: Persons identified under regulations listed in the agenda. The address for all FDIC staff identified in the agenda is Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: Twice each year, the FDIC publishes an agenda of regulations to inform the public of its regulatory actions and to enhance public participation in the rulemaking process. Publication of the agenda is in accordance with both the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and the FDIC statement of policy entitled, "Development and Review of FDIC Rules and Regulations" (44 FR 31007, May 30, 1979; 44 FR 32353, June 6, 1979; 44 FR 76858, December 28, 1979; 49 FR 7288, February 28, 1984).

The FDIC amends its regulations under the general rulemaking authority prescribed in section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819) and under specific authority granted by the Act and other statutes.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"), which was enacted on August 9, 1989, contains reforms that significantly restructure Federal deposit insurance and the regulation of financial institutions. As a consequence, the FDIC expects, in the coming months, to propose and adopt a number of regulations, as required by FIRREA. Among them are regulatory actions pertaining to insurance fund assessment procedures and the requirements for notifying the public of deposit insurance coverage, which are included in this agenda.[1]

Interested persons may petition the FDIC for the issuance, amendment, or repeal of any regulation by submitting a written petition to the Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429. Petitioners should include complete and concise statements of their interest in the subject matter and reasons why the petitions should be granted.

Dated: August 25, 1989.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

3869. PRIOR NOTICE BY INSURED BANKS OF INTENT TO DIRECTLY OR INDIRECTLY ENGAGE IN A NEW BANKING ACTIVITY AND OF INTENT TO ACQUIRE OR ESTABLISH A SUBSIDIARY

Legal Authority: 12 USC 1816; 12 USC 1817; 12 USC 1818(a); 12 USC 1818(b); 12 USC 1819; 12 USC 1820; 12 USC 1821(f)

CFR Citation: 12 CFR 304; 12 CFR 332

Legal Deadline: None

Abstract: The FDIC is considering amending its regulations to require any insured State nonmember bank to provide 30-day prior written notice to the regional director of the FDIC region in which the bank is located of the bank's intent to engage in a new banking activity and of its intent to acquire or establish a subsidiary. The planned rule also would require notice to the regional director of the FDIC region in which the bank is located not more than 10 days after the activity is started or the subsidiary is established or acquired.

3870. ● INSIDER TRANSACTIONS - CONFLICTS OF INTEREST

Legal Authority: 12 USC 1818; 12 USC 1819; 12 USC 1820; 12 USC 1821(f)

CFR Citation: 12 CFR 356

Legal Deadline: None

Abstract: The FDIC staff is considering whether to recommend to the Board of Directors that it amend its regulations to require any state-chartered nonmember bank and FDIC-insured foreign branch to adopt written guidelines governing all insider transactions beyond loans. Staff expects to recommend that the planned rule would require that no covered institution may enter into a business transaction with an insider (as defined) unless: (i) it is made on substantially the same terms as those prevailing at the time for comparable transactions, (ii) the board of directors or trustees states in writing that the business transaction is for the benefit of the bank and is not merely an accommodation to a bank insider, and (iii) the transaction does not present unfavorable features which may be detrimental to the bank's interest.

3871. ● ADVERTISEMENT OF MEMBERSHIP

Legal Authority: 12 USC 1819; 12 USC 1828(a); PL 101-73, Sec 221

CFR Citation: 12 CFR 328

Legal Deadline: None

Abstract: The FDIC has issued a final rule amending its regulation regarding advertisement of membership in order to comply with the requirements of section 221 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") (see 54 FR 33669, August 16, 1989). Because the FDIC acted under a statutory deadline, the final rule established only those requirements that were considered to be the minimum necessary to comply with FIRREA. The FDIC is now considering additional amendments to the regulation.

3872. SALARY OFFSET

Legal Authority: 5 USC 5514; 12 USC 1819

CFR Citation: 12 CFR 355

Legal Deadline: None

Abstract: The FDIC is planning to propose new regulations to implement salary offset procedures required by 5 USC 5514 and 5 CFR 550, Subpart K. The proposal would set out procedures to be used by the FDIC to offset the salary of any FDIC employee who is indebted to the United States and refuses to pay voluntarily. The proposal would also enumerate procedures through which the FDIC may request another agency to offset the salary of one of its employees to satisfy a debt that employee may owe the FDIC.

3873. SECURITIES RECORDKEEPING AND CONFIRMATIONS

Legal Authority: 12 USC 1817; 12 USC 1818; 12 USC 1819

CFR Citation: 12 CFR 344

Legal Deadline: None

Abstract: The FDIC expects to propose an amendment to 12 CFR Part 344, which governs an insured nonmember bank's recordkeeping and confirmation requirements for securities transactions. The proposed amendment would expand an existing exception under Part 344 for low activity. The exception would be increased to allow banks which effect an average of fewer than 1,000 securities transactions per year to be exempt from certain recordkeeping and written policymaking requirements. The current "low-activity" threshold is 200 transactions per year. The amendment is needed to eliminate unnecessary paperwork burden and is intended to reduce the impact of FDIC's regulation on insured nonmember banks that engage in a low number of securities transactions per year.

3874. PRIOR NOTICE OF RAPID GROWTH IN INSURED BANKS

Legal Authority: 5 USC 552; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1820

CFR Citation: 12 CFR 304

Legal Deadline: None

Abstract: The FDIC plans to substitute for its current regulation on reporting fully insured brokered deposits and fully insured deposits placed directly by other depository institutions (12 CFR 304.6) a new requirement calling for the reporting of planned rapid growth by certain limited means such as the solicitation and acceptance of brokered deposits, out-of-territory deposits and borrowings. The report would describe the volume, sources and anticipated uses of the funds to be borrowed.

3876. DELEGATIONS OF AUTHORITY TO ACT ON APPLICATIONS

Legal Authority: 12 USC 1815; 12 USC 1816; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1828; 12 USC 1829; 15 USC 1607

CFR Citation: 12 CFR 303

Legal Deadline: None

Abstract: The FDIC is preparing final amendments to Part 303 of its rules and regulations to clarify and, in some cases, to modify the delegations of authority for acting on a variety of applications (e.g., mergers, branches, relocations, deposit insurance, trust and banking powers, change in control, and management interlocks). The amendments do not alter any rights or obligations of any person, bank, or other applicant.

3877. INSURANCE COVERAGE; UNIT INVESTMENT TRUST

Legal Authority: 12 USC 1813; 12 USC 1817; 12 USC 1821; 12 USC 1822

CFR Citation: 12 CFR 330

Legal Deadline: None

Abstract: The FDIC proposed amending Part 330 of its rules and regulations. Under the proposed rule, unit investment trusts would no longer be treated as corporations for purposes of

insurance coverage limits where deposits in any one insured bank are insured to the maximum of $100,000. Instead, the proposal, if adopted, would result in deposit insurance up to $100,000 as to each beneficial owner of the trust's deposits.

3878. DEPOSIT LIABILITIES

Legal Authority: 12 USC 1813; 12 USC 1819

CFR Citation: 12 CFR 354

Legal Deadline: None

Abstract: The FDIC issued for public comment a proposed regulation expanding the definition of the term "deposit." The proposed rule would find that a bank's liability on a promissory note, bond, acknowledgement of advance, or similar obligation that is issued or undertaken by the insured bank as a means of obtaining funds is a deposit liability.

3880. ● ASSESSMENTS

Significance: Agency Priority

Legal Authority: 12 USC 1817 to 1819

CFR Citation: 12 CFR 327

Legal Deadline: None

Abstract: The FDIC is amending Part 327 of its regulations, entitled "Assessments," in response to the requirements of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989. The final rule establishes interim assessment procedures for savings associations. The final rule also provides a mechanism for funding the Financing Corporation and the Resolution Funding Corporation through the end of 1989.

The FDIC will consider any public comments received by November 13, 1989, in order to determine whether this final rule should be revised.

3881. ● ADVERTISEMENT OF MEMBERSHIP

Significance: Agency Priority

Legal Authority: 12 USC 1819; 12 USC 1828(a); PL 101-73, Sec 221

CFR Citation: 12 CFR 328

Legal Deadline: Final, Statutory, August 9, 1989.

Abstract: The FDIC is amending its regulation prescribing the requirements with regard to the official sign insured financial institutions must display notifying the public of deposit insurance coverage. This action is necessary in order to comply with the requirements of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"). This rule is intended to assure that insured financial institutions comply with the requirements of FIRREA.

Because the FDIC is acting under a statutory deadline, this final rule establishes only those requirements that are considered to be the minimum necessary to comply with FIRREA. Consequently, additional changes to the FDIC's regulation governing advertisement of membership are being considered, and comments are invited through a separately published "Advance Notice of Proposed Rulemaking" (see 54 FR 33716, August 16, 1989).

3882. FOREIGN BANKS; DELEGATIONS OF AUTHORITY

Legal Authority: 12 USC 378; 12 USC 1813; 12 USC 1815; 12 USC 1816; 12 USC 1817; 12 USC 1818; 12 USC 1819; 12 USC 1820; 12 USC 1828; 12 USC 1829; 12 USC 3103; 12 USC 3104; 12 USC 3108; 15 USC 1607

CFR Citation: 12 CFR 346; 12 CFR 303

Legal Deadline: None

Abstract: The FDIC has adopted changes to its regulations pertaining to insured branches of foreign banks. Substantial changes were made to the current provisions relating to exemptions from the deposit insurance requirement, the capital equivalency requirement, and the country exposure provision. Changes were also made to the pledge of assets requirement and to the delegations of authority concerning it (12 CFR Part 303.6), as well as to miscellaneous provisions throughout the regulation.

On June 28, 1989 (54 FR 27154), the FDIC published an addendum to the final regulation regarding exemptions from deposit insurance for branches of foreign banks. According to the addendum, the exemption for initial deposits of less than $100,000 by depositors who are neither citizens nor residents of the U.S. at the time of the initial deposit will be included in the final regulation.

Federal Energy Regulatory Commission

18 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Semiannual regulatory agenda.

SUMMARY: In response to Office of Management and Budget Bulletin No. 88-12, the Federal Energy Regulatory Commission voluntarily submits information about rulemakings under development. Of the 16 rulemakings listed, 14 are current and projected rulemakings and 2 are completed actions.

DATES: The dates provided represent goals, not commitments, and may be revised due to shifts in workload, changes in priorities, or extensive public comments. See the various dates listed for each specific rulemaking.

ADDRESS: Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Person listed for each specific rulemaking.

Lois D. Cashell,

Secretary.

FEDERAL ENERGY REGULATORY COMMISSION (FERC) — Prerule Stage

3883. REGULATIONS GOVERNING SUBMITTAL OF PROPOSED HYDROPOWER LICENSE CONDITIONS, AND OTHER MATTERS

Significance: Agency Priority

Legal Authority: 16 USC 792a et seq. (1982 and Supp. 1987) Federal Power Act; 16 USC 661 et seq. (1982) Fish and Wildlife Coordination Act; 42 USC 4321 et seq (1982) National Environmental Policy Act

CFR Citation: 18 CFR 1

Legal Deadline: None

Abstract: This rulemaking will propose improvements in the coordination between the Commission and Federal and State fish and wildlife agencies concerning appropriate conditions and other measures to be taken in proceedings on the granting of licenses to applicants for hydroelectric facilities subject to the Commission's jurisdiction. Docket No. RM89-7-000.

3887. 5-YEAR TAKE-OR-PAY MAKE-UP PROVISIONS IN NATURAL GAS PRODUCER-PIPELINE CONTRACTS

Significance: Agency Priority

Legal Authority: 15 USC 717 to 717w (1982) Natural Gas Act; 42 USC 7101 to 7352 (1982) Dept. of Energy Organ. Act; EO 12009 (1978) 3 CFR Part 142; 31 USC 9701 (1970) Independent Offices Approp. Act

CFR Citation: 18 CFR 154

Legal Deadline: None

Abstract: This notice of proposed rulemaking eliminates the requirement in the Commission's regulations that a gas purchase contract between an independent natural gas producer and an interstate natural gas pipeline must allow the pipeline a minimum 5-year make-up period in which to take gas for which payment has already been made. The Commission believes that this requirement, established in 1967, may no longer be necessary in light of current efforts by pipelines and producers to resolve take-or-pay issues and to enter into market-responsive contracts for future gas supplies. Docket No. RM88-20-000.(See Docket No. RM89-2-000).

3888. BLANKET SALES CERTIFICATES FOR FIRST SELLERS OF NATURAL GAS

Significance: Agency Priority

Legal Authority: 15 USC 717 to 717w (1982); EO 12009 3 CFR 1978 Comp., p. 142; 15 USC 3301 to 3432 (1982); 42 USC 7101 to 7352 (1982)

CFR Citation: 18 CFR 270; 18 CFR 271

Legal Deadline: None

Abstract: The proposed rule would grant blanket sales authority to first sellers of natural gas (except gas marketers) to make sales for resale in interstate commerce. Marketers would be required to apply individually for this authorization. The rule would eliminate virtually all of the certificate and filing requirements presently applicable to these sales. (This NOPR would consolidate Docket No. RM88-20-000 into this rule.) Docket No. RM89-2-000.

FEDERAL ENERGY REGULATORY COMMISSION (FERC) — Final Rule Stage

3889. CALCULATION OF CASH WORKING CAPITAL ALLOWANCE FOR PUBLIC UTILITIES

Legal Authority: 16 USC 791a to 828c

CFR Citation: 18 CFR 35

Legal Deadline: None

Abstract: The proposed rule would provide that the cash working capital requirements of a public utility that files an electric rate schedule will be presumed to be zero dollars, and thus will not affect the utility's rate base, unless the utility shows there is a significant difference between the time it pays certain current operating expenses and the time it receives revenues from ratepayers. The proposed rule would establish a threshold standard that must be met to support a cash working capital adjustment to a utility's rate base, the expense elements to be considered in calculating cash working capital adjustments to rate base, and criteria applicable to studies submitted in support of a request for an adjustment to rate base. Docket No. RM84-9-000.

Legal Deadline: None

Abstract: Order No. 500 is an interim rule that readopted the regulations promulgated in Order No. 436 with one addition and one deletion. Order No. 500 added a requirement that producers submit an offer of take-or-pay credits to an open access pipeline in order to make the pipeline's gas eligible for transportation (unless the pipeline and producer agree to a different arrangement); it deleted the customers' contract demand reduction option. Order No. 500 also adopted a policy on passthrough mechanisms for take-or-pay buyout and buydown costs and on gas inventory charges. Order Nos. 500-A, 500-B, 500-C and 500-D made changes to the crediting provisions and extended certain deadlines. Rehearing of the Order No. 500 interim rule was denied in Order No. 500-E. Docket No. RM87-34-000.

3892. REGULATIONS GOVERNING INDEPENDENT POWER PRODUCERS

Significance: Agency Priority

Legal Authority: PL 99-509, Sec 3401; 42 USC 7101 to 7352 (1982); EO 12009 3 CFR (1978) Comp., p. 142; 5 USC 551 to 557 (1982); 15 USC 717 to 717w (1982); 16 USC 791a to 828c (1982); 15 USC 3301 to 3432 (1982); 16 USC 2601 to 2645 (1982); 49 USC 1 to 27 (1976)

CFR Citation: 18 CFR 38; 18 CFR 382

Legal Deadline: None

Abstract: The Commission proposed to streamline regulation of a class of non-traditional utility suppliers, called independent power producers (IPPS). The proposed regulations would: (1) authorize rates for IPPS to be determined through competition or rate negotiation subject to a price cap, thereby freeing IPPS from cost-based ratemaking while ensuring that rates fall within a zone of reasonableness; (2) authorize IPPs to file rate schedules without having to provide extensive cost support; (3) exempt IPPS from cost-related accounting, reporting and recordkeeping requirements; (4) streamline the corporate and financial regulation of IPPS; (5) provide the blanket prior authorizations to engage in certain corporate activities; and (6) adopt and advance certification procedures to qualify as an IPP. Docket No. RM88-4-000.

Federal Home Loan Bank Board

Semiannual Regulatory Agenda

FEDERAL HOME LOAN BANK BOARD (FHLBB)

FEDERAL HOME LOAN BANK BOARD

12 CFR Ch. V

[No. 89-2162]

Agenda of Federal Regulations

AGENCY: Federal Home Loan Bank Board.

ACTION: Publication of agenda items.

SUMMARY: The Federal Home Loan Bank Board ("Bank Board") is hereby publishing items for the "October Unified Agenda of Federal Regulations." The agenda items reflect the status of the Bank Board's regulatory projects as of July 31, 1989.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA"), Pub. L. 101-73, 103 Stat. 183, signed into law on August 9, 1989, reorganizes the regulation of the thrift industry and the functions currently performed by the Bank Board. Under FIRREA, the regulatory responsibilities of the Bank Board were transferred to a new Office of Thrift Supervision ("OTS") in the Department of the Treasury and to the Federal Deposit Insurance Corporation ("FDIC"). Revisions to Bank Board regulations transferred to OTS and FDIC and new regulatory initiatives implementing FIRREA will be published in the **Federal Register** as they are promulgated and will appear in subsequent editions of the Unified Agenda under the appropriate agency.

ADDRESS: Information Services Division, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: See persons listed below for specific agenda items.

Dated: August 2, 1989.
By the Federal Home Loan Bank Board.
John F. Ghizzoni,
Assistant Secretary.

FEDERAL HOME LOAN BANK BOARD (FHLBB) — Proposed Rule Stage

3899. INSURANCE TERMINATION PROVISIONS

Legal Authority: 12 USC 1464; 12 USC 1727; 12 USC 1730

CFR Citation: 12 CFR 565

Legal Deadline: None

Abstract: The Bank Board is reviewing a number of issues relating to the extent to which institutions insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") that terminate their insured status in connection with transfers by operation of law must pay a final insurance premium to the FSLIC. As part of its review, the Bank Board solicited public comment to ascertain whether to issue a proposal in this area. On October 7, 1986, the Bank Board adopted a clarifying amendment to the definition of "transfers" set forth in its statement of policy regarding mergers and transfers of assets. (12 CFR 571.5(a)). However, as the clarification indicates, the interpretation did not specifically address the separate issues of whether an insured institution undertaking a transfer of assets and liabilities by operation of law in which the surviving entity is not FSLIC-insured must pay a final insurance premium to the FSLIC, and if so, the amount of such payment. The Bank Board has been reviewing this so-called "exit premium" issue on an ongoing basis and as yet has made no final determination with respect to this matter. (cont)

3900. REQUIRED CAPITAL LEVELS FOR INSURED INSTITUTIONS; REGULATORY INTERVENTION

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724; 12 USC 1725 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563

Legal Deadline: None

Abstract: In conjunction with its current proposal to amend its regulations to establish minimum capital requirements for FSLIC-insured institutions, the Bank Board is addressing whether the final capital regulation should contain specific language defining a particular level of capital as an "unsafe and unsound condition to transact business" for the purpose of activating the Board's statutory authority to appoint a conservator or receiver for an institution. The Board is considering setting its floor capital requirement at a level of 1.5% of total assets, to be held in the form of core equity capital.

3901. MUTUAL SAVINGS AND LOAN HOLDING COMPANIES

Significance: Agency Priority

FHLBB — **Proposed Rule Stage**

Legal Authority: 12 USC 1437; 12 USC 1725

CFR Citation: 12 CFR 500 et seq.

Legal Deadline: None

Abstract: The Bank Board is reviewing issues to be addressed through the implementation of the mutual holding company provisions of the National Housing Act ("NHA") added by the Competitive Equality Banking Act of 1987 ("CEBA"). The provisions permit any insured institution to reorganize to form a holding company by chartering an interim savings institution whose stock is wholly-owned by the mutual institution and transferring substantially all of the mutual institution's assets and liabilities (including all insured liabilities) to the interim savings institution.

3902. ● BONDS FOR DIRECTORS, OFFICERS, EMPLOYEES, AND AGENTS; FORM AND AMOUNT OF BONDS

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563

Legal Deadline: None

Abstract: The Bank Board recently adopted amendments to 12 CFR 563.19 which modified the schedule for calculating the permissible deductible for fidelity bonds. See RIN 3068-AA71. The Bank Board is now seeking comment on whether additional, more substantive revisions to the fidelity bond regulations for all insured institutions are necessary at this time.

Among the revisions under consideration are changes to The American Surety Association Form No. 22 Blanket Bond, and to the amount of the bond required.

3903. TRANSACTIONS WITH AFFILIATES

Significance: Agency Priority

Legal Authority: 12 USC 1730a; 12 USC 1425a; 12 USC 1462; 12 USC 1724; PL 100-86

CFR Citation: 12 CFR 584.3

Legal Deadline: None

Abstract: The Bank Board is proposing to amend its regulations pertaining to transactions between institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation and affiliates of those institutions. The proposed amendments (1) define and clarify the applicability of the limitations and prohibitions specified in sections 23A and 23B of the Federal Reserve Act and (2) clarify the applicability of the limitations and prohibitions specified in the Board's regulations existing prior to the Competitive Equality Banking Act (CEBA). The proposed amendments are intended to further the Congressional intent codified in CEBA by providing parity between a bank and a thrift holding company with respect to the treatment of transactions between the subsidiary depository institution and its affiliates engaged in activities permissible for a bank holding company under the Bank Holding Company Act and the regulations thereunder.

There are no alternatives that would be less burdensome than the proposed rule in addressing the concerns expressed above.

removed from membership under the National Housing Act by virtue of the termination of Federal Savings and Loan Insurance Corporation ("FSLIC") insurance of their accounts. Specifically, the proposal would amend Part 528 of the Board's Rules and Regulations for the Federal Home Loan Bank System, to provide that an FHLBank member that terminates its status as an FSLIC-insured institution and is thereby removed from FHLBank membership (as well as any other member whose membership is terminated pursuant to section 6(i) of the Federal Home Loan Bank Act), may be readmitted as a member only after the expiration of a five year period following its departure from the FHLBank System.

There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed above.

The potential costs and benefits of the proposed regulation on the industry have not been quantified.

3905. ELECTION OF DIRECTORS OF THE FEDERAL HOME LOAN BANKS

Significance: Agency Priority

Legal Authority: 12 USC 1425b; 12 USC 1426; 12 USC 1427; 12 USC 1437; 12 USC 1464; 12 USC 1725; 12 USC 1726; 12 USC 1730; 18 USC 207; 42 USC 6101 et seq.

CFR Citation: 12 CFR 522

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend its rules governing the Election of Directors of the Federal Home Loan Banks ("Banks") due to its concern about the appearance of conflicts of interest that may exist when officers or directors of institutions that are of regulatory concern are elected to positions as directors of the Banks. The Board feels that it is not be appropriate for persons who have been the subject of regulatory concern to serve on the boards of the Banks as they are an important part of the supervision and regulation of the thrift industry.

Significance: Agency Priority

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 561.13; 12 CFR 563.13

Legal Deadline: None

Abstract:

The Bank Board is proposing to amend its regulations concerning capital requirements for FSLIC-insured institutions. The proposal is more risk-based than the Board's current capital regulations, in order to ensure that institutions engaging in higher risk activities are adequately capitalized. The proposal also addresses interest-rate risk and collateralized borrowing.

In connection with the proposal, the Bank Board has proposed for comment a description of proposed methodologies to be used in calculating the interest-rate-risk component of the proposal.

3909. INVESTMENT PORTFOLIO POLICY AND ACCOUNTING GUIDELINES

Significance: Agency Priority

Legal Authority: 12 USC 1730; 12 USC 1464; 12 USC 1725 to 1726; 15 USC 78c

CFR Citation: 12 CFR 571.19; 12 CFR 563c

Legal Deadline: None

Abstract: The Board has amended its regulations governing institutions insured by the Federal Savings and Loan Insurance Corporation by adopting a statement of policy and by amending its rules to clarify that insured institutions must account for securities held for investment sale and/or trading in accordance with generally acceptable accounting procedures ("GAAP"). The policy statement requires an insured institution's board of directors to document and monitor its investment in policy and strategies; discuss the appropriate documentation of investment decisions; summarize GAAP applicable to securities held for investment,sale, and/or trading; and offer guidance on the application of GAAP by insured institutions in determining when securities should be accounted for as a security held for trading. The Board's intent is to provide guidance and clarifications to insured institutions on the accounting for and classification of investment in securities within the confines of existing accounting literature.

CFR Citation: 12 CFR 509; 12 CFR 512

Legal Deadline: None

Abstract: The Bank Board has revised 12 CFR Parts 509 and 512, its regulations governing the rules of practice and procedure in adjudicatory proceedings. The revisions to Part 509 streamline prehearing procedures with a view toward expediting the proceedings, clarifying the authority of the Administrative Law Judges appointed to conduct the proceedings, and adding several new provisions. The revisions to Part 512 are of a clarifying and technical nature and update several provisions of the rules relating to the conduct of investigative and formal examination proceedings.

There are no alternatives that would be less burdensome than the proposed amendments in addressing the concerns expressed above.

The potential costs and benefits of the proposed regulations on the industry have not been quantified.

CFR Citation: 12 CFR 563.19

Legal Deadline: None

VOL 54 ISS 208 OCT 30 1989 UMI

Abstract:

The Bank Board has amended 12 CFR 563.19 by deleting the current schedule for calculating the permissible deductible amount for bonds for directors, officers, employees, and agents of FSLIC-insured institutions. A new method for calculating the permissible deductible has been instituted making the maximum permissible deductible the higher of either five percent of tangible capital as defined in 12 CFR 563.9-8(b)(12) or $50,000, with some exceptions.

In addition, the allowance for institutions to increase the permissible deductible to a maximum of three times the permissible amount if losses under the bond exceed 50 percent of the premium has been eliminated as it is unnecessary due to the increase in the permissible deductibles.

CFR Citation: 12 CFR 563.8-1

Legal Deadline: None

Abstract: The Bank Board amended 12 CFR 563.8-1, its regulations governing the issuance of subordinated debt securities by insured institutions, to codify certain interpretations of the rule and to incorporate technical revisions to the rule which are necessary due to recently-enacted legislation.

The rule also modifies the bases for supervisory objection to approval of a subordinated debt application by giving the Office of Regulatory Activities ("ORA") the authority to develop guidelines outlining the bases for supervisory objection to the issuance of subordinated debt. The Principal Supervisory Agent ("PSA") is given the authority to approve or deny subordinated debt applications, subject to an appeal process.

The rule also includes a standard set of conditions which would apply to approvals of applications to include subordinated debt in regulatory capital.

Abstract: The Bank Board has revised its applications processing regulations with regard to the approval of the formation of savings and loan holding companies by insured institutions. The revisions include automatic approval of applications for routine reorganizations involving the formation of savings and loan holding companies, subject to certain requirements. Applications will be automatically approved 30 calendar days after filing if the Board has not notified the applicant in writing that more information is required, that it is materially deficient, or that it is denied.

The rule also provides for an improved approval process for permission to organize an interim federal institution for insurance of accounts, for Federal Home Loan Bank Membership and merger of any interim institution that is part of the reorganization transaction.

3915. ACQUISITION OF CONTROL OF INSURED INSTITUTIONS

Significance: Agency Priority

Legal Authority: 12 USC 1730; 12 USC 1730a

CFR Citation: 12 CFR 574.6

Legal Deadline: None

Abstract: The Bank Board has adopted a short-form application for use by insured institutions seeking approval for routine reorganizations involving the formation of savings and loan holding companies. The rule is intended to improve the application process by limiting the required contents of routine reorganization applications to that which is necessary for the FSLIC to make informed decisions.

3916. CORPORATE GOVERNANCE, PART I

Significance: Agency Priority

Legal Authority: 12 USC 1464

CFR Citation: 12 CFR 541.0 et seq.; 12 CFR 542.1 et seq.

Legal Deadline: None

Abstract: The Bank Board proposed extensive revisions to its regulations regarding the corporate governance of Federal associations in order to update and clarify these regulations. Due to the magnitude of the revisions, the Bank Board presented the proposal in parts, issued separately for public comment. The proposed regulations would have reorganized parts of Subchapter C (the regulations for federally chartered associations) and amended and added sections to provide a more cohesive and complete body of rules for the corporate governance of Federal associations. Part I would have provided definitions and rules for the organization and incorporation of Federal associations.

The proposed rule would have applied equally to all insured institutions.

The time period for Board action on the proposal expired on July 10, 1989. It is anticipated that the proposal will be formally withdrawn and reproposed at a later date.

Abstract: The Bank Board proposed extensive revisions to its regulations regarding the corporate governance of Federal associations in order to update and clarify these regulations. Due to the magnitude of the revisions, the Bank Board presented the proposal in parts, issued separately for public comment. The proposed regulations would have reorganized parts of Subchapter C (the regulations for federally chartered associations) and amended and added sections to provide a more cohesive and complete body of rules for the corporate governance of Federal associations. Part II would have contained provisions regarding the corporate structure and governing processes for Federal stock associations and Federal mutual associations.

The time period for Board consideration of the proposal expired on July 10, 1989. It is anticipated that the proposal will be formally withdrawn and reproposed at a later date.

3918. RELEASE OF CUSTOMER FINANCIAL RECORDS BY FEDERAL ASSOCIATIONS

Significance: Agency Priority

Legal Authority: 12 USC 1425a; 12 USC 1425b; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1726; 12 USC 1728; 12 USC 1730; 12 USC 1730a

CFR Citation: 12 CFR 545.131; 12 CFR 545.132; 12 CFR 545.141; 12 CFR 552.11

Legal Deadline: None

Abstract: The Bank Board has revised its regulations concerning the releases by federally chartered savings and loan associations and savings banks of customer financial records. It generally authorizes a Federal association to disclose the names and addresses of its customers to any party unless the customer objects, but would prohibit the disclosure of confidential information regarding customers' savings or loan accounts subject to specific exceptions. It also modifies the requirement that Federal mutual associations obtain the prior approval of either the Board or a Supervisory Agent before releasing their customer records.

CFR Citation: 12 CFR 522

Legal Deadline: None

Abstract: The Bank Board has adopted a temporary rule to implement the procedures to be used for the election of directors to the boards of the Federal Home Loan Banks during calendar year 1989. As a result of legislation pending in Congress to restructure the regulation of the thrift industry, the election process will be delayed, but will be completed by December 31, 1989, in any case.

Significance: Agency Priority.

Legal Authority: 12 USC 1421 et seq.; 12 USC 1425a; 12 USC 1425b; 12 USC 1437; 12 USC 1462; 12 USC 1464; 12 USC 1724 to 1730; 12 USC 1730a; 12 USC 3806

CFR Citation: 12 CFR 563

Legal Deadline: None

Abstract: The Bank Board has amended its regulations concerning investments by FSLIC-insured institutions in equity securities, real estate, service corporations, operating subsidiaries, certain land loans, and nonresidential construction loans. The rule differs from the original proposal (See RIN 3068-AA74) in that investments in Federal National Mortgage Association and Federal Home Loan Mortgage Corporation stock made on or before December 14, 1988 would be grandfathered in a manner consistent with the savings clause of the current equity-risk investment regulation found at 12 CFR 563.9-8(f) (1988).

See RIN 3068-AA74, Completed Actions, for references to the original proposal.

FEDERAL MARITIME COMMISSION (FMC)

FEDERAL MARITIME COMMISSION

46 CFR Ch. IV

Unified Regulatory Agenda

AGENCY: Federal Maritime Commission.

ACTION: Unified Agenda of Federal Regulations.

SUMMARY: Pursuant to section 5 of E.O. 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Commission anticipates having under consideration during the period from October 1, 1989, to September 30, 1990, actions in the areas listed below.

FOR FURTHER INFORMATION CONTACT: For further information concerning Commission rulemaking proceedings or the status of any matter listed below, contact: Joseph C. Polking, Secretary, 1100 L Street NW., Washington, DC 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION: Section 602 of the Regulatory Flexibility Act (5 U.S.C. 602) requires the publication of an agenda of items for which regulatory agencies may propose or promulgate a rule which is likely to have a significant economic impact on a substantial number of small entities. Section 5 of Executive Order 12291 also requires executive agencies to publish a regulatory agenda; the Commission voluntarily complies with this section.

The agendas include information on regulatory activities being conducted or reviewed during the succeeding 12 months by the Commission.

The following is the Commission's Unified Regulatory Agenda. The agenda does not necessarily include all petitions for rulemakings which are under staff review.

In addition, the Commission maintains a compilation of the status of pending rulemaking proceedings and a listing of rules that have become final since the publication of the most recent regulatory agenda. This will be made available to the public, including the press and interested persons.

Joseph C. Polking,

Secretary.

Semiannual Regulatory Agenda

FEDERAL RESERVE SYSTEM (FRS)

FEDERAL RESERVE SYSTEM

12 CFR Ch. II

Semiannual Regulatory Flexibility Agenda

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Semiannual agenda.

SUMMARY: The Board is issuing this agenda under the Regulatory Flexibility Act and the Board's Statement of Policy Regarding Expanded Rulemaking Procedures. The Board anticipates having under consideration regulatory matters as indicated below during the period from October 1, 1989, through April 1, 1990. The next semiannual agenda will be published in April 1990.

DATES: Comments about the form or content of the agenda may be submitted any time during the next six months.

ADDRESS: Comments should be addressed to William W. Wiles, Secretary of the Board, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FOR FURTHER INFORMATION CONTACT: A staff contact for each item is indicated with the regulatory description below.

SUPPLEMENTARY INFORMATION: The Board is publishing its October 1989 Agenda as part of the October 1989 Unified Agenda of Federal Regulations, which is coordinated by the Office of Management and Budget under Executive Order 12291. Participation by the Board in the Unified Agenda is on a voluntary basis.

The Board's agenda is divided into three sections. The first, Proposed Rule Stage, reports on matters the Board may consider for public comment during the next six months. The second section, Final Rule Stage, reports on matters that have been proposed and are under Board consideration. A third section, Completed Actions, reports on regulatory matters the Board has completed or is not expected to consider further.

A dot (●) preceding an entry indicates a new matter that was not a part of the Board's previous agenda and which the Board has not completed.

Barbara R. Lowrey,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM (FRS)

Proposed Rule Stage

3947. ● REGULATION: C – HOME MORTGAGE DISCLOSURE

Legal Authority: 12 USC 2803(e); 12 USC 2803(h)

CFR Citation: 12 CFR 203

Legal Deadline: Other, Statutory, January 1, 1990.
As of January 1, 1990, lenders are required to collect the new information.

Abstract: Before year-end, the Board will propose for public comment and adopt revisions to Regulation C to implement amendments to the Home Mortgage Disclosure Act (HMDA) that were contained in the Financial Institutions Reform, Recovery and Enforcement Act, signed August 9, 1989. Currently, HMDA requires covered institutions to disclose and report information regarding their mortgage lending. Among other things, the statutory amendments extend the coverage of HMDA to include most mortgage lenders. Covered institutions will be required also to maintain and disclose information regarding mortgage loan applications, and information regarding the race, gender and income of applicants and borrowers. Under the amendments, banks and other depository institutions with $30 million or less in assets will not be required to report data on the race, gender, and income level of applicants and borrowers. Institutions with $10 million or less in assets remain exempt from all requirements of the Act. Therefore, it is not expected that the proposals will have a significant economic impact on the smallest mortgage lenders; they will have significant economic impact on institutions (cont)

RIN: 7100–AB04

3948. REGULATION: E - ELECTRONIC FUND TRANSFERS

Legal Authority: 15 USC 1693 et seq Electronic Fund Transfer Act

CFR Citation: 12 CFR 205

Legal Deadline: None

Abstract: The Board is conducting a review of Regulation E, which implements the Electronic Fund Transfer Act, and establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfer services and of financial institutions that offer these services (whether or not these institutions hold the consumer's account). The review will consider whether any provisions of the regulation are in need of updating and whether any substantive changes are necessary because of technological and other developments. The Board will also consider whether to make any legislative recommendations for statutory changes.

Public comment will be requested on any regulatory proposals that may be developed following the review. It is not anticipated that the revisions would have a significant economic impact on a substantial number of small banks.

3949. REGULATION: G - SECURITIES CREDIT BY PERSONS OTHER THAN BANKS, BROKERS, OR DEALERS; AND REGULATION: U - CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

Legal Authority: 15 USC 78g Securities Exchange Act of 1934, as amended; 15 USC 78w Securities Exchange Act of 1934, as amended

CFR Citation: 12 CFR 221; 12 CFR 207

Legal Deadline: None

Abstract: During the next three months the Board may address the ability of

FRS

Proposed Rule Stage

FRS

Proposed Rule Stage

lenders subject to Regulations G and U to transfer a credit between these two types of lenders without treating the transaction as creating a new extension of credit. The regulations currently permit a transfer only between lenders subject to the same regulation. Several law firms have expressed an interest in such a deregulatory amendment.

It is not anticipated that this proposal will affect a significant portion of the overall lending activities of a substantial number of small firms.

3950. REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 1843 (c)(13); 12 USC 601 to 604a; 12 USC 611 to 631

CFR Citation: 12 CFR 211

Legal Deadline: None

Abstract: The Board will consider whether to publish for public comment a proposed amendment to Regulation K to permit U.S. banking organizations to engage in a broader range of activities abroad. Specifically, the Board will consider whether U.S. banking organizations should be permitted to underwrite, distribute, and deal in equity securities outside the United States in excess of the current restriction in Regulation K, which prohibits a subsidiary of a U.S. banking organization from making an underwriting commitment for shares of an issuer in excess of: (i) $2 million, or (ii) 20 percent of the capital and surplus of the issuer's voting shares, unless covered by binding commitments from subunderwriters or other purchasers.

In addition, the Board will consider whether the purchases of shares of companies held in trading accounts should continue to be subject to the investment procedures set out in Regulation K at 12 CFR 211.5(c). This proposal may be considered in connection with the broad-based review of Regulation K to be issued by year-end. See RIN 7100-AA98. It is not expected that the proposal would have a significant economic impact on a (cont)

3951. REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 221 et seq; 12 USC 1841 et seq; 12 USC 3101 et seq

CFR Citation: 12 CFR 211

Legal Deadline: Other, Statutory, December 1989.
Section 3(b) of the International Banking Act of 1978 requires that Board review and revise Subpart A of Regulation K every five years, beginning in 1979.

Abstract: In 1989, the Board will conduct a broad-based review of Subpart A of Regulation K (International Operations of United States Banking Organizations), as required every five years by the International Banking Act. This review will include consideration of the powers of Edge corporations and additional overseas activities of U.S. banking organizations, including expanded authority to underwrite and deal in equity securities outside the United States. In addition, Subpart B (Foreign Banking Organizations) will be reviewed, particularly with respect to the effect of the revisions of the Standard Industrial Classification (SIC) codes on that Subpart. Subpart C (Export Trading Companies) will be reviewed with a view toward bringing that Subpart into conformity with the Export Trading Company Act Amendments of 1988. Two items that have been listed on the Board's Semiannual Agenda will now be considered in connection with this broad-based review. These items relate to restrictions on transactions with affiliates by Edge corporations (Docket No. R-0550; RIN 7100-AA58) and a possible amendment to Section 211.3(b)(g) governing (cont)

3952. REGULATION: P - MINIMUM SECURITY DEVICES AND PROCEDURES FOR FEDERAL RESERVE BANKS AND STATE MEMBER BANKS

Legal Authority: 12 USC 1881 to 1884

CFR Citation: 12 CFR 216

Legal Deadline: None

Abstract: During the next two months, the Board will conduct a zero-based review of Regulation P, which implements the Bank Protection Act of 1968, and establishes minimum security standards for Federal Reserve Banks and for State member banks. The review will consider whether any provisions of the regulation are outdated and whether any substantive

changes are necessary because of new technological developments. The regulation will also be reorganized and revised for simplicity and clarity. Public comment will be requested following the zero-based review. It is not anticipated that the revised regulation will have a significant economic impact on a substantial number of small banks.

3953. REGULATION: T - CREDIT BY BROKERS AND DEALERS

Legal Authority: 15 USC 78g Securities Exchange Act of 1934, as amended; 15 USC 78w Securities Exchange Act of 1934, as amended

CFR Citation: 12 CFR 220

Legal Deadline: None

Abstract: During the next two months the Board may consider proposing amendments to Regulation T to accommodate settlement and clearance of foreign securities in accounts covered by Regulation T. A request has been made that extensive amendments be proposed because of the growing internationalization of the securities markets.

It is not anticipated that any proposals in this area would affect a significant portion of the overall lending activities of a substantial number of small firms.

3954. PRIVATE SECTOR PRESENTMENT (DOCKET NUMBER: R-0631)

Legal Authority: 12 USC 4008(c)

CFR Citation: None

Legal Deadline: None

Abstract: In April 1988, the Board requested comment on whether it should require paying banks to pay for checks presented by private sector collecting banks before 2:00 p.m. in same-day funds and without imposing presentment fees (53 FR 11911, April 11, 1988). The purpose of such a regulation would be to speed the forward collection of checks by requiring paying banks to accept checks without charging a fee later in the day, thus increasing the number of checks that can be collected that day. It would give private sector collecting banks the same rights vis-a-vis paying banks as the Federal Reserve Banks now have.

The Board has not yet made a specific proposal to amend its regulation in this regard. Rather, it merely requested comment on the idea of same-day payment in private sector presentments. If such a regulation were to be adopted, small entities that might be affected include small banks and State and local governments.

The Board will review the public comments and determine whether to propose specific regulations within the next four months.

3955. REGULATION: B - EQUAL CREDIT OPPORTUNITY (DOCKET NUMBER: R-0671)

Legal Authority: 15 USC 1691 et seq as amended Equal Credit Opportunity Act

CFR Citation: 12 CFR 202

Legal Deadline: None

Abstract: In July 1989, the Board published for comment revisions to Regulation B to implement amendments to the Equal Credit Opportunity Act contained in H.R. 5050, enacted in October 1988 (54 FR 29734, July 14, 1989). The Board's proposal would require creditors (1) to give written notice to business applicants (either at the time of application or when credit is denied) of their right to a written statement of the reasons for credit denial or other adverse action, and (2) to maintain records used in evaluating credit applications for 25 months. The proposal closely parallels the rules that govern nonbusiness transactions (with one or two differences that would offer creditors some flexibility). Creditors could follow the present nonbusiness rules and be in full compliance with the amended regulation.

The statutory changes were intended to expand the ECOA rights available to small-business owners. Under the Board's proposal, the new rules would apply to credit applications from businesses with gross revenues of $500,000 or less; other applications and trade credit transactions would (cont)

3956. REGULATION: D - RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS (DOCKET NUMBER: R-0571)

Legal Authority: 12 USC 248(k); 12 USC 461(a)

CFR Citation: 12 CFR 204

Legal Deadline: None

Abstract: In May 1986, the Board issued for comment rules to clarify the definition of "deposit" in Regulation D to include the interest or liability associated with a borrowing in the form of certain sales of assets and related transactions by a depository institution (51 FR 16855, May 7, 1986). These transactions include a sale of assets that involves a full guarantee by the institution that, in effect, substitutes the institution's credit standing for that of the ultimate borrower and in which the institution retains the risk of borrower default after the asset is sold.

Further, the regulation currently treats obligations of an affiliate as deposits of the depository institution to the extent the proceeds are provided to the depository institution. The Board proposes to exclude proceeds received from a sale of assets without recourse to the affiliate. The proposal also would clarify the application of Regulation D to certain of these transactions involving organizations effectively controlled by the depository institution even though not formally affiliated. Finally, the proposal would (cont)

3957. REGULATION: Q - INTEREST ON DEPOSITS (DOCKET NUMBER: R-0514)

Legal Authority: 12 USC 371b

CFR Citation: 12 CFR 217

Legal Deadline: None

Abstract: In January 1986, the Board issued for comment proposals to clarify, update, and simplify the advertising provisions of Regulation Q (51 FR 1379, January 13, 1986). The revisions incorporate and supersede the proposals of March 1984 concerning advertising of split-rate deposits and IRA/Keogh (HR 10) Plan accounts. The proposal is not expected to have a significant adverse effect on small banks.

The Board will review the comments and is expected to take further action within the next six months.

It is also anticipated that the Board will consider at that time various options with regard to providing written disclosures to consumers about their accounts.

Legal Authority: 12 USC 1841 Bank Holding Company Act; 12 USC 221 Federal Reserve Act; 12 USC 3901 International Lending Supervision Act of 1983

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: In December 1986, the Board requested public comment on a proposal to permit bank holding companies to engage in real estate investment activities within certain limits (52 FR 543, January 7, 1987). The proposed limits are designed to ensure that conduct of the activity does not result in unsafe or unsound practices, unfair competition, conflicts of interest or other adverse effects.

The Board requested public comment on a number of specific items, including whether real estate investment activities may be deemed to be closely related to banking and a proper incident thereto for purposes of Section 4(c)(8) of the Bank Holding Company Act; whether the proposed limits on the size, scope, and manner in which the activity would be conducted are appropriate; whether nonbank companies owned by holding company banks should be prohibited from conducting these activities; and whether the Board should establish special capital requirements for bank holding companies that control banks directly engaged in these activities.

The proposal, if adopted, would permit bank holding (CONT)

CFR Citation: 12 CFR 225.13(b)(1); 12 CFR 225, Appendix; 12 CFR 208.14

Legal Deadline: None

Abstract: In November 1987, the Board requested comment on whether, in evaluating proposals submitted under section 3 of the Bank Holding Company Act, the Board should consider the impact of real estate activities of the bank to be acquired by the bank holding company on the financial condition of the bank and bank holding company, and, where appropriate, should prohibit banks and savings banks that are acquired by bank holding companies from directly engaging in real estate investment and development activities (52 FR 42301, November 4, 1987).

The Board also requested comment on whether member banks that are not in a bank holding company should be made subject to the interaffiliate lending restrictions of section 23A of the Federal Reserve Act in their dealings with real estate investment and development subsidiaries of the bank.

Finally, the Board requested comment on whether the Board should impose special capital requirements on real estate subsidiaries of banks in a bank holding company, under the Board's authority in the International Lending Supervision Act. These three proposals supplement the Board's earlier (cont)

Legal Authority: 12 USC 1843 Bank Holding Company Act; 12 USC 1844(b) Bank Holding Company Act

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: A provision of Regulation Y permits a State bank subsidiary of a bank holding company to engage through a nonbank subsidiary in any activity that is permissible under State law for the bank subsidiary itself, subject to the same limits as if the bank engages in the activity directly. (A similar rule applies to national bank subsidiaries regarding activities permissible for such banks under Federal law.) The Board received comments on this provision in connection with its general request for comments in May 1983 regarding the proposed revision of Regulation Y. Some of the commenters challenged the Board's authority to issue this provision, although it has been part of Regulation Y since 1971. In taking final action on the revision of Regulation Y, the Board deferred consideration of the comments on this provision and allowed the existing rule to remain in effect in the interim (49 FR 794, January 5, 1984).

In December 1988, the Board requested public comment regarding whether this rule, as it applies to nonbanking companies owned by state banks in a holding company system, continues to be valid and appropriate in light of enactment of the (cont)

3961. ● REGULATION: Y - BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (DOCKET NUMBER: R-0664)

Legal Authority: 12 USC 1843(c)(8)

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: In December 1988, the Board requested public comment on a proposal by a bank holding company to provide armored car transportation services to non-affiliated customers and on whether the proposed armored car activities may be deemed to be closely related to banking and a proper incident thereto for purposes of Section 4(c)(8) of the Bank Holding Company Act (53 FR 50292, December 14, 1988).

The National Armored Car Association submitted comments in opposition to the application and requested a hearing on whether the proposal would meet Section 4(c)(8) of the Bank Holding Company Act. A formal, public hearing before a hearing officer was held on June 16 and July 11, 1989, at the offices of the Board in Washington, D.C. A recommended decision by the hearing officer is expected to be filed with the Board in September, 1989, after which the Board will consider the application. The proposal, if adopted, would permit a bank holding company to engage in a broader range of armored car services than bank holding companies currently are permitted to conduct under 12 CFR 225. Specifically, the proposal would permit a small bank (cont)

3962. PROPOSALS TO MODIFY THE PAYMENTS SYSTEM RISK REDUCTION PROGRAM (DOCKET NUMBERS: R-0661, R-0668, R-0669, R-0670)

Legal Authority: 12 USC 221 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In June 1989, the Board requested comment on several proposals that would modify its payments system risk reduction program (54 FR 26090, June 21, 1989). The proposals concerned pricing of daylight overdrafts (R-0668, previously proposed in Docket R-0592, 51 FR 45042, December 16, 1986), book-entry securities transfers (R-0669), and foreign bank agencies and branches (R-0670). In conjunction with the proposals, the Board issued three policy statements regarding private delivery-against-payment systems (R-0665), offshore clearing and netting systems (R-0666), and rollovers and continuing contracts (R-0667).

In addition, as another facet of its risk reduction program, in March 1989, the Board requested comment on changes in the way the Federal Reserve Banks treat automated clearing house transactions (Docket R-0661, 54 FR 8822, March 2, 1989). It is not expected that these actions will have a significant economic impact on a substantial number of small entities, because small entities do not usually participate in large-dollar wire transfer systems.

FEDERAL RESERVE SYSTEM (FRS) — Completed Actions

3963. REGULATION: K - INTERNATIONAL BANKING OPERATIONS

Legal Authority: 12 USC 601 et seq

CFR Citation: 12 CFR 211

Legal Deadline: None

Abstract: The last Semiannual Agenda included a possible amendment to the Board's regulation governing the establishment of foreign operating subsidiaries by member banks. The amendment would eliminate the requirement in section 211.3(b)(9) of Regulation K that a member bank's operating subsidiary be established only where required by local law or regulation. The revision is intended to promote the efficiency of member banks' foreign operations. The Board will consider this item in connection with the broad-based review of Regulation K expected by the end of the year. See RIN 7100-AA98.

The proposal would not have a significant economic impact on a substantial number of small businesses because it affects only U.S. banks operating abroad.

Abstract: In August 1985, the Board published for comment proposed regulations that would restrict lending by an Edge Corporation to its affiliates where the Edge Corporation is not subject to the restrictions of Section 23A of the Federal Reserve Act (12 USC 371c) because it is not owned by a U.S. insured bank (50 FR 35238, August 30, 1985). In taking this action, the Board noted the increasing number of owners of Edge Corporations that are not subject to Federal banking supervision and the potential adverse effects that might result from such affiliations, such as the impairment of the Edge's ability to act as an impartial arbiter of credit. The Board requested comment on the effect of the proposal on existing Edge Corporations, especially those owned by foreign banks and whether any exemptions from the restrictions are appropriate.

It is not expected that the proposal would have a significant economic impact on a substantial number of small businesses, because it applies only to organizations involved in international banking. (cont)

Legal Authority: 12 USC 1843(c)(8)

CFR Citation: 12 CFR 225.25(b)(9)

Legal Deadline: None

Abstract: In September 1987, the Board requested public comment on whether the Board should authorize bank holding companies to acquire thrift institutions as a general matter under section 4(c)(8) of the Bank Holding Company Act. The Board currently permits bank holding companies to acquire thrift institutions only if the thrift is failing or has failed, and the acquisition is likely to result in revitalization of the thrift.

The Board requested comment on whether changes in the economic and regulatory environment, in particular the expansion of the powers of thrifts and the growth in state initiatives authorizing interstate banking, justify revisions of the Board's policy and the authorization of thrift acquisitions by bank holding companies. The Board also requested comment on what, any, conditions the Board should impose on bank holding companies seeking to acquire thrifts. The provisions of the

RIN: 7100–AA89

3967. REGULATION: Z - TRUTH IN LENDING (DOCKET NUMBER: R-0655)

Legal Authority: 15 USC 1604, as amended, Truth in Lending Act

CFR Citation: 12 CFR 226

Legal Deadline: Other, Statutory. The Board's rules apply to open-end credit plans entered into or applications for such plans that are distributed on or after November 7, 1989.

Abstract: In June 1989, following review of public comments received on its January 1989 proposal, the Board published a final rule to amend Regulation Z to implement provisions of the Home Equity Loan Consumer Protection Act of 1988, which requires creditors to provide consumers with more information for open-end credit plans secured by the consumer's dwelling, and imposes substantive limitations on these plans (54 FR 24670, June 9, 1989).

Under the amended regulation, creditors have to provide additional information at the time an application is provided to consumers, including information about the payment terms, fees imposed under the plan, and, for variable-rate plans, information about the index and a fifteen-year history of changes in the index values. Creditors also are required to provide consumers with a brochure prepared by the Board (or with one substantially similar) that describes home equity plans. In addition, new duties are imposed on third parties who provide applications to consumers, and the rules relating to advertisements for home equity plans have been modified. (cont)

Timetable:

Action	Date	FR Cite
Board proposed amendment	01/23/89	54 FR 3063
Board adopted final rule	06/09/89	54 FR 24670

Small Entities Affected: Businesses

Government Levels Affected: State

Additional Information: ABSTRACT CONT: The final rule also amends Regulations Z to implement new substantive limitations imposed by the law on home equity plans. Small institutions engaged in home equity lending could incur additional expenses, including costs to revise and reprint disclosure forms, to acquire and distribute the home equity brochures, and possibly to modify their contracts. They also will need to review and possibly modify their advertisements for home equity plans. The Board has revised Appendix G of the regulation to provide disclosure samples and model clauses to assist creditors in preparing their disclosures.

3968. REGULATION: Z - TRUTH IN LENDING (DOCKET NUMBER R-0654)

Legal Authority: 15 USC 1604 as amended Truth in Lending Act

CFR Citation: 12 CFR 226

Legal Deadline: Final, Statutory. Final regulations were effective April 3, 1989, 150 days from enactment of the law.

Abstract: In April 1989, following review of public comments received on its December 1988 proposal, the Board adopted revisions to Regulation Z to implement amendments to the Truth in Lending Act that were part of H.R. 515, the Fair Credit and Charge Card Disclosure Act of 1988, enacted on November 3, 1988 (54 FR 13855, April 6, 1989). The statutory amendments require credit and charge card issuers to provide certain credit disclosures in telephone solicitations and in direct mail and other applications and solicitations to open credit and charge card accounts. Card issures will also be required to give cardholders written notice regarding the renewal of their credit and card accounts before a cardholder has to pay a fee to renew the account. In addition, the law requires credit card issures to provide cardholders with written notice of a change in the entity providing credit insurance on credit card accounts.

The Board also revised Appendix G of Regulation Z to provide model forms and clauses to assist creditors in preparing their disclosures.

Board proposed amendment to Regulation Z	12/23/88	53 FR 51785
Board adopted final rule	04/06/89	54 FR 13855

Small Entities Affected: Businesses

Government Levels Affected: State

Additional Information: ABSTRACT CONT: Regardless of size, most commercial banks offer credit card plans to consumers. The regulations do not distinguish between large and small creditors. Consequently, creditors of all sizes will incur similar types of costs. However, the magnitude of these expenses will depend upon the level of a particular creditor's credit card plan operation and the type of marketing employed. With respect to bank cards, the majority of credit card accounts are held by a relatively small number of large card issuers. These institutions also probably account for a substantial proportion of the credit card solicitations. Consequently, large card issuers will probably incur a larger aggregate cost, relative to smaller card issuers, to comply with the new rules, although on a cost-per-solicitation or cost-per-account basis these costs will probably be relatively small.

3969. REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0639)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229.36

Legal Deadline: None

Abstract: In June 1988, the Board issued for comment a proposed amendment to Regulation CC that would prohibit banks from issuing teller's checks unless a depositary bank located in the same check processing region as the issuing bank would normally receive credit for the check as early as credit for a check drawn on the issuing bank. The purpose of the amendment is to address the problems connected with certain delayed disbursement practices.

Following review of public comments, and in lieu of adopting the proposed regulation, the Board issued a policy statement discouraging the delayed disbursement of teller's checks and cashier's checks (54 FR 13839, April 6, 1989). The policy statement applies to all banks regardless of size. It is not expected that the policy will impose significant costs on small banks.

3970. REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0648)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229

Legal Deadline: None

Abstract: In November 1988, the Board adopted a rule to amend its Regulation CC to treat "bank payable through checks" as local or nonlocal based on the location of the bank on which they are written rather than the location of the bank through which they are payable. In conjunction with the final rule, the Board issued proposed amendments to Regulation CC designed to alleviate the operational difficulties and additional risks resulting from the final rule. Following review of the public comments, the Board, in July 1989, issued a final rule that provides for certain labeling requirements for bank payable through checks and shifts some of the risk of loss due to a late return of a bank payable through check to the bank on which the check is written (54 FR 32035, August 4, 1989). The proposed rule would affect all institutions that issue payable through checks. A number of these institutions would be small banks, generally credit unions.

3971. REGULATION: CC - AVAILABILITY OF FUNDS AND COLLECTION OF CHECKS (DOCKET NUMBER: R-0649)

Legal Authority: 12 USC 4001 et seq

CFR Citation: 12 CFR 229

Legal Deadline: None

Abstract: The Board's Regulation CC requires banks to make funds available to their customers within specific times, to disclose their fund availability policies to their customers, and to handle returned checks expeditiously. Since the publication of Regulation CC, the Board has received numerous requests from banks and others for clarification of various provisions of the regulation. In November 1988, the Board issued for comment proposed changes to Regulation CC that respond to many of the questions and provide assistance to banks in understanding and complying with the regulation.

Following review of public comments, the Board adopted final amendments in April 1989 (54 FR 13841, April 6, 1989).

Adoption of the final amendments did not result in any significant economic impact on small entities.

3972. PROPOSALS FOR LONG-TERM IMPROVEMENT TO THE CHECK COLLECTION SYSTEM (DOCKET NUMBER: R-0622)

Legal Authority: 12 USC 4001 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In December 1987, the Board published for comment several proposals that have the potential to improve the check collection system (52 FR 47112, December 11, 1987). They are, however, long-term proposals that are not likely to be implemented in the immediate future. They include bar-code endorsements, digitized image processing of checks, electronic clearing zones, and an electronic clearing house.

If these were to be introduced, they would likely have a significant economic impact on a substantial number of small banks and small entities including State and local governments that use their services.

Because these are long-term proposals requiring extensive review, the Board does not expect action in the near future.

Semiannual Regulatory Agenda

VOL 54 ISS 208 OCT 30 1989 UMI

FEDERAL TRADE COMMISSION (FTC)

FEDERAL TRADE COMMISSION

16 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: Federal Trade Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The following agenda of Commission proceedings is published in accordance with section 22(d)(1) of the Federal Trade Commission Act, 15 U.S.C. 57b-3(d)(1), and section 610(c) of the Regulatory Flexibility Act, 5 U.S.C. 610(c). Each projected date reflects an assessment by the FTC staff of the likelihood that the specified event will occur during the coming year. No Commission determination on the need for or the substance of a trade regulation rule or any other procedural option should be inferred from the notation of projected events in this agenda.

Several agenda items concern rulemaking proceedings that may affect a substantial number of small businesses as that term is used in the Regulatory Flexibility Act. Whether any such proceeding is likely to have a significant economic impact on such entities will depend upon the Commission's final determinations respecting the need for and the substance of a trade regulation rule.

Except for notice of completed actions, the information in this agenda represents the judgment of Commission staff based upon information now available. These views should not be regarded as a final staff position nor should they be attributed to the Commission itself. The Commission will independently address the issues presented on the rulemaking record in each proceeding.

Agenda items include the projected timing of certain future actions. In most instances, the dates of future events are listed by month, not by a specific day. Acquisition of new information, change of circumstances, or changes in the law may alter the information set forth in this agenda.

FOR FURTHER INFORMATION CONTACT: Further details may be obtained from the agency contact person listed for each particular proceeding.

By direction of the Commission.

Donald S. Clark,

Secretary.

3973. REVIEW OF TRADE REGULATION RULE CONCERNING PRESERVATION OF CONSUMERS CLAIMS AND DEFENSES ("HOLDER-IN-DUE COURSE RULE")

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 433

Legal Deadline: None

Abstract: The Holder-In-Due Course Rule affects many sales that are financed by closed-end or open-end consumer credit; therefore, it may have a significant effect on a substantial number of small entities. The Commission has solicited comments and data on this issue and, if the Rule has had an effect, whether it should be amended to minimize what kinds of costs the Rule has imposed on small entities, how the Rule has effected the availability and cost of credit for small entities and how creditors and sellers have adapted to the Rule. This information will be used to determine whether the Commission should amend or repeal the Rule.

3974. INFORMAL DISPUTE SETTLEMENT PROCEDURES

Legal Authority: 15 USC 2309; 15 USC 2310(a)(2) Magnuson-Moss Warranty--FTC Improvements Act

CFR Citation: 16 CFR 703

Legal Deadline: None

Abstract: The Magnuson-Moss Warranty Act, enacted on January 4, 1975, requires that the Federal Trade Commission promulgate a rule prescribing the minimum requirements for any informal dispute settlement procedure which is incorporated into the terms of a written warranty subject to the Act. Because warrantors are not required to incorporate such procedures into warranties, the rule applies only to warrantors who choose to do so. The present rule sets forth detailed procedural, recordkeeping, and reporting requirements for dispute settlement mechanisms designed to insure their fairness. To assess whether any changes are needed, the Commission conducted a regulatory negotiation process in which an advisory committee was charged to recommend to the Commission revisions to the rule that would facilitate the Congressional (cont)

Additional Information: ABSTRACT CONT: objective of encouraging warrantors to establish and participate in informal dispute settlement mechanisms. The committee met for the last time on June 17, 1987, and failed to reach a consensus on rule revisions. The Commission and its staff will continue to monitor the impact of the current informal dispute settlement procedures rule. On April 11, 1988, the FTC received a petition from the Motor Vehicle Manufacturers Association and the Automobile Importers Association to amend this rule in order to preempt certain state "lemon" laws. The Commission has issued an Advance Notice of proposed rulemaking requesting public comment on whether to initiate a review of the Rule and on the issues raised in the petition.

3975. FRANCHISE RULE

Legal Authority: 15 USC 41 et seq., Federal Trade Commission

CFR Citation: 16 CFR 436

Legal Deadline: None

Abstract: On December 21, 1978, the Commission issued a trade regulation rule applicable to franchises and other business opportunity ventures. The franchise rule took effect on October 21, 1979. The rule requires franchisors to give pre-sale disclosures to prospective investors before they pay money or become legally bound to pay. The disclosures provide material information and are designed to assure that potential investors have the information they need to investigate the franchise offer so they can make an informed investment decision. The Commission is considering whether to amend its trade regulation rule concerning franchises and business opportunity ventures. In particular, the Commission is considering whether to amend the rule's earnings claim and preemption provisions.

3976. GAMES OF CHANCE IN THE FOOD RETAILING AND GASOLINE INDUSTRIES RULE

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 419

Legal Deadline: None

Abstract: The Commission's trade regulation rule concerning games of chance became effective on October 17, 1969. The rule establishes requirements for food and gasoline retailers in conducting and advertising games of chance by requiring disclosure of odds-of-winning and prize information in broadcast and print advertisements, as well as in point of sale information. In January, 1983, the Commission granted a temporary partial exemption to allow supermarkets and gas stations to advertise their games on radio and television without disclosing full information on prizes and odds-of-winning. In addition, the Commission also published an advance notice of proposed rulemaking on whether to make the broadcast exemption permanent. Finally, the Commission has proposed to reduce the recordkeeping requirements of the rule from three years to one year in keeping with the goals of the Paperwork Reduction Act, and requested public comment on other possible areas where amendments to the rule may be appropriate. The rule benefits consumers by allowing contestants to enter games of chance with full knowledge of all material information to enable equal competition for (cont)

3977. ● REVIEW OF THE SEWING MACHINE RULE

Legal Authority: 15 USC 41-58

CFR Citation: 16 CFR 401

Legal Deadline: None

Abstract: On June 30, 1965, the Commission promulgated the Sewing Machine Rule. The Rule states that the use of the word "automatic" or terms of similar import to describe a household sewing machine is an unfair or deceptive act. The need for the Rule, stated at the time of promulgation, was that use of the word automatic as a description of a sewing machine led consumers "to believe that merely by the twist of a dial or the flick of a lever they will be able to perform sewing operations." On April 19, 1989, the Commission initiated a rulemaking proceeding to determine whether or not the Sewing Machine Rule should remain in effect without changes or should be repealed. In an Advance Notice of Proposed Rulemaking, the Commission sought public comment on whether sewing machine technology and marketing have changed so that the Rule is no longer needed, and whether the Rule still provides any benefit.

3978. ● REGULATIONS UNDER THE COMPREHENSIVE SMOKELESS TOBACCO HEALTH EDUCATION ACT OF 1986

Legal Authority: 15 USC 4401

CFR Citation: 16 CFR 307

Legal Deadline: Other, Judicial, July 31, 1989.
Deadline is for the NPR.

Abstract: On July 31, 1989, the Commission issued a NPR to amend its regulations under the Comprehensive Smokeless Tobacco Act of 1986, 15 U.S.C. 4401, and sought public comment. In 1986, the Commission had issued final regulations implementing the Act's requirements for the display of health warnings in the labeling and advertising of smokeless tobacco products and for the submission of plans specifying the method used to rotate, display, and distribute the mandated health warnings. The regulations exempted utilitarian objects that are sold or given to consumers for their personal use, that display the brand name, logo, or selling message of a smokeless product. The Commission's exemption of these items from the regulation's requirements was challenged in court and the Commission was ordered to delete this exemption. This proposed amendment deletes the previous exemption and proposes a method for the display of the mandated health warnings on utilitarian objects.

Legal Authority: 15 USC 45; 15 USC 46(g); 15 USC 57(a)

CFR Citation: 16 CFR 453

Legal Deadline: None

Abstract: The funeral industry practices rule, which became fully effective on April 30, 1984, seeks to increase consumer access to accurate information about prices and legal requirements prior to and at the time of purchase of funeral goods and services. The Rule: (1) requires funeral directors to provide consumers with written itemized pre-sale disclosures; (2) prohibits misrepresentation of legal and cemetery requirements and the preservative or protective value of embalming, caskets, and vaults; (3) prohibits funeral directors from requiring a casket for cremations, or any other tie-in arrangements; (4) prohibits funeral directors from charging for goods and services not specifically ordered, such as embalming, unless required by law; and (5) requires funeral directors to give, on request, price information over the telephone. The Rule provides that no later than four years after its effective date, the Commission will begin a rulemaking proceeding to determine whether the Rule should be amended or terminated. (cont)

FTC — Final Rule Stage

VOL 54 ISS 208 OCT 30 1989 UMI

claims made concerning shipping dates or, in the absence of any specifically stated date, to ship the ordered merchandise within thirty (30) days of receipt of an order. In the event of delays in shipment, the rule establishes notification procedures whereby buyers have the option either to agree to the delay or to cancel the order and receive a prompt refund. The Commission's rule is designed to address a number of significant consumer problems described on the record of the rulemaking proceeding, including failure to deliver ordered merchandise, unexplained delays in delivery, failure to make prompt (or any) refunds upon cancellation of an order, and inability to obtain responses to inquiries about pending orders. The rule enables consumers to obtain ordered merchandise within a reasonable time period or, if delays occur, to cancel the order and obtain a prompt refund, so that losses due to undelivered merchandise, delays, and inadequate or nonexistent refunds can be avoided. By subjecting sellers (cont)

Additional Information: ABSTRACT CONT: who solicit orders they cannot fill within a reasonable time to the risk of cancellation, the rule may provide competitive benefits, since buyers may shift their business to more efficient merchants. Costs relating to the rule may include the cost of establishing a system for monitoring and recording orders, shipments, delays, cancellations, consents to delays, and refunds; the costs of complying with the rule's notification requirements regarding delays (printing, postage, etc.); the cost of processing refunds; and additional inventory costs. Staff is considering whether to recommend to the Commission that the rule be amended to cover orders placed by telephone or any other means, and whether the rule's definition of "properly completed order" for credit sales should be amended to mean the time the seller receives sufficient information to charge the buyer's account. On October 27, 1988, the Commission published an ANPR inviting public comment on these questions. After analyzing these comments and other information, the staff will recommend that the Commission either publish an NPRM or end the inquiry.

3981. REVIEW OF THE PREMERGER NOTIFICATION RULES AND REPORT FORM

Significance: Agency Priority

Legal Authority: 15 USC 18a Clayton Act

CFR Citation: 16 CFR 801; 16 CFR 802; 16 CFR 803; 16 CFR 803, (Appendix)

Legal Deadline: None

Abstract: The Premerger Notification Rules and the Antitrust Improvements Act Notification and Report Form were adopted pursuant to Section 7A of the Clayton Act. Section 7A requires firms of a certain size contemplating mergers or acquisitions of a specified size to file notification with the Federal Trade Commission (FTC) and the Department of Justice (DOJ) and to wait a designated period before consummating the transaction. It also requires the FTC, with the concurrence of the Assistant Attorney General for Antitrust, to promulgate rules requiring that notification be in a form and contain information necessary to enable the FTC and DOJ to determine whether the proposed acquisition may, if consummated, violate the antitrust laws. These rules are continually reviewed in order to improve the program's effectiveness and reduce the paperwork burden on the business community. In September 1988, the Commission proposed to amend these rules to exempt the acquisition of small percentages of an issuer's voting securities, and proposed two alternative amendments that would provide other special treatment for acquisitions of small percentages of voting securities. CFR Citation: 16 CFR 305

Legal Deadline: Final, Statutory, July 1, 1989.
See section 2(d)(2)(B) of Pub. L. 100-357, June 28, 1988, 102 Stat. 672.

Abstract: The Energy Policy and Conservation Act (EPCA) required the Commission to consider labeling rules for the disclosure of energy information, based on standard test procedures prescribed by the Department of Energy, for at least 13 categories of major household appliances. The Commission adopted a labeling rule for seven appliance categories: (1) refrigerators and refrigerator- freezers; (2) freezers; (3) dishwashers; (4) clothes washers; (5) water heaters; (6) room air conditioners; and (7) furnaces. The Commission exempted five other categories of appliances. In 1987, the Commission amended the rule to include central air conditioners and heat pumps and to include two new types of furnace under the rule's coverage. The provisions took effect on June 7, 1988. Since the Commission's rule implements the requirements of EPCA, most of the costs imposed on industry members may not be attributable to the rule. The rule applies mainly to manufacturers of household appliances but does impose some burdens on distributors and retailers. Some of those entities may be small businesses under section 610 of the Regulatory Flexibility Act. Therefore, the Commission (cont)

Additional Information: ABSTRACT CONT: has reviewed the rule to determine whether it has had a significant economic effect on a substantial number of small entities. The Commission has terminated that review and has begun another rulemaking to consider several amendments that would make the rule's energy usage disclosure scheme more efficient for consumers and business. The Commission has estimated that the proposals will reduce the paperwork burden of compliance by 5 percent. Pursuant to recent amendments to EPCA, the Commission issued a rule prescribing labeling requirements for fluorescent lamp ballasts.

3983. TRANSISTOR RULE

Legal Authority: 15 USC 41 et seq., Federal Trade Commission Act

CFR Citation: 16 CFR 414

Legal Deadline: None

Abstract: The Transistor Count Rule states that it is an unfair method of competition and an unfair or deceptive act or practice in connection with the sale of radio receivers (including transceivers) to represent that a radio set contains a specified number of transistors when the transistors counted do not function to detect, amplify, or receive radio signals. The rule was adopted May 4, 1968 and became effective on December 10, 1968. The Commission seeks comment on whether or not changes in technology and marketing over the last twenty years have rendered the rule obsolete and therefore no longer in the public interest. The Commission has issued an NPR asking for comment on the continued viability of the rule and whether it should be repealed.

FEDERAL TRADE COMMISSION (FTC) — Completed Actions

3984. RETAIL FOOD STORE ADVERTISING AND MARKETING PRACTICES

Legal Authority: 15 USC 41 et seq Federal Trade Commission Act

CFR Citation: 16 CFR 424

Legal Deadline: None

Abstract: The Commission's Rule on Retail Food Store Advertising and Marketing Practices states that it is a violation of Section 5 of the Federal Trade Commission Act for grocery stores to advertise products at a particular price unless such products are in stock and conspicuously and readily available for sale at the advertised price during the effective period of the advertisement. If a store runs out of advertised products, it is in violation of the rule even if the store noted the limitations on availability in its advertisement and even if the store provides rainchecks or substitute items. The rule is intended to benefit consumers by ensuring that advertised items are available, that advertising-induced purchasing trips are not fruitless, and that store prices accurately reflect the prices appearing in the ads. The rule may cause costs to be incurred in maintaining sufficient inventory to meet anticipated demand, and costs associated with the monitoring of price changes, changing marked prices, training employees to comply with the rule and keeping records to prove compliance. (cont)

Additional Information: ABSTRACT CONT: The rule may also discourage the advertising of certain kinds of products, such as perishables or goods that are available to the store only in limited supply. The staff concluded from a careful review of the rule's effects that the costs the rule imposes on consumers in the form of higher grocery prices significantly exceeds its benefits. On April 21, 1988, the Commission decided to modify the rule so that a store could comply by clearly and adequately disclosing in its advertisements that there are limitations on availability, or by offering rainchecks or substitute items if supplies run out. On August 28, 1989, the final rule, as amended, became effective.

Semiannual Regulatory Agenda

INTERSTATE COMMERCE COMMISSION (ICC)

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 420 (Sub-No. 17)]

Semiannual Regulatory Agenda

AGENCY: Interstate Commerce Commission.

ACTION: Notice of semiannual regulatory agenda to be part of a Unified Agenda of Federal Regulations.

SUMMARY: Pursuant to OMB Bulletin No. 89-12, issued under section 6(b) of E.O. 12291 to implement the provisions of section 5 of the Executive order concerning Regulatory Agendas, the Commission is publishing an agenda of: (1) Current and projected rulemakings and (2) existing regulations being reviewed to determine whether to propose modifications through rulemaking. Listed below are the regulatory actions to be developed or reviewed during the next 12 months. Following each rule identified is a brief description of the rule including its purpose and legal basis.

FOR FURTHER INFORMATION CONTACT: A contact person is identified for each of the rules listed below.

SUPPLEMENTARY INFORMATION: A list of proceedings appears below containing information about subject areas in which the Commission is currently conducting rulemaking proceedings or may institute such proceedings in the near future. It also contains information about existing regulations being reviewed to determine whether to propose modifications through rulemaking.

The agenda also identifies regulations likely to have a significant economic impact on a substantial number of "small entities." Accordingly, this information will satisfy the requirements of section 602 of the Regulatory Flexibility Act, 5 U.S.C. 602.

Finally, this agenda will comprise part of a Unified Agenda of Federal Regulations compiled by the Office of Management and Budget which is to be published in a single issue of the **Federal Register** in October 1989. The purpose of the Unified Agenda is to provide the public with more comprehensive documentation of the Federal Government's current regulatory plans, and to provide a systematic means of monitoring regulatory activity in each agency.

This notice is issued pursuant to 49 U.S.C. 10321 and 5 U.S.C. 553.

Decided: August 4, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

INTERSTATE COMMERCE COMMISSION (ICC) — Prerule Stage

3985. REVIEW OF CAR-HIRE REGULATION, EX PARTE NO. 334 (SUB-NO. 6)

Legal Authority: 49 USC 10321; 49 USC 10708; 49 USC 10734; 49 USC 11122; 5 USC 553

3988. AMENDMENTS TO RAIL CARRIER COST RECOVERY TARIFFS, EX PARTE NO. 290 (SUB-NO. 5)

Legal Authority: 49 USC 10321; 5 USC 553

CFR Citation: 49 CFR 1312

Legal Deadline: None

Abstract: The Commission is considering whether its regulations should be revised by changing the regulations governing the form and volume of supplemental matter to rail carrier cost recovery tariffs filed pursuant to Ex Parte No. 290 (Sub-No. 2), Railroad Cost Recovery Procedures. Present regulations provide that such tariffs be published with expiration dates and they may be maintained without regard to the amount of supplemental matter in effect. Informal criticisms have been received by the Commission which indicate that the tariffs have become extremely cumbersome to follow and apply. In view of these criticisms, the Commission is concerned that the tariffs are not being published in a manner which is consistent with the public interest. Comments dealing with problems encountered by users of the rail carrier cost recovery tariffs are sought as well as suggestions for rule changes.

3991. RAIL GENERAL EXEMPTION AUTHORITY - MISCELLANEOUS MANUFACTURED COMMODITIES, EX PARTE NO. 346 (SUB-NO. 24)

Legal Authority: 49 USC 10505

CFR Citation: 49 CFR 1039

Legal Deadline: None

Abstract: 49 USC 10505 requires that the Commission exempt from regulation the movement by rail of traffic for which it finds continued regulation no longer necessary to serve the Nation's transportation policy objectives and to protect shippers from abuse of market power by the railroads. In examining the transportation characteristics and markets of various commodities moving by rail, there appear to be many products for which sufficient competition exists among transportation alternatives so that regulation may no longer be necessary. Exemption of such commodities should provide increased rate and service flexibility for railroads to meet shippers' needs and to compete more effectively for the subject traffic. Anticipated benefits include lower rates and improved service, at a possible "cost" of increased price instability and competition to alternative transport firms.

3997. EX PARTE NO. 55 (SUB-NO. 89), RULES GOVERNING APPLICATIONS FOR OPERATING AUTHORITY -- REVISION OF FORM OP-1

Legal Authority: 5 USC 551(a); 5 USC 553; 5 USC 559; 16 USC 1456; 49 USC 10101; 49 USC 10305; 49 USC 10321; 49 USC 10541; 49 USC 10921; 49 USC 10922; 49 USC 10923; 49 USC 10924; 49 USC 10928; 49 USC 10931; 49 USC 11102

CFR Citation: 49 CFR 1003; 49 CFR 1160; 49 CFR 1162; 49 CFR 1168

Legal Deadline: None

Abstract: The Commission proposes to revise significantly the general licensing application form (Form OP-1) and to make corresponding revisions in its regulations governing licensing procedures at 49 CFR 1160, 1162, and 1168 and the list of forms at 49 CFR 1003. The proposed OP-1 replacement form would integrate the information presently required in and supersede: (1) the existing Form OP-1 used by applicants for motor and water carrier, property broker, and household goods freight forwarder authority; and (2) Form OCCA-95 used by applicants for temporary and emergency temporary authority. The proposed form revisions are intended to simplify and unify the temporary and permanent authority licensing processes, minimize the application filing burdens on applicants and, in turn, create a more efficient application process, both for the public and the Commission.

National Credit Union Administration

Semiannual Regulatory Agenda

NATIONAL CREDIT UNION ADMINISTRATION (NCUA)

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Ch. VII

Semiannual Agenda of Regulations

AGENCY: National Credit Union Administration ("NCUA").

ACTION: Semiannual agenda of regulations.

SUMMARY: Pursuant to its ongoing policy of reviewing regulations, NCUA is publishing a list of current and projected rulemaking, reviews of existing regulations, and completed actions as of July 31, 1989. NCUA will also include this agenda in the "Unified Agenda of Federal Regulations."

DATES: This information is current as of July 31, 1989.

ADDRESS: National Credit Union Administration, 1776 G Street NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: For each regulation listed, the person(s) named in the listing, at the above address or listed telephone number.

SUPPLEMENTARY INFORMATION: The purpose of this agenda is to enable credit unions and the public to follow regulatory development and review at NCUA and to enable interested parties to more effectively participate in that process. The agenda is divided into four parts: (1) Prerule stage; (2) proposed rule stage; (3) final rule stage; and (4) completed actions. Interpretive Rulings and Policy Statements (IRPS) promulgated by NCUA are also included in the agenda.

The agenda is published pursuant to NCUA Interpretive Ruling and Policy Statement Number 87-2 ("Developing and Reviewing Government Regulations," 52 FR 35231, September 18, 1987). Executive Order No. 12291 does not require independent executive agencies such as NCUA to publish a regulatory agenda, but NCUA has voluntarily decided to do so by including this agenda in the Office of Management and Budget's next publication of its "Unified Agenda of Federal Regulations."

Approved by the NCUA Board on August 21, 1989.

Becky Baker,

Secretary of the Board.

Prerule Stage

Sequence Number	Title	Regulation Identifier Number
4000	Share, Share Draft and Share Certificate Accounts	3133-AA82
4001	Investment and Deposit Activities	3133-AA87

Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
4002	Management Interlocks	3133-AA19
4003	Loan Participation	3133-AA49
4004	Purchase, Sale and Pledge of Eligible Obligations	3133-AA50
4005	Records Preservation Programs	3133-AA56
4006	Credit Union Service Contracts	3133-AA95
4007	Retirement Benefits for Employees of Federal Credit Unions	3133-AA96
4008	Loans to Members and Lines of Credit to Members	3133-AB00
4009	Designation of Low-Income Status	3133-AB03

Final Rule Stage

Sequence Number	Title	Regulation Identifier Number
4010	Full and Fair Disclosure	3133-AA12
4011	Nondiscrimination Requirements	3133-AA17
4012	Mergers of Federally Insured Credit Unions: Voluntary Termination or Conversion of Insurance Status	3133-AA59
4013	Employee Responsibility and Conduct	3133-AA84
4014	Loans to Members and Lines of Credit to Members	3133-AA88

NCUA

Completed Actions

Sequence Number	Title	Regulation Identifier Number
4015	FCU Ownership of Fixed Assets	3133-AA06
4016	Treasury Tax and Loan Accounts	3133-AA16
4017	Other Applications	3133-AA44
4018	Definitions	3133-AA47
4019	Federal Credit Unions Acting as Depositaries and Financial Agents of the Government	3133-AA53
4020	Liquidation Priorities and Adjudication of Claims	3133-AA84
4021	Federal Credit Union Field of Membership and Chartering Policy	3133-AA89
4022	Description of Office; Disclosure of Official Records; Availability of Information and other Applications	3133-AA98
4023	Organization and Operations of Federal Credit Unions; Fidelity Bond and Insurance Coverage for Federal Credit Unions	3133-AA99
4024	Organization and Operation of Federal Credit Unions	3133-AB01
4025	Loans to Members and Line of Credit to Members; Investment and Deposit Activities	3133-AB02

NATIONAL CREDIT UNION ADMINISTRATION (NCUA) — Prerule Stage

4000. SHARE, SHARE DRAFT AND SHARE CERTIFICATE ACCOUNTS

Legal Authority: 12 USC 1752; 12 USC 1757; 12 USC 1759; 12 USC 1766; 12 USC 1782; 12 USC 1789

CFR Citation: 12 CFR 701.35

Legal Deadline: None

Abstract: An FCU's payment of dividends on share, share draft and share certificate accounts is limited to available earnings and cannot be guaranteed in advance. Staff is considering whether a statement to this effect should be included in NCUA's share account regulation, in light of problems which NCUA has encountered with certain liquidated credit unions.

4001. INVESTMENT AND DEPOSIT ACTIVITIES

Legal Authority: 12 USC 1757; 12 USC 1766

CFR Citation: 12 CFR 703

Legal Deadline: None

Abstract: NCUA staff is undertaking a comprehensive review of FCU investment authority in light of changes in the marketplace, e.g., increased availability of mutual funds geared primarily toward FCU's new instruments based on permissible FCU investments, new investment structures, statutory expansions of FCU investment authority.

4003. LOAN PARTICIPATION

Legal Authority: 12 USC 1757; 12 USC 1766; 12 USC 1789

CFR Citation: 12 CFR 701.22

Legal Deadline: None

Abstract: This section sets forth definitions and requirements for Federal credit unions wishing to participate in making loans with other credit unions, credit organizations, or financial organizations. The regulation will be reviewed to determine what changes are needed in this area and how the regulation can be simplified and clarified.

4009. ● DESIGNATION OF LOW-INCOME STATUS

Significance: Agency Priority

Legal Authority: 12 USC 1752; 12 USC 1757(6); 12 USC 1766; 12 USC 1781; 12 USC 1789; PL 97-35, 95 Stat. 498; PL 99-509

CFR Citation: 12 CFR 700.1; 12 CFR 701.32; 12 CFR 705.3; 12 CFR 741.5

Legal Deadline: None

Abstract: The purposes of the proposed amendment are: (1) to clarify that a Federal credit union must receive a designation from NCUA to act in the capacity of a low-income credit union; (2) to establish procedures for granting and revoking the designation of a low-income credit union; and (3) to establish that a federally insured State-chartered credit union must receive a low-income credit union designation from its State regulator with the concurrence of NCUA.

Additional Information: The NCUA Board approved a final rule that was submitted to the Office of Government Ethics, OPM, for approval, in June 1988. The rule was reviewed by OPM and recommended changes have been made. In April 1989, the Board adopted a final package, designated as Part 796, as agency policy and guidelines. The package will not become a final rule until after OPM adopts its own new rules and approves Part 796 as a final regulation.

4024. ● ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

Significance: Agency Priority

Legal Authority: 12 USC 1755; 12 USC 1756; 12 USC 1757; 12 USC 1759; 12 USC 1761a; 12 USC 1761b; 12 USC 1766; 12 USC 1767; 12 USC 1782; 12 USC 1784; 12 USC 1787; 12 USC 1789; 12 USC 1798

CFR Citation: 12 CFR 701.32; 12 CFR 741.5

Legal Deadline: None

Abstract: New section 701.32 requires that FCU's obtain NCUA approval prior to receiving nonmember funds in excess of 20 percent of total shares. A change to section 741.5 of the regulations requires that federally insured, State-chartered credit unions comply with these limitations. Only minor changes have been made to the substantive provisions contained in the interim final rule.

Nuclear Regulatory Commission

Semiannual Regulatory Agenda

VOL 54 ISS 208 OCT 30 1989 UMI

NUCLEAR REGULATORY COMMISSION (NRC)

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Regulatory Agenda

AGENCY: Nuclear Regulatory Commission.

ACTION: Semiannual publication of NRC regulatory agenda.

SUMMARY: The Nuclear Regulatory Commission (NRC) is publishing its semiannual regulatory agenda in accordance with Public Law 96-354 "The Regulatory Flexibility Act" and Executive Order 12291 "Federal Regulations." The agenda is a compilation of all rules on which the NRC has recently completed action or has proposed or is considering action. This issuance updates any action occurring on rules since publication of the last semiannual agenda on April 24, 1989 (54 FR 16440).

ADDRESSES: Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Comments may also be hand delivered to the One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland, between 7:30 a.m. and 4:15 p.m., Federal workdays. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

The agenda and any comments received on any rule listed in the agenda are available for public inspection and copying at a cost of ten cents per page at the Nuclear Regulatory Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC 20555. Single copies of the NRC quarterly agenda can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082. Customers may call (202) 275-2060 or (202) 275-2171.

FOR FURTHER INFORMATION CONTACT: For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Michael Lesar, Acting Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone (301) 492-7758. Persons outside the Washington, DC, metropolitan area may call toll-free: (800) 368-5642. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading "Agency Contact" for that rule.

SUPPLEMENTARY INFORMATION: Although publication of the agenda is only required semiannually in April and October, the NRC has chosen to update and publish its agenda each quarter. However, the information contained in this semiannual publication is updated to reflect any action which has occurred on rules since publication of the last NRC semiannual agenda on April 24, 1989 (54 FR 16440).

Within each group, the rules are ordered according to the Regulation Identifier Number (RIN).

The information in this agenda has been updated through August 25, 1989. The date under the heading "Timetable," for the next scheduled action, is the date the rule is scheduled to be published in the **Federal Register.** The date is considered tentative and is not binding on the Commission or its staff. This regulatory agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking process. However, the NRC may consider or act on any rulemaking even though it is not included in the regulatory agenda.

Rulemakings Approved by the Executive Director for Operations (EDO)

The EDO initiated a procedure for the review of the regulations being prepared by staff offices that report to him to ensure that staff resources are allocated most effectively to achieve NRC's regulatory priorities. This procedure requires EDO approval before staff resources may be expended on the development of any new rulemaking. Furthermore, all existing rules must receive EDO approval prior to the commitment of additional resources.

Rules that have received EDO approval to date are identified by the symbol (+) at the beginning of the title. As additional rules receive EDO approval, they will be identified in subsequent editions of this agenda.

The NRC agenda lists rulemaking actions. Of these, no rulemaking items are considered to be priority or major as defined in section 1(b) of Executive Order 12291.

Eight rules potentially will have a "significant economic impact on a substantial number of small entities" as defined in the Regulatory Flexibility Act.

Dated at Bethesda, Maryland, this 15th day of August 1989.

For the Nuclear Regulatory Commission.

David L. Meyer,

Chief, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration.

NUCLEAR REGULATORY COMMISSION (NRC) — Prerule Stage

4026. NIGHT FIRING QUALIFICATIONS FOR SECURITY GUARDS AT NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 73

Legal Deadline: None

Abstract: The rulemaking would ensure that security force effectiveness at nuclear power plants is not dependent on the time of day. Security guards currently are required to perform night firing for familiarization only. There is no requirement for standards to measure their effectiveness. The rule would change that by requiring that security guards at nuclear power plants qualify for night firing. The only alternative to rulemaking is to retain the current status.

Part 73, Appendix B, Part IV, will be amended to require reactor security guards to qualify annually in an NRC-approved night firing course with their assigned weapons. The amendment will standardize training and qualification in night firing and prepare power reactor guard forces to more effectively respond in the event of an incident occurring in limited lighting conditions. The cost to industry should be relatively modest since licensees already operate daylight firing training and qualification facilities and programs. The costs to NRC will also be minimal because it will only (cont)

NUCLEAR REGULATORY COMMISSION (NRC) — Proposed Rule Stage

4028. PROPOSED REVISIONS TO THE CRITERIA AND PROCEDURES FOR THE REPORTING OF DEFECTS AND NONCOMPLIANCE

Legal Authority: 42 USC 2201; 42 USC 2282; 42 USC 5841; 42 USC 5846

CFR Citation: 10 CFR 21; 10 CFR 50

Legal Deadline: None

Abstract: This proposed rule would amend Part 21 and sec. 50.55(e), both of which require the reporting of safety defects by licensees. In addition, Part 21 requires reporting by non-licensees. This proposed amendment was prompted by TMI Action Plan Task II, J.4, and NRC staff experience with Part 21 and section 50.55 (e) reporting. The main objectives of the rulemaking effort are: (1) elimination of duplicate evaluation and reporting of safety defects; (2) consistent threshold for safety defect reporting in Part 21 and section 50.55(e); (3) establishment of consistent and uniform content of reporting under Part 21 and section 50.55 (e) and (4) establishment of consistent time limits for reporting defects.

Approximately 300 reports are submitted to the Commission annually under Part 21. Approximately 900 reports are submitted to the Commission annually under section 50.55 (e). These reports identify both plant-specific and generic safety defects for further NRC regulatory action. Under current rules, these reports have formed the basis for NRC issuance of numerous NRC generic communications. (cont)

Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT:

Alternatives to this rulemaking approach which were considered, varied from establishment of a single rule for all reporting of safety defects and operating reactors events to maintaining status quo for defect reporting. All alternatives were rejected since they would not substantially improve the current safety defect reporting situation.

Current costs of reporting under Part 21 and section 50.55 (e) are estimated at $6.67 million annually for industry and $670,000 annually for NRC evaluations. It is anticipated that the annual industry reporting burden should be reduced by approximately $1.0 million; while NRC burden should remain the same. Additional industry burden, though minimal, is anticipated in the area of reissuing procedures for reporting and record keeping.

Agency Contact: William R. Jones, Nuclear Regulatory Commission, Office of Analysis and Evaluation of Operational Data, Washington, DC 20555, 301 492-4442

RIN: 3150-AA68

4029. CRITERIA FOR AN EXTRAORDINARY NUCLEAR OCCURRENCE

Legal Authority: 42 USC 2201; 42 USC 2210; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The proposed rule would revise the criteria for an extraordinary nuclear occurrence (ENO) to eliminate the problems encountered in the Three Mile Island ENO determination. It is desirable to get revised criteria in place in the event they are needed.

There are no alternatives to this rulemaking, as the current ENO criteria are already embodied in Subpart E of 10 CFR Part 140. The only way to modify these criteria, as this rule seeks to do, is through rulemaking.

There is no safety impact on public health or safety. The ENO criteria provide legal waivers of defenses. Industry (insurers and utilities) claims that a reduction in the ENO criteria could cause increases in insurance premiums. The final rule would also be responsive to PRM-140-1.

It is estimated that approximately 1.0 staff year of NRC time will be required to process the final rule.

4030. REVISED RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

Legal Authority: 42 USC 2201; 42 USC 2231; 42 USC 2241; 42 USC 5841; 05 USC 552

CFR Citation: 10 CFR 0; 10 CFR 1; 10 CFR 2; 10 CFR 9; 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would shorten and simplify existing Commission procedural rules applicable to domestic licensing proceedings by

VOL 54 ISS 208 OCT 30 1989 UMI

comprehensively restating the current practice, and revising and reorganizing the statement of those rules to reflect current practice. The changes in this proposed rule would enable the Commission, directly and through its adjudicatory offices, to render decisions in a more timely fashion, eliminate the stylistic complexity of the existing rules, and reduce the burden and expense to the parties participating in agency proceedings. During his tenure, Chairman Zech requested re-submission of this proposed rule for possible re-consideration by the Nuclear Regulatory Commission. The Commission had deferred further consideration of this proposal which would have revised the Commission's procedural rules governing the conduct of all adjudicatory proceedings, with the exception of export licensing proceedings under 10 CFR Part 110.

RIN: 3150–AB66

4031. SAFETY RELATED AND IMPORTANT TO SAFETY IN 10 CFR PART 50

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would clarify in the Commission's regulations the use of the terms "important to safety" and "safety related" by adding definitions of these two terms and of "facility licensing documents" to 10 CFR Part 50 and by discussing how these definitions will be applied in NRC licensing reviews. Significant issues concerning the meaning of these terms as they are used in this part have arisen in Commission licensing proceedings. This proposed rule would define these terms and clarify the nature and extent of their effect on quality assurance requirements, thereby resolving these issues.

Rulemaking was chosen as the method of resolving this issue as a result of the Commission's directive to resolve the issue by rulemaking contained in the Shoreham licensing decision (CLI-84-9, 19 NRC 1323, June 5, 1984).

A position paper requesting approval of the staff proposed definitions and additional guidance from the Commission was signed by the EDO on May 29, 1986. In addition to rulemaking, the position paper discusses the alternative of the Commission (cont)

Timetable:

Action	Date	FR Cite

Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: ABSTRACT CONT: issuing a policy statement concerning the definitions and their usage.

Since the proposed rule is only clarifying existing requirements, there is no impact on the public or the industry as a result of this rulemaking. It is anticipated that the NRC will expend 3.2 to 4.4 staff years in developing the final rule over a two year period. The manpower and time frame will depend on Commission guidance received on the extent to which 10 CFR usage of the terms is to be consistent, i.e., 10 CFR Part 50 only or all of 10 CFR Chapter I. The timetable for this rule is on hold based on a decision by the Commission.

Agency Contact: Jerry N. Wilson, Nuclear Regulatory Commission, Office of Nuclear Regulatory Research, Washington, DC 20555, 301 492-3729

RIN: 3150–AB88

4032. NRC ACQUISITION REGULATION (NRCAR)

Legal Authority: 42 USC 2201; 42 USC 5841; 41 USC 401

CFR Citation: 48 CFR 020

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to establish provisions unique to the NRC concerning the acquisition of goods and services. The NRC Acquisition Regulation is necessary to implement and supplement the government-wide Federal Acquisition Regulation. This action is necessary to ensure that the regulations governing the procurement of goods and services within the NRC satisfy the needs of the agency. The NRC Acquisition Regulation implements the Federal Acquisition Regulation within the agency and includes additional policies, procedures, solicitation provisions, or contract clauses needed to meet specific NRC needs.

RIN: 3150–AC01

4033. AVAILABILITY OF OFFICIAL RECORDS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The proposed amendment would conform the NRC's regulations pertaining to the availability of official records to existing case law and agency practice. The amendment would reaffirm that the terms of 10 CFR 2.790(c) provide submitters of information a qualified right to have their information returned upon request. This amendment informs the public of three exceptions to the right to withdraw, pursuant to 10 CFR 2.790(c) of the NRC's regulations, i.e., information submitted in a rulemaking proceeding that subsequently forms the basis for the final rule, information which has been made available to an advisory committee or was received at an advisory committee meeting, and information that is subject to a pending Freedom of Information Act request.

Additionally, the proposed amendment would add a notice statement to 10 CFR Part 2 that submitters of documents and information to the NRC should be careful in submitting copyrighted works. The agency in receiving submittals and making its normal distributions routinely photocopies submittals, makes microfiche of such submittals and insures that these (con't)

4034. DISPOSAL OF WASTE OIL BY INCINERATION FROM NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201; 42 USC 2167; 42 USC 2073

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: The proposed rule, which is being initiated in partial response to a petition filed by Edison Electric Institute and Utility Nuclear Waste Management Group (PRM-20-15, dated July 31, 1984), would amend NRC regulations to allow onsite incineration of waste oil at nuclear power plants subject to specified conditions. Currently, the only approved disposal method for low-level, radioactively contaminated waste oil from nuclear power plants involves absorption or solidification, transportation to, and burial at a licensed disposal site. There is a clear need to allow, for very low activity level wastes, the use of alternative disposal methods which are more cost effective from a radiological health and safety standpoint and which conserve the limited disposal capacity of low-level waste burial sites.

Increased savings to both the public and the industry could thereby be achieved without imposing additional risk to the public health and safety. There would be an estimated industry-wide economic savings of approximately $3 million to $12 million per year if such a rule were promulgated. (cont)

4035. RADIOACTIVE WASTE BELOW REGULATORY CONCERN; GENERIC RULEMAKING

Legal Authority: 42 USC 2201

CFR Citation: 10 CFR 2; 10 CFR 20

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) sought comments on a proposal to amend NRC regulations to address disposal of radioactive wastes that contain sufficiently low quantities of radionuclides that their disposal does not need to be regulated as radioactive.

The NRC has already published a policy statement providing guidance for filing petitions for rulemaking to exempt individual waste streams (August 29, 1986; 51 FR 30839). It is believed that generic rulemaking could provide a more efficient and effective means of dealing with disposal of wastes below regulatory concern. Generic rulemaking would supplement the policy statement which was a response to Section 10 of the Low-Level Radioactive Waste Policy Amendments Act of 1985 (Pub. L. 99-240). The public was asked to comment on 14 questions. The ANPRM requested public comment on several alternative approaches that the NRC could take. The evaluation of public comment together with the results from a proposed research contract will help to determine whether and how NRC should proceed on the matter. (cont)

4036. COMPREHENSIVE QUALITY ASSURANCE IN MEDICAL USE AND A STANDARD OF CARE

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 35

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) would amend the Commission's regulations governing the medical use of byproduct material to require a comprehensive quality assurance program for medical licensees using byproduct materials. The purpose of this rulemaking action is to address each source of error that can lead to a misadministration. An ANPRM was published to request public comment on the extent to which in addition to the basic quality assurance steps (being addressed by another rulemaking action, entitled "Basic Quality Assurance for Medical Use of byproduct Material") a more comprehensive quality assurance requirement is needed, and invites advice and recommendations on about 20 questions that will have to be addressed in the rulemaking process.

4037. CRITERIA FOR LICENSING THE CUSTODY AND LONG-TERM CARE OF URANIUM MILL TAILINGS SITES

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 40

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking would amend 10 CFR Part 40 to include a procedure for licensing a custodian for the post-closure, long-term control of uranium mill tailings sites required by the Uranium Mill Tailings Radiation Control Act of 1987 (UMTRCA). This amendment would establish a general license for custody and long-term care of uranium mill tailings by the Department of Energy, other designated Federal agencies, or States when applicable. The license would be formulated so that it would become effective for a particular site when (1) NRC concurs in the DOE determination that the site has been properly reclaimed or closed and (2) a Surveillance and Maintenance Plan that meets the requirements of the license has been received by NRC. No significant impact to the public or industry is expected as a result of this proposed action.

4038. BASIC QUALITY ASSURANCE PROGRAM FOR MEDICAL USE OF BYPRODUCT MATERIAL

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 35

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations concerning the medical use of byproduct material. The proposed amendments would require its medical licensees to establish and implement a written basic quality assurance program to prevent, detect, and correct the cause of errors in the administration of byproduct material. The proposed action is necessary to provide for improved patient safety. The proposed amendment, which is intended to reduce the potential for and severity of therapy misadministrations, would primarily affect hospitals, clinics, and individual physicians. The proposed rule would also modify reporting and recordkeeping requirements for diagnostic and therapy events.

4039. REVISION OF DEFINITION OF MEETING

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 9

Legal Deadline: None

Abstract: The proposed rule would return the definition of "meeting" to its pre-1985 wording. The proposal is based on a study of comments submitted on an interim final rule published on May 21, 1985 (50 FR 20889), and the 1987 recommendations and report of the American Bar Association (ABA). Since the pre-1985 wording of the definition of meeting is fully adequate to permit the types of non-Sunshine Act discussions that the NRC believes would be useful, the proposal calls for the NRC to reinstitute its pre-1985 definition of meeting, with the intention of conducting its non-Sunshine Act discussions in accordance with the guidelines recommended by the ABA.

4040. TWENTY-FOUR HOUR NOTIFICATION OF INCIDENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: This rulemaking would amend 10 CFR Part 20.403(a) and (b) to clarify the licensees' reporting requirements. While 10 CFR 20.403(a) and (b) are reasonably clear in terms of licensee reporting requirements for events involving "exposures" and "releases" of radioactive materials, these sections are not clear concerning events involving "loss of operation" and "damage to property." "Loss of operation" should be clarified in terms of loss of use of facilities, devices or equipment. "Damage to property" should be clarified to include contamination clean-up if the corrective action is equal to or greater than a certain cost. In addition, the rulemaking should also define "immediate" in actual time, e.g., within 1 hour, for reporting requirements.

This rulemaking action will clarify a current Commission regulation; there is no other appropriate procedure to accommodate the clarification.

Timetable:

Action	Date	FR Cite
NPRM	11/00/89	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: The health and safety of the public will be better protected because improved reporting requirements will reduce the potential risk of exposure to radiation. Clarifying the reporting requirements will also simplify regulatory functions and free the staff from unnecessary additional investigation and, at the same time, protect the industry from unnecessary and unexpected fines.

RIN: 3150-AC91

4041. CODES AND STANDARDS FOR NUCLEAR POWER PLANTS (ASME CODE, SECTION XI, DIVISION 1, SUBSECTION IWE)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would incorporate by reference Subsection IWE, "Requirements for Class MC Components of Light-Water Cooled Power Plants," of Section XI (Division 1) of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code). Subsection IWE provides the rules and requirements for inservice inspection, repair, and replacement of Class MC pressure retaining components and their integral attachments, and of metallic shell and penetration liners of Class CC pressure retaining components and their integral attachments in light-water cooled power plants.

Incorporation by reference of Subsection IWE will provide systematic examination rules for containment structure for meeting Criterion 53 of the General Design Criteria (Appendix A of 10 CFR Part 50) and Appendix J of 10 CFR Part 50. Age-related degradation of containments has occurred, and additional and potentially more serious degradation mechanisms can be anticipated as nuclear power plants age. (cont)

Timetable:

Action	Date	FR Cite

Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: If the NRC did not take action to endorse the Subsection IWE rules, the NRC position on examination practices for containment structure would have to be established on a case-by-case basis and improved examination practices for steel containment structures might not be implemented. The other alternatives of incorporating these detailed examination requirements into the American National Standard ANSI/ANS 56.8-1981 or into Appendix J are not feasible.

Incorporating by reference the latest edition and addenda of Subsection IWE will save applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the staff can review any single submission. Adoption of the proposed amendment would permit the use of improved methods for containment inservice inspection.

RIN: 3150-AC93

4042. LICENSING AND RADIATION SAFETY REQUIREMENTS FOR LARGE IRRADIATORS

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2111; 42 USC 2232; 42 USC 2233; 42 USC 2273; 42 USC 5842

CFR Citation: 10 CFR 036

Legal Deadline: None

Abstract: The Nuclear Regulatory Commission is developing regulations to specify radiation safety requirements and license requirements for the use of licensed radioactive materials in large irradiators. Irradiators use gamma radiation to irradiate products to change their characteristics in some way. The requirements would apply to large panoramic irradiators (those in which the radioactive sources and the material being irradiated are in a room that is accessible to personnel while the source is shielded) and certain large self-contained irradiators in which the source always remains under water. The rule would not cover small self-contained irradiators, instrument calibrators, medical uses of sealed sources (such as teletherapy), or non-destructive testing (such as industrial radiography).

The alternative to a regulation is continuing to license irradiators on a case-by-case basis using license conditions. The formalization would make the NRC's requirements better understood and possibly speed the licensing of irradiators. Development of the rule will require 2 staff-years.

4043. MEDICAL USE OF BYPRODUCT MATERIAL; TRAINING AND EXPERIENCE CRITERIA

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 035

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) would amend the Commission's regulations concerning training and experience criteria for individuals involved in medical use of byproduct material. Rulemaking may be needed to reduce the chance of misadministrations. The Commission may proceed with rulemaking, assist in the development of national voluntary training standards, or issue a policy statement recommending increased licensee attention to training. If the Commission proceeds with rulemaking, the NRC could publish criteria in its regulations or recognize medical specialty certificates. The NRC is not able to project costs or benefits at this time, and has requested cost/benefit comments in an ANPRM published May 25, 1988. The NRC has hired a contractor to study training, accreditation and certification programs that are now in place. The NRC staff will analyze the study results, due in November 1989, and the comments received to determine whether regulatory action is necessary.

4044. AMENDMENT OF THE PRESSURIZED THERMAL SHOCK RULE

Legal Authority: 42 USC 2133; 42 USC 2134; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule revises the Pressurized Thermal Shock (PTS) rule, published on July 23, 1985, which established a screening criterion, a limit on the degree of radiation embrittlement of PWR reactor vessel beltline materials beyond which operation cannot continue without additional plant-specific analysis. The PTS rule prescribed how to calculate the degree of embrittlement as a function of the copper and nickel contents of the controlling material and the neutron fluence. The proposed amendment revises the calculative procedures to be consistent with that given in Revision 2 of Regulatory Guide 1.99. This guide, which was published in final form on June 8, 1988, provides an updated correlation of embrittlement data.

The need to amend the PTS rule to be consistent with the guide became apparent when it was found that some medium-copper, high-nickel materials embrittlement is worse now than predicted using the PTS rule. A number of PWR's will reach the screening criterion sooner than previously thought, and three plants will need to make plant-specific analyses in the next 10 years. (cont)

Timetable:

Action	Date	FR Cite
NPRM	10/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: Abstract Cont.

An unacceptable alternative to this amendment from the safety standpoint is to leave the present PTS rule in place. A plant-by- plant analysis by the NRC staff found four plants whose reference temperatures are 52 to 68 degrees F higher than previously thought, based on the present rule. This is beyond the uncertainties that were felt to exist when the proposed rule was published. Another unacceptable alternative that has been evaluated is to change the calculative procedure for the reference temperature and also change the screening criterion. Failure probabilities for the most critical accident scenarios in three plants, when recalculated using the new embrittlement estimates, were somewhat lower, but were quite dependent on the plant configuration and the scenario chosen. Furthermore, the screening criterion was based on a variety of considerations besides the probabilistic analysis. Reopening the question of where to set the screening criterion was not considered productive because of plant-to-plant differences.

RIN: 3150-AD01

4045. NUCLEAR PLANT LICENSE RENEWAL

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule is scheduled for completion prior to the anticipated submittal of license renewal applications for Yankee Rowe and Monticello. The rule will provide the basis for development and review of these two "lead plant" applicants and the concurrent development of implementing regulatory guidance. Timely completion of the rule is critical for establishing standards for continued safe operation of power reactors during the license renewal term and providing the regulatory stability desired by utilities in determining whether to prepare for license renewal or pursue alternative sources of generating capacity.

License renewal rulemaking to provide regulatory requirements for extending nuclear power plant licenses beyond 40 years was initiated in response to the Commission's 1986 and 1987 policy and planning guidance. Current regulatory

provisions permit license renewal but do not provide requirements for the form and content of a license renewal application nor the standards of acceptability against which the application will be reviewed.

4046. CODES AND STANDARDS FOR NUCLEAR POWER PLANTS (ASME CODE, 1986/1987/1988 ADDENDA)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would incorporate by reference the 1986 Addenda, the 1987 Addenda, the 1988 Addenda, and the 1989 Edition of Section III, Division 1, and Section XI, Division 1, with a specified modification, of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code). Also, the proposed amendment would impose augmented examination of reactor vessel shell welds and would separate the requirements for inservice testing from those for inservice inspection by placing the requirements for inservice testing in a separate paragraph. The ASME Code provides rules for the construction of light-water-reactor nuclear power plant components in Section III, Division 1, and provides rules for the inservice inspection and inservice testing of those components in Section XI, Division I.

The proposed rule would update the existing reference to the ASME Code and would thereby permit the use of improved methods for the construction, inservice inspection, and inservice testing of nuclear power plant components. Incorporating by reference the latest addenda of the ASME Code would save (cont)

Timetable:

Action	Date	FR CRe
NPRM	02/00/90	
Final Action	11/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: Abstract Cont. applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the staff could review any single submission. In addition, the proposed rule would require expeditious implementation of the expanded reactor vessel shell weld examinations provided in the 1988 Addenda and the 1989 Edition of Section XI and would clarify the existing requirements in the regulation for inservice inspection and inservice testing.

This action will be handled as a routine updating of 10 CFR 50.55a of the NRC regulations. There is no reasonable alternative to rulemaking action. The proposed amendment will be issued for public comment. The task to develop and publish the proposed amendment is scheduled for a period of 7.5 months with an estimated staff effort of 400 p-hrs.

4053. ● CREDIT CHECKS - EXPANDED PERSONNEL SECURITY INVESTIGATIVE COVERAGE

Legal Authority: 42 USC 2165; 42 USC 2201; 42 USC 5841; 42 USC 2273

CFR Citation: 10 CFR 011; 10 CFR 025

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to require the expansion of the present investigative scope for licensee "R" Special Nuclear Material Access Authorization and "L" security clearance applicants by adding a credit check and would revise the corresponding fee schedule to recover the additional cost of each credit check.

These amendments are necessary for the following reasons: (1) to obtain a higher degree of assurance that licensee "R" and "L" applicants are reliable, trustworthy, and do not have any significant financial problems which may cause them to be susceptible to pressures, blackmail, or coercion to act contrary to the national interest; (2) to achieve greater comparability with the investigation scope for DOE's "L" and Secret clearances; (3) to be consistent with the investigative coverage proposed in the NUMARC guidelines for licensee personnel with unescorted access to protected and vital areas of nuclear power plants; and (4) to recover the additional cost of each credit check. RIN: 3150–AD28

4054. ● DAY FIRING QUALIFICATIONS AND PHYSICAL FITNESS PROGRAMS FOR SECURITY PERSONNEL AT CATEGORY I FUEL CYCLE FACILITIES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 073

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to require that security personnel qualify and requalify annually on specific standardized day firing courses using all assigned weapons. Current regulations require day firing qualification using a national policy course or equivalent for handguns and an NRA or nationally recognized course for semiautomatic weapons. A firing course is specified for shotguns, which is in need of revision. Recent amendments to Part 73 added a requirement for night firing qualification using specific, designated firing courses. To ensure uniformity, the current day firing requirements should be compatible.

Additionally, current regulations specify that security personnel shall have no physical weaknesses that would adversely affect their performance of assigned job duties. However, no regulatory standards exist for assuring that security personnel are physically fit to perform their duties. Requirements for a physical fitness program and fitness standards at Category I fuel cycle facilities for security personnel need to be added to the regulations in order to provide a uniform, (CONT)

Timetable:

Action	Date	FR Cite
NPRM	04/00/90	
Final Action	04/00/91

Government Levels Affected: Undetermined

Additional Information: Abstract Cont. enforceable program. Guidance will be developed to assure that such a program will not, at the same time, endanger the health of those participating in it.

The proposed rule change would amend 10 CFR Part 73, Appendix H, to include day firing qualification courses in each type of required weapon as well as a standardized physical fitness training course and fitness standards for security personnel. Alternatives to the rulemaking would be to allow the status quo to continue. Standardization of day firing courses to be consistent with those established for night firing would be of negligible cost to the 3-4 affected licensees and to the NRC since day firing qualification using a variety of firing courses is already being done. Physical fitness training programs would incur moderate costs to the licensee in the area of personnel time and limited physical fitness equipment. The cost to the NRC would be in the area of licensing and inspection activities. Neither area of rulemaking affects occupational exposure.

4055. ● AMENDMENTS TO PART 60 TO DELINEATE ANTICIPATED PROCESSES AND EVENTS AND UNANTICIPATED PROCESSES AND EVENTS

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 060

Legal Deadline: None

Abstract: In 10 CFR Part 60, licensing requirements for disposal of radioactive wastes in geologic repositories, certain performance requirements for the repository are based on an assumption of the occurrence of anticipated processes and events. The specific meaning and use of this term, and unanticipated processes and events, needs further clarification. This rulemaking would modify the definition of this term in Section 60.2, modify Section 60.113, which describes the use of this term and modify the definition of "geologic setting" in Section 60.2, and modify the use of that term in Section 60.102.

The objective of the rulemaking is to improve the licensing process for the geologic repository program. It would have no adverse effects on the licensee or the public. It is expected that the resources expended by NRC on the rulemaking would be more than offset

VOL 54 ISS 208 OCT 30 1989 UMI

by resources saved during the licensing process.

4056. ● EMERGENCY RESPONSE DATA SYSTEM

Legal Authority: 42 USC 2131; 42 USC 2133; 42 USC 2134; 42 USC 2135; 42 USC 2201; 42 USC 2232; 42 USC 2233; 42 USC 2236; 42 USC 2239; 42 USC 2282; 42 USC 5841; 42 USC 5843; 42 USC 5846

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations by requiring the implementation of the NRC-approved Emergency Response Data System (ERDS) at all licensed nuclear power plants. The primary role of the Nuclear Regulatory Commission during an emergency at a licensed nuclear power facility is one of monitoring the licensee to assure that appropriate recommendations are made with respect to necessary offsite actions to protect its role during an emergency, the NRC requires accurate and timely data on four types of parameters: (1) the reactor core and coolant system conditions to assess the extent or likelihood of core damage; (2) the conditions inside the containment building to assess the likelihood of its failure; (3) the radioactivity release rates to assess the immediacy and degree of public danger; and (4) the data from the plant's meteorological tower to assess the distribution of potential or actual impact on the public.

The ERDS is a licensee-activated computer data link between the electronic data systems at licensed nuclear power (cont)

Timetable:

Government Levels Affected: Undetermined

Additional Information: Abstract Cont. facilities and a central computer in the NRC Operations Center. Current experience with voice-only emergency communication link, utilized for data transmission, has demonstrated it to be slow and inaccurate. Simulated site tests of the ERDS concept in emergency planning exercises have demonstrated that ERDS is effective between the NRC Operations Center and affected licensees.

The rule would require that the licensees provide the required hardware and software to transmit the data in a format specified by the NRC. The NRC would require that the licensee activate the ERDS as soon as possible following the declaration of an alert condition. Based on a site survey of 80 percent of licensed facilities, the current estimates of licensee costs are $20K-50K for software and $0-100K for hardware. The current estimated cost to NRC is $2.6 million. The proposed changes to 10 CFR Part 50 will be issued for public comment.

4057. ● LOW-LEVEL WASTE MANIFEST INFORMATION AND REPORTING

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 020; 10 CFR 061

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to: (1) augment and improve information contained in manifests accompanying shipments of waste to low-level waste (LLW) disposal facilities licensed under Part 61; (2) require that operators of these disposal facilities store portions of this manifest information in onsite computer recordkeeping systems; and (3) require that operators periodically submit, in an electronic format, reports of shipment manifest information.

To assure safe disposal of LLW, we must understand the mechanisms and rates by which radioactivity can be released from LLW and into the environment. To do this, we must understand the chemical physical, and radiological characteristics of LLW. This task is greatly complicated by the heterogeneous nature of LLW; it exists in a variety of chemical and physical forms and contains roughly 200 different radionuclides in concentrations that can range from a few microcuries to several hundred curies per cubic foot. Each year there are thousands of shipments of LLW disposal sites. (cont)

Timetable:

Action	Date	FR Cite
NPRM	06/00/90	
Interim Final Rule	05/00/91	

Small Entities Affected: Businesses

Government Levels Affected: Undetermined

Additional Information: Abstract Cont.

Pursuant to Section 20.311, a manifest must accompany each shipment of LLW to a disposal facility. Unfortunately, existing manifests do not describe the waste in detail sufficient to assure compliance with the Part 61 performance objectives. In addition, NRC's regulations do not require that disposal site operators develop and operate computer systems for storage and manipulation of shipment manifests information. We believe that such onsite computer systems are necessary for safe disposal facility operation. We also believe that a national data base is needed which contains information on LLW disposed at all sites.

A rulemaking to upgrade shipment manifests and require disposal site computer recordkeeping systems will assure that technical information on LLW is available and in a form which can be used for performance assessments, technical analyses, and other activities. It is expected that the rulemaking will slightly increase disposal costs.

4058. ● REQUIREMENTS FOR POSSESSION OF INDUSTRIAL DEVICES

Legal Authority: 42 USC 2111; 42 USC 2114; 42 USC 2201

CFR Citation: 10 CFR 031

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations for the possession of industrial devices containing byproduct material to require device users to report to the NRC on a periodic basis. The proposed report would indicate that the device is still in use or to whom the device has been transferred. The proposed rule would be the most efficient method, considering the number of general licensees and the number of devices currently in use, for assuring that devices are not improperly transferred or inadvertently discarded. The proposed rule is necessary to avoid unnecessary radiation exposure to the public that may occur when an improperly discarded device is included in a batch of scrap metal for reprocessing. The proposed rule would also avoid the unnecessary expense involved in retrieving the manufactured items fabricated from contaminated metal. The proposed rule would impose a small burden on device users and the NRC.

NUCLEAR REGULATORY COMMISSION (NRC) — Final Rule Stage

4059. PROCEDURES INVOLVING THE EQUAL ACCESS TO JUSTICE ACT: IMPLEMENTATION

Legal Authority: 5 USC 504

CFR Citation: 10 CFR 1; 10 CFR 2

Legal Deadline: None

Abstract: The proposed rule would implement the Equal Access to Justice Act (EAJA) by providing for the payment of fees and expenses to certain eligible individuals and businesses that prevail in agency adjudications when the agency's position is determined not to have been substantially justified. This proposed regulation is modeled after rules issued by the Administrative Conference of the United States (ACUS) and have been modified to conform to NRC's established rules of practice. The proposed rule would further the EAJA's intent to develop government-wide, "uniform" agency regulations and would describe NRC procedures and requirements for the filing and disposition of EAJA applications. A draft final rule was sent to the Commission in June 1982, but Commission action was suspended pending a decision by the Comptroller General on the availability of funds to pay awards to intervenor parties. This issue was also the subject of litigation in Business and Professional People for the Public Interest v. NRC, 793 F. 2d 1366 (D.C. Cir. 1986). This litigation is being evaluated to determine what if any changes may be necessary in the proposed rule. (cont)

4060. AMENDMENT TO 10 CFR 51.51 AND 51.52, TABLES S-3 AND S-4, ADDITION OF RADON-222 AND TECHNETIUM-99 RADIATION VALUES, AND ADDITION OF APPENDIX B, "TABLE S-3 EXPLANATORY ANALYSIS"

Legal Authority: 42 USC 2011; 42 USC 2201; 42 USC 4321; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 51

Legal Deadline: None

Abstract: The proposed rule provides a narrative explanation of the numerical values established in Table S-3, "Table of Uranium Fuel Cycle Environmental Data," that appears in the Commission's environmental protection regulations. The proposed rule describes the basis for the values contained in Table S-3, the significance of the uranium fuel cycle data in the table, and the conditions governing the use of the table. The proposed rule amends Section 51.52 to modify the enrichment value of U-235 and the maximum level of average fuel irradiation. The narrative explanation also addresses important fuel cycle impacts and the cumulative impacts of the nuclear fuel cycle for the whole nuclear power industry so that it may be possible to consider these impacts generically rather than repeatedly in individual licensing proceedings, thus reducing litigation time and costs for both NRC and applicants.

BEST COPY AVAILABLE

VOL 54 ISS 208 OCT 30 1989 UMI

The proposed revision of 10 CFR 51.51 and the addition of Appendix B was published for public review and comment on March 4, 1981 (46 FR 15154). The final rulemaking was deferred pending the outcome of a suit (Natural Resources Defense Council, et al. v. NRC, No. 74-1486) in the U.S. Circuit) decision of (cont)

Government Levels Affected: Undetermined

Additional Information: April 27, 1982, invalidated the entire Table S-3 rule. The Supreme Court reversed this decision on June 6, 1983. The proposed rule to provide an explanatory analysis for Table S-3 has been revised to reflect new developments during the time the rulemaking was deferred. Final action on the Table S-3 rule was held in abeyance until new values for radon-222 and technetium-99 could be added to the table and covered in the narrative explanation. The rule is being reissued as a proposed rule because the scope has been expanded to include radiation values for radon-222 and technetium-99 and the narrative explanation has been extensively revised from that published on March 4, 1981 (46 FR 15154).

The staff's estimate is that the completion of a final Table S-3 rule covering the new values for radon-222 and technetium-99 and the revised explanatory analysis will be completed in 1989. A Commission paper presenting the final rulemaking plan and schedule was submitted on August 18, 1988 (SECY 88-242). On September 8, 1988, SECY 88-242 was approved by the Commission.

4061. STANDARDS FOR PROTECTION AGAINST RADIATION

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2095; 42 USC 2111; 42 USC 2133; 42 USC 2134; 42 USC 2201; 42 USC 2273; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 20

Legal Deadline: None

Abstract: Radiation protection philosophy and technology have changed markedly since the present Part 20 was promulgated nearly thirty years ago. Since Part 20 contains the NRC standards for protection against radiation that are used by all licensees and affects exposures of workers and members of the public, it should be the most basic of the NRC regulations. However, because the present Part 20 has become outmated, most radiation protection actions occur through licensing actions independent of Part 20. A complete revision is necessary to provide better assurance of protection against radiation; establish a clear health protection basis for the limits; reflect current information on health risk, dosimetry, and radiation protection practices and experience; provide NRC with a health protection base from which it may consider other regulatory actions taken to protect public health; be consistent with recommendations of world authorities (ICRP); International Commission on Radiological Protection (ICRP); and apply to all licensees in a consistent manner.

Alternatives to the complete revision considered were no action, delay for further guidance, and partial revision (cont)

Additional Information: ABSTRACT CONT: of the standards. These were rejected as ignoring scientific advancements, being unresponsive to international and national guidance, and correcting only some of the recognized problems with the present Part 20.

Benefits would include updating the regulations to reflect contemporary scientific knowledge and radiation protection philosophy; implementing regulations which reflect the ICRP risk-based rationale; reducing lifetime doses to individuals receiving the highest exposures; implementing provisions for summation of doses from internal and external exposures; providing clearly identified dose limits for the public; and providing an understandable health-risk base for protection.

Initial estimates of the cost of implementing the revision is about $33 million for all NRC and Agreement State licensees in the initial year and about $8 million in each subsequent year. This cost does not include any savings which might also be realized by the revision.

4062. PRIMARY REACTOR CONTAINMENT LEAKAGE TESTING FOR WATER-COOLED POWER REACTORS

Legal Authority: 42 USC 2133; 42 USC 2134; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would update and revise the 1973 criteria for preoperational and periodic pressure testing for leakage of primary containment boundaries of water-cooled power reactors. Problems have developed in application and interpretation of the existing rule. These result from changes in testing technology, test criteria, and a relevant national standard that needs to be recognized.

The revision is urgently needed to resolve continuing conflicts between licensees and NRC inspectors over interpretations, current regulatory practice that is no longer being reflected accurately by the existing rule, and endorsement in the existing regulation of an obsolete national standard that was replaced in 1981.

The benefits anticipated include elimination of inconsistencies and obsolete requirements, and the addition of greater usefulness and a higher confidence in the leak-tight integrity of containment system boundaries under post-loss-of-coolant accident conditions. The majority of the effort needed by NRC to issue the rule has already been expended. (cont)

4063. PERSONNEL ACCESS AUTHORIZATION PROGRAM

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050; 10 CFR 073

Legal Deadline: None

Abstract: The Commission has concluded that it is appropriate for each licensee who operates a nuclear power plant to establish an access authorization program to ensure that individuals who require unescorted access to protected areas or vital areas of their facilities are trustworthy, reliable, emotionally stable, and do not pose a threat to commit radiological sabotage. Accordingly, the NRC published a proposed rule on August 1, 1984, which would require an access authorization program at nuclear power plants (42 FR 30726).

An alternative proposal by the Nuclear Utility Management and Resource Committee (NUMARC) was submitted as a public comment on this proposed rule. The alternative proposed a voluntary industry commitment to implement an access authorization program at nuclear power plants based upon industry guidelines. Major provisions of this program include background investigation, psychological evaluation, and behavioral observation.

Action	Date	FR Cite
Proposed Policy Statement Published	03/09/88	53 FR 7534
Final Action	11/00/89	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information:

On June 18, 1986, the Commission approved developing a policy statement endorsing industry guidelines as an alternative to the proposed rulemaking. Commitments to adhere to these guidelines would be formalized through amendments to the physical security plans and be subject to inspection and enforcement by NRC.

On March 9, 1988, the NRC published a proposed policy statement endorsing the NUMARC guidelines. In the Federal Register notice, the Commission specifically requested public comments as to whether the access authorization program should be a rule or a policy statement.

On April 19, 1989, the Commission decided to go forward with a final rule which would require all licensees to have an access authorization program and would specify the major attributes of the program. The NRC would also issue a regulatory guide which would endorse, with appropriate exceptions, the applicable industry guidelines, as an acceptable way of complying with the rule.

4064. ELIMINATION OF INCONSISTENCIES BETWEEN NRC REGULATIONS AND EPA STANDARDS

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 60

Legal Deadline: None

Abstract: The proposed rule would eliminate several inconsistencies with the EPA standards to be developed for the disposal of HLW in deep geologic repositories. The Nuclear Waste Policy Act of 1982 (NWPA) directs NRC to promulgate criteria for the licensing of HLW geologic repositories. Section 121(c) of this Act states that the criteria for the licensing of HLW geologic repoaitories must be consistent with these standards. The proposed rule is needed in order to eliminate several inconsistencies with the EPA standards, thus fulfilling the statutory requirement.

The public, industry, and NRC will benefit from eliminating inconsistencies in Federal HLW regulations. NRC resources needed would be several staff years but will not include contract resources.

Because the Federal Court invalidated the EPA standards, action on this rule, which is in response to the EPA standards, is undetermined.

4065. SAFETY REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC EQUIPMENT

Legal Authority: 42 USC 2111; 42 USC 2201; 42 USC 2232; 42 USC 2233

CFR Citation: 10 CFR 34

Legal Deadline: None

Abstract: The proposed rule would amend the present regulations to establish performance standards for industrial radiography exposure devices. Overexposures of radiographers (and occasionally the general public) are more than double that of other radiation workers and have been a concern to the NRC for some time. Approximately 25-35% of the radiography overexposures are

associated with equipment malfunction. The issue of safety requirements for these devices is a primary concern since the devices use relatively high intensity, high energy gamma-ray emitting sources with the potential for serious overexposures. Although a consensus standard for radiographic exposure devices was published in 1981 (American National Standard N432), it is not clear that all manufacturers are adopting the standard.

The alternatives considered were to take no action at this time, amend the regulations to require performance standards for radiographic devices plus a requirement for radiographers to wear alarm dosimeters and simultaneously issue a regulatory guide endorsing the consensus standard, supplemented by such other performance standards deemed necessary, and incorporate (cont)

4066. TRANSPORTATION REGULATIONS: COMPATIBILITY WITH THE INTERNATIONAL ATOMIC ENERGY AGENCY (IAEA)

Legal Authority: 42 USC 2073; 42 USC 2093; 42 USC 2111; 42 USC 2232; 42 USC 2233; 42 USC 2273; 42 USC 5842

CFR Citation: 10 CFR 71

Legal Deadline: None

Abstract: The proposed rule, would in conjunction with a corresponding rule change by the U.S. Department of Transportation, make the United States Federal regulations for the safe transportation of radioactive material consistent with those of the International Atomic Energy Agency (IAEA). The IAEA regulations can be found in IAEA Safety Series No. 6 "Regulations for the Safe Transport of Radioactive Material," 1985 Edition.

Consistency in transportation regulations throughout the world facilitates the free movement of radioactive materials between countries for medical, research, industrial, and nuclear fuel cycle purposes. Consistency of transportation regulations throughout the world also contributes to safety by concentrating the efforts of the world's experts on a single set of safety standards and guidance (those of the IAEA) from which individual countries can develop their domestic regulations. In addition, the accident experience of every country that bases its domestic regulations on those of the IAEA can be applied by every other country with consistent regulations to improve its safety program. The action will be handled as a routine (cont)

4067. REASSERTING NRC'S SOLE AUTHORITY FOR APPROVING ONSITE LOW-LEVEL WASTE DISPOSAL IN AGREEMENT STATES

Legal Authority: 42 USC 2201; 42 USC 2021; 42 USC 5841

CFR Citation: 10 CFR 150

Legal Deadline: None

Abstract: This rulemaking would establish NRC's sole authority for approving onsite disposal of low-level waste at all NRC licensed reactors and at Part 70 fuel cycle facilities. There is a need to amend 10 CFR 150.15 to authorize one agency (the NRC) to regulate all onsite disposal of low-level waste in order to provide a more comprehensive regulatory review of all onsite waste management activities and to avoid unnecessary duplication of effort. Uniform review by the NRC will provide for greater assurance that the radioactive material will not present a health hazard at a later date after the site is decommissioned.

4068. ● ENFORCEMENT OF NONDISCRIMINATION ON THE BASIS OF HANDICAP IN FEDERALLY ASSISTED PROGRAMS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 004

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations concerning enforcement of section 504 of the Rehabilitation Act of 1973, as amended, in federally assisted programs or activities to include a cross-reference to the Uniform Federal Accessibility Standards (UFAS). Because some facilities subject to new construction or alteration requirements under section 504 are also subject to the Architectural Barriers Act, government wide reference to UFAS will diminish the possibility that recipients of Federal financial assistance would face conflicting enforcement standards. In addition, reference to UFAS by all Federal funding agencies will reduce potential conflicts when a building is subject to the section 504 regulations or more than one Federal agency.

4069. STORAGE OF SPENT NUCLEAR FUEL IN NRC-APPROVED STORAGE CASKS AT NUCLEAR POWER REACTOR SITES

Legal Authority: 42 USC 10153; 42 USC 10198

CFR Citation: 10 CFR 50; 10 CFR 72; 10 CFR 170

Legal Deadline: None

Abstract: The proposed rule is in response to the Nuclear Waste Policy Act (NWPA) section 218 (a) which states in part, that the Secretary of DOE shall establish a demonstration program, in cooperation with the private sector, for dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the Commission may, by rule, approve for use at sites of civilian nuclear power reactors. The NWPA also requires that the NRC establish procedures for the licensing of any technology approved by the Commission under section 218(a) for use at the site of any civilian nuclear power reactor.

The staff anticipates a significant increase in the demand for use of dry spent fuel storage casks starting in the early 1990s, thus processing of this proposed rule would be timely. NRC resource requirements are anticipated to be about two staff years.

4070. DEBT COLLECTION PROCEDURES

Legal Authority: 31 USC 3711; 31 USC 3717; 31 USC 3718; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 015

Legal Deadline: None

Abstract: The proposed rule would amend the regulations concerning the procedures that the NRC uses to collect the debts which are owed to it. The proposed amendments are necessary to conform NRC regulations to the amended procedures contained in the Federal Claims Collection Standards issued by the General Accounting Office and the U.S. Department of Justice. The proposed action is intended to allow the NRC to further improve its collection of debts due to the United States. Because the proposed regulation is necessary to implement the Debt Collection Act of 1982, there is no suitable alternative to rulemaking for this action. No comments were received on the proposed rule.

4071. ENSURING THE EFFECTIVENESS OF MAINTENANCE PROGRAMS FOR NUCLEAR POWER PLANTS

Legal Authority: 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would provide functional requirements for the maintenance of nuclear power plants and allow industry initiatives to develop the details of maintenance programs to meet these requirements. The proposed rule would apply to all components, systems and structures of nuclear power plants and wold be applicable to existing and future plants. The proposed rule would also require each licensee to develop, implement and maintain a maintenance program, and to formally commit to follow the program.

The scope of maintenance activities addressed in the rule will be within the framework of the Commission's Policy Statement on Maintenance of Nuclear Power Plants which was issued on March 23, 1988 (53 FR 9430).

It is estimated that about 3 staff-years of effort and $800,000 for contract services will be required to process the final rule.

4072. MINOR AMENDMENTS TO PHYSICAL PROTECTION REQUIREMENTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 070; 10 CFR 072; 10 CFR 073; 10 CFR 075

Legal Deadline: None

Abstract: The proposed rule amends the Commission's regulations dealing with physical protection requirements that are out of date, susceptible to differing interpretations, or in need of clarification. These problems were identified by a systematic review of the agency's safeguards regulations and guidance documents conducted by the Safeguards Interoffice Review Group (SIRG). In addition, the staff has identified other areas in the regulations where minor changes are warranted. In response to these efforts, specific amendments to the regulations are being proposed. The proposed changes would: (1) add definitions for common terms not currently defined by frequent use, (2) delete action dates that no longer apply, (3) correct outdated terms and cross references, (4) clarify wording that is susceptible to differing interpretations, (5) correct typographical errors, and (6) make other minor changes.

NPRM Comment Period End	09/29/89	
Final Action	04/00/90	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: The alternative to rulemaking would be to allow the status quo to continue. Except for the change in the impact of a high radiation field on physical protection requirements, these minor amendments affect the public, industry and the NRC only in so far as they make the regulations easier to understand, implement, and enforce. It is estimated that 0.4 staff-years of NRC effort over 2 years will be required for the rulemaking. This is a low priority rulemaking.

4073. SEQUESTRATION OF WITNESSES INTERVIEWED UNDER SUBPOENA/DISQUALIFICATION OF ATTORNEYS

Legal Authority: 41 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 019

Legal Deadline: None

Abstract: The proposed rule would provide for the sequestration of all persons compelled to appear before NRC representatives under subpoena during the conduct of investigative interviews. The proposed rule would also give the agency official conducting the investigation (after consultation with the Office of the General Counsel) the authority to disqualify an attorney who represents multiple interests from the investigative interviews of other witness clients or from the investigatory proceedings entirely whenever the attorney impairs or impedes the progress of the investigation. The proposed rule would require the official to have evidence of the attorney's improper conduct and must provide the excluded counsel a written statement of reasons for the disqualification. The proposed rule would also provide disqualified counsel a right to Commission review of the disqualification decision. The proposed rule is intended to clarify and delineate the rights and responsibilities of the agency, interviewees, licensees, and attorneys during the conduct of agency investigations. The proposed rule is also (cont)

4074. PALLADIUM-103 FOR THE INTERSTITIAL TREATMENT OF CANCER

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 035

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations concerning the medical use of byproduct material. The proposed regulation would add Palladium-103 sealed source as seeds to the list of sources permitted in 10 CFR Part 35 for use in cancer treatment. Under current NRC regulations, users must have their licenses amended before they may use Palladium-35 seeds by each potential user (about 700 licensees) with either a simplified amendment or no amendment, depending upon the individual license. An evaluation of potential radiation hazards to hospital personnel and the public showed a minimal risk if the seeds are used in accordance with the manufacturer's radiation safety and handling instructions.

4075. ● INFORMAL HEARING PROCEDURES FOR NUCLEAR REACTOR OPERATOR LICENSING ADJUDICATIONS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 002

Legal Deadline: None

Abstract: The proposed rule would amend NRC regulations to provide rules of procedure for informal adjudicatory hearings in nuclear power reactor operator licensing proceedings. The Atomic Energy Act of 1954 requires that the NRC, in any proceeding for the granting, suspending, revoking, or amending of an NRC license, including licensing as an operator or senior operator of a nuclear power plant, afford an interested person, upon request, a "hearing." This proposed rule would amend an existing rule which provides for informal hearing procedures for materials licensing proceedings to include reactor operator licensing proceedings as well.

4077. ● EXPORT OF HEAVY WATER TO CANADA

Legal Authority: 42 USC 3201; 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 110

Legal Deadline: None

Abstract: The final rule would amend the Commission's regulations concerning the import and export of nuclear equipment and material in 10 CFR Part 110. Current regulations require that license applications for the export of 1000 kilograms or more of heavy water to any country require review by the Commission. The Commission has reviewed its processing of nuclear export license applications and has determined that license applications for the export of any quantity of heavy water to Canada do not raise issues that require Commission review. Therefore, the Commission has delegated additional authority to the NRC staff to act upon such export license applications without prior consultation with the Commission. There is no acceptable alternative to rulemaking because an amendment to the regulations is necessary to identify the classes of export license application which require Commission review. The rule should benefit the NRC, the industry, and the public by expediting the review process for these kinds of applications.

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations requiring licensees and license applicants to ensure that neither they, nor their contractors or subcontractors, impose conditions in settlement agreements under Section 210 of the Energy Reorganization Act, or in other agreements on the terms, conditions, and privileges of employment, that would prohibit, restrict, or otherwise discourage an employee from providing the Commission with information on potential safety violations. The proposed rule would require licensees and license applicants to establish procedures to ensure that their contractors and subcontractors have been informed of the prohibition, that licensees and license applicants are notified of any complaints filed with the Department of Labor pursuant to Section 210 of the Energy Reorganization Act by an employee of a contractor or subcontractor, and to require review by the licensee of any settlement agreements related to employee complaints of such determination by a contractor or subcontractor.

4079. MODIFICATIONS TO THE NRC HEARING PROCESS (LIMITED INTERROGATORIES AND FACTUAL BASIS FOR CONTENTIONS)

Legal Authority: 42 USC 2239

CFR Citation: 10 CFR 2

Legal Deadline: None

Abstract: The proposed rule has been superseded by the proposed rule entitled, "Rules of Practice for Domestic Licensing Proceedings--Procedural Changes in Hearing Process," which is scheduled to be published as a final rule in July 1989. This rule will address the following aspects of the hearing process: admission of contentions, discovery against NRC staff, use of cross examination plans timing of motions for summary disposition and limitations on matters and issues that may be included in proposed findings of fact or conclusions of law, or in an appellate brief submitted by a person who does not have the burden of proof or who has only a limited interest in the proceeding.

4086. EDUCATION AND EXPERIENCE REQUIREMENTS FOR SENIOR REACTOR OPERATORS AND SUPERVISORS AT NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201

CFR Citation: 10 CFR 50; 10 CFR 55

Legal Deadline: None

Abstract: The Commission is withdrawing this proposed rulemaking published on December 29, 1988 (54 FR 52718), in which comments were solicited on two proposed alternative amendments to its regulations. The alternatives proposed in the Federal Register notice would have imposed additional education and experience requirements for either senior operators or control room supervisors. In consideration of the comments received on the proposed rule and the status of industry initiatives to enhance the education level of its operating personnel, the Commission concludes that it should withdraw the proposed rule published on December 29, 1988. The Commission published a policy statement that presents its views concerning education for senior operators and shift supervisors at nuclear power plants (August 15, 1989; 54 FR 33639).

4091. LICENSEE ACTION DURING NATIONAL SECURITY EMERGENCY

Legal Authority: 42 USC 5841; 42 USC 5842; 42 USC 5846

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The final rule amended the Commission's regulations governing the domestic licensing of production and utilization facilities to allow a licensee during a national security emergency to deviate from a license condition or a technical specification. The Commission previously has granted authority to nuclear power reactor licensees to take reasonable action that departs from a license condition or a technical specification in an emergency when the action is immediately necessary to protect the public health and safety and no action consistent with license conditions and technical specifications that can provide adequate or equivalent protection is immediately apparent. This final rule provides the same flexibility to licensees, but for the purpose of attaining national security objectives during a declared national emergency due to nuclear war or natural disaster.

4093. RULE ON THE SUBMISSION AND MANAGEMENT OF RECORDS AND DOCUMENTS RELATED TO THE LICENSING OF A GEOLOGIC REPOSITORY FOR THE DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 002

Legal Deadline: None

Abstract: The Nuclear Waste Policy Act [NWPA] provides three years for the NRC to reach a decision on construction authorization for a high-level waste repository. In order for the NRC to be able to make its decision within the allotted time, ready access to all pertinent records must be assured to all parties in the licensing proceeding. The DOE has committed to develop an electronic information management system to be used for the licensing proceeding. The NRC staff has used the process of negotiated rulemaking to develop a rule that revises the Commission's discovery procedure and motion practice in 10 CFR Part 2 for the high-level waste licensing proceeding. This rule requires the DOE license application and all supporting records to be provided in a standardized electronic format. All parties to the licensing proceeding will be required to submit all relevant data to this system. In turn, all parties will have access to the data base.

4096. INDEMNIFICATION OF LICENSEES THAT MANUFACTURE, PRODUCE, POSSESS OR USE RADIOPHARMACEUTICALS OR RADIOISOTOPES FOR MEDICAL PURPOSES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: Section 19 of the Price-Anderson Amendments Act of 1988 required the Commission to determine, through use of a negotiated rulemaking proceeding, whether persons licensed by the Commission or Agreement States for the manufacture, production, possession, or use of radioisotopes or radiopharmaceuticals for medical purposes ("radiopharmaceutical licensees") should be indemnified under the Price-Anderson Act. Section 19 required the Convenor of the proceeding to submit a recommendation to the Commission on whether the Commission should enter into indemnity agreements with radiopharmaceutical licensees. The Convenor's report recommended that the Commission not extend indemnity under the Price-Anderson Act to any class of radiopharmaceutical licensees. Therefore, this rulemaking was terminated.

4098. ● MANNER OF SERVICE OF PLEADINGS UPON THE SECRETARY OF THE COMMISSION

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 002

Legal Deadline: None

Abstract: The final rule amends the Commission's regulations to require all parties in NRC proceedings to file copies of all pleadings filed with any agency adjudicatory tribunal with the Office of the Secretary in the same or equivalent manner in which they were filed with the tribunal. This will result in the Office of the Secretary receiving the pleading on approximately the same day as the tribunal.

[Release Nos. 33-6845, 34-27245, 35-24953, 39-2225, IC-17134, IA-1199; File No. S7-26-89]

Regulatory Flexibility Agenda and Rules Scheduled for Review

AGENCY: Securities and Exchange Commission.

ACTION: Publication of regulatory flexibility agenda and rules scheduled for review.

SUMMARY: The Securities and Exchange Commission is today publishing an agenda of its open and anticipated rulemaking actions pursuant to chapter six of the Administrative Procedure Act and Office of Management and Budget Bulletin 89-12. The agenda is a general announcement to the public intended to provide advance notice of rulemaking actions which may have a significant economic impact on a substantial number of small entities. The Commission invites questions and public comment on individual agenda entries.

DATE: Public comments are due by December 31, 1989.

ADDRESSES: Persons wishing to submit written views should file three copies with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street NW., Room 6184, Stop 6-9, Washington, DC 20549. All submissions should refer to File No. S7-26-89 and will be available for public inspection at the Commission's Public Reference Room, Room 1026, at the same address.

FOR FURTHER INFORMATION CONTACT: William J. Atkinson, Office of Economic Analysis, Securities and Exchange Commission, 450 5th Street NW., Room 9200, Stop 9-1, Washington, DC 20549 (202-272-7100). The names of persons to contact concerning particular rules are identified with each entry.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act ("RFA") (Pub. L. 96-354, 94 Stat. 1164 [September 19, 1980]) requires each Federal agency, during April and October of each year, to publish in the **Federal Register** a regulatory flexibility agenda identifying rules which the agency expects to propose or adopt that are likely to have a significant economic impact on a substantial number of small entities.[1]

The RFA also requires the Commission to publish a plan for the periodic review of all rules issued by the agency which have or will have a significant economic impact on a substantial number of small entities.[2] The Commission published such a plan in 1981.[3] The plan provides for the review of all rules in effect on January 1, 1981, within ten years of that date and for the review of all rules adopted thereafter within ten years of their adoption as final rules. The RFA further requires publication, each year, of a list of those rules which are to be reviewed during the succeeding twelve months.[4]

The Commission's continuing review of its rules, begun before the effective date of the statute (January 1, 1981), extends beyond the requirements of the RFA. Consequently, some rules listed in this part of the agenda may not be subject to RFA review requirements. The Commission is identifying them here in order to inform the public of its intention to review them. The agenda also identifies the rulemaking actions which have been completed (or withdrawn) since the last RFA release was published.[5]

The statute specifically provides that the agenda does not preclude the Commission from considering or acting on any matter not included nor is the Commission required to consider or act on any matter which is included.[6] Furthermore, the inclusion of a rule in the Commission's agenda reflects only the staff's preliminary judgment that the rule, if adopted or as it exists, may have a significant economic impact on a substantial number of small entities.[7] This preliminary judgment may be changed upon further analysis.

The Commission's entries to the October 1989 Unified Agenda of Federal Regulations are listed below. The Commission's agenda includes new entries, as well as items carried over from the April 1989 publication. New entries are marked with a bullet next to the Sequence Number. Priority items are identified under the heading "Significance."

Copies of the Commission's regulatory agenda are available from the Commission's Office of Public Affairs (Room 1015). The Commission's regulatory agenda is also available for inspection and copying in the Public Reference Room (Room 1026). Please refer to File S7-26-89 as noted above.

The Commission invites public comment on the individual entries in its regulatory agenda.

Dated: September 14, 1989.

By the Commission.

Jonathan G. Katz,

Secretary.

Abstract: The Commission has proposed a multijurisdictional disclosure system that would permit Canadian issuers that, depending on the nature of the offering, meet market value, public float and Canadian reporting history tests to register securities in the United States using disclosure documents prepared according to the requirements of Canadian regulatory authorities. Certain Canadian issuers would also be able to use such documents to meet U.S. periodic disclosure requirements. Companies subject to U.S. proxy requirements could use Canadian documents for certain solicitations. Canadian insider reports could be filed with the Commission. Additionally, tender offers for Canadian companies could be made in accordance with Canadian rules where a limited number of shareholders reside in the U.S.

Legal Deadline: None

Abstract: The staff is developing proposals to promote shareholder analysis of extraordinary corporate transactions recommended or approved by the board of directors of the subject company. Amendments would be proposed to Rule 13e-3 and Schedule 13E-3 to apply those provisions to transactions where it is anticipated that management will have a significant interest in the transaction, such as an equity interest in the surviving entity. The proposals also would adopt enhanced disclosure requirements, similar to those of Rule 13e-3 for a broader class of extraordinary transactions. The objective of the proposals would be to provide investors with more information concerning the transaction (including the values inherent in the transaction) and the evaluation processes of the board of directors. In connection with this rulemaking project, a review of Rules 13e-3 and 14d-1 through 14f-1 and Schedule 13E-3 will be conducted.

Legal Authority: 15 USC 78o(c)(3); 15 USC 78w

CFR Citation: 17 CFR 240.15c3-1

Legal Deadline: None

Abstract: In response to the October 1987 market break and as a part of its comprehensive market break study, the Division of Market Regulation examined the appropriate levels of minimum net capital required of registered broker-dealers. As a result, the Commission decided to publish for comment proposed amendments to the net capital rule that, among other things, will raise the minimum net capital required of various classes of registered broker-dealers. The Commission believes that these higher levels of required net capital are justified based upon the risks posed by undercapitalized firms to customers and to the securities system as a whole.

4123. MUTUAL FUND GOVERNANCE

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-37

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: On December 10, 1982, the Commission issued an advance concept release (Investment Company Act Release No. 12888, (47 FR 56509)) soliciting public comment on whether the Commission should propose rules or

BEST COPY AVAILABLE

VOL 54 ISS 208 OCT 30 1989 UMI

recommend legislation which would provide for an alternative form of mutual fund governance. Specifically, this release requests comment on whether mutual funds should be exempted from shareholder voting and/or director requirements under the Investment Company Act of 1940 (the "Act") and, if so, whether conditions could be fashioned which would adequately insure against loss of investor protection. Although such changes might be effected through rulemaking, the Commission has indicated that, in its preliminary judgment, changes of this magnitude should be effected through legislative rather than administrative action. Since the costs and benefits of providing for an alternative scheme of mutual fund governance cannot be estimated at the present time, the release solicits specific comment on the costs and benefits which would result from such changes. Extension of comment period until April 18, 1983 was announced in Investment Company Act Release No. 13012 (cont)

4124. RULE 17J-1 UNDER THE INVESTMENT COMPANY ACT OF 1940

Legal Authority: 15 USC 80a-17(j); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.17j-1

Legal Deadline: None

Abstract: Rule 17j-1 requires every access person of a registered investment company, or of an investment adviser of or principal underwriter for the investment company to report to the investment company certain of his securities transactions. The Commission is considering whether to propose an amendment to this rule which would reduce the reporting requirement for investment company directors who are interested persons with respect to the investment company by reason of their affiliation with a registered broker-dealer. Members of the industry have characterized these reporting requirements as unnecessarily burdensome in some instances. Any such rule amendment would have the effect of lessening the reporting requirements currently imposed by the rule. As a result, the staff believes that the costs, which should be insignificant, of complying with any amendment would be significantly less than the benefits it would provide. The Commission is also considering whether to amend Rule 17 j-1 to define specified acts as fraudulent, deceptive or manipulative or to require certain minimum standards to be set forth on a company's code of ethics.

Abstract: Absent an exception, every solicitation of a proxy, authorization or consent in respect of any security with respect to which a registered investment company is the issuer, is subject to rules adopted pursuant to the Securities Exchange Act of 1934 and the Investment Company Act of 1940 concerning solicitations of proxies. Solicitations to which the rules apply may not commence unless each person solicited is furnished or has previously been furnished with a proxy statement containing specified information prepared in accordance with certain rules and the material has been filed with the Commission. The existing proxy rules were adopted in piecemeal fashion and have been the subject of frequent changes. This has led to certain duplicative and, in certain cases, complex requirements. To the extent that a proxy statement contains repetitive material or is overly complicated and difficult to read, it may not effectively perform its intended function of communicating meaningful information to security holders in order that they may make informed voting decisions. In order to update the proxy regulations and, in doing so, improve the (cont)

Additional Information: ABSTRACT CONT: readability of proxy statements and eliminate unnecessary disclosure costs, the Commission has commenced a comprehensive review of the proxy regulations as they relate to investment companies. There does not currently exist a basis upon which to quantify the reduced costs and burdens of such action on those registrants affected. Since the action will apply to all registered investment companies soliciting proxies, unless the solicitation is excepted, the Action is expected to have a significant impact on a substantial number of small entities. However, the contemplated revisions are still in the developmental stage and have not yet been formally proposed by the Commission. Thus, the extent of the revision actually proposed and the attendant reductions in costs and burdens are as yet largely unknown, but are anticipated to be significant.

4126. AMENDMENTS TO FORM N-2

Legal Authority: 15 USC 80a-8 Investment Company; 15 USC 77g Securities Act; 15 USC 77j Securities Act

CFR Citation: 17 CFR 239.14; 17 CFR 274.11a-1

Legal Deadline: None

Abstract: Form N-2 is the registration statement form under the Investment Company Act of 1940 and the Securities Act of 1933 for closed-end management investment companies other than small business investment companies and companies which issue periodic payment plan certificates or which are sponsors or depositors of companies issuing such certificates. Included within the registration statement are the companies' prospectuses used in offering their securities to the public. The Commission believes a simplified prospectus is necessary because current prospectuses have become too cumbersome for the average investor to understand and because current requirements result in the disclosure of much information that is not necessarily material to an investment decision. The Commission has proposed a simplified three-part form.

4127. METHOD FOR COMPLIANCE WITH SECTION 206(3) OF THE INVESTMENT ADVISERS ACT OF 1940 WITH RESPECT TO CERTAIN TRANSACTIONS

Legal Authority: 15 USC 80b-11(a)

CFR Citation: 17 CFR 275.206(3)-3

Legal Deadline: None

Abstract: Section 206(3) of the Investment Advisers Act of 1940 makes it unlawful for any investment adviser, by use of the mail or any means or instrumentality of interstate commerce, directly or indirectly, knowingly to effect a securities transaction (a) with a client while acting as principal or (b) for a client while acting as broker for a person other than such client, without disclosing in writing to such client before the completion of the transaction the capacity on which he is acting and obtaining the consent of the client to the transaction. The Commission is considering whether to propose a rule that would provide a nonexclusive method for compliance with the provisions of Section 206(3) of the Investment Advisers Act of 1940 in connection with purchases of securities from an underwriting syndicate for an advisory client under specified conditions. Because the proposed rule is still in the developmental stages, its potential effect on small entities and its potential costs and benefits as a whole are unknown at this time.

4129. ADVERTISING BY INVESTMENT ADVISERS

Legal Authority: 15 USC 80b-6(4)

CFR Citation: 17 CFR 275.206(4)-1

Legal Deadline: None

Abstract: Rule 206(4)-1 contains a wide range of restrictions on advertising by investment advisers including prohibitions on the use of testimonials. The rule was adopted in 1962 and has not been revised since. The Commission is considering whether to amend the rule in a manner that would permit greater flexibility to investment advisers in their advertising and protect the investing public from potential abuse. Because the proposed amendments to the rule are still in the developmental stages, the potential effect on small entities and its potential costs and benefits as a whole are uncertain at this time.

4133. ADVERTISING BY UNIT INVESTMENT TRUSTS

Legal Authority: 15 USC 77j; 15 USC 77s; 15 USC 80a-37(a)

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: Currently unit investment trusts advertise their performance by means of an "estimated current return" which shows estimated cash flow. However, because there is no uniform method of computing the estimated current return, they cannot be compared by prospective investors. This rulemaking project will endeavor to create such a uniform method. A uniform method of computation will permit investors to make more informed investment decisions by enabling them to compare the performance of different trusts.

4134. PROPOSED RULE 6C-12 UNDER THE INVESTMENT COMPANY ACT OF 1940

Legal Authority: 15 USC 80a-6(c)

CFR Citation: 17 CFR 270.6c-12

Legal Deadline: None

Abstract: The regulation will be designed to codify numerous exemptions from the provisions of the Investment Company Act of 1940 ("Act") granted to two-tier real estate limited partnerships. Exemptions from the Act pursuant to Section 6(c) of the Act have generally been granted where: 1) the two-tier partnership invests in limited partnerships engaged in the development and building of housing for low and moderate income persons; 2) the limited partnership interests are sold only to suitable investors; and 3) requirements for fair dealing by the general partner of the issuer with the limited partners of the issuer are included in the basic organizational documents of the partnership. The regulation will reduce the number of exemptive relief applications received by the Office of Investment Company Regulation requesting exemptions for two-tier real estate limited partnerships.

4141. EXEMPTION FROM REGISTRATION UNDER THE ADVISERS ACT FOR CERTAIN SMALLER INVESTMENT ADVISERS

Legal Authority: 15 USC 80b-6A

CFR Citation: 17 CFR 275.203(b)(1)-1; 17 CFR 275.203(b)(3)-2

Legal Deadline: None

Abstract: The Commission proposed rules that, if adopted would exempt smaller investment advisers from most federal adviser regulation other than the general antifraud provisions, if the advisers are registered in all states in which they do business. The proposed exemptions should significantly diminish the costs and paperwork associated with dual federal and state regulation of small advisory businesses. The proposed rules would rely on the states to assume responsibility for the detailed regulation that, at the federal level, would no longer be applicable to small advisers exempt under these rules. The proposed rules, which include both an interstate and an intrastate exemption, would determine eligibility for the exemptions by reference to the size of the adviser's business; whether the adviser has custody of client funds or securities; and whether the adviser is registered as an adviser in the state or states in which it does business. The proposed exemptions, together with the amendment of several rules, would eliminate costs of registration and reporting as well as compliance with the brochure rule, the recordkeeping rule, the performance for rule, the cash (cont)

CFR Citation: 17 CFR 210.5-02; 17 CFR 210.10-01; 17 CFR 210.11-02; 17 CFR 229.303

Legal Deadline: None

Abstract: The Commission proposed amendments to require (1) presentation of certain industry segment information for interim periods; (2) a discussion of reportable segments in management's discussion and analysis; and (3) modifications of other miscellaneous interim reporting requirements. The release also provides advance notice of possible future rulemaking regarding (1) additional segment reporting disclosures and (2) uniform disclosure of off balance sheet financing arrangements. The proposals are designed to enhance analysis of financial information. They may entail some new recordkeeping but any such costs have not been determined. The Commission's interim reporting rules will be reviewed as a part of this action.

4149. REPORT OF MANAGEMENT'S RESPONSIBILITIES

Legal Authority: 15 USC 77f; 15 USC 77g; 15 USC 77h; 15 USC 77i; 15 USC 77s(a); 15 USC 77aa (25) and (26); 15 USC 78l; 15 USC 78n; 15 USC 78o (d); 15 USC 78w (a); 15 USC 79c (b); 15 USC 79n; 15 USC 79t (a); 15 USC 80a-8; 15 USC 80a-29

CFR Citation: 17 CFR 229; 17 CFR 240; 17 CFR 249; 17 CFR 270; 17 CFR 274

Legal Deadline: None

Abstract: The Commission has proposed rules to require registrants to include a report of management's responsibilities in Forms 10-K and N-SAR and annual reports to security holders. The management report would contain a description or statement of management's responsibilities for the preparation of the registrant's financial statements and other financial information and for establishing and maintaining a system of internal control directly related to financial reporting, with management's assessment of the effectiveness of the registrant's internal control system.

Disclosure Rules

4151. ACQUISITIONS OF SUBSTANTIAL AMOUNTS OF SECURITIES AND RELATED ACTIVITIES DURING AND FOLLOWING A TENDER OFFER FOR THOSE SECURITIES

Legal Authority: 15 USC 78c(b); 15 USC 78m(e); 15 USC 78n(d); 15 USC 78w(a); 15 USC 78o(c); 15 USC 78l(b)

CFR Citation: 17 CFR 240.13e-2; 17 CFR 240.14d-11

Legal Deadline: None

Abstract: The Commission proposed Rules 13e-2 and 14d-11 that would require that, subject to certain exceptions, purchases, offers to purchase, arrangements or understandings to purchase and solicitations of offers to sell securities undertaken during and shortly after a tender offer that would increase any person's ownership of the class of securities subject to the tender offer by 10% or more of the class be made in compliance with the statutory provisions and rules applicable to tender offers. The proposed rules would apply to all persons from the formal commencement of a tender offer until 10 business days after the scheduled expiration date. A proposed rule also would subject a bidder to the same requirements from the time it commenced a tender offer by public announcement until it either formally commenced a tender offer by some other means or 30 business days after it made a subsequent public announcement stating that it had determined not to continue with the tender offer.

CFR Citation: 17 CFR 239.16b

Legal Deadline: None

Abstract: The Commission has proposed major revisions to the procedures for registering employee benefit plan securities on Form S-8. The proposals are intended to reduce costs to registrants by eliminating the need to prepare and file separate documents for federal securities law purposes that duplicate information otherwise provided to plan participants, while assuring timely delivery of information necessary for participants to make informed investment decisions. In the context of this rulemaking, Form S-8 will be fully reviewed for purposes of the Regulatory Flexibility Act.

Legal Authority: 15 USC 77b(10); 15 USC 77s(a); 15 USC 77j(a)(4); 15 USC 77j(d)

CFR Citation: 17 CFR 230.433

Legal Deadline: None

Abstract: The Commission proposed two alternative versions of a new Rule 433 that would provide a safe harbor from the requirement to deliver a final prospectus prior to or contemporaneously with a confirmation of sale in a firm commitment offering of securities for cash. Both proposals would permit, if all conditions of the rule are satisfied, the sending of a final prospectus no later than five business days after a confirmation of sale is sent to an investor in such an offering.

Legal Authority: 15 USC 78o(c)(3); 15 USC 78w

CFR Citation: 17 CFR 240.15c3-3

Legal Deadline: None

Abstract: Because the borrowing of government securities plays an important role in the government securities market, the Commission believes that, for purposes of the customer protection rule, the categories of instruments that broker-dealer can provide to customer lenders of government securities should be expanded to include certain instruments currently not listed in the rule. Therefore, the Commission has decided to propose for comment an amendment to the customer protection rule that will allow broker- dealers to provide, in addition to the instruments currently listed in the rule, certain government securities as the collateral in government securities borrowings.

4161. ● NET CAPITAL REQUIREMENTS FOR BROKER OR DEALERS

Legal Authority: 15 USC 78o(c)(3); 15 USC 78w

CFR Citation: 17 CFR 240.15c3-1

Legal Deadline: None

Abstract: In response to the October 1987 market break and as a part of its comprehensive market break study, the Division of Market Regulation examined the specialist financial responsibility rules and specialist financial surveillance systems of the various exchanges. As a result, the Commission decided to publish for comment proposed amendments to the net capital rule that, among other things, will make the rule applicable to certain specialists that are now exempt from the rule. In addition to the consequential overall financial accountability and discipline that results from the application of the net capital rule, the Commission believes it would be desirable to have a uniform measure whereby it may review the financial health and liquidity of all specialists at all exchanges.

Investment Management Rules

4162. PROPOSED RULE 3A-4 -- INDIVIDUALIZED INVESTMENT MANAGEMENT SERVICES

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.3a-4

Legal Deadline: None

Abstract: In Investment Company Act Release No. 11391 (October 10, 1980) [45 FR 69479) the Commission proposed for public comment Rule 3a-4, which would deem investment management services providing their clients with individualized treatment not to be investment companies for purposes of the Act. The rule provides a "safe harbor" for any investment manager providing its clients with treatment based on the needs and goals of each client. Under such circumstances, regulation of investment management services under the Act appears unnecessary. The proposed rule was intended to clarify the Commission's position on the question of "mini-accounts" by providing a safe harbor for certain investment management services and thereby provide some certainty to the public. The Commission does not expect any final action taken on the proposal to significantly affect the cost of providing investment management services. The public comment letters on the proposal have been reviewed and alternatives for final action are being considered.

4163. PROPOSED AMENDMENT TO RULE 17G-1 UNDER THE INVESTMENT COMPANY ACT

Legal Authority: 15 USC 80a-6(c); 15 USC 80a-17(g); 15 USC 80a-37(a)

CFR Citation: 17 CFR 270.17g-1

Legal Deadline: None

Abstract: The Commission is considering whether to adopt an amendment to Rule 17g-1 under the Investment Company Act. The amendment was proposed for public comment in Investment Company Act Release No. 11193 (June 2, 1980) (45 FR 38407). Rule 17g-1 requires every registered investment company to provide and maintain a bond against larceny and embezzlement covering officers and employees of the company. In some circumstances, the officers and employees of a company's depositor, trustee, investment adviser or other manager and various affiliates of such persons, because they have access to the company's assets, function as

4167. DISCLOSURE OF SECURITY

Legal Deadline: None

VOL 54 ISS 208 OCT 30 1989 UMI

officers and employees of the investment company. The proposed amendment to the rule would clarify the scope of the rule by explicitly requiring the bonding of such persons. The principal cost associated with this rule would be the cost of a bond. That cost would vary according to the persons required to be bonded by the rule. In this regard, before adopting any amendment to the rule, the Commission will carefully consider what persons should be bonded to protect investors adequately, weighing the benefits of the protection against the cost of a bond.

4164. SIMPLIFICATION OF REGISTRATION STATEMENTS FILED BY UNIT INVESTMENT TRUSTS

Legal Authority: 15 USC 80a-8; 15 USC 77g; 15 USC 77j

CFR Citation: 17 CFR 239.16; 17 CFR 274.12

Legal Deadline: None

Abstract: On March 9, 1987, the Commission reproposed for public comment Form N-7, a new form for registering unit investment trusts("UITS") and their securities under the Investment Company Act of 1940 and the Securities Act of 1933. Form N-7 was originally proposed by the Commission on May 14, 1985. Adoption of Form N-7 would (i) codify the disclosure requirements for VITS into one form; (ii) codify the disclosure standards that have been developed for VITS; and (iii) shorten and simplify the prospectus used in connection with the sale of units in both the initial offering and in the secondary market maintained by the sponsor. As reproposed, a one-part prospectus originally proposed, but the prospectus would retain a series specific part and a generic part. The requirement for audited financial statements would be eliminated under certain circumstances. The requirement that registrants include certain third party financial statements in the registration statement would be extended to insurers as well as guarantors of portfolio securities of the trust under the reproposal.

4169. DIVERSIFICATION BY EXEMPT HOLDING COMPANIES

Legal Authority: 15 USC 79c(a)(1); 15 USC 79t(a)

CFR Citation: 17 CFR 250.17; 17 CFR 250.2; 17 CFR 259.402

Legal Deadline: None

Abstract: Proposed Rule 17 clarifies under what conditions diversification into non-utility enterprises would not be deemed detrimental to the public interest or the interest of investors or consumers within the meaning of the "unless and except" clause of S3(a)(1) of the Public Utility Holding Company Act of 1935. The rule would provide two alternative "safe harbors". A companion proposed amendment to rule 2 under the Act would require after three years from its adoption, claims of exemption under rule 2, in order to be effective, would require that the claimant meet one of the safe harbor provisions of rule 17. Also proposed is an amendment to Form U-3A-2, the statement filed annually by holding companies claiming exemptions under rule 2, that would request information necessary to determine whether a rule 2 claim of exemption by an intrastate holding company was meritorious in light of the requirement added to rule 2. These proposals could significantly increase regulatory compliance costs for those intrastate public utility holding companies that have diversified operations, or that intend to do so. The proposals could require such a company to forego acquisition of an unrelated (con't)

Legal Authority: 15 USC 77f; 15 USC 77g; 15 USC 77s

CFR Citation: 17 CFR 228.801(e)

Legal Deadline: None

Abstract: Guide 5 is intended to provide guidance regarding disclosure to minimize delays in the review of registration statements relating to real estate limited partnerships and also to assist issuers, accountants, attorneys, and others in the preparation of such filings. The Guide does not contain rules of the Commission, nor is it published as bearing the Commission's official approval. Instead, it reflects the policies and practices followed by the Division of Corporation Finance in the administration of the registration requirements of the Securities Act of 1933 regarding real estate limited partnerships.

4178. ● SALES PRACTICE REQUIREMENTS FOR CERTAIN LOW-PRICED SECURITIES

Legal Authority: 15 USC 78w; 15 USC 78c; 15 USC 78j; 15 USC 78o

CFR Citation: 17 CFR 240.15c2-6

Legal Deadline: None

Abstract: Rule 15c2-6 is the Commission's response to the widespread incidence of misconduct by some broker-dealers in connection with transactions in equity securities that are not traded on an exchange or NASDAQ, and whose issuers do not meet certain financial standards. The Commission has initiated a number of enforcement actions against such broker-dealers, yet the misconduct has continued. Consequently, the Commission believes that additional regulatory action is necessary to deal more effectively with the problem. Rule 15c2-6 requires broker-dealers who recommend purchases of such securities to obtain written customer agreement to, and make a documented suitability determination for, the purchase. Benefits of the rule include increased investor confidence in covered securities, thereby enhancing broker-dealer activities in the securities, and the capital raising function of their issuers.

Federal Register
Vol. 54, No. 209
Tuesday, October 31, 1989

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SAN FRANCISCO, CA

WHEN: November 29; at 9:00 a.m.
WHERE: Room 15138,
450 Golden Gate Avenue,
San Francisco, CA.
RESERVATIONS: Call Mary Walters at the San Francisco Federal Information Center,
415-556-6600.

SEATTLE, WA

WHEN: November 30; at 1:00 p.m.
WHERE: South Auditorium, 4th Floor,
915 2nd Avenue,
Seattle, WA.
RESERVATIONS: Call Carmen Meler or Peggy Groff at the Portland Federal Information Center on the following numbers:
Seattle: 206-442-0570,
Tacoma: 206-383-7970,
Portland: 503-326-2222.

Rules and Regulations

Federal Register
Vol. 54, No. 209
Tuesday, October 31, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Rural Telephone Bank

7 CFR Part 1610

Determination of the 1989 Fiscal Year Interest Rate on Rural Telephone Bank Loans

AGENCY: Rural Telephone Bank, USDA.

ACTION: Notice of 1989 fiscal year interest rate determination.

SUMMARY: In accordance with 7 CFR 1610.10, the Rural Telephone Bank's Fiscal Year 1989 cost of money rate has been established at 5.00 percent. Except for loans approved from October 1, 1987 through December 21, 1987 where borrowers elected to remain at interest rates set at loan approval, all loan advances made from October 1, 1988 through September 30, 1989 under Bank loans approved on or after October 1, 1987 shall bear interest at the rate of 5.00 percent.

The calculation of the Bank's cost of money rate for Fiscal Year 1989 is provided in Table 1. Since the calculated rate (4.87 percent) is less than the minimum rate allowed under 7 U.S.C. 948(b)(3)(A), the cost of money rate is set at the minimum rate of 5.00 percent. The methodology required to calculate the cost of money rate is established in 7 CFR 1610.10(c).

FOR FURTHER INFORMATION CONTACT: F. Lamont Heppe, Jr., Chief, Loans and Management Branch, Telecommunications Staff Division, Rural Electrification Administration, Room 2250, South Building, U.S. Department of Agriculture, Washington, DC 20250, telephone number (202) 382–9550.

SUPPLEMENTARY INFORMATION: The cost of money rate methodology develops a weighted average rate for the Bank's cost of money by considering total fiscal year loan advances; the excess of fiscal year loan advances over amounts received in the fiscal year from issuances of Class A, B, and C stocks, debentures and other obligations; and the costs to the Bank of obtaining funds from these sources. During Fiscal Year 1989, the Bank paid the following dividends: the dividend on Class A stock was 2.00 percent as established in amended section 406(c) of the Rural Electrification Act; no dividends were payable on Class B stock as specified in 7 CFR 1610.10(c); and the dividend on Class C stock was established by the Bank at 8.5 percent.

The total amount received by the Bank in Fiscal Year 1989 from the issuance of Class A stock was $28,710,000. Total advances for the purchase of Class B stock and cash purchases for Class B stock were $4,955,025. Rescissions of loan funds advanced for Class B stock amounted to $1,071,815. Thus, the amount received by the Bank from the issuance of Class B stock, per 7 CFR 1610.10(c), was $3,883,210 ($4,955,025 –$1,071,815). The total amount received by the Bank in Fiscal Year 1989 from the issuance of Class C stock was $11,614.

The Bank did not issue debentures or any other obligations during Fiscal Year 1989. Consequently, no cost was incurred related to the issuance of debentures subject to 7 U.S.C. 943(b)(3)(D).

The excess of Fiscal Year 1989 loan advances over amounts received from issuances of Class A, B, and C stocks and debentures and other obligations amounted to $64,442,123. The cost associated with this excess is the historical cost of money rate as defined in 7 U.S.C. 948(b)(3)(D)(v). The calculation of the Bank's historical cost of money rate is provided in Table 2. The methodology required to perform this calculation is described in 7 CFR 1610.10(c). The cost of money rates for fiscal years 1974 through 1987 are defined in section 406(b) of the RE Act, as amended by Public Law 100–203, and are listed in 7 CFR 1610.10(c) and Table 2 herein.

Dated: October 25, 1989.

Jack Van Mark,
Acting Governor, Rural Telephone Bank.

TABLE 1.—RURAL TELEPHONE BANK FY 1989 COST OF MONEY RATE

Source of bank funds	Amount	Cost rate (percent)	Amount × cost rate	(Amount × rate) advances (percent)
FY 1989 issuance of Class A Stock	$28,710,000	2.00	$574,200	0.5917
FY 1989 issuance of Class B Stock	3,883,210	0.00	0	0.0000

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 515

Supplemental List of Specially Designated Nationals (Cuba) in Panama

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Notice of Additions to the List of Specially Designated Nationals of Cuba.

SUMMARY: This notice provides the names of individuals and firms operating in Panama that have been added to the list of Specially Designated Nationals under the Treasury Department's Cuban Assets Control Regulations (31 CFR Part 515). Also provided is a complete current listing of known Specially Designated Nationals of Cuba in Panama.

EFFECTIVE DATE: October 31, 1989.

FOR FURTHER INFORMATION CONTACT: Richard J. Hollas, Chief, Enforcement Division, Office of Foreign Assets Control, Tel: (202) 376-0400. Copies of the list of Specially Designated Nationals are available upon request at the following location: Office of Foreign Assets Control, Department of the Treasury, 1331 G Street, NW., Room 300, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: Under the Cuban Assets Control Relgulations, persons subject to the jurisdiction of the United States are prohibited from engaging, directly or indirectly, in transactions with any nationals or specially designated nationals of Cuba, or involving any property in which there exists an interest of any national or specially designated national of Cuba, except as authorized by law or by the Treasury Department's Office of Foreign Assets Control by means of a general or specific license.

Section 515.302 of Part 515 defines the term "national," in part, as (a) a subject or citizen domiciled in a particular country, or (b) any partnership, association, corporation, or other organization owned or controlled by nationals of that country, or that is organized under the laws of, or that has had its principal place of business in that foreign country since the effective date (for Cuba, 12:01 a.m., e.s.t., July 8, 1963), or (c) any person that has directly or indirectly acted for the benefit or on behalf of any designated foreign country. Section 515.305 defines the term "designated national" as Cuba or any national thereof, including any person who is a specially designated national. Section 515.306 defines "specially designated national" as any person who has been designated as such by the Secretary of the Treasury; any person who, on or since the effective date, has either acted for or on behalf of the government of, or authorities exercising control over, any designated foreign country; or any partnership, association, corporation or other organization that, on or since the applicable effective date, has been owned or controlled directly or indirectly by such government or authorities, or by any specially designated national

Section 515.201 prohibits any transaction, except as provided in Section 515.201 or as authorized by law or by the Secretary of the Treasury, involving property in which there exists an interest of any national or specially designated national of Cuba. The list of Specially Designated Cuban Nationals is a partial one, since the Department of the Treasury may not be aware of all the persons located outside Cuba that might be acting as agents or front organizations for Cuba, thus qualifying as specially designated nationals of Cuba. Also, names may have been omitted because it seemed unlikely that those persons would engage in transactions with persons subject to the jurisdiction of the United States. Therefore, persons engaging in transactions with foreign nationals may not rely on the fact that any particular foreign national is not on the list as evidence that it is not a specially designated national.

The Treasury Department regards it as incumbent upon all U.S. persons engaging in transactions with foreign nationals to take reasonable steps to ascertain for themselves whether such foreign nationals are specially designated nationals of Cuba, or other designated countries (at present, Cambodia, North Korea, and Vietnam). The list of Specially Designated Nationals was last published on December 10, 1986, in the **Federal Register** (51 FR 44459), and was amended on November 3, 1988 (53 FR 44307), January 24, 1989 (54 FR 3446), April 10, 1989 (54 FR 14215) and August 4, 1989 (54 FR 32064), and September 20, 1989 (54 FR 38811).

Please take notice that section 16 of the Trading with the Enemy Act as amended (the "Act"), 50 U.S.C. App. 16, provides in part that whoever willfully violates any provision of the Act or any license, rule or regulation issued thereunder:

"Shall, upon conviction, be fined not more than $50,000, or, if a natural person, imprisoned for not more than ten years, or both; and the officer, director or agent of any corporation who knowingly participates in such violation shall be punished by a like fine, imprisonment, or both; and any property, funds, securities, papers, or other articles or documents, or any vessel, together with her tackle, apparel, furniture, and equipment, concerned in such violation shall be forfeited to the United States."

In addition, persons convicted of an offense under the Act may be fined a greater amount than set forth in the Act, as provided in 18 U.S.C. 3571 and 3581.

Authority: 50 U.S.C. App. 5(b) and 16 U.S.C. 3571 and 3581.

BILLING CODE 4810-25-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 8F3630/R1039; FRL-3658-1]

Pesticide Tolerance for Fenarimol

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide fenarimol in or on the raw agricultural commodity cherries at 1.0 part per million (ppm). This regulation to establish the maximum permissible level for residues of fenarimol in or on the commodity was requested in a petition submitted by Elanco Products Co.

EFFECTIVE DATE: October 31, 1989.

ADDRESSES: Written objections, identified by the document control number [PP 8F3630/R1039], may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. M–3708, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Susan T. Lewis, Acting Product Manager (PM) 21, Registration Division (H7505C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 227, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–1900.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of May 25, 1988 (53 FR 18898), which announced that Elanco Products Co., 740 South Alabama St., Indianapolis, IN 46285, had submitted pesticide petition (PP) 8F3630 to EPA requesting that the Administrator, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for the fungicide fenarimol [alpha-(2-chlorophenyl)-alpha-(4-chlorophenyl)-5-pyrimidinemethanol] in or on the raw agricultural commodity cherries at 1.0 ppm.

There were no comments received in response to the notice of filing.

The data submitted in support of the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the tolerance include the following:

1. A 1-year dog feeding study using doses of 0, 1.25, 12.5, and 125 milligrams/kilogram (mg/kg) body weight (bwt)/day. The no-observed-effect level (NOEL) is 12.5 mg/kg bwt/day. The 125 mg/kg bwt/day dose level caused increased serum alkaline phosphatase, increased liver weights, increase in *p*-nitroanisole *o*-demethylase activity, and mild hepatic bile stasis.

2. An initial 2-year chronic feeding/oncogenicity study in rats using dietary concentrations of 0, 50, 130, and 350 ppm (equivalent to doses of 0, 2.5, 6.5, and 17.5 mg/kg bwt/day). In a previous **Federal Register** Notice (51 FR 7567; March 5, 1986), the Agency indicated fenarimol to be oncogenic. In that Notice, the Agency's initial conclusion that fenarimol was oncogenic was based on a finding in the 2-year rat study of a statistically significant increase in hepatic lesions (adenomas and hyperplastic nodules) at the highest dose tested (17.5 mg/kg bwt/day), when data for male and female rats were combined.

Since that time, the compound has been reevaluated. The Agency now considers it more appropriate to separate data for males and females and also to separate hyperplastic nodules from tumors (adenomas and carcinomas). When a reevaluation of the hepatic lesions for males and females was performed separately with the elimination of hyperplastic nodules, the data did not demonstrate a statistically significant increased incidence in adenomas and/or carcinomas in either sex. Moreover, the mouse oncogenicity study did not demonstrate oncogenic potential at dose levels up to and including a dose level of 85.7 mg/kg bwt/day (the highest dose level tested).

Because of the appearance of a low incidence of fatty change of the liver (nonneoplastic pathological lesions) in the low-dose groups in this study, it was unclear if a NOEL for fatty change of the liver was established in this study.

3. Additional 2-year chronic feeding/oncogenicity studies in rats using dietary concentrations of 0, 12.5, 25, and 50 ppm (equivalent to doses of 0, 0.63, 1.25, and 2.5 mg/kg bwt/day). The purpose of these additional studies was to assist in determining a NOEL for fatty liver changes. The first of these two studies was compromised, however, by an outbreak of chronic respiratory disease which reduced survival in all experimental groups, including control. The study was then repeated with the same dose levels. In the second study, no fatty liver changes or oncogenic effects were observed at the doses tested under the conditions of the study. Using data from all three 2-year studies, a NOEL for fatty liver change of 6.5 mg/kg bwt/day was established.

4. A 2-year oncogenicity study in mice using dietary concentrations of 0, 50, 170, and 600 ppm (equivalent to doses of 0, 7, 24.3, and 85.7 mg/kg bwt/day) that was negative for oncogenic effects at all doses tested under the conditions of the study. At 600 ppm, an increase in fatty change of the liver was demonstrated. The NOEL for this effect was 170 ppm (24.3 mg/kg bwt/day).

5. A rabbit teratology study that was negative for teratogenic effects at all doses tested (0, 5, 10, and 35 mg/kg).

6. A rat teratology study that demonstrated hydronephrosis at 35 mg/kg (doses tested were 0, 5, 13, and 35 mg/kg). A second study in rats (with a postpartum evaluation) again demonstrated hydronephrosis at 35 mg/kg, but also indicated that the dose level

VOL 54 ISS 209 OC 31 1989 UMI

of 35 mg/kg was associated with a maternal toxic effect (decreased body weight gain during treatment). The Agency considers the NOEL for hydronephrosis and for maternal toxicity to be 13 mg/kg.

7. A multigeneration reproduction study in rats that demonstrated decreased fertility in males and delayed parturition and dystocia in females at 5 mg/kg bwt/day. The NOEL for reproductive effects in this study was 2.5 mg/kg bwt/day.

8. Multigeneration reproduction studies in guinea pigs and mice that were negative for reproductive effects at doses up to 35 mg/kg bwt/day (highest dose tested) and 20 mg/kg bwt/day, respectively.

9. An aromatase inhibition study in rats that showed fenarimol to be a moderately weak inhibitor of aromatase activity.

The adverse reproductive effects observed in the rat multigeneration reproduction study are considered to be a species-specific effect caused by aromatase inhibition. This enzyme promotes normal sexual behavior in rats and mice, but not in guinea pigs, primates, or man. A NOEL of 35 mg/kg bwt/day for reproductive effects relevant to humans was established in the multigeneration reproduction study in guinea pigs.

10. A mouse lymphoma forward mutation assay; a DNA repair synthesis study in rat liver culture systems; gene mutation assays in *Salmonella typhimurium* (Ames test) and in *Escherichia coli*; a dominant lethal assay in Wistar rats; an assay for transformation activity in the C3H/10T ½ embryonic mouse fibroblast; and an *in vivo* assay for chromosome aberration in the Chinese hamster. Fenarimol did not demonstrate mutagenic activity in any of these studies.

The mutagenic potential of fenarimol has been evaluated in several assay systems (see item 10 above). Fenarimol did not demonstrate a mutagenic effect in any of these studies. Furthermore, fenarimol did not induce altered foci or neoplastic nodules in an initiation and promotion study in rat liver tissue.

Based on the above findings, the Agency concludes that fenarimol was not oncogenic in long-term studies in rats and mice under test conditions in which the highest dose tested for both species approached a maximum tolerated dose as evidenced by increased fatty change in the liver.

Data currently lacking is additional field trial data from California. The Agency expects the additional data to be submitted by October 1989.

The acceptable daily intake (ADI) based on the 2-year rat chronic feeding study (NOEL of 6.5 mg/kg bwt/day), and using a hundredfold safety factor, is calculated to be 0.065 mg/kg bwt/day. The theoretical maximum residue contribution from previously established tolerances and the tolerances established here is 0.0004 mg/kg bwt/day and utilizes 0.6 percent of the ADI. Previous tolerances have been established for fenarimol in pecans, pears, apples, apple pomace, milk, meat and meat byproducts of cattle, goats, hogs, horses, and sheep; and fat and liver of cattle, goats, hogs, horses, and sheep.

The nature of the residue is adequately understood, and adequate analytical methods are available for enforcement purposes. Because of the long lead time from establishing this tolerance to publication of the enforcement methodology in the *Pesticide Analytical Manual*, Vol. II, the analytical methodology is being made available in the interim to anyone interested in pesticide enforcement when requested from: Calvin Furlow, Public Information Branch, Field Operation Division (H7506C), 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Room 242, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–4432.

The pesticide is considered useful for the purposes for which the tolerances are sought. Based on the information and data considered, the Agency concludes that the establishment of the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

This tolerance will expire 1 year after the date of publication of this final rule. Based on the reviews of the California residue data, the Agency will determine whether establishing a permanent tolerance is appropriate.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Pursuant to the requirement of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

The Office of Management and Budget has exempted this rule from the requirement of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

Administrative practice and procedures, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 27, 1989.

Douglas D. Campt,
Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.421, by revising paragraph (b) by adding the raw agricultural commodity cherries and putting the paragraph in tabular format, to read as follows:

§ 180.421 Fenarimol; tolerances for residues.

* * * * *

(b) A tolerance is established for combined residues of the fungicide fenarimol [alpha-(2-chlorophenyl)-alpha-(4-chlorophenyl)-5-pyrimidinemethanol] and its metabolites [alpha-(2-chlorophenyl)-alpha-(4-chlorophenyl)-1,4-dihydro-5-pyrimidinemethanol and 5-[(2-chlorophenyl) (4-chlorophenyl)methyl]-3,4-dihydro-4-pyrimidinol measured as the total of fenarimol and 5-[(2-chlorophenyl)-(4-chlorophenyl)methyl]pyrimidine (calculated as fenarimol)], in or on the following raw agricultural commodities:

Commodities	Parts per million	Expiration date
Cherries	1.0	October 31, 1990.
Grapes	0.2	None.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-61; RM-6521]

Radio Broadcasting Services; Strasburg, CO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots FM Channel 272A to Strasburg, Colorado, as that community's first local broadcast service, in response to a petition for rule making filed on behalf of Express Communications. See 54 Fed. Reg. 12249, March 24, 1989. Coordinates used for Channel 272A at Strasburg are 39–39–37 and 104–15–25. With this action, the proceeding is terminated.

DATES: Effective November 30, 1989; the window period for filing applications on Channel 272A at Strasburg, Colorado, will open on December 1, 1989, and close on January 2, 1990.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89–61, adopted September 26, 1989, and released October 16, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, D.C. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 88-367; RM-6221, RM-6530]

Radio Broadcasting Services; Selma and Georgiana, AL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 261C2 for Channel 261A at Selma, AL, and modifies the Class A license of Holder Communications Corp. for Station WDXX(FM), as requested, to specify operation on the higher class channel, thereby providing that community with an additional expanded coverage FM service (RM–6221). See, 53 FR 30076, August 10, 1988. Additionally, Channel 299A is allotted to Georgiana, AL, as that community's first local broadcast service in response to a counterproposal filed on behalf of Alabama Broadcasting Service Company (RM–6530). Coordinates used for Channel 261C2 at Selma are 32–26–02 and 87–00–40. Coordinates used for Channel 299A at Georgiana are 31–39–31 and 86–44–22. With this action, the proceeding is terminated.

DATES: Effective December 4, 1989, the window period for filing applications on Channel 299A at Georgiana, AL, will open on December 5, 1989, and close on January 4, 1990.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530. Questions related to the window application filing process at Georgiana, AL, should be addressed to the Audio Services Division, FM Branch, Mass Media Bureau, (202) 632–0394.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–367, adopted September 29, 1989, and released October 17, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. BILLING CODE 6712-01-M

DEPARTMENT OF VETERANS AFFAIRS

48 CFR Part 815

RIN 2900-AE18

Acquisition Regulation; Contracting by Negotiation

AGENCY: Department of Veterans Affairs.

ACTION: Final rule; correction.

SUMMARY: The Department of Veterans Affairs (VA) is correcting previously published information concerning Department-issued procurement-related regulations.

EFFECTIVE DATE: October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Charles A. Fountaine, III, Chief, Directives Management Division (70Y731), Paperwork Management and Regulations Service, Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC (202) 233-2073.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 17, 1989, (54 FR 42507), VA published its regulations to eliminate procurement-related regulations not essential to implement Governmentwide policies and procedures within the Department, to specify the VA control point for all unsolicited proposals, to delegate authority to permit correction of mistakes in proposals before award, and to authorize the use of option clauses in acquisitions with medical schools, clinics, and any other group or individual providing scarce medical specialist and sharing services at VA facilities. In that final regulation, a citation was incorrectly stated and is corrected.

List of Subjects in 48 CFR Part 815

Government procurement.

Dated: October 25, 1989.

Donald R. Howell,

Acting Chief, Directives Management Division.

For the foregoing reason, the Department of Veterans Affairs hereby corrects FR Doc. 89-24492 in the issue of October 17, 1989, on page 42508 middle column, to read as follows:

PART 815—[AMENDED]

* * * * *

3. Subpart 815.6 consisting of 815.607, is added to read as follows:

Subpart 815.6—Source Selection

815.607 Disclosure of mistakes before award.

The Head of the Contracting Activity (as defined in 802.1) is delegated authority to permit correction of mistakes in proposals before award consistent with FAR 15.607.

Proposed Rules

Federal Register
Vol. 54, No. 209
Tuesday, October 31, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 971

[Docket No. FV-89-110]

South Texas Lettuce; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order 971 for the 1989-90 fiscal period. Authorization of this budget would allow the South Texas Lettuce Committee to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program would be derived from assessments on handlers.

DATES: Comments must be received by November 10, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone 202-447-5331.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 144 and Marketing Order No. 971 [7 CFR part 971], regulating the handling of lettuce grown in the Lower Rio Grande Valley of South Texas. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601-674], hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 10 handlers and 20 producers of South Texas lettuce covered under this marketing order. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

The budget of expenses for the 1989-90 fiscal year was prepared by the South Texas Lettuce Committee (committee), the agency responsible for local administration of the marketing order, and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of lettuce. They are familiar with the committee's needs and with the costs for goods, services and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee was derived by dividing anticipated expenses by expected shipments of lettuce. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses.

The committee met on October 3, 1989, and unanimously recommended a 1989-90 budget of $51,531.49. Last season's budget was $34,305. Major expense items include increases in committee staff salaries, travel and marketing development and production research projects.

The committee also unanimously recommended an assessment rate of $0.05 per carton, the same rate as last season's. This rate, when applied to anticipated shipments of 1,011,500 cartons of lettuce, would yield $50,575 in assessment revenue. This amount when added to $956.49 from the reserve fund would be adequate to cover budgeted expenses.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

This action should be expedited because the committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. The 1989-90 fiscal period began in August, and the marketing order requires that the rate of assessment apply to all assessable lettuce handled during the fiscal period. In addition, handlers are aware of this action which was recommended by the committee at a public meeting. Therefore, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for this program needs to be expedited. The committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis.

[FV–89–106PR]

Expenses and Assessment Rate for Walnuts Grown in California for 1989–90

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order No. 984 for the 1989–90 marketing year established under the walnut marketing order. This action is needed for the Walnut Marketing Board (Board), the agency responsible for the local administration of the order, to operate during the 1989–90 marketing year. The Board incurs expenses on a continuous basis and needs to collect funds during the year to pay those expenses. Funds to administer this program are derived from assessments on handlers.

DATES: Comments must be received by November 10, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, F&V, AMS, USDA, P.O. Box 96456, Washington, DC 20090–6456. All comments should reference the docket number and the date and page number of this issue of the Federal Register and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 96456, Room 2524–S, Washington, DC 20090–6456; telephone (202) 447–5120.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 984 [7 CFR part 984], both as amended, regulating the handling of walnuts grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "nonmajor" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 65 handlers of walnuts grown in California who are subject to regulation under the walnut marketing order, and approximately 5,000 producers of walnuts in the production area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of walnut producers and handlers may be classified as small entities.

The walnut marketing order requires that the assessment rate for a particular marketing year shall apply to all assessable walnuts handled from the beginning of such year. An annual budget of expenses is prepared by the Board and submitted to the U.S. Department of Agriculture for approval. The Board consists of handlers, producers, and a non-industry member. They are familiar with the Board's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Board is derived by dividing anticipated expenses by expected shipments of walnuts. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Board's expected expenses. The recommended budget and rate of assessment is usually acted upon by the Board shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, the budget and assessment rate approval must be expedited so that the Board will have funds to pay its expenses.

The Board met on September 15, 1989, and unanimously recommended 1989–90 marketing order expenditures of $1,463,782 and an assessment rate of $0.0085 per kernelweight pound of walnuts. In comparison, 1988–89 marketing year budgeted expenditures were $1,475,294, and the assessment rate was $0.0085 per kernelweight pound of walnuts. Budget categories for 1989–90 are $79,436 for administrative expenses, $300,000 for production research, $700,000 for the domestic market research and development program, and $37,000 for the 1990 crop estimate. Comparable actual expenditures for the 1988–89 crop were $75,999, $244,988, $688,554, and $30,500, respectively. Assessment income for 1989–90 is estimated to total as much as $1,539,707 based on an estimated crop of 181,142,000 kernelweight pounds of walnuts.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for the program need to be expedited. The Board needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 984

California, Marketing agreements and order, Walnuts.

For the reasons set forth in the preamble, it is proposed that a new § 984.341 be added as follows:

1. The authority citation for 7 CFR part 984 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 984—WALNUTS GROWN IN CALIFORNIA

2. New § 984.341 is added to read as follows:

§ 984.341 Expenses and assessment rate.

Expenses of $1,463,782 by the Walnut Marketing Board are authorized, and an assessment rate of $0.0085 per kernelweight pound of merchantable walnuts is established for the 1989–90 marketing year ending July 31, 1990.

Dated: October 25, 1989.

Animal and Plant Health Inspection Service

9 CFR Part 85

[Docket No. 89–022]

Pseudorabies

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the pseudorabies regulations to allow certain interstate movements of swine based on compliance with new herd vaccination and testing procedures. The effect of this action would be to allow an additional option for the interstate movement of swine without presenting a significant risk of pseudorabies being spread interstate.

DATE: Consideration will be given only to comments received on or before November 30, 1989.

ADDRESSES: To help ensure that your comments are considered, send an original and three copies to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 89–022. Comments received may be inspected at Room 1141 of the South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. William Stewart, Chief Staff Veterinarian, Swine Diseases Staff, VS, APHIS, USDA, Room 736, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7767.

SUPPLEMENTARY INFORMATION:

Background

Pseudorabies, also known as Aujeszky's disease, mad itch, and infectious bulbar paralysis, is caused by a herpes virus and is primarily a disease of swine. The regulations in 9 CFR part 85 (referred to below as the regulations) govern the interstate movement of swine and other livestock in order to help prevent the spread of pseudorabies. Swine are allowed to be moved interstate under specific conditions, as provided in §§ 85.3 through 85.13 of the regulations.

The specific conditions that apply depend, in part, upon whether the swine are known to be infected with or exposed to pseudorabies. Swine known to be infected with or exposed to the disease may be moved interstate under very restrictive conditions to prevent the interstate spread of the disease. Swine not known to be infected with or exposed to pseudorabies may be moved interstate under less restrictive conditions.

Within the latter category, swine vaccinated for pseudorabies are subject to tighter controls than unvaccinated swine. There are two related reasons for this. First, the pseudorabies vaccines that have been developed do not confer immunity from the disease; vaccinated swine can become infected and spread pseudorabies. The advantages of vaccination are that it increases the swine's resistance to the disease and, if infection occurs, lessens the severity of the illness and facilitates recovery. Also, vaccinated swine that become infected with pseudorabies generally shed less virus than nonvaccinated swine, making them less likely to spread the disease. The drawback is that vaccinated swine produce antibodies to the vaccine that cannot be distinguished by traditional pseudorabies tests from antibodies produced in response to the field strain of the virus that causes pseudorabies infection. Thus, the second reason for restricting the interstate movement of vaccinated swine is that the pseudorabies status of these swine cannot be determined by traditional tests.

A test has been developed that, when used in conjunction with a new vaccine, can distinguish between antibodies produced in response to the field strain of the pseudorabies virus and antibodies produced in response to the new vaccine. The new test is called the "HardChek® anti-pseudorabies virus glycoprotein X enzyme-linked immunosorbent assay test" (referred to below and in the proposed regulations as "HardChek® anti-PRV-gpX ELISA test"). The complementary vaccine is called the "PRV/Marker ™ vaccine."

The PRV/Marker ™ vaccine is a vaccine from which a nonessential glycoprotein (gpX) has been deleted. Swine vaccinated with the gpX-deleted vaccine would not produce antibodies to that gpX unless they were infected with the pseudorabies field virus or vaccinated with vaccines containing the gpX antigen. The HardChek® anti-PRV-gpX ELISA test is specific for antibodies to the gpX deleted from the PRV/Marker ™ vaccine, that is, it recognizes those antibodies but ignores others. Thus, the HardChek® anti-PRV-gpX ELISA test, when used in combination with the PRV/Marker ™ vaccine, can distinguish between swine vaccinated with the PRV/Marker ™ vaccine and swine infected with pseudorabies.

Data submitted to the Animal and Plant Health Inspection Service by the producers of the new vaccine and test, including results of field trials on these products, and other relevant literature are available for inspection at the Hyattsville, Maryland, offices of the Animal and Plant Health Inspection Service (Room 736, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782).

Based on this information, it appears that swine from a herd vaccinated and tested with these products could, under certain conditions, be moved interstate with fewer restrictions than swine vaccinated in the traditional manner, without increasing the risk of spreading pseudorabies interstate. We therefore propose to revise the regulations accordingly.

We anticipate that the proposed changes to the regulations would provide swine producers with a greater incentive to vaccinate their herds, thereby reducing pseudorabies in the United States. The American Association of Veterinary Laboratory Diagnosticians and the U.S. Animal Health Association recommend that we allow use of the PRV/Marker ™ vaccine and the associated HardChek® anti-PRV-gpX ELISA test.

Herd Status

To ensure that swine from herds vaccinated and tested with the PRV/

VOL 54 ISS 209 OCT 31 1989 UMI

Marker ™ vaccine and the HardChek® anti-PRV-gpX ELISA test can be moved interstate as proposed in this document (see "Interstate Movements" in this Supplementary Information) without increasing the risk of spreading pseudorabies interstate, the herd would have to meet certain conditions to ensure the swine are free of pseudorabies. Herds that meet these conditions would be designated as "qualified PRV/Marker vaccinated/gpX nagative herds." We propose the following requirements for achieving the maintaining this herd status:

Initial Qualifying Tests

(1) All swine in the herd over 6 months of age must be tested with an official pseudorabies serologic test. For a minimum of 30 days before the test, the herd must not have been a known infected herd. During the 90 days before the test, at least 90 percent of the swine in the herd either must have been on the premises and a part of the herd or must have entered the herd directly from a qualified pseudorabies nagative herd. If any of the tested swine are found positive on this or any other official pseudorabies test prior to vaccination with the PRV/Marker ™ vaccine, the requirements in paragraph (2) must be met.

These requirements appear necessary to establish that the herd is free of swine infected with or exposed to pseudorabies. Requiring a 30-day waiting period for herds that have had pseudorabies would ensure that the disease, if incubating in the herd, would be detectable by an official pseudorabies serologic test. Tests of more recently exposed swine may not yield a positive result because the swine would not have had time to develop sufficient antibodies to the virus. Placing restrictions on additions to the herd during the 90 days before the qualifying test would further reduce the chances of the herd containing swine that are in the initial stages of developing pseudorabies. Our experience with herds subject to these identical qualifying conditions (qualified pseudorabies negative herds) indicates that testing all swine in the herd over 6 months of age would be adequate to detect pseudorabies if it exists in the herd.

(2) If any swine in the herd test positive on the official pseudorabies test, those swine must be removed from the herd, and the premises on which the herd is kept must be disinfected in accordance with the regulations (see 9 CFR 85.13). No less than 30 days after the positive swine are removed and the premises are disinfected, all swine in the herd except swine nursing from their mothers must be tested with an official pseudorabies serologic test and found negative. Within 30 to 60 days after this first negative test, the herd must be tested again in accordance with paragraph (1), above.

These requirements appear necessary to establish that the herd no longer contains swine infected with or exposed to pseudorabies. Requiring that positive swine be removed from a herd is the only way to remove sources of infection from a herd; there are no effective treatments for pseudorabies. Cleaning and disinfection of premises in accordance with the regulations has been shown to destroy pseudorabies virus that may be present on inanimate objects. Follow-up testing of all remaining swine in the herd, except swine nursing from their mothers, is necessary to determine whether the herd is free of pseudorabies infection. Nursing swine would not need to be tested since the result of a pseudorabies test on the mother would be sufficient indication of the disease status of the nursing swine. Swine nursing from a dam infected with pseudorabies would become infected. Swine nursing from a dam free of pseudorabies would be unlikely to contract the disease since they would normally not come in contact with swine other than their dam or other swine in the same litter. Based on our experience with herds that have had pseudorabies, it appears that all swine other than those nursing from their mothers must be subjected to an official pseudorabies serologic test to determine whether the herd is free of pseudorabies. The 30-day waiting period before this test would help ensure that swine incubating the disease have had time to develop detectable levels of antibodies. If all tested swine are negative, then negative results on a second official pseudorabies serologic test 30 to 60 days later would establish that the herd is free of pseudorabies.

Vaccination and Follow-up Tests

(1) No more than 15 days after test results show the herd to be negative for pseudorabies in accordance with paragraph (1) under "Initial Qualifying Tests," all swine in the herd over 6 months of age must be vaccinated with the PRV/Marker™ vaccine.

We are proposing a 15-day time period to allow herd owners time to have the herd vaccinated, yet minimize the chances for exposure to pseudorabies between testing and vaccination. Based on our experience with pseudorabies controlled vaccinated herds, 15 days appears to be an appropriate amount of time.

(2) Not less than 35 days after vaccination with the PRV/Marker™ vaccine, all swine in the herd over 6 months of age must be tested with an official pseudorabies serologic test. All serological samples that are positive must be tested with the HerdChek® anti-PRV-gpX ELISA test and found negative.

Testing the vaccinated swine with an official pseudorabies serologic test would identify all swine in the herd that have antibody titers for pseudorabies. Testing those positive swine with the HerdChek® anti-PRV-gpX ELISA test would be necessary to show that the positive reaction to the official pseudorabies serologic test was in response to the PRV/Marker™ vaccine and not pseudorabies infection. We are proposing an interval of at least 35 days between vaccination with the PRV/Marker™ vaccine and the official pseudorabies serologic test to ensure that the vaccinated swine have sufficient time to develop detectable levels of antibodies to the PRV/Marker™ vaccine.

Maintaining Herd Status

We propose that qualified PRV/Marker vaccinated/gpX negative herds meet the following requirements to maintain their status:

(1) All swine over 6 months of age in the herd must be tested at least once a year with the HerdChek® anti-PRV-gpX ELISA test and found negative. This requirement could be met by testing 25 percent of the swine over 6 months of age every 80–105 days, or by testing 10 percent of the swine over 6 months of age each month and finding them negative. No swine could be tested twice in 1 year to comply with the 25 percent requirement, or twice in 10 months to comply with the 10 percent requirement.

Continued testing would be required to ensure that the herd remains free of pseudorabies. Testing all swine over 6 months of age has been found to be a sufficient method of monitoring for pseudorabies in herds not known to be infected with or exposed to the disease. Testing a certain percentage of the swine on a rotating basis throughout the year is desirable to find infection as early as possible if it develops in a herd.

(2) Swine may be added to a qualified PRV/Marker vaccinated/gpX negative herd only under one of the following conditions:

(i) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from another qualified PRV/Marker vaccinated/gpX negative herd, or from a qualified pseudorabies negative herd, without having any contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd.

(ii) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from a qualified pseudorabies negative herd, have contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to an official pseudorabies serologic test conducted 30 days or more after the swine are isolated.

(iii) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from another qualified PRV/Marker vaccinated/gpX negative herd, have contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to a HerdChek® anti-PRV-gpX ELISA test conducted 35 days or more after the swine are isolated.

(iv) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from a herd other than a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to two official pseudorabies serologic tests, one conducted at the time the swine are isolated, and the second conducted 30 days or more after the swine are isolated.

These conditions are designed to ensure that any swine added to the herd are free of pseudorabies.

Swine from qualified pseudorabies negative herds or qualified PRV/Marker vaccinated/gpX negative herds would present an insignificant risk of carrying pseudorabies infection, given the existing and proposed standards for achieving and maintaining herd status. If swine from these herds have no contact, en route, with swine from other types of herds, it is unlikely that they will be exposed to pseudorabies infection. There does not appear to be any need to isolate and test these swine before adding them to the herd.

If swine from a qualified pseudorabies negative herd do have contact, en route to their new herd, with swine from other than a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, the risk of exposure to infection would be increased. That is why we are proposing to isolate the swine until they are found negative to an official pseudorabies serologic test conducted 30 days or more after the swine are isolated. The same rationale applies to swine that are moved from another qualified PRV/Marker vaccinated/gpX negative herd and have contact with swine from other than a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd. The only difference is that these swine, vaccinated with the PRV/Marker™ vaccine, would need to be tested with the HerdChek® anti-PRV-gpX ELISA test rather than an official pseudorabies serologic test.

Swine from other than a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd would present the greatest risk of carrying and spreading pseudorabies infection. Requiring that the swine be isolated until they are found negative to two official pseudorabies serologic tests, one conducted at the time the swine are isolated, and the second conducted 30 days or more after the swine are isolated, would help ensure that only swine free of pseudorabies are added to the herd.

Interstate Movement of Swine From a Qualified PRV Marker Vaccinated/gpX Negative Herd

We propose to allow swine that are from a qualified PRV/Marker vaccinated/gpX negative herd, and that are not known to be infected or exposed to pseudorabies, to be moved interstate without further restriction under the pseudorabies regulations if:

(1) The swine are moved directly to a recognized slaughtering establishment, or directly through one or more slaughter markets and then directly to a recognized slaughtering establishment; or

(2) The swine are moved from a qualified PRV/Marker vaccinated/gpX negative herd directly to a feedlot, quarantined feedlot, or approved livestock market; or

(3) The swine are moved from an approved livestock market to a feedlot, quarantined feedlot, or other approved livestock market.

These interstate movements represent market channels for moving swine to slaughter, either directly or through markets or feedlots. Swine from a qualified PRV/Marker vaccinated/gpX negative herd would present an insignificant risk of carrying pseudorabies infection, given the proposed standards for achieving and maintaining herd status. If any of these swine became exposed to pseudorabies at any point along the way to slaughter, they would be unlikely, in most cases, to develop and spread the infection before being slaughtered, and, in any case, would not have contact with any swine other than those also moving to slaughter. Thus, these interstate movements would not present a significant risk of spreading pseudorabies interstate.

The regulations in 9 CFR part 71 contain identification and recordkeeping requirements for swine moved in interstate commerce, including swine moved in accordance with the pseudorabies regulations. These requirements appear adequate to allow the swine to be traced through market channels.

For all other interstate movements of swine from a qualified PRV/Marker vaccinated/gpX negative herd, we proposed to require that the swine be accompained by a certificate, and that the certificate be delivered to the consignee. In addition to other information routinely required on a certificate (see 9 CFR 85.1), the certificate would have to state that the swine are from a qualified PRV/Marker vaccinated/gpX negative herd and the date of the last qualifying test, and list the identification for the swine to be moved, in accordance with 9 CFR 71.19. Swine moved interstate for purposes other than slaughter, sale for slaughter, or feeding would be breeder swine or could have opportunity for contact with breeder swine. Breeder swine that become exposed to or infected with pseudorabies present a significant risk of spreading pseudorabies. Requiring the swine to be accompained by a certificate would provide the consignee with certification by a Veterinary Services representative, a State representative, or an accredited veterinarian that the swine are from a qualified PRV/Marker vaccinated/gpX negative herd and are not infected with or exposed to pseudorabies.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or

on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

According to the United States Department of Agriculture (USDA) Agricultural Statistics Board, in 1988 hogs were raised on 333,500 farms in the United States. This includes all farms that raised hogs of any type. The vast majority of producers raise hogs for the slaughter market, but a small number of farms raise hogs to produce breeding stock, which is sold to other hog producers. Very few, if any, producers who raise hogs for the slaughter market maintain qualified pseudorabies negative herds. It appears, from tabulating the membership rolls of hog breed associations, that about 12,000 farmers raise hog breeding stock. Of these producers' herds, 3,182 are listed by USDA and State regulatory officials as qualified pseudorabies-negative herds. These herds supply most of the U.S. hog seedstock.

We believe that under the proposed rule qualified pseudorabies negative herds are the only viable market for the PRV/Marker™ vaccine and the HerdChek® anti-PRV-gpX test kits. However, we believe these products will be used as a risk management tool by only a small number of these specialized hog producers. Their use would be optional. Producers' decisions to adopt this technology will depend on current disease exclusion costs, producers' perceptions of the risk of their herds' being infected with pseudorabies, and their personal preferences about assuming risk.

We estimate that owners of no more than 5 percent of the qualified pseudorabies negative herds will use the Marker vaccine and its companion test instead of or in addition to the management practices they currently use to prevent pseudorabies from entering their herds. Assuming an average of 100 sows and 10 boars in a herd and an annual production of 18 pigs weaned per sow per year, and that all breeding animals and their offspring are vaccinated annually, the estimated annual use of the vaccine would be 310,000 doses.

Some small businesses may realize a modest economic benefit through the sale of the PRV/Marker™ vaccine and the HerdChek® anti-PRV-gpX test kits. Other marker vaccines and tests for pseudorabies may be developed. When appropriate, APHIS would propose to amend the regulations to include these vaccines and tests. Of the dozen or so businesses that market pseudorabies vaccines and related products, we are aware of only one that currently markets the "HardChek® anti-PRV-gpX test kit, and another that markets the PRV/Marker™ vaccine. Both businesses appear to be small entities.

However, the two affected firms are working in a niche within a small part of a very large market. USDA records indicate that approximately 25.2 million doses of pseudorabies vaccine were produced in the United States in 1988. These records also indicate that about 65 percent of annual production (19.8 million doses) is for domestic use. The approximate annual value of the United States pseudorabies vaccine market, at $10 million, is just 2 percent of the United States $500 million-a-year veterinary biologics market. The estimated use of the Marker vaccine under the proposed regulations would expand the pseudorabies vaccine market by only 1.5 percent. Thus any strategic advantage gained by these firms, while important to them, would not be significant compared with the total veterinary biologics market.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The regulations in this proposal contain no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR part 3015, Subpart V.)

List of Subjects in 9 CFR Part 85

Animal diseases, Livestock, Pseudorabies, Quarantine, Reporting and recordkeeping requirments, Transportation.

Accordingly, 9 CFR part 85 would be amended as follows:

PART 85—PSEUDORABIES

1. The authority citation for part 85 would continue to read as follows:

Authority: 21. U.S.C. 111–112, 113, 115, 117, 120, 121, 123–126, 134b, 134f; 7 CFR 2.17, 2.51, and 3.71.2(d).

§ 85.1 [Amended]

2. In § 85.1, in the definition of "Official pseudorabies serologic test" the words "paragraph (q) of" would be removed.

3. In § 85.1, in the definition of "official pseudorabies test", the semicolon immediately after "(ELISA) Test" would be replaced by a comma, and the phrase "except for the HerdChek® anti-pseudorabies virus glycoprotein X enzyme-linked immunosorbent assay test (Herdchek® anti-PRV/gpX ELISA test);" would be added immediately after "(ELISA) Test,".

4. In § 85.1, in the definition of "Certificate", the phrase "are not pseudorabies vaccinates" would be removed and the phrase "are not vaccinated for pseudorabies with any vaccine other than the PRV/Marker™ vaccine" would be added in its place.

5. In § 85.1, two new definitions would be added, in alphabetical order, to read as follows:

§ 85.1 [Amended]

* * * * *

PRV/Marker vaccinate swine. Swine vaccinated with the PRV/Marker™ vaccine.

* * * * *

Qualified PRV/marker vaccinated/gpX negative herd. (a) Qualified PRV/marker vaccinated/gpX negative herd status is attained under the following conditions:

(1) All swine in the herd over 6 months of age must be tested with an official pseudorabies serologic test. For a minimum of 30 days before the test, the herd must not have been a known infected herd. During the 90 days before the test, at least 90 percent of the swine in the herd either must have been on the premises and a part of the herd or must have entered the herd directly from a qualified pseudorabies negative herd. If any of the tested swine are found positive on this or any other official pseudorabies test prior to vaccination with the PRV/Marker™ vaccine, the requirements in paragraph (a)(2) of this definition must be met.

(2) If any swine in the herd test positive on the official pseudorabies test, those swine must be removed from the herd, and the premises on which the herd is kept must be disinfected in accordance with § 85.13 of this part. No less than 30 days after the positive swine are removed and the premises are disinfected, all swine in the herd except swine nursing from their mothers must be tested with an official pseudorabies serologic test and found negative. Within 30 to 60 days after this first negative test, the herd must be tested again in accordance with paragraph (a)(1) of this definition.

(3) No more than 15 days after test results show the herd to be negative for pseudorabies in accordance with paragraph (a)(1) of this definition, all swine in the herd over 6 months of age must be vaccinated with the PRV/Marker™ vaccine.

(4) Not less than 35 days after vaccination with the PRV/Marker™ vaccine, all swine in the herd over 6 months of age must be tested with an official pseudorabies serologic test. All serological samples that are positive must be tested with the Herdchek® anti-PRV/gpX ELISA test and found negative.

(b) Qualified PRV/Marker vaccinated/gpX negative herd status is maintained under the following conditions:

(1) All swine over 6 months of age in the herd must be tested at least once a year with the Herdchek® anti-PRV/gpX ELISA test and found negative. This requirement may be met by testing 25 percent of the swine over 6 months of age every 80–105 days, or by testing 10 percent of the swine over 6 months of age each month and finding them negative. No swine may be tested twice in 1 year to comply with the 25 percent requirement, or twice in 10 months to comply with the 10 percent requirement.

(2) Swine may be added to a qualified PRV/Marker vaccinated/gpX negative herd only under one of the following conditions:

(i) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from another qualified PRV/Marker vaccinated/gpX negative herd, or from a qualified pseudorabies negative herd, without having any contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd.

(ii) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from a qualified pseudorabies negative herd, have contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to an official pseudorabies serologic test conducted 30 days or more after the swine are isolated.

(iii) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from another qualified PRV/Marker vaccinated/gpX negative herd, have contact en route with swine other than those from a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to a HerdChek® anti-PRV-gpX ELISA test conducted 35 days or more after the swine are isolated.

(iv) The swine are moved to the qualified PRV/Marker vaccinated/gpX negative herd from a herd other than a qualified PRV/Marker vaccinated/gpX negative herd or a qualified pseudorabies negative herd, and, before being added, are isolated until they are found negative to two official pseudorabies serologic tests, one conducted at the time the swine are isolated, and the second conducted 30 days or more after the swine are isolated.

* * * * *

§ 85.6 [Amended]

6. In § 85.6, remove the phrase "pseudorabies vaccinate swine" and add the phrase "pseudorabies vaccinate swine, except PRV/Marker vaccinate swine," in the following places:

(a) The section heading;

(b) The heading for paragraph (a); and

(c) The heading for paragraph (b).

7. In § 85.6, remove the phrase "Pseudorabies vaccinate swine" and add the phrase "Pseudorabies vaccinate swine, except PRV/Marker vaccinate swine," in the following places:

(a) In the introductory text to § 85.6;

(b) In the introductory text to paragraph (a); and

(c) In the introductory text to paragraph (b).

§§ 85.9, 85.10, and 85.11 [Redesignated from §§ 85.8, 85.9, and 85.10]

5. Sections 85.8, 85.9, and 85.10 would be redesignated as §§ 85.9, 85.10, and 85.11, respectively.

6. A new § 85.8 would be added to read as follows:

§ 85.8 Interstate movement of swine from a qualified PRV/Marker vaccinated/gpX negative herd and not known to be infected with or exposed to pseudorabies.

Swine that are from a qualified PRV/Marker vaccinated/gpX negative herd, and that are not known to be infected or exposed to pseudorabies, may be moved interstate only in accordance with the following provisions:

(a) Without further restriction under this part if:

(1) The swine are moved directly to a recognized slaughtering establishment, or directly through one or more slaughter markets and then directly to a recognized slaughtering establishment; or

(2) The swine are moved from a qualified PRV/Marker vaccinated/gpX negative herd directly to a feedlot, quarantined feedlot, or approved livestock market; or

(3) The swine are moved from an approved livestock market to a feedlot, quarantined feedlot, or other approved livestock market.

(b) For all interstate movements other than those set forth in paragraph (a) of this section, the swine must be accompanied by a certificate, and the certificate must be delivered to the consignee. In addition to the information required by § 85.1, the certificate must state that the swine are from a qualified PRV/Marker vaccinated/gpX negative herd and the date of the herd's last qualifying test, and must list the identification for the swine to be moved interstate, in accordance with § 71.19 of this chapter.

Done in Washington, DC, this 25th day of October 1989.

Larry B. Slagle,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 61

RIN 1076-AC11

Preparation of Rolls of Indians

September 8, 1989.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Indian Affairs (BIA) is proposing to amend the regulations contained in 25 CFR part 61 governing the preparation of rolls of Indians. The Cow Creek Band of Umpqua Tribe of Indians Distribution of Judgment Funds Act of 1987 directs the Secretary of the Interior to prepare a tribal membership roll in accordance with the regulations contained in 25 CFR part 61. The regulations in Part 61 provide general enrollment procedures that can be made applicable to the preparation of a specific roll of Indians by amending the regulations to include the qualifications for enrollment and the deadline for filing applications for the particular roll. The BIA is proposing to amend Part 61 by adding a paragraph (e) to § 61.4 to include the qualifications for enrollment and the deadline for filing applications so that the procedures contained in part 61 will govern the preparation of the tribal membership

VOL 54 ISS 209 OCT 31 1989 UMI

roll of the Cow Creek Band of Umpqua Tribe of Indians.

DATE: Comments must be received on or before November 30, 1989.

ADDRESS: Written comments should be directed to the Chief, Division of Tribal Government Services, Bureau of Indian Affairs, Mail Stop 4627 MIB, 18th & C Streets, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Kathleen L. Slover, Branch of Tribal Enrollment Services, Division of Tribal Government Services, Bureau of Indian Affairs, Mail Stop 4627 MIB, 18th & C Streets, NW., Washington, DC 20240, telephone number: (202) 343–1702 (FTS 343–1702).

SUPPLEMENTARY INFORMATION: This proposed amendment to a rule is published in exercise of rulemaking authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in the Departmental Manual at 209 DM 8.

A proposed rule to amend the regulations contained in Part 61 to include the qualifications for enrollment and the deadline for filing applications for the tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians was previously published for public comment in the **Federal Register** on Friday, June 3, 1988, 53 FR 20335. An editorial correction was published in the **Federal Register** on Wednesday, June 29, 1988, 53 FR 24551.

The Cow Creek Band of Umpqua Tribe of Indians was awarded judgment funds in docket numbered 53–61L by the United States Claims Court. Funds to satisfy the award were appropriated by Congress. The Cow Creek Band of Umpqua Tribe of Indians Distribution of Judgment Funds Act of October 26, 1987, Pub. L. 100–139 (Judgment Act), authorized the use and distribution of the judgment funds.

Section 5 of the Judgment Act, which amended the Cow Creek Band of Umpqua Tribe of Indians Recognition Act of December 29, 1982 (Recognition Act), directs the Secretary to prepare a tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians in accordance with the regulations contained in 25 CFR part 61. The Act further directs that the tribal membership roll be published in the **Federal Register.**

Language was included in the Fiscal Year 1989 Interior Appropriations Act of September 27, 1988, Public Law 100–446, to amend the Cow Creek Band of Umpqua Tribe of Indians Recognition Act. The amendment to the Recognition Act affects the qualifications for enrollment on the tribal membership roll that were in the proposed rule published in the **Federal Register** on June 3, 1988. Because the effect, which will be discussed below under COMMENTS AND CHANGES, is significant, the BIA is again issuing a proposed rule to amend the regulations contained in part 61.

The policy of the Department of the Interior is, whenever practical, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding this proposed amendment.

The regulations in part 61 provide general enrollment procedures and contain provisions which are not applicable in the preparation of all rolls. As a matter of clarification, because the BIA is preparing a tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians under this proposed amendment, review of applications by tribal authorities under section 61.10 will be applicable to provide for maximum tribal participation in the enrollment process.

Also, in addition to general public notice, to provide actual notice of the preparation of the roll to as many potentially eligible beneficiaries as possible, the Superintendent, Siletz Agency, Bureau of Indian Affairs, shall send notices in accordance with section 61.5(c) to all persons whose names appear on the so-called Interrogatory No. 14 roll and all descendants, whose names have been furnished to the BIA, of persons named on the so-called Interrogatory No. 14 roll at their last available address. The notice shall advise individuals of the preparation of the roll and the relevant procedures to be followed, including the qualifications for enrollment and the deadline for filing application forms. It should be noted, however, that the ability of the Superintendent to send notices will be dependent upon the availability of addresses furnished either by the individuals or the tribe. An application form will be mailed with each notice.

The primary author of this document is Kathleen L. Slover, Tribal Enrollment Specialist, Division of Tribal Government Services, Mail Stop 4627 MIB, Bureau of Indian Affairs, 18th and C Streets, NW., Washington, DC 20240.

Comments and Changes

The period for commenting on the previously proposed amendment to 25 CFR part 61 to add paragraph (e) to section 61.4 to include the qualifications for enrollment and a deadline for filing applications for the tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians closed on July 5, 1988. Comments were received from 46 individuals and the Cow Creek Band of Umpqua Tribe of Indians through its General Counsel within the public comment period. Basically only three provisions were addressed by the commenters: (1) The requirement that all individuals must establish Cow Creek Indian ancestry to be included on the membership roll of the Cow Creek Band of Umpqua Tribe of Indians, (2) the deadline date for filing applications that was published in the proposed rule document and (3) the requirement that all individuals have to file applications by the deadline date to establish eligibility for enrollment.

1. Section 5 of the Judgment Act states that the Secretary is to prepare a tribal membership roll comprised of "Indian individuals" who were not members of any other federally recognized Indian tribe on July 30, 1987, and (1) who are named on a tribal roll dated September 13, 1980 (the so-called Interrogatory No. 14 roll); (2) who were born on or prior to October 26, 1987, and are descendants of persons named on the so-called Interrogatory No. 14 roll; or (3) who are descendants of persons considered to be members of the Cow Creek Band of Umpqua Tribe of Indians for the purposes of the treaty entered between such Band and the United States on September 19, 1853.

The Department had concluded that the enrollment requirements stated in the Judgment Act were ambiguous, in particular it was not clear what was meant by "Indian individuals" in the context of the Judgment and Recognition Acts. A review of the legislative history found no clear intent that when Congress recognized the Cow Creek Band of Umpqua Tribe of Indians it was recognizing a tribal entity comprised of individual Indians, irrespective of tribal affiliation, rather than a tribe comprised of Cow Creek descendants.

If all individuals were not required to establish Cow Creek Indian ancestry, the Secretary might be in the position of preparing and approving a tribal membership roll comprised of individuals who did not meet the current membership requirements or the membership requirements under which the so-called Interrogatory No. 14 roll was prepared. The Judgment Act provided that until the tribe adopted and the Secretary approved a new governing document, the interim governing document would "be the tribal bylaws entitled 'Bylaws of Cow Creek Band of Umpqua Tribe of Indians' which bear an 'approved' date of '9–10–78.' " The 1978 Bylaws were also the document under which the so-called Interrogatory No. 14 roll was prepared. The membership

article of the Bylaws states that no person "shall be a member * * * unless he shall be able to trace his ancestry to the members of the Cow Creek Band who claimed and lived upon the land described in the treaty of September 19, 1853, with the United States Government."

The BIA was reluctant to expand administratively the membership of the Cow Creek Band of Umpqua Tribe of Indians beyond clear Congressional intent. Consequently, the proposed rule published on June 3, 1988, to govern the preparation of the tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians required all persons, including those whose names appeared on the so-called Interrogatory No. 14 roll and their descendants, to establish that they were of Cow Creek Indian ancestry to qualify for enrollment.

During Congressional consideration of the Fiscal Year 1989 Interior Appropriations Act, disapproval of the BIA's interpretation was expressed and the Secretary was directed to revise the proposed rule to include all members on the so-called Interrogatory No. 14 roll who satisfy basic Indian ancestry requirements. Accordingly, the Fiscal Year 1989 Interior Appropriations Act amended the Recognition Act by striking out "Indian individuals" and inserting "Cow Creek descendants or other Indian individuals."

As a result of the amendment to the Recognition Act, the BIA has determined that when Congress recognized the Cow Creek Band of Umpqua Tribe of Indians, it was recognizing the tribe and its members, irrespective of their tribal affiliation, rather than a tribe comprised exclusively of Cow Creek descendants.

Section 3 of the Restoration Act, codified at 25 U.S.C. 712a, in part, provides:

> (a) Federal Recognition.—Notwithstanding any provision of the Act approved August 13, 1954 (25 U.S.C. 691 et seq.) [Western Oregon Indians Termination of Federal Supervision Act], or any other law, Federal recognition is extended to the Cow Creek Band of Umpqua Tribe of Oregon. * * *
>
> (b) Restoration of Rights and Privileges.—All rights and privileges of *the tribe and the members of the tribe* under any Federal treaty, Executive order, agreement, or statute, or under any other authority, which may have been diminished or lost under the Act approved August 13, 1954 (25 U.S.C. 691 et seq.), are restored, and the provisions of such Act shall be inapplicable to *the tribe and to members of the tribe* after the date of enactment [December 29, 1982] of this Act. [Italic supplied.]

The Restoration Act, as amended, defines "member" as a person enrolled on the membership roll of the tribe in accordance with the membership provisions that are contained in the Judgment Act. Under the Judgment Act until a permanent roll is prepared by the Secretary the membership shall consist of all persons named on the so-called Interrogatory No. 14 roll and their descendants.

When Congress restored the Cow Creek Band of Umpqua Tribe of Indians, it was restoring not only the tribe, but individual members, i.e., those persons named on the so-called Interrogatory No. 14 roll and their descendants. Consequently, "other Indian individuals" named on the so-called Interrogatory No. 14 roll and their descendants, irrespective of their tribal affiliation, have been effectively restored and may "satisfy basic Indian ancestry requirements." Appropriate changes have been made to the proposed amendment.

Consistent with a generally accepted legal definition of Indian and absent any specific statutory language to the contrary, individuals, in addition to being recognized as Indian by their tribe or community, must possess aboriginal ancestry indigenous to the United States. [*See* F. Cohen, HANDBOOK OF FEDERAL INDIAN LAW, pp. 19–20 (1982 ed.)] Although persons named on the so-called Interrogatory No. 14 roll and their descendants may be recognized as Indians by the tribe, they will, nevertheless, be required to establish that they possess Indian ancestry indigenous to the United States to qualify for inclusion on the tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians being prepared. Appropriate changes have been made to the proposed amendment to part 61 from what was previously proposed.

2. As, the proposed amendment to part 61 was published in the **Federal Register**, the date of August 2, 1988, was inserted in paragraph (e)(2) of section 61.4, as the deadline for filing applications to establish eligibility for inclusion on the roll of the Cow Creek Band of Umpqua Tribe of Indians being prepared under the regulations. Most of the commenters believed that the deadline of August 2, 1988, was not a reasonable or adequate length of time. The insertion of August 2, 1988, in the proposed amendment when it was published was, however, an editorial error. The deadline in the proposed amendment should have been published to read as "60 days from the effective date of the final rule." A document was published in the **Federal Register** on Wednesday, June 29, 1988 (53 FR 24551), to make that correction. The commenters did not suggest an alternate deadline or specify a particular length of time for the filing of applications. Consequently, no change is being made. A deadline date of 60 days from the effective date of the final rule is being proposed.

3. As the amendment to part 61 to govern the preparation of the membership roll of the Cow Creek Band of Umpqua Tribe of Indians was previously proposed, all persons including those named on the so-called Interrogatory No. 14 roll and their descendants were required to file application forms by the deadline date to establish eligibility for enrollment. One of the commenters, the General Counsel on behalf of the tribe, objected strongly and found this requirement directly contrary to the Judgment Act. It is presumed that this is a twofold objection, both to the requirement that individuals named on the so-called Interrogatory No. 14 roll and their descendants must file application forms and that they must file before the deadline date to establish eligibility for enrollment.

The commenter argued that section 5 of the Judgment Act directs that only the third category of potentially eligible individuals, i.e., those who are descendants of persons considered to be members of the Cow Creek Band of Umpqua Tribe of Indians for the purposes of the treaty entered between such Band and the United States on September 19, 1853, must apply for inclusion on the membership roll, while mandating the inclusion of all Indian individuals, or as amended, all Cow Creek descendants or other Indian individuals named on the so-called Interrogatory No. 14 roll and their descendants. The commenter found that the Congressionally-established distinction in the Judgment Act between the section 5(b) (1) and (2) enrollees, i.e., so-called Interrogatory No. 14 enrollees and their descendants, on one hand and section 5(b)(3) enrollees, i.e., descendants of persons considered to be members of the historical Cow Creek Band, on the other is confirmed by section 5(c) which mandates regulations covering the enrollment process for section 5(b)(3) enrollees only. Further, these group-specific regulations are necessary because only section 5(b)(3) enrollees must actually apply to the Secretary for inclusion on the tribal membership roll.

Section 5(c) is not the only reference in section 5 of the Judgment Act to regulations for enrollment purposes. Section 5(b) directs the Secretary to prepare the tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians "in accordance with the

VOL 54 ISS 209 OC 31 1989 UMI

regulations contained in part 61 of title 25 of the Code of Federal Regulations." Thus, the enrollment process of all categories of eligibles is, in fact, subject to Secretarial regulations.

An early version of the proposed Cow Creek legislation contained specific language granting a "rebuttable presumption" of eligibility for those persons whose names were listed on the so-called Interrogatory No. 14 roll, but that provision was removed from the Judgment Act as enacted. Furthermore, recent considerations of the Judgment and Restoration Acts still indicate a Congressional intent that persons named on the so-called Interrogatory No. 14 roll must satisfy basic Indian ancestry requirements. Consequently, the real issue here is the appropriateness of requiring the filing of application forms to meet the burden of proof.

The so-called Interrogatory No. 14 roll is basically a listing of names. It does not contain sufficient information on which to base a determination of eligibility for enrollment on the tribal membership roll being prepared under this amendment. The most suitable manner in which to ensure that adequate information and documentation is submitted is to require that all persons including those named on the Interrogatory No. 14 roll and their descendants submit application forms for enrollment on the tribal membership roll being prepared under this amendment to part 61.

The regulations contained in part 61 provide in section 61.6(c) that "[a]pplication forms may be filed by sponsors on behalf of other persons." Under section 61.1 "sponsor" is defined as "any person who files an application for enrollment or appeal on behalf of another person." Consequently, under the regulations the tribe can file applications on behalf of their members and relieve the individuals of the burden.

No alternative manner for the BIA to obtain the necessary Indian ancestry information about the individuals named on the so-called Interrogatory No. 14 roll and their descendants was offered by the commenter. Consequently, the proposed rule to amend part 61 requires the submission of application forms for all persons including those named on the so-called Interrogatory No. 14 roll and their descendants to establish eligibility for enrollment on the tribal membership roll being prepared.

As indicated above, the requirement that applications be filed and the requirement that applications be filed by a deadline are considered two issues. The proposed amendment imposed both requirements on all persons including those named on the so-called Interrogatory No. 14 roll and their descendants.

The BIA has found that if a roll is ever to be completed, there must be a deadline for filing applications. Although the class of persons named on the so-called Interrogatory No. 14 roll is a matter of record, such persons must still establish their eligibility for enrollment. If a deadline is not imposed on this class of persons, there might then be confusion as to whether applications had to be filed at all. Also, if a deadline is not set, there would be no reasonable basis for determining when the BIA could take actions rejecting persons for failure to establish that they met the requirements for enrollment. As far as descendants of persons named on the so-called Interrogatory No. 14 roll, that class of individuals is not a matter of record. Although the BIA has received listings from time to time of "supplemental enrollees," BIA's records may not be complete. To avoid any confusion as to who has to file applications and when the applications have to be filed, the proposed rule to amend part 61 requires all persons including those named on the so-called Interrogatory No. 14 roll and their descendants to submit applications by the deadline specified to establish eligibility for enrollment. Furthermore, such persons can be rejected solely for failure to file on time regardless of whether they otherwise meet the qualifications for enrollment. Therefore, no change has been made to the amendment from what was previously proposed.

It should be noted the Judgment Act does provide that after completion and publication in the **Federal Register**, membership in the Cow Creek Band of Umpqua Tribe of Indians shall be limited to persons listed on the tribal membership roll being prepared and their descendants. However, the Judgment Act further provides that the Cow Creek Band of Umpqua Tribe of Indians, at its discretion, may subsequently grant tribal membership to any person of Cow Creek Band of Umpqua ancestry who under tribal procedures applies to the tribe for membership and is determined to meet the tribal requirements for membership.

Other Changes

No other changes have been made to the text of the amendment adding a new paragraph (e) to § 61.4 of part 61 to govern the preparation of a tribal membership roll of the Cow Creek Band of Umpqua Tribe of Indians from what was published in the proposed rule. However, the proposed rule does not revise the authority citation for Part 61 as previously proposed. Section 6 of the Judgment Act directed the Secretary to determine the eligibility of two additional categories of Cow Creek descendants. On Wednesday, April 6, 1988, 53 FR 11271, a final rule was published amending Part 61 to govern processing of applications from the two other categories of Cow Creek Indian descendants. The final rule revised the authority citation for part 61 and no further revision is necessary.

Paperwork Reduction Act

The Office of Management and Budget has informed the Department of the Interior that the information collection requirements contained in this part 61 need not be reviewed by them under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Executive Order 12291

The Department of the Interior has determined that this is not a major rule under E.O. 12291 because only a limited number of individuals will be affected and those individuals who are determined eligible to be enrolled on the tribal membership roll will be participating in the programs of one tribal entity funded by a relatively small judgment award granted the Cow Creek Band by the United States Claims Court.

Compliance With Other Laws

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because of the limited applicability as stated above.

The Department of Interior has determined that this rule is not a major Federal action significantly affecting the quality of the human environment and that neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 25 CFR Part 61

Indians—claims, Indians—enrollment.

Accordingly, it is proposed that part 61 of Subchapter F of Chapter I of Title 25 of the Code of Federal Regulations be amended as shown.

1. The authority citation for part 61 continues to read as follows:

Authority: 5 U.S.C. 301; 25 U.S.C. 2 and 9; 25 U.S.C. 1401 et seq., as amended; Pub. L. 100–139; Pub. L. 100–580.

2. Section 61.4 is amended by adding a new paragraph (e) to read as follows:

§ 61.4 Qualifications for enrollment and the deadline for filing application forms.

* * * * *

(e) *Cow Creek Band of Umpqua Tribe of Indians.* (1) Pursuant to Section 5 of the Cow Creek Band of Umpqua Tribe of Indians Distribution of Judgment Funds Act of October 26, 1987, Pub. L. 100–139, a tribal membership roll is to be prepared comprised of all persons who are able to establish that they are of Cow Creek or other Indian ancestry indigenous to the United States based on any rolls or records acceptable to the Secretary and were not members of any other Federally recognized Indian tribe on July 30, 1987; and:

(i) Who are named on the tribal roll dated September 13, 1980, the so-called Interrogatory No. 14 roll;

(ii) Who are descendants of individuals named on the tribal roll dated September 13, 1980, the so-called Interrogatory No. 14 roll, and were born on or prior to October 26, 1987; or

(iii) Who are descendants of individuals who were considered to be members of the Cow Creek Band of Umpqua Tribe of Indians for the purposes of the treaty entered between such Band and the United States on September 18, 1853.

(2) Application forms for enrollment must be filed with the Superintendent, Siletz Agency, Bureau of Indian Affairs, P.O. Box 539, Siletz, Oregon 97380, by (60 days from the effective date of the Final rule). Application forms filed after that date will be rejected for inclusion on the tribal membership roll for failure to file on time regardless of whether the applicant otherwise meets the qualifications for enrollment.

BILLING CODE 4310–02–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1614

RIN 3046–AA11

Federal Sector Equal Employment Opportunity

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Equal Employment Opportunity Commission is proposing a fundamental restructuring of the Federal sector EEO complaint process in this new part 1614 to its regulations. The new regulations will result in quicker, more efficient processing and will promote administrative fairness in the process of Federal sector EEO complaints.

DATES: Written comments on the proposed regulations must be received on or before January 2, 1990. The Commission proposes to consider any comments received and thereafter adopt final regulations.

ADDRESSES: Comments should be addressed to the Office of the Executive Secretariat, Room 10402, Equal Employment Opportunity Commission, 1801 L Street, NW., Washington, DC 20507. Copies of comments submitted by the public will be available for review at the Commission's library, Room 6502, 1801 L Street, NW., Washington, DC between the hours of 9:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Assistant Legal Counsel, at (202) 663–4669, Thomas J. Schlageter, Senior Attorney at (202) 663–4669, or Kathleen Oram, Staff Attorney at (202) 663–4669.

SUPPLEMENTARY INFORMATION: Pursuant to Reorganization Plan No. 1 of 1978, 43 FR 19807 (May 9, 1978), and Executive Order 12106, 44 FR 1053 (December 28, 1978), authority for the administration and enforcement of equal opportunity in Federal employment, previously vested in the Civil Service Commission, was transferred to the Equal Employment Opportunity Commission. The Commission is specifically granted the authority to issue rules, regulations, orders and instructions pursuant to Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e–16(b); the Age Discrimination in Employment Act of 1967, 29 U.S.C. 633a(b); the Rehabilitation Act of 1973, 29 U.S.C. 794a(a)(1); the Fair Labor Standards Act, 29 U.S.C. 201 *et seq.*, and E.O. 12067.

Pursuant to the foregoing authorities, the Commission is publishing a proposed part 1614 that fundamentally restructures the Federal sector equal employment opportunity complaint process. Part 1614 represents the Commission's response to numerous commentaries on the existing Federal sector complaint process, located at 29 CFR part 1613, that was created by the Civil Service Commission in 1972, 37 FR 22,717 (October 21, 1972). Recent commentaries on part 1613 include a Government Accounting Office Audit Report, comments by the Assistant Secretaries for Management Group, and the latest in the series, the House Employment and Housing Subcommittee's Report, "Overhauling the Federal EEO Complaint Processing System: A New Look at a Persistent Problem." H.R. Rep. No. 456, 100th Cong., 1st Sess. (1987).

The new part will apply to all counseling efforts pending on or commencing after the effective date of the regulations as well as to all complaints filed after the effective date of the regulations; complaints previously filed will continue to be processed under part 1613. The major differences between part 1613 and proposed part 1614 are discussed below.

A. Organization

Proposed part 1614 is organized differently than part 1613. Part 1613 is organized according to the type of discrimination complaint at issue; it has separate subparts for Title VII complaints, mixed case complaints, age complaints, class complaints, handicap complaints, and old mixed case complaints. Proposed part 1614 eliminates the repetition and cross-references inherent in the part 1613 scheme by consolidating the complaint processing procedures as much as possible. It is organized into six subparts. Subpart A concerns the agencies' programs for promoting equal employment opportunity and the procedures for agency processing of individual complaints of discrimination. Subpart B provides additional provisions that are applicable to the processing of particular types of complaints (i.e., ADEA, Equal Pay Act, Rehabilitation Act, class). Subpart C explains the relationship between the EEO process and the negotiated grievance process and between the EEO process and appeals to MSPB. Subpart D describes the right and method by which a complainant can appeal to EEOC and the right to file civil actions under each statute administered by EEOC. Subpart E sets forth EEOC's policy on remedies and corrective action when discrimination has occurred. Subpart F contains miscellaneous provisions of general applicability to agency EEO programs.

B. Individual Complaint Process

Proposed part 1614 also changes the complaint process for individual complaints. As under part 1613, a person who believes he or she has been retaliated against or discriminated against on the basis of race, color, religion, sex, national origin, age, or handicap must first seek counseling from the alleged discriminating agency and then file a written complaint with that agency. The agency must

VOL 54 ISS 209 OCT 31 1989 UMI

acknowledge receipt and, if properly filed, investigate. Proposed part 1614, however, eliminates the hearing from the agency investigation stage and requires the agency to investigate, attempt resolution and issue a notice of final action within 180 days. (A complainant's right to a hearing is being shifted from the agency investigation process to the EEOC appeal process; only the timing of the request, not the right to a hearing itself, is being modified by the proposal.) Because agencies' responsibilities in the 180-day period are limited to investigation and settlement attempts, it is anticipated that agencies will be able to complete investigations within that time limit.

The new procedure allows a large degree of flexibility in the investigation of complaints. The agency can use an exchange of letters, position papers, interrogatories, investigation, fact-finding conference or any other method or combination of methods that will lead to the development of a complete factual record. Agencies can incorporate alternative dispute resolution techniques into their investigations in order to facilitate early resolution of complaints. The Commission encourages agencies to explore the possibility of tailoring their investigative procedures to the issue(s) raised in a complaint and to adopt procedures that emphasize prompt resolution.

If the complainant wishes to pursue the matter beyond the agency level, he or she may file a civil action in federal district court or may appeal the notice of final action to the EEOC. In an appeal, EEOC will review the agency record to determine if it is adequate for decision. If it is not, EEOC will supplement the agency investigation by various methods. It may remand part or all of the matter to the agency for further investigation and may draw an adverse inference if the agency fails to supplement the record within the time specified by the Commission or it may refer the matter to an EEOC field office for investigation and require that the agency reimburse the Commission for the investigation. Although § 1613.216(c) of the current regulations provides for reimbursement, it has seldom been used; the Commission intends to make full use of the reimbursement provision in the proposed process. If an agency fails to develop an adequate record, the Commission may also send notice of this deficiency to an appropriate agency official or Congressional committee or take other appropriate action.

Once EEOC has determined the record is complete, it will so notify the parties and the complainant will have 15 days within which to request a hearing. A party may request that the Administrative Judge issue recommended findings and conclusions without a hearing if there are not genuine issues of fact or of credibility. After the Administrative Judge issues recommended findings and conclusions, or after the complainant fails to timely request a hearing, the EEOC will issue a decision on the appeal and the appellant can then seek reopening or file a civil action in federal court. By shortening the agency processing time, independently reviewing the agency's investigation and, when appropriate, conducting its own investigation, EEOC has attempted to make the federal sector process more like its private sector charge process.

By providing for EEOC review of agency investigations early in the process and for EEOC supplementation of agency investigations when necessary, the proposed part should correct any perceived conflict of interest or unfairness in the current part 1613 practice of agency self-investigation. The proposed part should also eliminate the time delays and backlogs frequently associated with part 1613 agency complaint processing by limiting agency processing to 180 days and by reducing the number of decision-making levels (proposed part 1614 eliminates the proposed disposition).

C. The Rehabilitation Act and Reassignment

In proposed section 1614.103, the Commission defines the scope of the part. In a change from § 1613.701(b), § 1614.103 states that for purposes of the Rehabilitation Act, the part applies to military departments as defined in 5 U.S.C. 102, executive agencies as defined in 5 U.S.C. 105, the U.S. Postal Service, the Postal Rate Commission and the Tennessee Valley Authority. This definition of charge processing jurisdiction is based on the plain language of section 501 of the Rehabilitation Act which limits coverage to departments, agencies and instrumentalities in the executive branch, and brings the regulation into conformance with a recent decision of a United States Court of Appeals. In *Judd* v. *Billington*, 863 F.2d 103 (D.C. Cir. 1988), the court held that section 791 of the Rehabilitation Act "applies only to employees in the executive branch. *See* 29 U.S.C. 791(b)." 863 F.2d at 105. The Commission recently acknowledged and adopted the *Judd* decision in *Faucette* v. *Kennickell*, Request No. 05880686 (March 1, 1989).

The former Civil Service Commission had authority to issue regulations covering competitive positions in legislative and judicial branch agencies, 5 U.S.C. 7153, however, that authority passed, not to EEOC, but to the Office of Personnel Management in 5 U.S.C. 7203. EEOC has requested that the Office of Personnel Management issue a regulation under section 7203 extending regulatory coverage of the Rehabilitation Act to competitive positions in the legislative and judicial branches. In addition, EEOC has asked the Interagency Committee on Handicapped Employees to recommend a legislative change to section 501 of the Rehabilitation Act to provide competitive employees of legislative and judicial branch agencies with a remedy under the Rehabilitation Act.

The Commission has taken the position that, under certain circumstances, an agency is required by section 501 of the Rehabilitation Act of 1973, 5 U.S.C. 791, and the Commission's implementing regulations to consider reassignment as a reasonable accommodation. *See Ignacio* v. *United States Postal Service*, Petition No. 03840005 (Sept. 4, 1984), upheld, 30 M.S.P.R. 471 (Spec. Panel 1986). The courts have not embraced this position. Congress intended the Federal government to be a model employer of the handicapped and the Commission believes that reassignment of employees with handicaps who can no longer perform in their positions is a necessary component of that responsibility. The Commission is, therefore, proposing a new § 1614.203(g), which imposes a duty to consider reassignment as part of an agency's affirmative action obligation under section 501.

The Supreme Court has recognized a distinction in the Rehabilitation Act's civil rights provisions between nondiscrimination and affirmative action. In *Southeastern Community College* v. *Davis*, 442 U.S. 397, 410 (1979), the Court contrasted the "evenhanded treatment of qualified handicapped persons" required by section 504 with the "affirmative efforts to overcome the disabilities caused by handicaps" required by section 501 and noted the requirements of the latter section for affirmative action program plans that describe how the special needs of handicapped employees are being met. The Court reiterated in *Alexander* v. *Choate*, 469 U.S. 287, 300 n.20 (1985), the distinction between the nondiscriminatory reasonable accommodations required by section 504 and the affirmative action required by section 501 to effect substantial changes, adjustments and modifications in existing personnel practices. Section 501 requires each agency to submit an affirmative action program plan for the hiring, placement and advancement of handicapped individuals including a description of the extent to which and methods whereby the special needs of handicapped individuals are being met.

The Commission can require that such plans include reassignment as a method of meeting the special needs of handicapped employees. As a special affirmative action requirement, the reassignment obligation would not be a component of the statute's reasonable accommodation requirement and would not be subject to the undue hardship limitation. Because this would be a new provision implementing the affirmative action requirements of section 501 only, the case law interpreting reasonable accommodation would be inapplicable. Thus, cases involving reassignment would rely on this new provision and not the reasonable accommodation case law in determining the proper legal standards for such reassignments under section 501.

The proposed paragraph does not require the Postal Service to reassign an employee to a position in a different craft or to make any other reassignment that would be inconsistent with the terms of a collective bargaining agreement covering an employee. This except for the Postal Service in included in order to be consistent with the reassignment requirements of 5 U.S.C. 8337 and 5 U.S.C. 8451. The Commission seeks comment on this new proposal.

D. Opting Out of Class Complaints

The Commission proposes to delete the opting out provisions contained in § 1613.605(b). The class complaint regulations are based on Rule 23 of the Federal Rules of Civil Procedure. *See* 41 FR 8081 (Feb. 24, 1976); 42 FR 11807 (March 1, 1977). Rule 23 governs class action lawsuits; among other things, it defines the different types of class actions and states the required notice provisions and opting out provisions for each. In court, employment discrimination class actions are generally treated under subsection (b)(2) of Rule 23, *Holmes* v. *Continental Can Co.*, 706 F.2d 1144, 1152 (11th Cir. 1983). A prerequisite of a "(b)(2)" class is that the defendant "acted or refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole." Fed. R. Civ. P. 23(b)(2). The right to opt out of such a class could be inconsistent with the prerequisite of a (b)(2) class that relief is appropriate for the class as a whole. Some courts have permitted class members to opt out of a (b)(2) class but only at the settlement or relief stage. *Cox* v. *American Cast Iron Pipe Co.*, 784 F.2d 1546, 1554 (11th Cir. 1986). In *Cox*, the court held that it would be an abuse of discretion for a district court to permit a right to opt out at the certification stage, i.e., before the class is identified or before the merits of the class claim are considered or resolved.

Permitting class members to opt out would make the class action mechanism less effective. It would make possible the repeated litigation of pattern and practice issues, a consequence that the class action procedure was designed to prevent. *Cox*, 784 F. 2d at 1554. Use of an opt out procedure at the commencement of a class action "force[s] class members to take a stand against their employers in order to stay in a controversial lawsuit." *Cox*, 784 F. 2d at 1554–55. It also discourages settlement by making it impossible to resolve all claims at once and would subject the defendant to the risk that class members will settle only the questionable claim and opt for separate treatment of the stronger claims. *Kincade* v. *General Tire & Rubber Co.*, 635 F. 2d 501, 507 (5th Cir. 1981). An opt out provision is thus inconsistent with the Title VII goal of encouraging settlement of claims.

If the opt-out provision is eliminated from the regulation, all class members will still receive notice that the class complaint has been filed and notice of any settlement or decision on the class complaint. If they do not wish to participate in the class or to file a claim for individual relief, they do not have to do so. Those who wish to participate will have the opportunity to object to any proposed settlement and to file claims for individual relief if discrimination is found. The Commission believes that class members' rights are sufficiently protected by the notice provisions and that the opt-out provision is both inconsistent and unnecessary. Therefore, the proposed regulation omits it.

E. Negotiated Grievance Procedure.

Under 29 CFR 1613.219, employees of agencies covered by 5 U.S.C. 7121(d) must elect initially to pursue a matter that is both grievable and allegedly discriminatory either through the negotiated grievance procedure or through the EEO complaint process, but not both. This regulatory provision also states that allegations of discrimination by employees of agencies not subject to 5 U.S.C. 7121(d) will not be subject to an election and should be processed as complaints under part 1613. The Commission proposes to continue this processing distinction between agencies that are and are not covered by 5 U.S.C. 7121(d). In view of the dual filing and processing responsibilities that can arise in agencies that are not covered by 5 U.S.C. 7121(d), however, the Commission proposes to toll the new 180-day processing limit for such complaints. If an employee of an agency not covered by 5 U.S.C. 7121(d) files an EEO complaint on a matter which is the subject of a negotiated grievance, the 180-day processing time contained in § 1614.108 shall be held in abeyance during the processing of the grievance. This will permit efficient processing of the EEO complaint without undercutting the grievance procedure.

F. Time limit For Seeking Counseling

Part 1613 provides that unless the time limits should be extended in accordance with certain criteria, an agency may only accept a complaint if the complainant previously sought counseling for the matter within 30 calendar days of the date of the alleged discriminatory event, of the effective date of the alleged discriminatory personnel action or of the date that the aggrieved person knew or reasonably should have known of the discriminatory event or personnel action. Part 1614 continues this 30-day rule and the provision for extension of the time limit under certain circumstances. The Commission, however, is aware of concerns expressed by some people that this 30-day time limit does not provide sufficient time for a potential claimant to evaluate the situation or to decide if he or she wants to pursue the matter in the EEO process, and of suggestions that this period be extended to as much as 180 days. The Commission solicits comment on whether this time limit should be lengthened, and if so, what the appropriate period for seeking counseling should be.

G. ADEA Statute of Limitations

The Commission proposes in § 1614.409(a) to address the absence of an explicit statute of limitations period in section 15 of the Age Discrimination in Employment Act, 29 U.S.C. 633a, which creates a right of action against Federal agencies for violations of the ADEA. The absence of an express limitations period in a statute does not mean that there is no time limitation for filing suits under that statue. *DelCostello* v. *International Brotherhood of Teamsters*, 462 U.S. 151, 158 (1983). When a statute is silent, courts borrow a limitations period from a closely analogous statute. *Johnson* v.

VOL 54 ISS 209 OCT 31 1989 UMI

Railway Express Agency, Inc., 421 U.S. 454, 466 (1975).

The courts have split on the issue of the correct statute of limitations applicable to ADEA lawsuits by federal employees. One court found that the two-and three-year limitations period for private sector ADEA cases was the most analogous limitations period for federal sector ADEA cases. *Weirsema* v. *Tennessee Valley Authority*, 41 Fair Empl. Prac. Cas. (BNA) 1588 (E.D. Tenn. 1986). *But see Lehman* v. *Nakshian*, 453 U.S. 156 (1981) (the Court held that the federal sector provisions of the ADEA are self-contained and looked to Title VII rathern than the private sector provisions of the ADEA for guidance in interpreting the ADEA's federal sector provisions). Other courts have borrowed the Title VII limitations period as the most analogous. *See Carraway* v. *Postmaster General of the United States*, 678 F. Supp. 125 (D. Md. 1988); *Strazdos* v. *Baker*, No. 88–1520 (S.D.N.Y. July 5, 1988); *DiCamillo* v. *U.S. Postal Service*, No. 87–6028 (D. Conn. April 22, 1988); *Ramachandran* v. *U.S. Postal Service*, No. CV–88–7690 WDK (C.D. Cal. April 15, 1987), *aff'd*, No. 87–6028 (9th Cir. May 26, 1988); *White* v. *Department of the Air Force*, No. CA–3–87–1452–R (N.D. Tex. Oct. 14, 1987) *aff'd*, 835 F. 2d 871 (Fed. Cir. 1987); *Healy* v. *U.S. Postal Service, 677 F. Supp. 1284 (E.D.N.Y. 1987); see also Rivera* v. *U.S. Postal Service*, 830 F. 2d 1037, 1039 (9th Cir. 1987) (dismissing ADEA claims for failure to file within 30 days), *cert. denied*, 180 S. Ct. 1737 (1988). Three courts have refused to borrow the 30-day limitations period of Title VII for ADEA actions without stating what limitations period should be borrowed. *See Coleman* v. *Nolan*, 49 Fair Empl. Prac. Cas. (BNA) 285 (S.D.N.Y. 1988); *Wetzel* v. *U.S. Postal Service*, No. 87–4–CIV–5 (E.D.N.C. Aug. 14, 1987); *Tkac* v. *Veterans Administration*, 610 F. Supp. 1075 (W.D. Mich. 1985). One court applied the six-year statute of limitations contained in 28 U.S.C. 2401(a) to a Federal sector ADEA suit. *Marks* v. *Turnage*, 46 Fair Empl. Prac. Cas. (BNA) 382 (N.D. Ill. 1988).

The Commission finds the reasoning of the cases applying the two- or three-year limitations period of the private sector ADEA provisions or the six-year limitations periods of 28 U.S.C. 2401(a) upersuasive and the use of those limitations periods to be inconsistent with the administrative process utilized for federal sector ADEA complaints. The Commission believes that the most closely analogous statutes to the Federal sector provisions of the ADEA are section 717 of Title VII and the Civil Service Reform Act and that their 30-day limitations periods should be borrowed for federal sector ADEA lawsuits.

Although there are differences between the federal sector provisions of Title VII and the ADEA, courts have nevertheless looked to Title VII for analogous procedures to use in Federal employees' ADEA lawsuits. *See, e.g., Lehman* v. *Nakshian*, 453 U.S. 156 (1981) (as in Title VII action, plaintiff is not entitled to trial by jury); *Ellis* v. *United States Postal Service*, 784 F.2d 835, 838 (7th Cir. 1986) (as in Title VII action, the only proper defendant in an ADEA suit is the head of the Federal agency); *Smith* v. *Office of Personnel Management*, 778 F.2d 258, 262 (5th Cir. 1985) (like Title VII, the ADEA does not allow recovery of compensatory damages). The use of different statutes of limitations for Federal sector Title VII and ADEA cases could lead to attempts to split complaints that allege violations of both statutes or premature departure from the administrative process in order to timely file a lawsuit on the ADEA issue.

Further support for a 30-day limitations period is found in the Civil Service Reform Act (CSRA) and its legislative history. The CSRA provides a 30-day limitations period for Federal employees to file suit when a claim of age discrimination is based on an action that is appealable to the MSPB, i.e., a mixed case involving a claim of age discrimination. *See* 5 U.S.C. 7703(b)(2). This may indicate that Congress intended or understood that the 30-day limitations period from Title VII applied as well to ADEA lawsuits. *See* S. Rep. No. 969, 95th Cong., 2d Sess. 63, reprinted in 1978 U.S. Code Cong. & Admin. News 2723, 2785 ("Under the anti-discrimination laws an employee has 30 days from the final agency action to initiate a de novo court proceeding"). Apart from any indication of legislative intent, it also constitutes another analogous statute of limitations that is available for borrowing. It can be argued that it is the most analogous limitations period since it applies not only to employment discrimination actions by Federal employees like Title VII but more specifically to those alleging age discrimination. In the alternative, it can be argued that it is at least as analogous as the Title VII limitations period to which it is identical. Thus, the CSRA supports the use of a 30-day limitations period for ADEA lawsuits either because its legislative history indicates that Congress intended the Title VII limitations period be applied to ADEA actions, or because the CSRA limitations period is the most analogous statute of limitations, or because the limitations periods common to both Title VII and the CSRA should both be borrowed as the most analogous statutes of limitations. Failure to use the 30-day limitations period for all civil actions under the ADEA would result in some age complaints having a 30-day limitations period (i.e., mixed case complaints that raise age discrimination) and others having a different limitations period (i.e., non-mixed case complaints).

The Commission, therefore, proposes that the limitations period applicable to suits brought under Title VII and the CSRA be borrowed and applied to suits brought under section 15 of the ADEA by individuals who have filed administrative complaints.

There are, however, two methods for a Federal employee to pursue an ADEA claim, i.e., by filing an administrative complaint or by filing a notice of intent to sue. Where an individual files a complaint, the Commission believes that the 30-day suit period is appropriate. Where, however, an individual files a notice of intent to sue, the Commission believes that the two- or three-year limitations period applicable to private sector ADEA lawsuits is appropriate. The notice of intent to sue procedure clearly comes from the private sector ADEA process and adopting that limitations period for this purpose is consistent with the case law on borrowing and our approach.

H. Exhaustion of Remedies Under the ADEA

In § 1614.409(b), the Commission proposes to address the exhaustion of remedies problem raised by the decisions in *Purtill* v. *Harris*, 658 F.2d 134, 137 (3d Cir. 1981), *cert. denied*, 462 U.S. 1131 (1983); *Bunch* v. *United States*, 548 F.2d 336, 340 (9th Cir. 1977), and other cases. These cases hold that once a Federal complainant under the Age Discrimination in Employment Act initiates administrative procedures, he or she must exhaust these procedures before filing a civil action. As the agency responsible for interpretation and enforcement of the ADEA in the Federal sector, the Commission believes that a complainant exhausts administrative remedies either 180 days after filing a complaint (the time period during which the agency is required to issue a notice of final action), or 180 days after filing an appeal with the EEOC, if EEOC has not issued a decision, or after EEOC issues a decision on an appeal. This exhaustion requirement is the same as the Title VII exhaustion requirement and will permit those complainants alleging age discrimination as well as Title VII discrimination to bring the entire complaint to court at the same time.

The Commission believes that this proposed fundamental restructuring of the complaint process will provide more efficient resolution of federal sector employment discrimination complaints while, at the same time, ensuring administrative fairness.

In the process of developing proposed part 1614, the Commission considered proposals to require payment of interest on back pay in discrimination cases and to provide for awards of attorneys fees in Age Discrimination in Employment Act cases. The Office of Legal Counsel at the Department of Justice has advised us, however, of its opinion that the Back Pay Act of 1966, 5 U.S.C. 5596, does not serve as a waiver of sovereign immunity for those purposes. We are now providing in § 1614.501, therefore, that interest on back pay may not be awarded to federal applicants or employees who prevail in discrimination claims. Proposed § 1614.501(e) will remain unchanged from its counterpart in part 1613; that is, the attorneys fees awards provisions shall apply to allegations of discrimination or retaliation prohibited by Title VII and the Rehabilitation Act.

In addition to these proposed regulations, the Commission invites comment on whether the Supreme Court's recent decision in *Price Waterhouse* v. *Hopkins*, 57 U.S.L.W. 4469 (May 1, 1989), requires that the Commission change its regulation on remedial action, found currently at 29 CFR 1613.271. Section 1613.271 states that full relief should be provided to an individual when discrimination is found unless the record contains clear and convincing evidence that the individual would not have been selected even absent discrimination. During the public comment and interagency coordination of the latest amendments to part 1613, published at 52 FR 41919 (October 30, 1987), commenters suggested that the burden of proof be changed from "clear and convincing evidence" to "a preponderance of the evidence" standard. As a result of these suggestions and comments, the Commission solicits comment on what effect, if any, the Hopkins decision should have on proposed § 1614.501, which is patterned on 29 CFR 1613.271.

The Commission also invites comments on whether any of the substantive changes proposed for part 1614 should also be applied to complaints being processed under part 1613.

These regulations have been coordinated with affected federal agencies pursuant to E.O. 12067 and have been reviewed by the Office of Management and Budget pursuant to E.O. 12291. The Commission hereby publishes these proposed rules for public comment. The proposed rules appear below.

List of Subjects in 29 CFR Part 1614

Equal employment opportunity, Government employees.

For the Commission,

Clarence Thomas,

Chairman.

For the reasons set forth in the preamble, it is proposed to amend title 29, chapter XIV of the Code of Federal Regulations by adding part 1614 to read as follows:

PART 1614—FEDERAL SECTOR EQUAL EMPLOYMENT OPPORTUNITY

Subpart A—Agency Program To Promote Equal Employment Opportunity

Sec.
1614.101 General policy.
1614.102 Agency program.
1614.103 Complaints of discrimination covered by this part.
1614.104 Agency processing.
1614.105 Counseling.
1614.106 Individual complaints.
1614.107 Rejections or cancellations of complaints.

Subpart B—Provisions Applicable To Particular Complaints

1614.201 Age Discrimination In Employment Act.
1614.202 Equal Pay Act.
1614.203 Rehabilitation Act.
1614.204 Class complaints.

Subpart C—Related Processes

1614.301 Relationship to negotiated grievance procedure.
1614.302 Mixed case complaints.
1614.303 Petitions to the EEOC from MSPB decisions on mixed case appeals and complaints.
1614.304 Contents of petition.
1614.305 Consideration procedures.
1614.306 Referral of case to special panel.
1614.307 Organization of special panel.
1614.308 Practices and procedures of special panel.
1614.309 Enforcement of special panel decisions.
1614.310 Right to file a civil action.

Subpart D—Appeals And Civil Actions

1614.401 Appeals to the commission.
1614.402 Time for appeals to the Commission.
1614.403 How to appeal.
1614.404 Appellate procedure.
1614.405 Supplementing the record on appeal.
1614.406 Hearings.
1614.407 Decisions on appeals.
1614.408 Reopening and reconsideration.
1614.409 Civil action: Title VII and Rehabilitation Act.
1614.410 Civil action: Age Discrimination in Employment Act.
1614.411 Civil action: Equal Pay Act.
1614.412 Effect of filing a civil action.

Subpart E—Remedies And Corrective Action

1614.501 Remedial actions.
1614.502 Corrective action.
1614.503 Enforcement of final decisions.
1614.504 Enforcement action by the Commission.
1614.505 Compliance with settlement agreements and decisions.

Subpart F—Matters Of General Applicability

1614.601 EEO group statistics.
1614.602 Reports to the Commission.
1614.603 Voluntary settlement attempts.
1614.604 Filing and computation of time.
1614.605 Representation and official time.
1614.606 Joint processing and consolidation of complaints.
1614.607 Severance of issues.
1614.608 Delegation of authority.

Authority: 42 U.S.C. 2000e–16; 29 U.S.C. 633a; 29 U.S.C. 791 and 794a; 29 U.S.C. 206(d); E.O. 10577; 3 CFR 218 (1954–1958 Comp.); E.O. 11222, 3 CFR 306 (1964–1965 Comp.); E.O. 11478, 3 CFR 133 (1969 Comp.); E.O. 12106, 44 FR 1053 (1978); Reorg. Plan No. 1 of 1978, 43 FR 19807 (1978), unless otherwise noted.

Subpart A—Agency Program To Promote Equal Employment Opportunity

§ 1614.101 General policy.

(a) It is the policy of the Government of the United States to provide equal opportunity in employment for all persons, to prohibit discrimination in employment because of race, color, religion, sex, national origin, age or handicap and to promote the full realization of equal employment opportunity through a continuing affirmative program in each agency.

(b) No person shall be subject to retaliation for opposing any practice made unlawful by Title VII of the Civil Rights Act (Title VII), the Age Discrimination in Employment Act (ADEA), the Equal Pay Act or the Rehabilitation Act or for participating in any stage of administrative or judicial proceedings under those statutes.

§ 1614.102 Agency program.

(a) Each agency shall maintain a continuing affirmative program to promote equal opportunity and to identify and eliminate discriminatory practices and policies. In support of this program, the agency shall:

(1) Provide sufficient resources to its equal employment opportunity program to ensure efficient and successful operation;

VOL 54 ISS 209 OCT 31 1989 UMI

(2) Provide for the prompt, fair and impartial processing of complaints in accordance with this part and the instructions contained in the Commission's Management Directives;

(3) Conduct a continuing campaign to eradicate every form of prejudice or discrimination from the agency's personnel policies, practices and working conditions;

(4) Communicate the agency's equal employment opportunity policy and program and its employment needs to all sources of job candidates without regard to race, color, religion, sex, national origin, age or handicap, and solicit their recruitment assistance on a continuing basis;

(5) Review, evaluate and control managerial and supervisory performance in such a manner as to insure a continuing affirmative application and vigorous enforcement of the policy of equal opportunity, and provide orientation, training and advice to managers and supervisors to assure their understanding and implementation of the equal employment opportunity policy and program;

(6) Take appropriate disciplinary action against employees who engage in discriminatory practices;

(7) Make reasonable accommodation to the religious needs of applicants and employees when those accommodations can be made without undue hardship on the business of the agency;

(8) Provide recognition to employees, supervisors, managers and units demonstrating superior accomplishment in equal employment opportunity;

(9) Establish a system for periodically evaluating the effectiveness of the agency's overall equal employment opportunity effort;

(10) Provide the maximum feasible opportunity to employees to enhance their skills through on-the-job training, work-study programs and other training measures so that they may perform at their highest potential and advance in accordance with their abilities;

(11) Inform its employees and recognized labor organizations of the affirmative equal employment opportunity policy and program and enlist their cooperation; and

(12) Participate at the community level with other employers, with schools and universities and with other public and private groups in cooperative action to improve employment opportunities and community conditions that affect employability.

(b) In order to implement its program, each agency shall:

(1) Develop the plans, procedures and regulations necessary to carry out its program;

(2) Appraise its personnel operations at regular intervals to assure their conformity with its program, part 1614 and the instructions contained in the Commission's Management Directives;

(3) Designate a Director of Equal Employment Opportunity (EEO Director), EEO Officer(s) and such Special Emphasis Program Managers (including but not necessarily limited to a Handicapped Program Coordinator, a Federal Women's Program Manager and a Hispanic Employment Program Manager), clerical and administrative support as may be necessary to carry out the functions described in this part in all organizational units of the agency and at all agency installations. The EEO Director shall be under the immediate supervision of the agency head. The responsibility for regulating the government-wide Special Emphasis Program continues with the Office of Personnel Management;

(4) Make written materials available to all employees and applicants informing them of the variety of equal employment opportunity programs and administrative and judicial remedial procedures available to them and prominently post such written materials in all personnel and EEO offices and throughout the workplace;

(5) Ensure that full cooperation is provided by all agency employees to EEO Counselors and agency EEO personnel in the processing and resolution of pre-complaint matters and complaints within an agency and that full cooperation is provided to the Commission in the course of appeals, including granting the Commission routine access to personnel records of the agency when required in connection with an investigation;

(6) Publicize to all employees and permanently post the names and addresses of the EEO Director, EEO Officer, Special Emphasis Program Managers and EEO Counselors and a notice of the time limits and necessity of contacting a Counselor before filing a complaint; and

(c) Under each agency program, the EEO Director shall be responsible for:

(1) Advising the head of the agency with respect to the preparation of national and regional equal employment opportunity plans, procedures, regulations, reports and other matters pertaining to the policy in § 1614.101 and the agency program;

(2) Evaluating from time to time the sufficiency of the total agency program for equal employment opportunity and reporting to the head of the agency with recommendations as to any improvement or correction needed, including remedial or disciplinary action with respect to managerial, supervisory or other employees who have failed in their responsibilities;

(3) When authorized by the head of the agency, making changes in programs and procedures designed to eliminate discriminatory practices and improve the agency's program for equal employment opportunity;

(4) Providing for counseling of aggrieved individuals and for the receipt and processing of individual and class complaints of discrimination; and

(5) Assuring that individual complaints are properly and thoroughly investigated and that notices of final action are issued in a timely manner in accordance with this part.

§ 1614.103 Complaints of discrimination covered by this part.

(a) Individual and class complaints of employment discrimination and retaliation prohibited by title VII (discrimination on the basis of race, color, religion, sex and national origin), the ADEA (discrimination on the basis of age when the aggrieved individual is at least 40 years of age), the Rehabilitation Act (discrimination on the basis of handicap) or the Equal Pay Act (sex-based wage discrimination) are covered by this part unless the complainant has elected to grieve the matter through a negotiated grievance procedure or to appeal the matter to the Merit Systems Protection Board.

(b) This part applies to:

(1) Military departments as defined in 5 U.S.C. 102;

(2) Executive agencies as defined in 5 U.S.C. 105;

(3) The United States Postal Service, Postal Rate Commission and Tennessee Valley Authority, except for complaints under the Equal Pay Act; and

(4) All units of the legislative and judicial branches of the Federal Government having positions in the competitive service, except for complaints under the Rehabilitation Act. This part does not apply to the General Accounting Office or the Library of Congress.

(c) Within the covered departments, agencies and units, this part applies to all employment policies or practices affecting employees or applicants for employment including employees and applicants who are paid from nonappropriated funds but does not apply to the employment of aliens outside the limits of the United States.

§ 1614.104 Agency processing.

(a) Each agency subject to this part shall adopt procedures for processing individual and class complaints of

discrimination and retaliation that include the provisions contained in §§ 1614.105 through 1614.107 and that are consistent with all other applicable provisions of this part and the instructions for complaint processing contained in the Commission's Management Directives.

(b) The Commission shall periodically review agency resources and procedures to ensure that an agency makes reasonable efforts to resolve complaints informally, to process complaints in a timely manner, to develop adequate factual records, to issue findings which are consistent with acceptable legal standards, to explain the reasons for its findings, and to give complainants adequate and timely notice of their rights.

§ 1614.105 Counseling.

(a) Aggrieved persons who believe they have been discriminated against on the basis of race, color, religion, sex, national origin, age or handicap or retaliated against must consult a Counselor prior to filing a complaint in order to try to informally resolve the matter. Contact with a Counselor must be initiated by the aggrieved person within 30 days of the date of the matter alleged to be discriminatory, within 30 days of the effective date of a personnel action or within 30 days of the date that the aggrieved person knew or reasonably should have known of the matter or personnel action alleged to be discriminatory.

(b) At the initial counseling session, Counselors must advise individuals in writing of their rights and responsibilities, including election rights pursuant to § 1614.301 and § 1614.302, the right to file a notice of intent to sue pursuant to § 1614.201(a) and a lawsuit under the ADEA instead of an administrative complaint of age discrimination under this part, the duty to mitigate damages, administrative and court time frames, and that only the matter(s) raised in pre-complaint counseling may be alleged in a subsequent complaint filed with the agency. Counselors must advise individuals of their duty to keep the agency and Commission informed of their current address. If the aggrieved person informs the Counselor that he or she wishes to file a class complaint, the Counselor shall explain the class complaint procedures and the responsibilities of a class agent and include in the notice required by paragraphs (d) or (e) of this section a notice of the right to file a class complaint.

(c) Counselors shall conduct counseling activities in accordance with instructions contained in Commission Management Directives. When advised that a complaint has been filed by an aggrieved person, the Counselor shall submit a written report to the agency's EEO Officer and the aggrieved person concerning the issues discussed and actions taken during counseling.

(d) Unless the aggrieved person agrees to a longer counseling period under paragraph (e) of this section, the Counselor shall conduct the final interview with the aggrieved person within 30 days after the date the aggrieved person brought the matter to the Counselor's attention. If the matter has not been resolved to the satisfaction of the aggrieved person, that person shall be informed in writing by the Counselor, not later than the thirtieth day after contacting the Counselor, of the right to file a discrimination complaint. The notice shall inform the complainant of the right to file a discrimination complaint at any time up to 15 days after receipt of the notice, of the appropriate official with whom to file a complaint and of the complainant's duty to assure that the agency is informed immediately if the complainant retains counsel or a representative.

(e) Prior to the end of the 30-day period, the aggrieved person may agree in writing with the Counselor to postpone the final interview and extend the counseling period for an additional period of no more than 60 days. If the matter has not been resolved to the satisfaction of the aggrieved person before the conclusion of the agreed extension, the notice described in paragraph (d) shall be issued.

(f) The Counselor shall not attempt in any way to restrain the aggrieved person from filing a complaint. The Counselor shall not reveal the identity of an aggrieved person who consulted the Counselor, except when authorized to do so by the aggrieved person, until the agency has received a discrimination complaint under this part from that person involving that same matter.

(g) The agency shall ensure that full cooperation is provided by all employees to the Counselor in the performance of the duties under this section.

§ 1614.106 Individual complaints.

(a) Complainants or their representatives must file complaints with the agency that allegedly discriminated against them.

(b) Complainants must file complaints within 15 days after receipt of the notice required by § 1614.105(d) or (e).

(c) Complaints must contain a signed statement from the person claiming to be aggrieved. This statement must be sufficiently precise to identify the aggrieved individual and the agency and to describe generally the action(s) or practice(s) that form the basis of the complaint.

(d) The agency shall acknowledge receipt of a complaint and inform the complainant of the date on which the complaint was filed. Such acknowledgement shall also advise the complainant that:

(1) The agency is required to complete processing of the complaint within 180 days after filing unless the parties agree in writing to extend that period; and

(2) If the agency has not issued a notice of final agency action within 180 days of filing or within the agreed period of extension, the complainant can file a civil action or appeal to EEOC in accordance with subpart D.

(e) In accordance with instructions contained in Commission Management Directives, the agency shall develop a complete factual record upon which to make findings on the matters raised by the written complaint. Agencies may use an exchange of letters or memoranda, interrogatories, investigations, fact-finding conferences or any other fact-finding conferences or any other fact-finding methods that efficiently and thoroughly address the matters at issue. Agencie are encouraged to incorporate alternative dispute resolution techniques into their investigative efforts in order to promote early resolution of complaints.

(f) The agency shall issue a notice of final action within 180 days from the date of filing of an individual complaint. By written agreement within the 180-day period, the complainant and the agency may voluntarily extend this 180-day period for not more than an additional 90 days. The notice of final action shall consist of:

(1) Findings by the agency on the merits of each issue in the complaint that is not rejected or cancelled pursuant to § 1614.107; and

(2) Appropriate remedial and corrective action in accordance with Subpart E of this part when discrimination is found; and

(3) A statement of supporting reasons for rejection or cancellation of each issue not considered on the merits; or

(4) A statement that the agency has been unable to resolve the matter or issue findings within the time limits of this paragraph.

The notice of final action shall include notice of the right to appeal to the Commission with the applicable time limitations, EEOC Form 573, Notice Of

VOL 54 ISS 209 OCT 31 1989 UMI

Appeal/Petition, and notice of the right to file a civil action in Federal district court with the applicable time limitations. A copy of the agency's investigative file shall be attached to the notice.

(g) An agency's failure to issue a notice of final action after 180 days or any period of extension shall constitute final action and the agency shall cease processing the complaint.

§ 1614.107 Rejections or cancellations of complaints.

The agency shall reject or cancel a complaint or part of a complaint:

(a) That fails to state a claim under § 1614.103 or § 1614.106(a) or states the same claim that is pending before or has been decided by the agency or Commission;

(b) That fails to comply with the applicable time limits contained in §§ 1614.105, 1614.106 and 1614.204(c), unless the agency extends the time limits in accordance with § 1614.604(c), or that raises a matter which has not been brought to the attention of a Counselor;

(c) That is the basis of a pending civil action in a United States District Court in which the complainant is a party provided that at least 180 days have passed since the filing of the administrative complaint, or that was the basis of a civil action decided by a United States District court in which the complainant was a party;

(d) Where the complainant has raised the matter in a negotiated grievance procedure that permits allegations of discrimination or in an appeal to the Merit Systems Protection Board and § 1614.301 or § 1614.302 indicates that the complainant has elected to pursue the non-EEO process;

(e) That alleges that an agency is proposing to take a personnel action that may be dicriminatory;

(f) Where the complainant cannot be located, provided that reasonable efforts have been made to locate the complainant and the complainant has not responded within 15 days to a notice of proposed cancellation sent to his or her last known address;

(g) That the complainant has failed to cooperate, where the agency has provided the complainant with a written request to provide relevant information or otherwise proceed with the complaint, and the complainant has failed to satisfy the request within 15 days of its receipt, provided that the request included a notice of the proposed cancellation; or

(h) If the complainant refuses within 15 days of receipt of an offer of settlement to accept an agency offer of full relief in adjustment of the complaint, provided that the agency's EEO Director, Chief Legal Officer or a designee reporting directly to the EEO Director or Chief Legal Officer, has certified in writing that the agency's written offer constitutes full relief. An offer of full relief under this subsection is the appropriate relief in § 1614.501.

Subpart B—Provisions Applicable to Particular Complaints

§ 1614.201 Age Discrimination in Employment Act.

(a) As an alternative to filing a complaint under this part, an aggrieved individual may file a civil action to obtain a judicial determination of his or her rights under the ADEA after giving the Commission not less than 30 days notice of the intent to file such an action. Such notice must be filed in writing with EEOC, Federal Sector Programs, 1801 L St. NW., Washington, DC 20507 within 180 days after the alleged unlawful practice occurred.

(b) The Commission may exempt a position from the provisions of the ADEA if the Commission establishes a maximum age requirement for the position on the basis of a determination that age is a bona fide occupational qualification necessary to the performance of the duties of the position.

§ 1614.202 Equal Pay Act.

(a) In its enforcement of the Equal Pay Act, the Commission has the authority to investigate an agency's employment practices on its own initiative at any time in order to determine compliance with the provisions of the Act.

(b) Complaints alleging violations of the Equal Pay Act shall be processed under this part unless they are brought against the United States Postal Service, Postal Rate Commission or the Tennessee Valley Authority. These three entities will be treated by the Commission as private employers. Alleged violations by these agencies may be filed with an appropriate Commission office listed in 29 CFR 1610.4(c).

§ 1614.203 Rehabilitation Act.

(a) *Definitions.* (1) "*Individual with handicaps*" is defined for this section as one who:

(i) Has a physical or mental impairment which substantially limits one or more of such person's major life activities.

(ii) Has a record of such an impairment, or

(iii) Is regarded as having such an impairment.

(2) "*Physical or mental impairment*" means:

(i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological, musculoskeletal, special sense organs, cardiovascular, reproductive, digestive, respiratory, genitourinary, hemic and lymphatic, skin, and endocrine, or

(ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(3) "*Major life activities*" means functions, such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(4) "*Has a record of such an impairment*" means has a history of, or has been classified (or misclassified) as having, a mental or physical impairment that substantially limits one or more major life activities.

(5) "*Is regarded as having such an impairment*" means has a physical or mental impairment that does not substantially limit major life activities but is treated by an employer as constituting such a limitation; has a physical or mental impairment that substantially limits major life activities only as a result of the attitude of an employer toward such impairment; or has none of the impairments defined in Paragraph (a)(2) of this section but is treated by an employer as having such an impairment.

(6) "*Qualified individual with handicaps*" means with respect to employment, an individual with handicaps who, with or without reasonable accommodation, can perform the essential functions of the position in question without endangering the health and safety of the individual or others and who, depending upon the type of appointing authority being used:

(i) Meets the experience or education requirements (which may include passing a written test) of the position in question, or

(ii) Meets the criteria for appointment under one of the special appointing authorities for individuals with handicaps.

(b) The Federal Government shall become a model employer of individuals with handicaps. Agencies shall give full consideration to the hiring, placement, and advancement of qualified individuals with mental and physical handicaps. An agency shall not discriminate against a qualified individual with physical or mental handicaps.

(c) *Reasonable accommodation.* (1) An agency shall make reasonable accommodation to the known physical or mental limitations of an applicant or employee who is a qualified individual with handicaps unless the agency can demonstrate that the accommodation would impose an undue hardship on the operations of its program.

(2) Reasonable accommodation may include, but shall not be limited to:

(i) Making facilities readily accessible to and usable by individuals with handicaps, and

(ii) Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, appropriate adjustment or modification of examinations, the provision of readers and interpreters, and other similar actions.

(3) In determining whether, pursuant to paragraph (c)(1) of this section, an accommodation would impose an undue hardship on the operation of the agency in question, factors to be considered include:

(i) The overall size of the agency's program with respect to the number of employees, number and type of facilities and size of budget;

(ii) The type of agency operation, including the composition and structure of the agency's work force; and

(iii) The nature and the cost of the accommodation.

(d) *Employment criteria.* (1) An agency may not make use of any employment test or other selection criterion that screens out or tends to screen out qualified individuals with handicaps or any class of individuals with handicaps unless:

(i) The test score or other selection criterion, as used by the agency, is shown to be job-related for the position in question, and

(ii) Alternative job-related tests or criteria that do not screen out or tend to screen out as many individuals with handicaps are not shown by the Office of Personnel Management to be available.

(2) An agency shall select and administer tests concerning employment so as to insure that, when administered to an applicant or employee who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant's or employee's ability to perform the position or type of positions in question rather than reflecting the applicant's or employee's impaired sensory, manual, or speaking skill (except where those skills are the factors that the test purports to measure).

(e) *Preemployment inquiries.* (1) Except as provided in paragraphs (e)(2) and (e)(3) of this section, an agency may not conduct a preemployment medical examination and may not make preemployment inquiry of an applicant as to whether the applicant is an individual with handicaps or as to the nature or severity of a handicap. An agency may, however, make preemployment inquiry into an applicant's ability to meet the medical qualification requirements, with or without reasonable accommodation, of the position in question, i.e., the minimum abilities necessary for safe and efficient performance of the duties of the position in question. The Office of Personnel Management may also make an inquiry as to the nature and extent of a handicap for the purpose of special testing.

(2) Nothing in this section shall prohibit an agency from conditioning an offer of employment on the results of a medical examination conducted prior to the employee's entrance on duty, provided that:

(i) All entering employees are subjected to such an examination regardless of handicap or when the preemployment medical questionnaire used for positions that do not routinely require medical examination indicates a condition for which further examination is required because of the job-related nature of the condition, and

(ii) The results of such an examination are used only in accordance with the requirements of this part. Nothing in this section shall be construed to prohibit the gathering of preemployment medical information for the purposes of special appointing authorities for individuals with handicaps.

(3) To enable and evaluate affirmative action to hire, place or advance individuals with handicaps, the agency may invite applicants for employment to indicate whether and to what extent they are handicapped, if:

(i) The agency states clearly on any written questionnaire used for this purpose or makes clear orally if no written questionnaire is used, that the information requested is intended for use solely in conjunction with affirmative action, and

(ii) The agency states clearly that the information is being requested on a voluntary basis, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this part.

(4) Information obtained in accordance with this section as to the medical condition or history of the applicant shall be kept confidential except that:

(i) Managers, selecting officials, and others involved in the selection process or responsible for affirmative action may be informed that the applicant is an individual with handicaps eligible for affirmative action;

(ii) Supervisors and managers may be informed regarding necessary accommodations;

(iii) First aid and safety personnel may be informed, where appropriate, if the condition might require emergency treatment;

(iv) Government officials investigating compliance with laws, regulations, and instructions relevant to equal employment opportunity and affirmative action for individuals with handicaps shall be provided information upon request; and

(v) Statistics generated from information obtained may be used to manage, evaluate, and report on equal employment opportunity and affirmative action programs.

(f) *Physical access to buildings.* (1) An agency shall not discriminate against applicants or employees who are qualified individuals with handicaps due to the inaccessibility of its facility.

(2) For the purpose of this subpart, a facility shall be deemed accessible if it is in compliance with the Architectural Barriers Act of 1968.

(g) Reassignment. When a nonprobationary employee becomes unable to perform the essential functions of his or her position even with reasonable accommodation due to a handicap, an agency shall reassign the individual to a vacant position within the same commuting area and at the same grade or level, whose essential functions the individual would be able to perform with reasonable accommodation if necessary. In the absence of a position at the same grade or level, reassignment to a vacant lower graded position shall be required, but availability of such a vacancy shall not affect the employee's entitlement, if any, to disability retirement pursuant to 5 U.S.C. 8337 or 5 U.S.C. 8451. For the purpose of this paragraph, an employee of the United States Postal Service shall not be considered qualified for reassignment to a position in a different craft or for any reassignment that would be inconsistent with the terms of a collective bargaining agreement covering the employee.

§ 1614.204 Class complaints.

(a) *Definitions.* (1) A "*class*" is a group of employees, former employees or applicants for employment who, it is

VOL 54 ISS 209 OCT 31 1989 UMI

alleged, have been or are being adversely affected by an agency personnel management policy or practice which discriminates against the group on the basis of their race, color, religion, sex, national origin, age or handicap.

(2) A "*class complaint*" is a written complaint of discrimination filed on behalf of a class by the agent of the class alleging that:

(i) The class is so numerous that a consolidated complaint of the members of the class is impractical;

(ii) There are questions of fact common to the class;

(iii) The claims of the agent of the class are typical of the claims of the class;

(iv) The agent of the class, or, if represented, the representative, will fairly and adequately protect the interests of the class.

(3) An "*agent of the class*" is a class member who acts for the class during the processing of the class complaint.

(b) Pre-complaint processing. An employee or applicant who wishes to file a class complaint must seek counseling and be counseled in accordance with § 1614.105.

(c) Filing and presentation of a class complaint.

(1) A class complaint must be signed by the agent and must identify the policy or practice adversely affecting the class as well as the specific action or matter affecting the class agent.

(2) The complaint must be filed with the agency that allegedly discriminated not later than 15 days after the agent's receipt of the notice of right to file a class complaint.

(3) The complaint shall be processed promptly; the parties shall cooperate and shall proceed at all times without undue delay.

(d) *Acceptance, rejection or cancellation.* (1) Within 15 days of an agency's receipt of a complaint, the agency shall forward the complaint, along with a copy of the Counselor's report and any other information pertaining to timeliness or other relevant circumstances related to the complaint, to the Commission. The Commission shall assign the complaint to a Commission Administrative Judge except in instances where the Commission finds it more practical to delegate this responsibility to a complaints examiner or Administrative Judge from another agency who is not an employee of the agency in which the complaint arose.

(2) The Administrative Judge may recommend that the agency reject the complaint, or any portion, for any of the reasons listed in § 1614.107 or because it does not meet the prerequisites of a class complaint under § 1614.204(a)(2).

(3) If an allegation is not included in the Counselor's report, the Administrative Judge shall afford the agent 15 days to state whether the matter was discussed with the Counselor and, if not, explain why it was not discussed. If the explanation is not satisfactory, the Administrative Judge shall recommend that the agency reject the allegation. If the explanation is satisfactory, the Administrative Judge shall refer the allegation to the agency for further counseling of the agent.

(4) If an allegation lacks specificity and detail, the Administrative Judge shall afford the agent 15 days to provide specific and detailed information. The Administrative Judge shall recommend that the agency reject the complaint if the agent fails to provide such information within the specified time period. If the information provided contains new allegations outside the scope of the complaint, the Administrative Judge shall advise the agent how to proceed on an individual or class basis concerning these allegations.

(5) The Administrative Judge shall recommend that the agency extend the time limits for filing a complaint and for consulting with a Counselor when the agent shows that he or she was not notified of the prescribed time limits and was not otherwise aware of them or that he or she was prevented by circumstances beyond his or her control from acting within the time limits.

(6) When appropriate, the Administrative Judge may recommend that a class be divided into subclasses and that each subclass be treated as a class, and the provisions of this section then shall be construed and applied accordingly.

(7) The Administrative Judge's recommendation to the agency on whether to accept, reject or cancel a complaint shall be transmitted in writing to the agency and the agent. The Administrative Judge's recommendation to accept, reject or cancel shall become the agency decision unless the agency accepts, rejects, cancels or modifies the recommended decision within 60 days of the receipt of the recommended decision and complaint file. The agency shall notify the agent and the Administrative Judge of its decision to accept, reject, modify or cancel a complaint. A decision to reject or cancel a class complaint shall inform the agent either that the complaint will be processed as an individual complaint of discrimination under subpart A or that the complaint is also rejected as an individual complaint in accordance with § 1614.107. In addition, it shall inform the agent of the right to appeal the final agency decision rejecting or cancelling the class complaint to the Office of Review and Appeals or to file a civil action and include EEOC Form 573, Notice Of Appeal/Petition.

(e) *Notification.* (1) Within 15 days of accepting a class complaint, the agency shall use reasonable means, such as delivery, mailing to last known address or distribution, to notify all class members of the acceptance of the class complaint.

(2) Such notice shall contain:

(i) The name of the agency or organizational segment, its location, and the date of acceptance of the complaint;

(ii) A description of the issues accepted as part of the class complaint; and

(iii) An explanation of the binding nature of the final decision or resolution of the complaint on class members.

(f) *Obtaining evidence concerning the complaint.* (1) Upon the acceptance of a complaint, the agency head shall designate an agency representative. The agency representative shall not be any of the individuals referenced in § 1614.102(b)(3).

(2) *Development of evidence.* (i) The Administrative Judge shall notify the agent and the agency representative of the time period that will be allowed both parties to prepare their cases. This time period may be extended by the Administrative Judge upon the request of either party. Both parties are entitled to reasonable development of evidence on matters relevant to the issues raised in the complaint. Evidence may be developed through interrogatories, depositions, and requests for production of documents. It shall be grounds for objection to producing evidence that the information sought by either party is irrelevant, overburdensome, repetitious, or privileged.

(ii) If mutual cooperation fails, either party may request to develop evidence. If a party refuses in bad faith or fails without adequate explanation to respond fully and in timely fashion to a request made or approved by the Administrative Judge for documents, records, comparative data, statistics or affidavits, and the information is solely in the control of one party, such failure may, in appropriate circumstances, cause the Administrative Judge:

(A) To draw an adverse inference that the requested information would have reflected unfavorably on the party refusing to provide the requested information;

(B) To consider the matters to which the requested information pertains to be

established in favor of the opposing party;

(C) To exclude other evidence offered by the party failing to produce the requested information; or

(D) To take such other actions as the Administrative Judge deems appropriate.

(iii) During the period for development of evidence, the Administrative Judge may, in his or her discretion, direct that an investigation of facts relevant to the complaint or any portion be conducted by an investigator trained or certified by the Commission.

(iv) Both parties shall furnish to the Administrative Judge copies of all materials that they wish to be examined and such other material as may be requested.

(g) *Opportunity for resolution of the complaint.* (1) The Administrative Judge shall furnish the agent and the representative of the agency a copy of all materials obtained concerning the complaint and provide opportunity for the agent to discuss materials with the agency representative and attempt resolution of the complaint.

(2) The complaint may be resolved by agreement of the agency and the agent at any time as long as the agreement is fair and reasonable.

(3) If the complaint is resolved, the terms of the resolution shall be reduced to writing and signed by the agent and the agency.

(4) Notice of the resolution shall be given to all class members in the same manner as notification of the acceptance of the class complaint and shall state the terms of corrective action, if any, to be granted by the agency. A resolution shall bind all members of the class. Within 30 days of the date of the notice of resolution, any member of the class may petition the EEO Director to vacate the resolution because it benefits only the class agent or is otherwise not fair and reasonable. Such a petition will be processed in accordance with § 1614.204(d) and if the Administrative Judge finds that the resolution does not comply with § 1614.204(g)(2), he or she shall recommend that the resolution be vacated and that the original class agent be replaced by the petitioner or some other class member who is eligible to be the class agent during further processing of the class complaint. Agency acceptance of a petition under this paragraph vacates any agreement between the former class agent and the agency. An agency decision on such a petition shall inform the former class agent or the petitioner of the right to appeal the adverse decision to the Office of Review and Appeals and include EEOC Form 573, Notice of Appeal/Petition.

(h) *Hearing.* On expiration of the period allowed for preparation of the case, the Administrative Judge shall set a date for hearing. The hearing shall be conducted in accordance with 29 CFR 1614.406.

(i) *Report of findings and recommendations.* (1) The Administrative Judge shall transmit to the agency a report of finding and recommendations on the complaint, including a recommended decision, corrective action pertaining to systemic relief for the class and any individual corrective action, where appropriate, with regard to the personnel action or matter that gave rise to the complaint.

(2) If the Administrative Judge finds no class relief appropriate, he or she shall determine if a finding of individual discrimination is warranted and, if so, shall recommend appropriate relief.

(3) The Administrative Judge shall notify the agent of the date on which the report of findings and recommendations was forwarded to the agency.

(j) *Agency decision.* (1) Within 60 days of receipt of the report of findings and recommendations issued under § 1614.204(h), the agency shall issue a decision to accept, reject, or modify the findings and recommendations of the Administrative Judge.

(2) The decision of the agency shall be in writing and shall be transmitted to the agent along with a copy of the report of findings and recommendations of the Administrative Judge.

(3) When the agency's decision is to reject or modify the findings and recommendations of the Administrative Judge, the decision shall contain specific reasons for the agency's action.

(4) If the agency has not issued a decision within 60 days of its receipt of the Administrative Judge's report of findings and recommendations, those findings and recommendations shall become the final agency decision. The agency shall transmit the final agency decision to the agent within five days of the expiration of the 60-day period.

(5) The decision of the agency shall require any remedial action authorized by law determined to be necessary or desirable to resolve the issue of discrimination.

(6) A final agency decision on a class complaint shall, subject to the provisions of § 1614.204(g)(4) and subpart D, be binding on all members of the class and the agency.

(7) The final agency decision shall inform the agent of the right to appeal or to file a civil action in accordance with subpart D and of the applicable time limits.

(k) *Notification of decision.* The agency shall notify class members of the decision and corrective action, if any, through the same media employed to give notice of the existence of the class complaint. The notice, where appropriate, shall include information concerning the rights of class members to seek individual relief, and of the procedures to be followed. Notice shall be given by the agency within 10 days of the transmittal of its decision to the agent.

(l) *Corrective action for individual class members.* (1) When discrimination is found, an agency must eliminate or modify the employment policy or practice out of which the complaint arose and provide individual corrective action, including an award of attorney's fees and costs, to the agent in accordance with § 1614.501.

(2) When class-wide discrimination is not found, but it is found that the class agent is a victim of discrimination, the remedial provisions of § 1614.501 shall apply.

(3) When discrimination is found in the final agency decision and a class member believes that he or she is entitled to individual relief, the class member may file a written claim with the head of the agency or its EEO Director within 30 days of notification by the agency of its decision. The claim must include a specific, detailed showing that the claimant is a class member who was affected by a personnel action or matter resulting from the discriminatory policy or practice, and that this discriminatory action took place within the period of time for which the agency found class-wide discrimination in its decision. The period of time for which the agency finds class-wide discrimination shall begin not more than 30 days prior to the agent's initial contact with the Counselor and shall end not laer than the date when the agency eliminates the policy or practice found to be discriminatory in the final agency decision. The agency shall issue a final decision on each such claim within 90 days of filing. Such decision must include a notice of the right to file an appeal or a civil action in accordance with subpart D of this part and the applicable time limits.

Subpart C—Related Processes

§ 1614.301 Relationship to negotiated grievance procedure.

(a) When a person is employed by an agency subject to 5 U.S.C. 7121(d) and is covered by a collective bargaining agreement that permits allegations of

discrimination to be raised in a negotiated grievance procedure, a person wishing to file a complaint or a grievance on a matter of alleged

appealed to the Merit Systems Protection Board (MSPB). The complaint may contain only an allegation of employment discrimination or it may

Any such mixed case complaint filed after an appeal has been filed on the same matter shall be rejected without affecting the complainant's right to raise

The EEOC will not accept appeals from MSPB dismissals without prejudice.

(b) *Method of filing.* Filing shall be made by certified or registered mail return receipt requested to the Office of

the Commission shall within 60 days after the date of its determination, consider the entire record of the proceedings of the MSPB and on the basis of the evidentiary record before

(2) One member of the MSPB designated by the Chairman of the Board each time a panel is convened;

(3) One member of the EEOC

VOL 54 ISS 209 OCT 31 1989 UMI

discrimination to be raised in a negotiated grievance procedure, a person wishing to file a complaint or a grievance on a matter of alleged employment discrimination must elect to raise the matter under either part 1614 or the negotiated grievance procedure, but not both. An election to proceed under this part is indicated only by the filing of a written complaint; use of the pre-complaint process as described in § 1614.105 does not constitute an election for purposes of this section. An aggrieved employee who files a complaint under this part may not thereafter file a grievance on the same matter. An election to proceed under a negotiated grievance procedure is indicated by the filing of a timely written grievance. An aggrieved employee who files a grievance with an agency whose negotiated agreement permits the acceptance of grievances which allege discrimination may not thereafter file a complaint on the same matter under part 1614 irrespective of whether the grievance has raised an issue of discrimination. Any such complaint filed after a grievance has been filed on the same matter shall be rejected without prejudice to the complainant's right to proceed through the negotiated grievance procedure including the right to appeal to the Commission from a final decision as provided in subpart D of this part. The notice of final action rejecting such a complaint shall advise the complainant of the right to appeal the final grievance decision to the Commission.

(b) When a person is not covered by a collective bargaining agreement that permits allegations of discrimination to be raised in a negotiated grievance procedure, allegations of discrimination shall be processed as complaints under this part.

(c) When a person is employed by an agency not subject to 5 U.S.C. 7121(d) and is covered by a negotiated grievance procedure, allegations of discrimination shall be processed as complaints under this part, except that the time limits for processing the complaint contained in § 1614.106 and for appeal to the Commission contained in § 1614.402 shall be held in abeyance during processing of a grievance covering the same matter as the complaint.

§ 1614.302 Mixed case complaints.

(a) *Definitions.* (1) *Mixed case complaint.* A mixed case complaint is a complaint of employment discrimination filed with a federal agency based on race, color, religion, sex, national origin, age, handicap or retaliation related to or stemming from an action that can be appealed to the Merit Systems Protection Board (MSPB). The complaint may contain only an allegation of employment discrimination or it may contain additional allegations that the MSPB has jurisdiction to address.

(2) *Mixed case appeals.* A mixed case appeal is an appeal filed with the MSPB that alleges that the appealable agency action was effected, in whole or in part, because of discrimination on the basis of race, color, religion, sex, national origin, handicap, age or retaliation.

(b) *Election.* An aggrieved person may initially file a mixed case complaint with an agency pursuant to this part or an appeal on the same matter with the MSPB pursuant to 5 CFR 1201.151, but not both. An agency shall inform every employee who is the subject of an action that is appealable to the MSPB and who has raised the issue of discrimination, either orally or in writing, during the processing of the action of the right to file either a mixed case complaint with the agency or to file a mixed case appeal with the MSPB. The person shall be advised that he or she may not initially file both a mixed case complaint and an appeal on the same matter and that whichever is filed first shall be considered an election to proceed in that forum. If a person files an appeal with the MSPB that is dismissed as untimely, he or she may, subject to § 1614.107, be able to file a mixed case complaint with the agency.

(c) *Cancellation or rejection.* An agency decision to cancel or reject a mixed case complaint on the basis of the complainant's prior election of the MSPB procedures shall be made as follows:

(1) Where the agency does not dispute the MSPB's jurisdiction over the appeal on the same matter, it shall cancel or reject the mixed case complaint pursuant to § 1614.107(d).

(2) Where the agency disputes the MSPB's jurisdiction over the appeal on the same matter, it shall hold the mixed case complaint in abeyance until the MSPB's Administrative Judge rules on the jurisdictional issue. During this period of time, all time limitations for processing or filing under this part and the statutes referenced in § 1614.103(a) will be tolled. If the MSPB's Administrative Judge finds that MSPB has jurisdiction over the matter, the agency shall cancel or reject the mixed case complaint pursuant to § 1614.107(d). If the MSPB's Administrative Judge finds that MSPB does not have jurisdiction over the matter, the agency shall recommence processing of the mixed case complaint. Any such mixed case complaint filed after an appeal has been filed on the same matter shall be rejected without affecting the complainant's right to raise the discrimination issue in the MSPB process and the complainant's right to petition the EEOC to review MSPB's decision on the discrimination allegation as provided in § 1614.303. The notice of final action rejecting such a complaint shall advise the complainant of the right to petition the EEOC to review the MSPB's final decision on the discrimination issue. An agency decision to hold a mixed case complaint in abeyance is not appealable to EEOC. An agency decision to cancel or reject a mixed case complaint is not appealable to the Commission except where § 1614.107(d) has been applied to a non-mixed case matter.

(d) Procedures for agency processing of mixed case complaints. When a complainant elects to proceed initially under this part rather than with the MSPB, the procedures set forth in subpart A shall govern the processing of the mixed case complaint with the following exceptions:

(1) At the time the agency advises a complainant of the acceptance of a mixed case complaint, it shall also advise the complainant that:

(i) If a notice of final action is not issued within 120 days of the date of filing of the mixed case complaint, the complainant may appeal the matter to the MSPB at any time thereafter as specified at 5 CFR 1201.154(a) or may file a civil action as specified at § 1614.310(g), but not both, and

(ii) If the complainant is dissatisfied with the agency's notice of final action on the mixed case complaint, the complainant may appeal the matter to the MSPB (not EEOC) within 20 days of receipt of the agency's notice of final action;

(2) At the time that the agency issues its notice of final action on a mixed case complaint, the agency shall advise the complainant of the right to appeal the matter to the MSPB (not EEOC) within 20 days of receipt and of the right to file a civil action as provided at § 1614.310(a).

§ 1614.303 Petitions to the EEOC from MSPB decisions on mixed case appeals and complaints.

(a) *Who may file.* Individuals who have received a final decision from the MSPB on a mixed case appeal or on the appeal of a notice of final action on a mixed case complaint under 5 CFR 1201.151 *et seq.* and 5 U.S.C. 7702 may petition EEOC to consider that decision.

The EEOC will not accept appeals from MSPB dismissals without prejudice.

(b) *Method of filing.* Filing shall be made by certified or registered mail return receipt requested to the Office of Review and Appeals, Equal Employment Opportunity Commission, 1801 L Street, NW., Washington, DC 20507.

(c) *Time to file.* A petition must be filed with the Commission either within 30 days after receipt of the final decision of the MSPB or within 30 days after the decision of a MSPB field office becomes final.

(d) *Service.* The petition for review must be served upon all individuals and parties on the MSPB's service list and the petitioner must certify as to the date and method of service.

§ 1614.304 Contents of petition.

(a) *Form.* Petitions must be written or typed, but may use any format including a simple letter format. Petitioners are encouraged to use EEOC Form 573, Notice of Appeal/Petition.

(b) *Contents.* Petitions must contain the following:

(1) The name and address of the petitioner;

(2) The name and address of the petitioner's representative, if any;

(3) A statement of the reasons why the decision of the MSPB is alleged to be incorrect, in whole or in part, with regard to issues of discrimination based on race, color, religion, sex, national origin, age, handicap or retaliation;

(4) A copy of the decision issued by the MSPB; and

(5) The signature of the petitioner and representative, if any.

§ 1614.305 Consideration procedures.

(a) Once a petition is filed, the Commission will examine it and determine whether the Commission will consider the decision of the MSPB. An agency may oppose the petition, either on the basis that the Commission should not consider the MSPB's decision or that the Commission should concur in the MSPB's decision, by filing any such argument with the Office of Review and Appeals and serving a copy on the petitioner within 15 days of the date of service of the petition.

(b) The Commission shall determine whether to consider the decision of the MSPB within 30 days after the Commission's Office of Review and Appeals receives the petition. A determination of the Commission not to consider the decision shall not be used as evidence with respect to any issue of discrimination in any judicial proceeding concerning that issue.

(c) If the Commission makes a determination to consider the decision, the Commission shall within 60 days after the date of its determination, consider the entire record of the proceedings of the MSPB and on the basis of the evidentiary record before the Board as supplemented in accordance with paragraph (d) of this section, either:

(1) Concur in the decision of the MSPB; or

(2) Issue in writing a decision that differs from the decision of the MSPB to the extent that the Commission finds that, as a matter of law:

(i) The decision of the MSPB constitutes an incorrect interpretation of any provision of any law, rule, regulation, or policy directive referred to in 5 U.S.C. 7702(a)(1)(B), or

(ii) The decision involving such provision is not supported by the evidence in the record as a whole.

(d) In considering any decision of the MSPB, the Commission, pursuant to 5 U.S.C. 7702(b)(4), may refer the case to the MSPB for the taking of additional evidence within such period as permits the Commission to make a decision within the 60-day period prescribed or provide on its own for the taking of additional evidence to the extent the Commission considers it necessary to supplement the record.

(e) Where the EEOC has differed with the decision of the MSPB under § 1614.305(c)(2), the Commission shall refer the matter to the MSPB.

§ 1614.306 Referral of case to special panel.

If the MSPB reaffirms its decision under 5 CFR 1201.162(a)(2) with or without modification, the matter shall be immediately certified to the Special Panel established pursuant to 5 U.S.C. 7702(d). Upon certification, the Board shall, within five days (excluding Saturdays, Sundays, and Federal holidays), transmit to the Chairman of the Special Panel and to the Chairman of the EEOC the administrative record in the proceeding including—

(a) The factual record compiled under this section, which shall include a transcript of any hearing(s);

(b) The decisions issued by the Board and the Commission under 5 U.S.C. 7702; and

(c) A transcript of oral arguments made, or legal brief(s) filed, before the Board and the Commission.

§ 1614.307 Organization of special panel.

(a) The Special Panel is composed of:

(1) A Chairman appointed by the President with the advice and consent of the Senate, and whose term is 6 years;

(2) One member of the MSPB designated by the Chairman of the Board each time a panel is convened;

(3) One member of the EEOC designated by the Chairman of the Commission each time a panel is convened.

(b) Designation of Special Panel member.

(1) Time of designation. Within five days of certification of the case to the Special Panel, the Chairman of the MSPB and the Chairman of the EEOC shall each designate one member from their respective agencies to serve on the Special Panel.

(2) Manner of designation. Letters of designation shall be served on the Chairman of the Special Panel and the parties to the appeal.

§ 1614.308 Practices and procedures of the special panel.

(a) *Scope.* The rules in this subpart apply to proceedings before the Special Panel.

(b) *Suspension of rules.* In the interest of expediting a decision, or for good cause shown, the Chairman of the Special Panel may, except where the rule is required by statute, suspend these rules on application of a party, or on his or her own motion, and may order proceedings in accordance with his or her direction.

(c) *Time limit for proceedings.* Pursuant to 5 U.S.C. 7702(d)(2)(A), the Special Panel shall issue a decision within 45 days after a matter has been certified to it.

(d) *Administrative assistance to Special Panel.*—(1) The MSPB and the EEOC shall provide the Panel with such reasonable and necessary administrative resources as determined by the Chairman of the Special Panel.

(2) Assistance shall include, but is not limited to, processing vouchers for pay and travel expenses.

(3) The Board and the EEOC shall be responsible for all administrative costs incurred by the Special Panel and, to the extent practicable, shall equally divide the costs of providing such administrative assistance. The Chairman of the Special Panel shall resolve the manner in which costs are divided in the event of a disagreement between the Board and the EEOC.

(e) *Maintenance of the official record.* The Board shall maintain the official record. The Board shall transmit two copies of each submission filed to each member of the Special Panel in an expeditious manner.

(f) *Filing and service of pleadings.*—(1) The parties shall file the original and six copies of all submissions with the

VOL 54 ISS 209 OCT 31 1989 UMI

Clerk, Merit Systems Protection Board, 1120 Vermont Avenue, NW., Washington, DC 20419. One copy of each submission shall be served on the other parties.

(2) A certificate of service specifying how and when service was made must accompany all submissions of the parties.

(3) Service may be by mail or by personal delivery during normal business hours (8:30 a.m.–5:00 p.m.). Due to the short statutory time limit, parties are required to file their submissions by overnight Express Mail, provided by the U.S. Postal Service, should they file by mail.

(4) The date of filing shall be determined by the date of mailing as indicated by the order date for Express Mail. If the filing is by personal delivery, it shall be considered filed on that date it is received in the office of the Clerk, MSPB.

(g) *Briefs and responsive pleadings.* If the parties wish to submit written argument, briefs shall be filed with the Special Panel within 15 days from the date of the Board's certification order. Due to the short statutory time limit responsive pleadings will not ordinarily be permitted.

(h) *Oral argument.* The parties have the right to oral argument if desired. Parties wishing to exercise this right shall so indicate at the time of filing their brief, or if no brief is filed, within 15 days from the date of the Board's certification order. Upon receipt of a request for argument, the Chairman of the Special Panel shall determine the time and place for argument and the time to be allowed each side, and shall so notify the parties.

(i) *Post-argument submissions.* Due to the short statutory time limit, no post-argument submissions will be permitted except by order of the Chairman of the Special Panel.

(j) *Procedural matters.* Any procedural matters not addressed in these regulations shall be resolved by written order of the Chairman of the Special Panel.

§ 1614.309 Enforcement of special panel decision.

The Board shall, upon receipt of the decision of the Special Panel, order the agency concerned to take any action appropriate to carry out the decision of the Panel. The Board's regulations regarding enforcement of a final order of the Board shall apply. These regulations are set out at 5 CFR Part 1201, subpart E.

§ 1614.310 Right to file a civil action.

An individual who has a complaint processed pursuant to 5 CFR 1201.151 *et seq.* or 29 CFR 1614.302 *et seq.* is authorized by 5 U.S.C. 7702 to file a civil action in an appropriate United States District Court:

(a) Within 30 days of receipt of notice of final action issued by an agency on a complaint unless an appeal is filed with the MSPB; or

(b) Within 30 days of receipt of notice of the final decision or action taken by the MSPB if the individual does not file a petition for consideration with the EEOC; or

(c) Within 30 days of receipt of notice that the Commission has determined not to consider the decision of the MSPB; or

(d) Within 30 days of receipt of notice that the Commission concurs with the decision of the MSPB; or

(e) If the Commission issues a decision different from the decision of the MSPB, within 30 days of receipt of notice that the MSPB concurs in and adopts in whole the decision of the Commission; or

(f) If the MSPB does not concur with the decision of the Commission and reaffirms its initial decision or reaffirms its initial decision with a revision, within 30 days of the receipt of notice of the decision of the Special Panel; or

(g) After 120 days from the date of filing a formal complaint if there is no final action or appeal to the MSPB; or

(h) After 120 days from the date of filing an appeal with the MSPB if the MSPB has not yet made a decision; or

(i) After 180 days from the date of filing a petition for consideration with Commission if there is no decision by the Commission, reconsideration decision by the MSPB or decision by the Special Panel.

Subpart D—Appeals and Civil Actions

§ 1614.401 Appeals to the Commission.

(a) A complainant may appeal an agency's notice of final action or an agency's failure to issue such a notice on an individual complaint.

(b) An agent may appeal a final agency decision on a class complaint, a class member may appeal a final agency decision on a claim for individual relief under a class complaint and both may appeal a final agency decision on a petition pursuant to § 1614.204(g)(4).

(c) A grievant may appeal issues of employment discrimination raised in a negotiated grievance procedure where the agency's negotiated labor-management agreement permits such issues to be raised and the individual elected under 5 U.S.C. 7121(d) to raise the matter in the negotiated grievance procedure. A grievant may appeal the final decision:

(1) Of the agency on the grievance;

(2) Of the arbitrator on the grievance; or

(3) Of the Federal Labor Relations Authority (FLRA) on exceptions to the arbitrator's award. A grievant may not appeal under this part, however, when the matter initially raised in the negotiated grievance procedure is still ongoing in that process, is in arbitration, is before the FLRA or is appealable to the MSPB. Any appeal prematurely filed in such circumstances shall be dismissed without prejudice. In addition, a grievant may not appeal under this subsection if 5 U.S.C. 7121(d) is inapplicable to the involved agency.

(d) A complainant, agent or individual class claimant may appeal to the Commission an agency's alleged noncompliance with a settlement agreement, notice of final action or final agency decision in accordance with § 1614.505.

§ 1614.402 Time for appeals to the commission.

Except for mixed case complaints and class complaints, any notice of final action may be appealed to the Commission within 30 days of the complainant's receipt of the notice. Except for complaints to which § 1614.301(c) applies, any complaint may be appealed after 180 days from the filing of the written complaint or, after 180 days plus any period of extension agreed to under § 1614.106(e), if the agency has not issued a notice of final action. Any complaint to which § 1614.301(c) applies may be appealed after 180 days after the grievance decision becomes final if the agency has not issued a notice of final action. Any grievance decision may be appealed within 30 days of receipt of a decision referred to in § 1614.401(c). In the case of class complaints, any final agency decision received by an agent, petitioner or an individual claimant may be appealed to the Commission within 30 days of its receipt.

§ 1614.403 How to appeal.

(a) The complainant must file his or her appeal and any supporting statement or brief with the Director, Office of Review and Appeals, Equal Employment Opportunity Commission, 1801 L Street, NW., Washington, DC 20507. The agency shall include this address in any notice of appeal rights which it is required to give the complainant under this part. The complainant should use EEOC Form 573, Notice of Appeal/Petition.

(b) The complainant shall furnish a copy of the appeal and any supporting statement or brief to the agency's EEO Director (or whomever is designated by the agency in the notice of final action) at the same time that he or she files the appeal with the Commission. In or attached to the appeal, the complainant must certify that a copy of the appeal and any supporting statement or brief were furnished to the agency's EEO Director or other designated official and state the date and method by which it was furnished.

(c) If a complainant does not file an appeal within the time limits of this subpart, the appeal will be untimely and shall be rejected by the Commission.

(d) The Agency file and any agency statement or brief in opposition to the appeal must be submitted to the Commission within 30 days of the date on which the appeal was served on the agency. A copy of the agency's opposition and, if not already furnished, the agency file, must be served on the complainant at the same time.

§ 1614.404 Appellate procedure.

The EEOC Chairman or his or her designee shall review the record and shall determine if the record requires supplementation. If the record requires supplementation, EEOC may supplement the record by its own fact finding or may remand the complaint back to the agency for further investigation. Once EEOC determines the record is complete, it will notify the parties and the complainant may then request a hearing. After the hearing, or after the time to request a hearing expires, the Commission shall issue a written decision on the appeal setting forth the reasons for its decision.

§ 1614.405 Supplementing the record on appeal.

The EEOC Chairman or his or her designee may supplement the record by an exchange of letters or memoranda, investigation, fact finding conference, remand to the agency or other procedures.

(a) Where the EEOC Chairman or his or her designee determines that the agency record is inadequate (i.e., the agency, without a reasonable explanation, did not investigate an issue or matter raised by the complaint, the investigation of which is necessary for a proper determination or which could change the outcome of the case; material evidence is available but was not obtained, there is no adequate explanation as to why it was not obtained and such evidence is either necessary for a proper determination or could change the outcome of the case; new and material evidence has been discovered that could change the outcome of the case; or substantial allegations of impropriety in the conduct of the investigation have been made that could change the outcome of the case) he or she may send the appeal to one of the Commission's field offices with instructions on how to supplement the record, or may remand the complaint back to the agency to complete the investigation.

(b) An agency's failure to develop an adequate record may result in notice being sent to an appropriate agency official or Congressional committee, or other appropriate action.

(c) If the EEOC Chairman or his or her designee determines that the complaint requires further investigation by EEOC, the field office shall assigne an investigator to supplement the record. The Commission's investigator shall submit a report of the investigation to the Office of Review and Appeals.

(d) If the EEOC Chairman or his or her designee remands the complaint back to the agency to complete the investigation, he or she shall designate a period of time between 30 and 90 days within which the agency must complete the investigation and return the record to EEOC. If the agency fails to return the complete record to the EEOC within the designated time period without adequate explanation, such failure may, in appropriate circumstances, cause the EEOC:

(1) To draw an adverse inference that the completed record would have reflected unfavorably on the agency;

(2) To consider the matters to which the further investigation pertains to be established in favor of the complainant;

(3) To exclude other evidence offered by the agency;

(4) To take such other actions as deemed appropriate.

(e) When the Commission supplements the record by means of additional investigation, the agency shall reimburse the Commission in accordance with instructions contained in the Commission's Management Directives.

(f) The following procedures apply when the Commission supplements the record:

(1) The complainant, the agency, and any employee of a federal agency shall produce such documentary and testimonial evidence as the Commission deems necessary.

(2) Commission employees are authorized to administer oaths. Statements of witnesses shall be made under oath or affirmation or, alternatively, be made by written statement under penalty or perjury.

(3) When the complainant, or the agency against which a complaint is filed, or its employees in bad faith fail to respond fully and in timely fashion to requests for documents, records, comparative data, statistics, affidavits, or the attendance of witness(es), the Commission may, in appropriate circumstnaces:

(i) Draw an averse inference that the requested information would have reflected unfavorably on the party refusing to provide the requested information;

(ii) Consider the matters to which the requested information pertains to be established in favor of the opposing party;

(iii) Exclude other evidence offered by the party failing to produce the requested information;

(iv) Issue a decision in favor of the opposing party; or

(v) Take such other actions as it deems appropriate.

(g) Any supplementation of the record will be conducted by Commission employees with appropriate security clearances when necessary except where the Commission finds it appropriate to delegate this responsibility to an Administrative Judge, complaints examiner or investigator from another agency that is not a party to the complaint. When the Commission delegates such responsibilities, it will supply the agency with the name of an Administrative Judge, a complaints examiner or investigator from another agency with appropriate security clearance who has been certified by the Commission as qualified to exercise the delegated responsibility.

§ 1614.406 Hearings.

(a) When EEOC determines the investigation is complete, the Chairman or his or her designee shall notify the parties that the investigation is complete and where appropriate shall transmit copies of any supplemental record to the parties. At that time, the Chairman or his or her designee shall notify the complainant that he or she may request a hearing. The complainant must notify the EEOC in writing within 15 calendar days of the receipt of the notice that he or she desires a hearing.

(b) Conduct of hearing. Agencies shall provide for the attendance at a hearing of all employees approved as witnesses by a Commission Administrative Judge. Attendance at hearings will be limited to persons determined by the Administrative Judge to have a direct connection with the complaint. Hearings are part of the investigative process and are thus closed to the public. The Administrative Judge shall have the power to regulate the conduct of a

BEST COPY AVAILABLE

VOL 54 ISS 209 OCT 31 1989 UMI

hearing, limit the number of witnesses whose testimony would be repetitious, and exclude any person from the hearing for contumacious conduct or misbehavior that obstructs the hearing. The Administrative Judge shall receive into evidence information or documents relevant to the complaint. Rules of evidence shall not be applied strictly, but the Administrative Judge shall exclude irrelevant or repetitious evidence. The Administrative Judge or the Commission may refer to the Disciplinary Committee of the appropriate Bar Association any attorney who refuses to follow the orders of an Administrative Judge, or who otherwise engages in improper conduct. The procedures contained in § 1614.405(f) shall apply to the conduct of hearings.

(c) *Recommended findings and conclusions without hearing.* (1) If a party believes that some or all material facts are not in genuine dispute and there is no genuine issue as to credibility, the party may file a statement with the Administrative Judge prior to the hearing setting forth the fact or facts and referring to the parts of the record relied on to support the statement. The statement must demonstrate that there is no genuine issue as to any material fact asserted not to be in dispute and cannot be based on informaiton not previously made available during the investigation unless the party demonstrates that the information was not available during the investigation. The statement must also demonstrate that there is no genuine issue as to credibility.

(2) A party opposing a request for recommended findings and conclusions without a hearing may refer to the record in the case to rebut the statement that a fact is not in dispute or may file an affidavit stating that the party cannot, for reasons stated, present facts to oppose the request. After considering the submissions, the Administrative Judge may refuse the request for recommended findings and conclusions without a hearing, order that discovery be permitted on the fact or facts involved, limit the hearing to the issues remaining in dispute, or make such other ruling as is appropriate.

(3) If the Administrative Judge determines that some or all facts are not in genuine dispute, based on a statement by a party or upon his or her own initiative, the Administrative Judge may, after giving notice to the parties and providing them an opportunity to respond in writing within 15 calendar days, issue recommended findings and conclusions without holding a hearing.

(d) *Recommended findings and conclusions.* Except as provided in § 1614.406(c), the Administrative Judge shall issue recommended findings and conclusions on the merits of the complaint, including recommended remedial action, where appropriate, with regard to the matter that gave rise to the complaint. The Administrative Judge shall send copies of the recommended findings and conclusions to the parties. The parties may, within 30 days of receipt of the recommended findings and conclusions, submit statements concerning the recommended findings and conclusions to the Office of Review and Appeals.

§ 1614.407 Decisions on appeals.

(a) Where the appeal has not been settled and after receipt of the statements of the parties regarding the recommended findings and conclusions or upon expiration of the period for submitting statements, or if a complainant fails to request a hearing within 15 days of receiving notice that the investigation is complete, the Office of Review and Appeals on behalf of the Commission shall issue a decision that specifically sets forth findings for each issue decided on the merits and reasons for each issue that is cancelled. The Commission shall cancel appeals or portions of appeals in accordance with § 1614.107 and shall remand matters to the agency when it reverses an agency's rejection or cancellation of a complaint. The decision shall be based on the preponderance of the evidence. If the decision contains a finding of discrimination or retaliation, appropriate remedy(ies) shall be included and, where appropriate, the entitlement to attorney's fees or costs shall be indicated. The decision shall reflect the date of its issuance, inform the complainant of his or her civil action rights, and be transmitted to the complainant and the agency by certified mail, return receipt requested. A copy of the appeal file will only be provided to the complainant and to the agency upon request.

(b) A decision issued under this section is final within the meaning of §§ 1614.408 and 1614.409 unless:

(1) Either party files a timely request to reopen pursuant to § 1614.407; or

(2) the Commission on its own motion reopens the case.

§ 1614.408 Reopening and reconsideration.

(a) Within a reasonable period of time, the Commission may, in its discretion, reopen and reconsider any decision of the Commission notwithstanding any other provisions of this part.

(b) A party may request reopening or reconsideration provided that such request is made within 30 days of receipt of a decision of the Commission or within 20 days of receipt of another party's timely request to reopen. Such request, along with any supporting statement or brief, shall be submitted to the Office of Review and Appeals and to all parties with proof of such submission. All other parties shall have 20 days from the date of service in which to submit to all other parties, with proof of submission, any statement or brief in opposition to the request.

(c) The request or the statement or brief in support of the request shall contain arguments or evidence which tend to establish that:

(1) New and material evidence is available that either was not readily available when the previous decision was issued or that explains evidence obtained by the Commission under § 1614.405; or

(2) The previous decision involved an erroneous interpretation of law, regulation or material fact, or misapplication of established policy; or

(3) The decision is of such exceptional nature as to have effects beyond the actual case at hand.

(d) A decision on a request to reopen by either party is final and there is no further right by either party to request reopening unless the decision remanded the complaint to the agency for further processing.

§ 1614.409 Civil action: Title VII and Rehabilitation Act.

A complainant who has filed an individual complaint, an agent who has filed a class complaint or a claimant who has filed a claim for individual relief is authorized under Title VII and the Rehabilitation Act to file a civil action in an appropriate United States District Court:

(a) Within 30 days of receipt of the agency's notice of final action on an individual complaint or final agency decision on a class complaint if no appeal has been filed;

(b) After 180 days from the date of filing a complaint if no appeal has been filed;

(c) Within 30 days after receipt of the Commission's final decision on an appeal; or

(d) After 180 days from the date of filing an appeal with the Commission if there has been no final decision by the Commission.

§ 1614.410 Civil action: Age Discrimination in Employment Act.

(a) A complainant who has filed an individual complaint, an agent who has filed a class complaint or claimant who has filed a claim for individual relief and who has exhausted administrative remedies may file a civil action in an appropriate United States District Court:

(1) Within 30 days of receipt of the agency's notice of final action on an individual complaint or final agency decision on a class complaint if no appeal has been filed;

(2) After 180 days from the date of filing a complaint if no appeal has been filed;

(3) Within 30 days after receipt of the Commission's final decision on an appeal; or

(4) After 180 days from the date of filing an appeal with the Commission if there has been no final decision by the Commission.

(b) When an individual has filed an administrative complaint alleging age discrimination, administrative remedies will be considered to be exhausted:

(1) 180 days after the filing of an individual complaint if the agency has not issued a notice of final action and the individual has not filed an appeal or 180 days after the filing of a class complaint if the agency has not issued a final agency decision;

(2) After the issuance of notice of final action on an individual complaint or final agency decision on a class complaint if the individual has not filed an appeal; or

(3) After the issuance of a final decision by the Commission on an appeal or 180 days after the filing of an appeal if the Commission has not issued a final decision.

(c) When a person has not filed an administrative complaint alleging age discrimination, the person may file a civil action not less than 30 days after giving the Commission notice of intent to file such action. Such notice shall be filed with EEOC, Federal Sector Programs, 1801 L Street NW., Washington, DC 20507, within 180 days after the alleged unlawful practice occurred. The civil action must be filed in an appropriate United States District Court within two years or, if willful, three years of the date of the alleged violation of the ADEA. Recovery of back wages in such a lawsuit is limited to two years prior to the date of filing suit, or to three years if the violation is deemed willful.

§ 1614.411 Civil action: Equal Pay Act.

A complainant is authorized under section 16(b) of the Fair Labor Standards Act to file a civil action in a court of competent jurisdiction within two years or, if the violation is willful, three years of the date of the alleged violation of the Equal Pay Act regardless of whether he or she pursued any administrative complaint processing. Recovery of back wages is limited to two years prior to the date of filing suit, or to three years if the violation is deemed willful; liquidated damages in an equal amount may also be awarded. The filing of a complaint or appeal under this part shall not toll the time for filing a civil action.

§ 1614.412 Effect of filing civil action.

Filing a civil action under § 1614.408 through § 1614.410 shall terminate Commission processing of the appeal. If private suit is filed subsequent to the Commission's initiation of an investigation, the parties are requested to notify the Commission in writing.

Subpart E—Remedies and Corrective Action

§ 1614.501 Remedial actions.

(a) When an agency, or the Commission, in an individual case of discrimination, finds that an applicant or an employee has been discriminated against, the agency shall provide full relief, as explained in appendix A of this part, which shall include the following elements in appropriate circumstances:

(1) Notification to all employees of the agency in the affected facility of their rights to be free of unlawful discrimination and assurance that the particular types of discrimination found will not recur;

(2) Commitment that corrective, curative or preventive action will be taken, or measures adopted, to ensure that violations of the law similar to those found will not recur;

(3) An unconditional offer to each identified victim of discrimination of placement in the position the person would have occupied but for the discrimination suffered by that person, or a substantially equivalent position;

(4) Payment to each identified victim of discrimination on a make whole basis for any loss of earnings the person may have suffered as a result of the discrimination; and

(5) Commitment that the agency shall cease from engaging in the specific unlawful employment practice found in the case.

(b) Remedial action involving an applicant. (1) When an agency, or the Commission, finds that an applicant for employment has been discriminated against, the agency shall offer the applicant the position for which the applicant applied or, if justified by the circumstances, a substantially equivalent position unless clear and convincing evidence indicates that the applicant would not have been selected even absent the discrimination. The offer shall be made in writing. The individual shall have 15 days from receipt of the offer within which to accept or decline the offer. Failure to accept the offer within the 15-day period will be considered a declination of the offer, unless the individual can show that circumstances beyond his or her control prevented a response within the time limit. If the offer is accepted, appointment shall be retroactive to the date the applicant would have been hired. Back pay, computed in the manner prescribed by 5 CFR 550.805, shall be awarded from the date the individual would have entered on duty until the date the individual actually enters on duty unless clear and convincing evidence indicates that the applicant would not have been selected even absent discrimination. The back pay computation, however, shall not include any amount as interest on back pay. The individual shall be deemed to have performed service for the agency during this period for all purposes except for meeting service requirements for completion of a required probationary or trial period. If the offer of employment is declined, the agency shall award the individual a sum equal to the back pay he or she would have receive, computed in the manner prescribed by 5 CFR 550.805, from the date he or she would have been appointed until the date the offer was made, subject to the limitation of paragraph (b)(4) of this section. The back pay computation shall not include any amount as interest on back pay. The agency shall inform the applicant, in its offer of employment, of the right to this award in the event the offer is declined.

(2) When an agency, or the Commission, finds that discrimination existed at the time the applicant was considered for employment but also finds by clear and convincing evidence that the applicant would not have been hired even absent discrimination, the agency shall nevertheless take all steps necessary to eliminate the discriminatory practice and ensure it does not recur.

(3) This paragraph shall be cited as the authority under which the above-described appointments or awards of back pay shall be made.

(4) Back pay under this paragraph for complaints under Title VII or the Rehabilitation Act may not extend from a date earlier than two years prior to the date on which the complaint was initially filed by the applicant.

(c) Remedial action involving an employee. When an agency, or the Commission, finds that an employee of the agency was discriminated against, the agency shall take remedial actions which shall include one or more of the following, but need not be limited to these actions:

(1) Retroactive promotion, with back pay computed in the manner prescribed by 5 CFR 550.805, unless clear and convincing evidence contained in the record evidences that the employee would not have been promoted or employed at a higher grade, even absent discrimination. The back pay computation, however, shall not include any amount as interest on back pay. The back pay liability under Title VII or the Rehabilitation Act is limited to two years prior to the date the discrimination complaint was filed.

(2) If clear and convincing evidence indicates that, although discrimination existed at the time selection for promotion was made, the employee would not have been promoted even absent discrimination, the agency shall nevertheless eliminate any discriminatory practice and ensure it does not recur.

(3) Cancellation of an unwarranted personnel action and restoration of the employee.

(4) Expunction from the agency's records of any reference to or any record of an unwarranted disciplinary action that is not a personnel action.

(5) Full opportunity to participate in the employee benefit denied (e.g., training, preferential work assignments, overtime scheduling).

(d) The agency has the burden of proving by a preponderance of the evidence that the complainant has failed to mitigate his or her damages.

(e) *Attorney's fees or costs.* (1) *Awards of attorney's fees or costs.* The provisions of this paragraph relating to the award of attorney's fees or costs shall apply to allegations of discrimination or retaliation prohibited by Title VII and the Rehabilitation Act. In a notice of final action or a decision, the agency or Commission may award the applicant or employee reasonable attorney's fees or costs incurred in the processing of the complaint.

(i) A finding of discrimination raises a presumption of entitlement to an award of attorney's fees.

(ii) Any award of attorney's fees or costs shall be paid by the agency.

(iii) Attorney's fees are allowable only for the services of members of the Bar and law clerks, paralegals or law students under the supervision of members of the Bar, except that no award is allowable for the services of any employee of the Federal Government.

(iv) Attorney's fees shall be paid only for services performed after the filing of the complaint required in § 1614.104 and after the complainant has notified the agency that he or she is represented by an attorney, except that fees are allowable for a reasonable period of time prior to the notification of representation for any services performed in reaching a determination to represent the Complainant. Written submissions to the agency which are signed by the representative shall be deemed to constitute notice of representation.

(2) *Amount of awards.* When the agency or the Commission awards attorney's fees or costs, the complainant's attorney shall submit a verified statement of costs and attorney's fees, as appropriate, to the agency within 20 days of receipt of the decision. A statement of attorney's fees shall be accompanied by an affidavit executed by the attorney of record itemizing the attorney's charges for legal services and both the verified statement and the accompanying affidavit shall be made a part of the complaint file. The amount of attorney's fees or costs to be awarded the complainant shall be determined by agreement between the complainant, the complainant's representative and the agency. Such agreement shall immediately be reduced to writing. If the complainant, the representative and the agency cannot reach an agreement on the amount of attorney's fees or costs within 20 days of the agency's receipt of the verified statement and accompanying affidavit, the agency shall issue a decision determining the amount of attorney's fees or costs due within 30 days of receipt of the statement and affidavit. The decision shall include a notice of right to appeal to the EEOC along with EEOC Form 573, Notice Of Appeal/Petition and shall include the specific reasons for determining the amount of the award.

(i) The amount of attorney's fees shall be calculated in accordance with existing case law using the following standards:

(A) The starting point shall be the number of hours reasonably expended multiplied by a reasonable hourly rate.

(B) This amount may be reduced or increased in consideration of the following factors, although ordinarily many of these factors are subsumed within the calculation set forth above: the time and labor required, the novelty and difficulty of the questions, the skill requisite to perform the legal service properly, the attorney's preclusion from other employment due to acceptance of the case, the customary fee, whether the fee is fixed or contingent, time limitations imposed by the client or the circumstances, the amount involed and the results obtained, the experience, reputation, and ability of the attorney, the undesirability of the case, the nature and length of the professional relationship with the client, and the awards in similar cases. Only in cases of exceptional success should any of these factors be used to enhance an award computed by the formula set forth in paragraph (d)(2)(i)(A) of this section.

(ii) The costs that may be awarded are those authorized by 28 U.S.C. 1920 to include:

(A) Fees of the reporter for all or any of the stenographic transcript necessarily obtained for use in the case;

(B) Fees and disbursements for printing and witnesses; and

(C) Fees for exemplification and copies of papers necessarily obtained for use in the case.

Witness fees shall be awarded in accordance with the provisions of 28 U.S.C. 1821, except that no award shall be made for a federal employee who is in a duty status when made available as a witness.

§ 1614.502 Corrective action.

(a) Corrective action ordered by the Office of Review and Appeals or the Commission is mandatory and binding on the agency except as provided in § 1614.406(b). Failure to implement ordered relief shall be subject to judicial enforcement as specified in § 1614.504(c).

(b) When the agency requests reopening and when the case involves removal, separation, or suspension continuing beyond the date of the request to reopen, and when the decision recommends retroactive restoration, the agency shall comply with the decision only to the extent of the temporary or conditional restoration of the employee to duty status in the position recommended by the Commission, pending the outcome of the agency request for reopening.

(1) Service under the temporary or conditional restoration provisions of this paragraph shall be credited toward the completion of a probationary or trial period, eligibility for a within-grade increase, or the completion of the service requirement for career tenure, if the Commission upholds its decision after reopening the case or refuses to reopen.

(2) The agency shall notify the Commission and the employee in writing, at the same time it requests

reopening, that the remedial action it takes is temporary or conditional.

(c) When no request for reopening is filed within 30 days of receipt of the decision, or when a request to reopen is denied, the agency shall execute the action ordered and there is no further right to delay implementation of the ordered relief. The corrective action shall be completed not later than 60 days after the decision becomes final.

§ 1614.503 Enforcement of final decisions.

(a) *Petition for enforcement.* A complainant may petition the Commission for enforcement of a decision issued under the Commission's appellate jurisdiction. The petition shall be submitted to the Office of Review and Appeals. The petition shall specifically set forth the reasons that lead the complainant to believe that the agency is not complying with the decision.

(b) *Compliance.* On behalf of the Commission, the Office of Review and Appeals shall take all necessary action to ascertain whether the agency is implementing the decision of the Commission. If the agency is found not to be in compliance with the decision, efforts shall be undertaken to obtain compliance.

(c) *Clarification.* On behalf of the Commission, the Office of Review and Appeals may, on its own motion or in response to a petition for enforcement or in connection with a timely request to reopen, issue a clarification of a prior decision. A clarification cannot change the result of a prior decision or enlarge or diminish the relief ordered but may further explain the meaning or intent of the prior decision.

(d) *Referral to the Commission.* Where the Director, Office of Review and Appeals, is unable to obtain satisfactory compliance with the final decision, the Director shall submit appropriate findings and recommendations for enforcement to the Commission, or, as directed by the Commission, refer the matter to another appropriate agency.

§ 1614.504 Enforcement action by the commission.

(a) *Notice to show cause.* The Commission may issue a notice to the head of any Federal agency that has failed to comply with a decision to show cause why there is noncompliance. Such notice may request the head of the agency or a representative to appear before the Commission or to respond to the notice in writing with adequate evidence of compliance or with compelling reasons for non-compliance.

(b) *Certification to the Office of Special Counsel.* Where appropriate and pursuant to the terms of a memorandum of agreement, the Commission may refer the matter to the Office of Special Counsel for enforcement action.

(c) *Notification to complainant of completion of administrative efforts.* Where the Commission has determined that an agency is not complying with a prior decision, or where an agency has failed or refused to submit its report of corrective action, the Commission shall notify the complainant of the right to file a cival action for enforcement of the decision pursuant to Title VII, the ADEA, the Equal Pay Act or the Rehabilitation Act and to seek judicial review of the agency's refusal to implement corrective action pursuant to the Administrative Procedure Act, 5 U.S.C. 701 *et seq.*, and the mandamus statute, 28 U.S.C. 1361, or to commence *de novo* proceedings pursuant to the appropriate statutes.

§ 1614.505 Compliance with settlement agreements and decisions.

Any settlement agreement knowingly and voluntarily agreed to by the parties, reached at any stage of the complaint process, shall be binding on both parties. A notice of final action or final agency decision that has not been the subject of an appeal, request to reopen, or civil action shall be binding on the agency. If the complainant believes that the agency has failed to comply with the terms of a settlement agreement, notice of final action, or final agency decision, the complainant shall notifiy the EEO Director, in writing, of the alleged noncompliance within 30 days of when the complainant knew or should have known of the alleged noncompliance. The complainant may request that the terms of the settlement agreement be specifically implemented or, alternatively, that the complainant be reinstated for further processing from the point processing ceased. The agency shall resolve the matter and respond to the complainant, in writing. If the agency has not responded to the complainant, in writing, or if the complainant is not satisfied with the agency's attempt to resolve the matter, the complainant may appeal to the Commission for a determination as to whether the agency has complied with the terms of the settlement agreement, notice of final action or final agency decision. The complainant may file such an appeal 35 days after service of the allegations of noncompliance, but must file an appeal within 30 days of receipt of an agency's determination. Prior to rendering its determination, the Commission may request that the parties submit whatever additional information or documentation it deems necessary or may direct that an investigation or hearing on the matter be conducted. If the Commission determines that the agency is not in compliance and the noncompliance is not attributable to acts or conduct of the complainant, it may order such compliance or it may order that the complaint be reinstated for further processing from the point processing ceased. Allegations that subsequent acts of retaliation or discrimination violate a settlement agreement shall be processed as separate complaints under § 1614.106 or § 1614.204, as appropriate, rather than under this section.

Subpart F—Matters of General Applicability

§ 1614.601 EEO group statistics.

(a) Each agency shall establish a system to collect and maintain accurate employment information on the race, national origin, sex and handicap(s) of its employees.

(b) Data on race, national origin and sex shall be collected by voluntary self-identification. If an employee does not voluntarily provide the requested information, the agency shall advise the employee of the importance of the data and of the agency's obligation to report it. If the employee still refuses to provide the information, the agency must make a visual identification and inform the employee of the data it will be reporting. If an agency believes that information provided by an employee is inaccurate, the agency shall counsel the employee about the solely statistical purpose for which the data is being collected, the need for accuracy, the agency's recognition of the sensitivity of the information and the existence of procedures to prevent its unauthorized disclosure. If, after counseling, the employee declines to change the apparently inaccurate self-identification, the agency must accept it.

(c) The information collected under paragraph (b) of this section shall be disclosed only in the form of gross statistics. An agency shall not collect or maintain any information on the race, national origin or sex of individual employees except when an automated data processing system is used in accordance with standards and requirements prescribed by the Commission to insure individual privacy and the separation of that information from personnel records.

(d) Each system is subject to the following controls:

VOL 54 ISS 209 OCT 31 1989 UMI

(1) Only those categories of race and national origin prescribed by the Commission may be used;

(2) Only the specific procedures for the collection and maintenance of data that are prescribed or approved by the Commission may be used;

(3) The Commission shall review the operation of the agency system to insure adherence to Commission procedures and requirements. An agency may make an exception to the prescribed procedures and requirements only with the advance written approval of the Commission.

(e) The agency may use the data only in studies and analyses which contribute affirmatively to achieving the objectives of the equal employment opportunity program. An agency shall not establish a quota for the employment of persons on the basis of race, color, religion, sex, or national origin.

(f) Data on handicaps shall also be collected by voluntary self-identification. If an employee does not voluntarily provide the requested information, the agency shall advise the employee of the importance of the data and of the agency's obligation to report it. If an employee who has been appointed pursuant to special appointment authority for hiring individuals with handicaps still refuses to provide the requested information, the agency must identify the employee's handicap based upon the records supporting the appointment. If any other employee still refuses to provide the requested information or provides information which the agency believes to be inaccurate, the agency should report the employee's handicap status as unknown.

(g) An agency shall report to the Commission on employment by race, national origin, sex and handicap in the form and at such times as the Commission may require.

§ 1614.602 Reports to the Commission.

(a) Each agency shall report to the Commission information concerning precomplaint counseling and the status, processing and disposition of complaints under this part at such times and in such manner as the Commission prescribes.

(b) Each agency shall advise the Commission whenever it is served with a Federal court complaint based upon a complaint that has been appealed to the Commission.

(c) Each agency shall submit annually for the review and approval of the Commission written national and regional equal employment opportunity plans of action. Plans shall be submitted in a format prescribed by the Commission and shall include, but not be limited to:

(1) Provision for the establishment of training and education programs designed to provide maximum opportunity for employees to advance so as to perform at their highest potential;

(2) Description of the qualifications, in terms of training and experience relating to equal employment opportunity, of the principal and operating officials concerned with administration of the agency's equal employment opportunity program; and

(3) Description of the allocation of personnel and resources proposed by the agency to carry out its equal employment opportunity program.

§ 1614.603 Voluntary settlement attempts.

Each agency shall make reasonable efforts to voluntarily settle complaints of discrimination as early as possible in, and throughout, the administrative processing of complaints, including the precomplaint counseling stage. Any settlement reached shall be in writing and signed by both parties and shall identify the allegations resolved.

§ 1614.604 Filing and computation of time.

(a) All time periods in this part that are stated in terms of days are calendar days unless otherwise stated.

(b) A document shall be deemed timely if it is delivered in person or postmarked before the expiration of the applicable filing period, or, in the absence of a legible postmark, if it is received by mail within five days from the expiration of the applicable filing period.

(c) The agency or the Commission shall extend any time limits in this part when the individual shows that he or she was not notified of the time limits and was not otherwise aware of them, or that despite due diligence he or she was prevented by circumstances beyond his or her control from submitting the matter within the time limits, or for other reasons considered sufficient by the agency or the Commission.

(d) The first day counted shall be the day after the event from which the time period begins to run and the last day of the period shall be included, unless it falls on a Saturday, Sunday or Federal holiday, in which case the period shall be extended to include the next business day.

§ 1614.605 Representation and official time.

(a) At any stage in the processing of a complaint, including the counseling stage under § 1614.105, the complainant shall have the right to be accompanied, represented, and advised by a representative of complainant's choice.

(b) If the complainant is an employee of the agency, he or she shall have a reasonable amount of official time to prepare the complaint if otherwise on duty. If the complainant is an employee of the agency and he designates another employee of the agency as his or her representative, the representative shall have reasonable amount of official time, if otherwise on duty, to prepare the complaint. The agency is not obligated to change work schedules, incur overtime wages, or pay travel expenses to facilitate the choice of a specific representative or to allow the complainant and representative to confer. However, the complainant and representative, if employed by the agency and otherwise in a pay status, shall be on official time, regardless of their tour of duty, when their presence is authorized or required by the agency or the Commission during the investigation, informal adjustment, or hearing on the complaint.

(c) In cases where the representation of a complainant or agency would conflict with the official or collateral duties of the representative, the Commission or the agency may, after giving the representative an opportunity to respond, disqualify the representative.

(d) After the agency has received written notice of the designation of a representative, all official correspondence shall be with the representative with copies to the complainant, and time frames for receipt of materials by the complainant shall be computed from the time of receipt by the representative.

(e) The Complainant shall at all times be responsible for proceeding with the complaint whether or not he or she has designated a representative.

(f) Witnesses who are Federal employees, regardless of their tour of duty and regardless of whether they are employed by the respondent agency or some other Federal agency, shall be in a duty status when their presence is authorized or required by Commission or agency officials in connection with a complaint.

§ 1614.606 Joint processing and consolidation of complaints.

Complaints of discrimination filed by two or more complainants consisting of substantially similar allegations of discrimination or relating to the same matter, or two or more complaints of discrimination from the same complainant, may be consolidated by the agency or the Commission for joint processing after appropriate notification to the parties.

§ 1614.607 Severance of issues.

An agency or the Commission may sever any issue(s) from a complaint at any time for separate processing or decision, or for consolidation with another complaint after appropriate notification to the complainant.

§ 1614.608 Delegation of authority.

An agency may delegate authority under this part to the agency's EEO Director, who must report directly to the agency head. The EEO Director may redelegate any of his or her authority to a designee reporting directly to the EEO Director.

BILLING CODE 6750-06-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Kentucky Permanent Regulatory Program; Kentucky Bond Pool

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing the receipt of a proposed program amendment to the Kentucky permanent regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of proposed modifications to Kentucky Administrative Regulations (KAR) at 405 KAR 10:200, the regulations governing Kentucky's alternative bonding program known as the Kentucky Bond Pool. The proposed regulations implement Senate Bill 338 passed by the 1988 Kentucky General Assembly.

This notice sets forth the times and locations that the Kentucky program and the proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding a public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m. on November 30, 1989. If requested, a public hearing on the proposed amendment will be held at 10:00 a.m. on November 27, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on November 15, 1989.

ADDRESSES: Written comments and requests for a hearing should be mailed or hand delivered to: Roger Calhoun, Acting Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504. Copies of the Kentucky program, the proposed amendment, and all written comments received in response to this notice will be available for review at the addresses listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting OSM Lexington Field Office.

Office of Surface Mining Reclamation and Enforcement, Lexington Field Office, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504, Telephone: (606) 233-7327

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5131, Washington, DC 20240. Telephone: (202) 343-5492

Office of Surface Mining Reclamation and Enforcement, Eastern Field Operations, Ten Parkway Center, Pittsburgh, Pennsylvania 15220, Telephone: (412) 937-2828

Department for Surface Mining Reclamation and Enforcement, No. 2 Hudson Hollow Complex, Frankfort, Kentucky 40601, Telephone: (502) 564-6940

If a public hearing is held, its location will be: The Harley Hotel, 2143 North Broadway, Lexington, Kentucky 40505.

FOR FURTHER INFORMATION CONTACT: Roger Calhoun, Acting Director, Lexington Field Office, Telephone (606) 233-7327.

SUPPLEMENTARY INFORMATION:

I. Background

On May 18, 1982, the Secretary of the Interior conditionally approved the Kentucky program. Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval can be found in the May 18, 1982, **Federal Register** (47 FR 21404-21435). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 917.11, 917.15, 917.16, and 917.17.

II. Discussion of Amendment

By letter dated September 18, 1989 (Administrative Record No. KY-916), Kentucky submitted proposed regulations to revise 405 KAR 10:200, the regulations governing the Kentucky Bond Pool. The proposed regulations implement Senate Bill 338 passed by the 1988 Kentucky General Assembly.

The proposed regulations delete from the definition of "member" the requirement that only permits held by bond pool members can be covered by the pool. Kentucky Revised Statutes (KRS) 350.720(14) authorizes pool coverage for nonmember permittees to participate in the abandoned mine land enhancement program.

The proposed regulations relax the criteria used to determine eligibility for membership into the Kentucky Bond Pool. The proposed regulations allow the Bond Pool Commission greater flexibility in applying compliance record criteria in determining eligibility. The Bond Pool Commission is authorized to defer action on an application for pool membership until violations and penalty assessments that could affect the applicant's eligibility or membership rating have been resolved. The proposed regulations also make several nonsubstantive changes for compliance with KRS Chapter 13A provisions.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is now seeking comment on whether the amendment proposed by Kentucky satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Kentucky program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commentor's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than the Lexington Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR FURTHER INFORMATION CONTACT**" by 4:00 p.m. on November 15, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will

greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment, and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendments may request a meeting at the OSM, Lexington Field Office listed under "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT**." All such meetings will be open to the public and, if possible, notices of meetings will be posted in advance at the locations listed under "**ADDRESSES**." A written summary of each meeting will be made a part of the Administrative Record.

VI. Procedural Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order 12291 and the Regulatory Flexibility Act

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 917

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: October 19, 1989.

30 CFR Part 935

Ohio Permanent Regulatory and Abandoned Mined Lands Programs; Revision of Ohio Revised Code

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing the receipt of proposed Program Amendment Number 40 to the Ohio permanent regulatory and abandoned mined lands (AML) programs (hereinafter jointly referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments were initiated by Ohio and are intended to revise six sections of the Ohio Revised Code to be consistent with Amended Substitute House Bill 399 of the 118th Ohio General Assen.bly. The proposed amendments would revise Ohio's method of calculating average wage rates for contractors performing reclamation work for the State, would restore civil service status to Ohio's regulatory inspection officers, would allow use of forfeited bond and defaulted area funds to pay administrative and design costs, and would prohibit the delay of reclamation while the Ohio Attorney General takes action to recover the State's reclamation expenses.

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m. on November 30, 1989. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on November 27, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on November 15, 1989.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed or hand-delivered to Ms. Nina Rose Hatfield, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contacting OSM's Columbus Field Office.

Office of Surface Mining Reclamation and Enforcement, Columbus Field Office, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43232, Telephone: (614) 866-0578.

Ohio Department of Natural Resources, Division of Reclamation, Fountain Square, Building B-3, Columbus, Ohio 43224, Telephone: (614) 265-6675.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Discussion of the Proposed Amendments

By letter dated October 2, 1989 (Administrative Record No. OH-1218), Ohio submitted proposed Program Amendment No. 40. This proposed amendment was initiated by Ohio to revise six sections of the Ohio Revised Code to be consistent with Amended Substitute House Bill 399 of the 118th Ohio General Assembly. The proposed amendment would revise the Ohio program at Ohio Revised Code (ORC) sections 1513.02(J); 1513.08(A); 1513.18

(B), (C), (F), and (H); 1513.24; and 1513.37(J).

Nonsubstantive changes are proposed throughout these six sections of the ORC to correct paragraph letter notations and to improve the clarity of the statutes.

The substantive changes proposed in Program Amendment No. 40 are discussed briefly below:

(1) Average Wage Rates for Reclamation Contractors

ORC section 1513.02 paragraph (J): This new paragraph is being added to specify that the Chief of the Ohio Department of Natural Resources, Division of Reclamation (the Chief), shall triennially determine the average wage rates paid by companies performing reclamation for Ohio. The initial determination of the average wage rate will be based on the wages paid by companies performing work for Ohio during the last ten years. Subsequent determinations will be based on wages paid by companies during the preceding three years.

ORC section 1513.18 paragraph (H): This paragraph is being rewritten to specify that the average wage rate required by the Chief of every contractor performing reclamation work under ORC section 1513.18 shall be as determined by the Chief under ORC section 1513.02.

ORC section 1513.24: A new paragraph is being added to provide that the Chief shall require every contractor performing reclamation work under ORC section 1513.24 to pay workers at the greater of their rate of pay or the average wage rate for the same or similar work as determined by the Chief under ORC section 1513.02.

ORC section 1513.37 paragraph (J): The last sentence in this paragraph is being rewritten to specify that the average wage rate required by the Chief of every contractor performing reclamation work under ORC section 1513.37 shall be as determined by the Chief under ORC section 1513.02.

(2) Civil Service Status for Regulatory Inspectors

ORC 1513.03: This section is being rewritten to delete the statement that Ohio regulatory inspection officers shall serve at the pleasure of the Chief. A new paragraph is also being added to provide that, to be eligible for appointment as inspection officers, appointees shall first pass an examination prepared and administered by the Ohio Department of Administrative Services and that new inspectors shall serve in a provisional status for one year to the satisfaction of the Chief. These provisions shall not apply to persons who were inspection officers on or before April 10, 1972 if the person is a certified employee in the classified service of the State.

(3) Administrative and Design Costs for Reclamation of Forfeited and Defaulted Areas

ORC section 1513.08 paragraph (A): This paragraph is being rewritten to provide that the Chief may expend money from the reclamation supplemental forfeiture account to pay necesary administrative, engineering, and design costs incurred by Ohio in reclaiming forfeited areas. Administrative exenditures need not be made under contract.

ORC section 1513.18 paragraphs (B) and (C): These paragraphs are being rewritten to provide that the Chief may expend money from the defaulted areas fund to pay necessary administrative, engineering, and design costs incurred by Ohio in reclaiming defaulted areas. Administrative expenditures need not be made under contract.

(4) Prohibition Against Delaying Reclamation

ORC section 1513.18 paragraph (F): The last sentence in this paragraph is being rewritten to provide that the Chief shall not postpone the reclamation of forfeited or defaulted areas because of any actions being brought by the Ohio Attorney General under this paragraph to recover the State's reclamation expenses. Prior to completing reclamation, the Chief may collect through the Attorney General any additional amount in excess of the forfeited bond that the Chief believes will be necessary for reclamation of the land that the operator should have, but failed to, reclaim.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the Ohio program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenters recommendations. Comments received after the time indicated under "**DATES**" or at locations other than the Columbus Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "**FOR MORE INFORMATION CONTACT**" by 4:00 p.m. on November 15, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under "**FOR MORE INFORMATION CONTACT**." All such meetings shall be open to the public and, if possible, notices of the meetings will be posted at the locations listed under "**ADDRESSES**." A written summary of each public meeting will be made a part of the Administrative Record.

VOL 54 ISS 209 OCT 31 1989 UMI

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Treasury expects to issue a Notice of Proposed Rulemaking under the Bank Secretary Act to address the problem of money laundering through international payments, especially wire transfers of funds. This Advance Notice of Proposed Rulemaking requests comments on a number of regulatory options.

DATES: Comments must be received no later than January 2, 1990.

ADDRESS: Comments should be sent to: Amy G. Rudnick, Director, Office of Financial Enforcement, Department of the Treasury, Room 4320, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Linda Noonan, Senior Counsel for Financial Enforcement. Office of the Assistant General Counsel (Enforcement), (202) 566–2941.

SUPPLEMENTARY INFORMATION: The Bank Secretary Act, Public Law 91–508, (codified at 12 U.S.C. 1829b, 12 U.S.C. 1951, *et seq.*, and 31 U.S.C. 5311–5326), authorizes the Secretary of the Treasury to require financial institutions to keep records and file reports that the Secretary determines have a high degree or usefulness in criminal, tax, and regulatory matters. The primary purpose of the Act is to identify the sources, volumes and movements of monies moving into and out of the country and through domestic financial institutions. *See* H.R. Rep. No. 975, 91st Cong., 2d Sess. 11–13 (1970). In exercising this far reaching authority, Treasurey has been mindful of issues concerning undue interference with foreign laws and has been careful not to create obstacles to the free flow of legitimate international trade and commerce. H.R. Rep. No. 975 at 13.

Under 31 U.S.C. 5314, the Secretary may require reports or records relating to transactions between persons subject to the jurisdiction of the United States and "foreign financial agencies", *e.g.*, financial institutions located abroad. In addition, pursuant to 31 U.S.C. 5318(a)(2), the Secretary may require that domestic financial institutions "maintain appropriate procedures" to ensure compliance with any regulation prescribed under section 5314 or any other provision in 31 U.S.C. 5311–5326. Treasury will be exercising its authority unde these provisions to address the problem of "laundering" drug and other illegal proceeds through the international payments system, particularly through international wire transfers of funds. International wire transfers of funds include transactions where either (1) a foreign office of a financial institution instructs a U.S. office of a financial institution to effect a payment in the U.S., directly or indirectly, or (2) where a U.S. office of a financial institution instructs a foreign office of a financial institution to effect a payment abroad, directly or indirectly. (The term does not include check or ACH payments.)

World-wide gross drug revenues are estimated to be $300 billion. Illegal drug revenues in the United States are estimated to total $110 billion. Estimates are that only 20% of the money generated from narcotics trafficking goes to the cost of goods sold, with 80% available for profits. These profits are used to finance other narcotics and criminal activities, purchase luxury items, make investmens in real estate and acquire legitimate businesses.

Money laundering is a vital component of drug trafficking and other criminal activity throughout the world. Criminals must "wash" their "dirty" money to make it appear "clean." As President Bush recently stated,

> Drug money undermines honest businesses, corrupts political institutions, and even threatens the security of nations. To conceal their obscene profits, drug barons must wash their money by cycling it through financial institutions and illegitimate shell corporations.

Currently, illegal funds are being transferred from or to the United States and "cycled" through intricate money laundering schemes involving international payments, particularly wire transfers. Several recent money laundering operations, which have been discovered by Treasury and other federal law enforcement agencies, such as Operations C-Chase and Polar Cap, are testaments to this phenomenon. In an April 28, 1989, submission to the Director, Office of National Drug Control Policy, reprinted in the Congressional Record of May 18, 1989, the American Bankers Association stated that, "Wire transfers, which are essentially unregulated, have emerged as the primary method by which high volume launderers ply their trade." 135 Cong. Rec. S5555 (May 16, 1989).

To date Treasury has used its Bank Secrecy Act authority to require financial institutions to keep records of all requests, advices and instructions relating to international transfers of more than $10,000 to or from any person or account outside the United States. 31 CFR 103.33(b). Under this provision, a financial institution must keep a record of each international transaction over $10,000, including all international wire transfers of funds and book transfers of credit. Currently, Treasury does not specify what type of information must be contained in the record. Thus, financial institutions are not required to obtain or record information from or about the identity of an originator or beneficiary of a payment, about the parties on whose behalf the originator or beneficiary may be acting, or other information beyond what is in their records or necessary to make the transfer.

In addition to the current recordkeeping requirements for wire transfers, Treasury is authorized to require financial institutions to report transactions, including international wire transfers of funds, with foreign financial institutions in a designated location for a limited period of time pursuant to 31 CFR 103.25. This authority is limited by the fact that financial institutions involved in international wire transfers of funds frequently do not have complete information about the originator or beneficiary of payments.

Treasury is reviewing a number of regulatory options under the authority of 31 U.S.C. 5314 and 5318 to deal with these deficiencies and the severe money laundering problem. In our regulatory review, we will give careful consideration to the question of reaching an appropriate balance between law enforcement needs, the importance of free capital flow in global commerce and an efficient international financial network, and the potential burden on financial institutions. This is difficult given the severity of the money laundering problem and the enormous daily volume of international payments, the overwhelming majority of which represent normal commercial transactions. Therefore, Treasury is soliciting views of financial institutions, law enforcement officials, regulatory agencies, and other interested parties on these or other regulatory options. After Treasury analyzes the comments received in response to the Advance Notice, it expects to issue a Notice of Proposed Rulemaking with specific regulatory proposals for comment.

The following list illustrates some of the regulatory options under consideration. Treasury seeks views on each of these proposals. However, these proposals are not meant to be considered as mutually exclusive alternatives; they may be later proposed in combination with one another. With respect to any possible reporting requirement, Treasury would propose that reporting could be made by electronic data transmission.

1. Require a record or report by the financial institution originating or receiving an international wire transfer of funds for a customer which includes identifying and account information about the originator, beneficiary and the person on whose behalf the payment is being made or received and whether the sender or receiver is aware of any separate payment instructions regarding the payment unknown to the financial institution. This requirement might be coupled with some type of an exemption system designed to cover the majority of normal business transactions.

2. Require that all international wire transfer messages contain all known third party identifying information, *e.g.*, account numbers, addresses, and names of the originator and beneficiary of the payment.

3. Require that, prior to originating international payments on a customer's behalf, either through book entry transfers of credit or through international wire transfers of funds, financial institutions apply model "know your customer" procedures to verify the legitimate nature of the customer's business and that the transfers are commensurate with legitimate business activities.

4. Require special identification procedures and recordkeeping or reporting of international payments sent or received by persons without established account relationships at financial institutions.

5. Require that financial institutions develop a suspicious international wire transfer profile and report suspicious payments to Treasury. The profile might include certain criteria suggested by Treasury, for example, the presence of large currency deposits prior to an outgoing transfer or the existence of an incoming transfer followed by issuance of a cashier's check.

6. Require that (A) when an institution, typically a bank, receives a targeting order under 31 CFR 103.25 relating to international wire transfers of funds, it must obtain, to the extent possible, information from other domestic banks involved in the transfer regarding the identity of the originator or beneficiary of the transfer, and (B) that those other domestic banks cooperate in providing this information on a timely basis to the targeted institution.

7. Provide that an additional category of information may be requested through a regulation issued under 31 CFR 103.25, relating to international book transfers of credit not involving wire transfers, *e.g.*, transfers of credit between U.S. and foreign offices of a financial institution.

This list is not meant to be exhaustive of the ways in which Treasury's regulatory authority might be used to address the problem. Treasury is open to other suggestions from financial institutions or other interested parties regarding additional or alternative regulatory measures or voluntary programs.

Treasury requests that financial institutions that have dealt with the issue of money laundering through international payments share their experiences with Treasury, for instance, on efforts to isolate suspicious wire transfers or to impose "know your customer" procedures. We would like financial institutions to advise of their policies and procedures for "pay on proper ID" payments or other arrangements whereby noncustomers can receive (or send) international payments. Treasury also is interested in comments on any practical problems presented by these options and on the estimated costs of compliance. We welcome recommendations on how best to fashion an appropriate exemption system if routine recordkeeping or reporting requirements are adopted. Finally, we welcome comments relating to specific problems which might arise with foreign jurisdictions, such as foreign constraints on U.S. jurisdiction and enforcement abilities.

Treasury is committed to the effective and judicious use of its Bank Secrecy Act authority and wishes to work with the affected financial institutions and law enforcement community to fashion a responsible regulatory solution to the problem at hand. We look forward to the full cooperation and participation of financial institutions on this regulatory project.

Dated: October 25, 1989.

Salvatore R. Martoche,

Assistant Secretary (Enforcement).

47 CFR Part 73

[MM Docket No. 89–461, RM–6881]

Radio Broadcasting Services; Lafayette, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Brian Mitchell Rowland requesting the substitution of Channel 260C2 for Channel 260A at Lafayette, Florida, and modification of the construction permit (BPH–870729MJ) for Station WKXJ(FM) to special operation on the higher powered channel. Channel 260C2 can be allotted to Lafayette in compliance with the Commission's minimum distance separation requirements with a site restriction of 20.8 kilometers (12.9 miles) southeast. The coordinates for the allotment are North Latitude 30–18–21 and West Longitude 84–03–09. In accordance with § 1.420(g) of the Commission's Rules, competing expressions of interest in use of Channel 260C2 at Lafayette will not be considered and petitioner will not be required to demonstrate the availability of an additional equivalent channel for use by such interested parties.

DATES: Comments must be filed on or before December 7, 1989, and reply comments on or before December 22, 1989.

ADDRESS: Federal Communications Commission, Washington, DC 20554 In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Peter Gutmann, Neal J. Friedman, Pepper & Corazzini, 200 Montgomery Building, 1776 K Street, NW., Washington, DC 20006, (Attorneys for petitioner)

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No.89–461, adopted October 2, 1989, and released October 16, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. Radio Broadcasting Services; Giddings, Cameron, Centerville, Edna and Hearne, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Radio Lee County, the licensee of Station KGID(FM), Channel 268C2 at Giddings, Texas, proposing the substitution of Channel 268C1 for Channel 268C2 at Giddings and the modification of its license to specify the higher class station. In order to accomplish the substitution at Giddings, channel substitutions must also be made at four other Texas communities: (1) Cameron, Texas, Channel 232A for Channel 267A, Station KJKS(FM); (2) Centerville, Texas, Channel 290A for vacant Channel 276A; (3) Edna, Texas, Channel 285A for vacant but applied for Channel 289A; and (4) Hearne, Texas, Channel 276A for Channel 232A, Station KHRN(FM).

DATES: Comments must be filed on or before December 8, 1989, and reply comments on or before December 26 , 1989.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Don Werlinger, Broadcast Development Group, 7819 Manassas Drive, Austin, Texas 78745 (Consultant to petitioner).

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No.89–459 , adopted October 2, 1989, and released October 17, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB35

Endangered and Threatened Wildlife and Plants; Desert Tortoise

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; correction.

SUMMARY: The U.S. Fish and Wildlife Service (Service) is correcting an error in the SUMMARY of the proposed rule to list the Mojave population of the desert tortoise, which appeared in the **Federal Register** on October 13, 1989 (54 FR 42270).

FOR FURTHER INFORMATION CONTACT: Dr. James Tate, Jr. at (703) 358–2171.

SUPPLEMENTARY INFORMATION: The Service published an emergency rule to list the Mojave population of the desert tortoise as endangered on August 4, 1989 (54 FR 55654). The emergency rule will cease to have force and effect after 240 days unless the procedures leading to a final rule, or to a withdrawal of the emergency rule, have been complied with during that period. Thus, the emergency rule to list the desert tortoise would expire on Sunday, April 1, 1990 (actually on the next working day, Monday, April 2, 1990). A proposed rule to list the Mojave population of the desert tortoise appeared in the **Federal Register** on October 13, 1989 (54 FR 42270).

The correct statement that the "* * * emergency rule provides protection

VOL 54 ISS 209 OCT 31 1989 UMI

under the [Endangered Species] Act for the Mojave population of tortoises for 240 days (until April 2, 1990)" appears on page 42271. An incorrect date of August 2, 1990 appears in the SUMMARY of the same publication. This error is corrected below.

* * * * *

Dated: October 25, 1989.

John F. Turner,

Director, Fish and Wildlife Service.

The following correction is made in RIN 1018–AB35, the proposed rule to list the Mojave population of the desert tortoise, which appeared in the Federal Register on October 13, 1989 (54 FR 42270).

On page 42270, first column, line 33, change "August 2, 1990" to "April 2, 1990".

* * * * *

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Seismic Exploration Permit Fees

AGENCY: Forest Service, USDA.

ACTION: Notice of interim policy.

SUMMARY: The Forest Service gives notice that it is establishing a standard land use rental fee applicable nationwide to seismic exploration permits issued by the Forest Service. The revised fee policy is set forth in Interim Directive No. 69 to the Forest Service Manual Chapter 2720—Special Uses Administration. The intended effect is to bring consistency to fee determinations on seismic exploration permits and to increase efficiency in processing permits.

EFFECTIVE DATE: The interim directive is effective November 15, 1989.

FOR FURTHER INFORMATION CONTACT: Persons interested in this rental fee policy should direct inquiries and comments to Ruben M. Williams, Lands Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090 (703) 235–8212.

SUPPLEMENTARY INFORMATION: National Forest System lands are open to seismic exploration activities. Seismic exploration commonly involves the use of explosives or machinery to generate energy shock waves through the earth's surface to detect the presence of oil and gas deposits or conditions likely to be favorable to location of such deposits. When an operator wishes to explore for oil and gas in an area of the National Forest system that is not covered by a Federal lease, the operator must obtain a permit for the exploration and pay a land use rental fee (36 CFR 251.57).

Forest Service policy has allowed Regional Foresters to establish fees for seismic exploration permits by one of two methods. The first method bases the fee on a survey of rental payments paid to private land owners within a market area for seismic exploration surveys. The second method, which was developed by the Regional Forester for the Rocky Mountain Region in consultation with seismic exploration contractors, was based upon average rental values of Federal oil and gas leases within that Region and adjacent areas. This fee method, notice of which was published February 12, 1987, in the Federal Register [52 FR 4514] resulted in a fee of $200 per mile, or fraction of a mile. In contrast, surveys of the private rental market have resulted occasionally in fees that were higher than the fees determined by the Rocky Mountain Region, particularly when the National Forest lands were located in areas with good potential for oil and gas development, such as the Gulf Coast States.

The agency has reviewed the current fee determination procedure and concluded that a uniform fee would not only eliminate inconsistent fee charges but would also increase agency efficiency of processing seismic permits by reducing the time and cost associated with the current fee determination methods. The agency is, therefore, adopting a standard, nationwide fee for seismic exploration permits of $200 per mile, or fraction of a mile, and $50 per shot hole. This fee rate is currently charged on several National Forests for seismic permits.

These fee rates will be imposed on all types of seismic exploration in which temporary disturbance and occupancy of the land is authorized by a Forest Service permit. They do not apply to exploration by a holder of a valid Federal lease within a leasehold on National Forest System lands. Also, the seismic permit fee does not include any costs of reclamation, restoration, or compliance with applicable laws, such as indentification and protection of cultural resources for which the holder may be responsible as a condition of the permit.

This fee policy is being issued as interim direction to allow the agency to evaluate the effects of a standard fee and the fee amount over the next 12 months and to determine if any changes are needed before isuing permanent direction. Any member of the public, including seismic exploration contractors, may submit comments for the agency's consideration during the evaluation period. Notice of adoption of a final fee policy for seismic exploration will be given in the Federal Register.

Dated: October 10, 1989.

George M. Leonard,

Associate Chief.

[FR Doc. 89–25568 Filed 10–30–89; 8:45 am]

BILLING CODE 3410–11–M

Draft Supplement to a Final Environmental Impact Statemept for the Grouse Creek Gold Mine Project (Formally the Sunbeam Mine Project) on the Yankee Fork Ranger District of the Challis National Forest, Custer County, ID

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare a supplement to an environmental impact statement.

SUMMARY: The Department of Agriculture, Forest Service will prepare a Draft and Final Supplement (DSEIS and SEIS respectively) to the Environmental Impact Statement (EIS) previously prepared for the Sunbeam Mining Project (September 1984). The supplement is for an expanded Plan of Operation proposed by Grouse Creek Mining, Inc., for an open-pit gold mine located 19 miles northeast of Stanley, Idaho and 30 miles southwest of Challis, Idaho, on the Yankee Fork District of the Challis National Forest in Custer County, Idaho.

The supplement will focus on proposed modifications to the original Sunbeam Mining Project, including: (1) Expanded operation into the Grouse Creek drainage resulting in an additional pit and potential waste dump, (2) change in milling process from vat leaching to conventional counter-current decant process, (3) construction of tailing impoundment and embankments, and (4) improvement of Forest Route 40172. The modified proposal will be called Grouse Creek Project.

The agency will accept written comments and suggestions on the scope of the analysis. However, because the Forest has been communicating with interested persons concerning the scope of the proposed action through prior negotiations and meetings, the agency urges that any comments on the proposal be concise. Comments directed to the substance, as opposed to the scope, of the proposal are more

VOL 54 ISS 209 OCT 31 1989 UMI

appropriately submitted during the comment period following release of the DSEIS.

In addition, the agency gives notice of the full environmental analysis and decision-making process will occur on the proposal so that interested persons are aware of how they may participate and contribute to the final decision.

DATE: Comments concerning the scope of the analysis must be received by December 1, 1989 to ensure timely consideration.

ADDRESS: Submit written comments and suggestions related to the scope of the analysis to Forest Supervisor, Challis National Forest, P.O. Box 404, Challis, Idaho 83226.

FOR FURTHER INFORMATION: Direct questions about the proposed action and DSEIS to Ruth Monahan, Project Coordinator, Challis Supervisor's Office, P.O. Box 404, Challis, Idaho, telephone 208–879–2285.

SUPPLEMENTARY INFORMATION: The Final Environmental Impact Statement for the Sunbeam Mining Project was approved by Forest Supervisor Jack C. Griswold on September 28, 1984. Full development and construction of the Sunbeam Project has been delayed due to litigation concerning Clean Water Act section 402/404 permitting authority between the U.S. Army Corps of Engineers and the U.S. Environmental Protection Agency, relating to the discharge of spent ore tailings to the Pinyon Basin wetland. As a result of Sunbeam Mining Corporation's recent merger with CoCa Mines, Inc., the original Sunbeam Mine Project is now being developed by Grouse Creek Mining, Inc. a subsidiary of CoCa Mines, Inc.

The Forest Service received a Conceptual Plan of Operation from Grouse Creek Mining, Inc. in August of 1989. Re-evaluation of the original Sunbeam Mine Project caused Grouse Creek Mining, Inc. to modify components of the original project. Grouse Creek Mining proposes to construct an open pit mine, waste dumps, haul road, processing facilities, mine tailing embankments and impoundments, and widening of USFS Forest Road #40172 along Jordan Creek. The 1984 EIS Project Area has also been expanded under the modified proposed project to include the Grouse Creek drainage basin. The supplemental EIS will evaluate the new or changed aspects of the Project.

A range of alternatives will be considered, including the no-action alternative. Other alternatives will be developed to address significant issues and to mitigate impacts.

Scoping of this project was initiated on August 24, 1989 through an informational meeting held in Stanley, Idaho by Grouse Creek Mining, Inc. Numerous Federal, State, and local agencies and other individuals and organizations were represented at the August 24 meeting. All interested and affected publics are invited to participate in the scoping process. This process will include:

1. Identification of new or additional issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those sufficiently covered in the original Sunbeam EIS.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).

Additional public meetings are tentatively scheduled for November 1989 and will be held in Stanley and Challis, Idaho. Actual dates, times and locations for these meetings will be announced through the news media, by letter or personal contact.

The Fish and Wildlife Service of the Department of the Interior, Army Corps of Engineers of the Department of Army, and the U.S. Environmental Protection Agency (EPA) have been invited to participate as cooperating agencies. The U.S. Fish and Wildlife Service will evaluate potential impacts on threatened and endangered species habitat if any are found to exist in and adjacent to proposed project area.

The Army Corps of Engineers is responsible for issuance of the Clean Water Act section 404 permit, regulating the discharge of dredged or fill materials into navigable waters. The EPA is responsible for the issuance of the National Pollution Discharge Elimination System (NPDES) permit, regulating any discharges to surface water. The SEIS will provide the National Environmental Policy Act documentation requirements necessary for the issuance of the section 404 and the NPDES permits. Numerous other State and local permits and licenses will be required to implement the proposed action.

Jack C. Griswold, Forest Supervisor of the Challis National Forest, Challis, Idaho, is the responsible official for this action. The Forest Service is the lead agency.

The DSEIS is expected to be filed with the Environmental Protection Agency and be available for public review in April of 1990. At that time, the Environmental Protection Agency will publish a notice of availability of the draft supplement in the **Federal Register**.

The comment period on the DSEIS will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in this proposed action participate at that time. To be most useful, comments on the DSEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (See The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of DSEIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the SEIS. *City of Angoon* v. *Hodel*, (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

The SEIS is scheduled to be completed and available to the public by August 1990. The responsible official will document the decision and the reasons supporting it in a Record of Decision. That decision will be subject to appeal pursuant to 36 CFR 217.

Dated: October 23, 1989.

Ronald L. Johnson,

Acting Forest Supervisor.

[FR Doc. 89–2551 Filed 10–30–89; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Marine Mammals; National Zoological Park, Smithsonian Institution

AGENCY: National Marine Fisheries Service (NOAA Fisheries), NOAA, Commerce.

ACTION: Application for Permit; National Zoological Park—Smithsonian Institution (P6L).

SUMMARY: Notice is hereby given that an Applicant has applied in due form for a Scientific Research Permit to import marine mammal samples as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

1. Applicant: National Zoological Park, Smithsonian Institution, Washington, DC 20008.

2. Type of Permit: Scientific Research.

3. Name and Number of Marine Mammals: Harbor seals (*Phoca vitulina*), up to 80; Gray seal (*Halichoerus grypus*), up to 160.

4. The Applicant requests permission to import samples of milk (including gastric milk contents), blood and tissues (organs and blubber) from harbor seals and gray seals, collected from animals under a research permit issued by the Director General of Fisheries and Oceans, Government of Canada. Tissues were previously obtained by the Canadian Government from animals sacrificed according to Canadian Sealing Regulations.

5. Location and Duration of Activity: Samples will be obtained from seals on Sable Island, Nova Scotia, Canada. The requested duration for import of samples is three years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Highway, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1335 East West Highway, Room 7330, Silver Spring, Maryland 20910;

Director, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, Massachusetts 01930; and

Director, National Marine Mammal Laboratory, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE BIN C15700, Seattle, Washington 98115.

Dated: October 19, 1989.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Rescission of a Limit on Luggage of Silk Blend and Other Vegetable Fiber Produced or Manufactured in the People's Republic of China

October 24, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs cancelling a limit.

EFFECTIVE DATE: October 31, 1989.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Pursuant to consultations held with the Government of the People's Republic of China, the United States Government has decided to cancel the current restraint limit on luggage of silk blend and other vegetable fiber in Category 870.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 50278, published on December 14, 1988.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 24, 1989.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: Effective on October 31, 1989, this directive cancels only that portion of the directive of December 6, 1988 issued to you by the Chairman, Committee for the Implementation of Textile Agreements, which establishes a restraint limit for silk blend and other vegetable fiber textile products in Category 870, produced or manufactured in China and exported during the twelve-month period which began on January 1, 1989 and extends through December 31, 1989.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the Republic of Korea

October 25, 1989.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: November 1, 1989.

FOR FURTHER INFORMATION CONTACT: Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–8041. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

VOL 54 ISS 209 OCT 31 1989 UMI

The current limits for Groups I, II, and III, and certain sublevels within the groups, are being adjusted, variously, for swing, carryover and shift.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 50988, published on December 19, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 25, 1989.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 13, 1988 issued to you by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Republic of Korea and exported during the twelve-month period which began on January 1, 1989 and extends through December 31, 1989.

Effective on November 1, 1989, the directive of December 13, 1988 is amended further to adjust the limits for the following categories, as provided under the terms of the current bilateral textile agreement between the Governments of the United States and the Republic of Korea:

Category	Adjusted 12-month limit [1]
Group I	
200, 201, 218–220, 222–229, 300–326, 360–363, 369–O[2], 400, 410, 414, 464–469, 600–607, 611–622, 624–629, 665–669 and 670–O[3], as a group.	387,587,856 square meters equivalent.
Sublevels in Group I	
200	375,199 kilograms.
300/301	2,689,281 kilograms.
317/326	16,054,242 square meters.
604	295,819 kilograms.
611	2,230,203 square meters.
625/626/627/628/629	11,749,337 square meters.
669–T [4]	3,924,236 kilograms.
Group II	
237, 239, 330–354, 359, 431–448, 459, 630–654 and 659, as a group.	583,581,095 square meters equivalent.
Sublevels in Group II	
333/334	106,000 dozen.
335	111,229 dozen.
336	49,635 dozen.
338/339	851,843 dozen.
340	471,144 dozen of which not more than 155,980 dozen shall be in Category 340–Y.[5]
341	201,608 dozen.
342	75,429 dozen.
347/348	377,339 dozen.
351	126,819 dozen.
352	149,282 dozen.
353/354/653/654	249,281 dozen.
359–H [6]	2,126,281 kilograms.
433/434	18,063 dozen of which not more than 13,627 dozen shall be in Category 433 and not more than 6,802 dozen shall be in Category 434.
435	34,151 dozen.
436	13,655 dozen.
442	46,526 dozen.
443	338,158 numbers.
444	52,737 numbers.
447	85,504 dozen.
448	34,691 dozen.
459–W [7]	92,974 kilograms.
631	260,499 dozen pairs.
632	1,996,798 dozen pairs.
633/634/635	1,340,662 dozen of which not more than 150,000 dozen shall be in Category 633, not more than 803,000 dozen shall be in Category 634, and not more than 559,000 dozen shall be in Category 635.
638/639	5,756,299 dozen.
640–D [8]	3,477,935 dozen of which not more than 1,325,538 dozen shall be in Category 640–DY.[9]
640–O [10]	2,548,567 dozen of which not more than 2,192,235 dozen shall be in Category 640–OY.[11]
641	1,042,542 dozen of which not more than 37,730 dozen shall be in Category 641–Y.[12]
642	96,672 dozen.
643	779,560 numbers.
647/648	1,273,262 dozen.
650	21,113 dozen.
659–H [13]	1,211,917 kilograms.
659–S [14]	156,811 kilograms.
Group III	
831–844 and 847–859, as a group.	12,507,858 square meters equivalent.
Sublevels in Group III	
835	29,595 dozen.
836	76,315 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1988.

[2] In Category 369–O, all HTS numbers except 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.92.1500, 4202.92.3015 and 4202.92.6000 in Category 369–L.

[3] In Category 670–O, all HTS numbers except 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3030 and 4202.92.9020 in Category 670–L.

[4] In Category 669–T, only HTS numbers 6306.12.0000, 6306.19.0010 and 6306.22.9000.

[5] In Category 340–Y, only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2046, 6205.20.2050 and 6205.20.2060.

[6] In Category 359–H, only HTS numbers 6505.90.1530 and 6505.90.2060.

[7] In Category 459–W, only HTS number 6505.90.4060.

[8] In Category 640–D, only HTS numbers 6205–30.2010, 6205.30.2020, 6205.30.2030, 6205.90.2040, 6205.90.2030 and 6205.90.4030.

[9] In Category 640–DY, only HTS numbers 6205.30.2010 and 6205.30.2020.

[10] In Category 640–O, only HTS numbers 6203.23.0080, 6203.29.2050, 6205.30.1000, 6205.30.2050, 6205.30.2060, 6205.30.2070, 6205.30.2080 and 6211.33.0040.

[11] In Category 640–OY, only HTS numbers 6205.30.2050 and 6205.30.2060.

[12] In Category 641–Y, only HTS numbers 6204.23.0050, 6204.29.2030, 6206.40.3010 and 6206.40.3025.

[13] In Category 659–H, only HTS numbers 6502–00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5060, 6505.90.6060, 6505.90.7060 and 6505.90.8060.

[14] In Category 659–S, only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 89–25557 Filed 10–30–89; 8:45 am]

BILLING CODE 3510–DR–M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Civilian Validation of ASVAB–14; Supplemental Information form, Behaviorally-Anchored Rating Scales (BARS), Importance of Occupational Dimensions; 0704–0292.

Type of Request: Extension.

Average Burden Hours/Minutes per Response: 15 minutes

Frequency of Resonse: One

Number of Respondents: 7,736

Annual Burden Hours: 1,934

Annual Responses: 7,736

Needs and Uses: Three types of instruments will be used to determine the valdity of ASVAB 14 for predicting performance in 12 civilian occupations. The Supplemental Information form will ask employees who take the ASVAB certain background information about themselves. The Behaviorally-anchored Rating Scales will ask supervisors their employees' performance; and the third instrument, Importance of Occupational Dimensions, will ask supervisors to indicate importance of the occupational dimensions covered in the scales.

Affected Public: Individuals or households, State or local governments, businesses or other for-profit, Federal agencies or employees, non-profit institutions.

Frequency: One-time only.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Dr. Timothy Sprehe

Written comments and recommendations on the proposed information collection should be sent to Dr. Timothy Sprehe at Office of Management of Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DoD Clearance Officer: Ms. Pearl Rascoe-Harrison.

Written request for copies of the information collection proposal should be sent to Ms. Rasco-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302.

Dated: October 25, 1989.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

Department of the Army

Privacy Act of 1974, Amended System of Records Notice

AGENCY: Department of the Army, DOD.

ACTION: Amendment of one system of records notice for public comment.

SUMMARY: The Department of the Army proposes to amend one system of records to its inventory of systems of records subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a). The system notice for the amended system is set forth below.

DATES: This amendment will be effective November 30, 1989, unless comments are received which would result in a contrary determination.

ADDRESS: Send comments to Mr. Robert Priest, Chief, Systems Management Branch, HQ, Army Information Systems Command (AS–OPS–MR), Ft. Huachuca, AZ 85613–5000.

SUPPLEMENTARY INFORMATION: The Department of the Army systems of records notices subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a), have been published in the **Federal Register** as follows:

50 FR 22090, May 29, 1985 (Compilation, changes follow)
51 FR 23576, Jun 30, 1986
51 FR 30900, Aug 29, 1986
51 FR 40479, Nov 7, 1986
51 FR 44361, Dec 9, 1986
52 FR 11847, Apr 13, 1987
52 FR 18798, May 19, 1987
52 FR 25905, Jul 9, 1987
52 FR 32329, Aug 27, 1987
52 FR 43932, Nov 17, 1987
53 FR 12971, Apr 20, 1988
53 FR 16575, May 10, 1988
53 FR 21508, Jun 8, 1988
53 FR 26247, Jul 27, 1988
53 FR 28249, Jul 27, 1988
53 FR 28430, Jul 28, 1988
53 FR 34576, Sep 7, 1988
53 FR 49589, Dec 8, 1988
53 FR 51580, Dec 22, 1988
54 FR 10034, Mar 9, 1989
54 FR 11790, Mar 22, 1989
54 FR 14835, Apr 13, 1989

The record system was previously published in the **Federal Register** at 54 FR 14835 on April 13, 1989. The system is being amended to separate the "Disclosure to consumer reporting agencies" from the "Routine uses" element and adding the Federal Claims Collection Act of 1966 and the Debt Collection Act of 1982 to the "Authority" element. The specific changes to the record system being amended is set forth below, followed by the system notice, as amended, published in its entirety. The amended notice is not within the purview of subsection (r) of the Privacy Act, 5 U.S.C. 552a, which requires the submission of an altered system report.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

October 24, 1989.

AAFES0702.34

System name:

Individual Accounts Receivable Files (54 FR 14835, Apr 13, 1989).

Changes:

* * * * *

Authority for maintenance of the system:

Delete entire entry and substitute with "10 U.S.C. 3012 and 8012; Federal Claims Collection Act of 1966, 31 U.S.C. § 3711; Debt Collection Act of 1982 (Pub. L. 97–365); 31 U.S.C. 5512 through 5514; and E.O. 9397."

* * * * *

Routine uses of records maintained in the system, including categories of users and the purpose of such uses:

Delete paragraph d. in its entirety. Change paragraph e. to d. Add the following element after paragraph d.:

"Disclosure to consumer reporting agencies:

Disclosure pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)) to collect dishonored check indebtedness."

* * * * *

AAFES0702.34

SYSTEM NAME:

Individual Accounts Receivable Files.

SYSTEM LOCATION:

Headquarters, Army and Air Force Exchange Service (AAFES), Dallas, TX 75222; Headquarters, AAFES Europe; and Headquarters, AAFES, Pacific. Official mailing addresses are published as an appendix to the Army's compilation of systems notices.

VOL 54 ISS 209 OCT 31 1989 UMI

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

AAFES customers (military, retirees, civilian, and civilian dependents).

CATEGORIES OF RECORDS IN THE SYSTEM:

Case files relating to debts owed by individuals, including dishonored checks, deferred payment plans, home layaways, salary/travel advances, pecuniary liability claims and credit cards. These files include all correspondence to the debtor/his or her commander, notices from banks concerning indebtedness, originals or copies of returned checks, envelopes showing attempts to contact the debtor, payment documentation, pay adjustment authorizations, deferred payment plan applications, charges and statements or accounts, and home layaway cards.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 3012 and 8012; Federal Claims Collection Act of 1966, 31 U.S.C. 3711; Debt Collection Act of 1982 (Pub. L. 97–365); 31 U.S.C. 5512 through 5514; and E.O. 9397.

PURPOSE(S):

To process, monitor, and post audit accounts receivable, to administer the Federal Claims Collection Act, and to answer inquiries pertaining thereto. To collect dishonored check indebtedness.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To the U.S. Department of Justice/U.S. Attorneys for legal action and/or final disposition of the debt claim.

To the Internal Revenue Service to obtain locator status for delinquent accounts receivables (controls exist to preclude redisclosure of solicited IRS address data; and/or to report write-off amounts as taxable income as pertains to amounts compromised and accounts barred from litigation due to age.

To private collection agencies for collection action when the Army has exhausted its internal collection efforts.

To civil or criminal law enforcement agencies for law enforcement purposes.

The "Blanket Routine Uses" that appear at the beginning of the Department of the Army's compilation of systems of records also apply to this system.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure pursuant to 5 U.S.C. 552a(b)(12) may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)) to collect dishonored check indebtedness.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in individual file folders.

RETRIEVABILITY:

Retrieved by customer's surname or Social Security Number.

SAFEGUARDS:

Records are maintained in areas accessible only by authorized personnel within AAFES/CM–G.

RETENTION AND DISPOSAL:

Records are retained in current files until close of fiscal year in which the receivable is cleared, or if office space doesn't permit, at the end of the fiscal quarter in which receivable is cleared. At year end, files are stored for 10 years and subsequently forwarded to the Federal Records Center, Fort Worth, Texas for destruction.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Army and Air Force Exchange Service, Dallas, TX 75222.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Commander, Army and Air Force Exchange Service, ATTN: Chief, General Accounting Branch, Comptroller Division, Dallas, TX 75222 or telephone (214) 330–2631.

Individuals should provide full name, Social Security Number, or other acceptable identifying information that will facilitate locating the records.

RECORD ACCESS PROCEDURE:

Individuals seeking access to information about themselves contained in this system of records should address written inquiries to the Commander, Army and Air Force Exchange Service, ATTN: Chief, General Accounting Branch, Comptroller Division, Dallas, TX 75222 or telephone (214) 330–2631.

Individuals should provide full name, Social Security Number, or other acceptable identifying information that will facilitate locating the records.

CONTESTING RECORD PROCEDURE:

The Department of the Army rules for accessing records and for contesting contents and appealing initial agency determinations are published in Department of the Army Regulation 430–21–8; 32 CFR Part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From the customer and from correspondence between AAFES and Vendors.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 3810–01–M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Clean Water Act Section 404 Permit for Construction of Hunter Lake Reservoir near Springfield, IL

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: On July 28, 1989, an application for a permit under Section 404 of the Clean Water Act (33 CFR part 325) was submitted to the U.S. Army Corps of Engineers, Rock Island District (Corps) for construction of the Hunter Lake Reservoir near Springfield, Illinois. A DEIS will be prepared to address the effects of construction and operation of the project.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be answered by: Charlene Carmack; 309/788–6361, Ext. 570. Written comments may be addressed to: District Engineer, U.S. Army Engineer District, Rock Island, ATTN: Planning Division, Clock Tower Building—P.O. Box 2004, Rock Island, Illinois 61204–2004.

SUPPLEMENTARY INFORMATION:

1. The proposed reservoir, presently known as Hunter Lake, would be constructed by building an earthfill dam across Horse Creek, approximately one mile downstream of the confluence of Horse and Brush Creeks. The lake would have a projected storage volume of 17.4 billion gallons with a surface area at normal lake elevation of 3,250 acres. Proposed development will include approximately 82 miles of shoreline and 4,450 acres of marginal property surrounding the area of inundation.

2. Alternatives, in addition to the No Action alternative, to be considered for meeting water supply needs include temporary or permanent diversions of water from the Sangamon River to supplement the City's present supply.

3. This notice solicits input and assistance from the interested public and invites participation by affected Federal and State agencies having special jurisdiction and/or expertise.

—Impacts to natural, social, economic, and cultural resources resulting from construction and operation of the project will be addressed and considered in determining whether it is in the public interest to grant or to deny the permit.

4. A scoping meeting is expected to be scheduled within the last quarter of calendar year 1989 to facilitate early input to the NEPA process and identify significant issues to be analyzed in depth in the EIS. The date, time and location of this meeting is yet to be determined.

5. It is anticipated that the DEIS will be made available to the public in the second quarter of calendar year 1991.

Dated: October 13, 1989.

John R. Brown,

Colonel, EN, Commanding.

N10140–1

SYSTEM NAME:

Ration Card Records.

SYSTEM LOCATION:

U.S. Navy Personnel Support Activity Detachments London, Holy Loch, Brawdy, Edzell, and Thurso, United Kingdom.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Officers, enlisted, and civilian component personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Ration Card holders are entered on 5" x 8" color coded cards, which are contained in boxes and maintained alphabetically. Ration Cards are registered in log, showing name of individual and number of Ration Cards issued.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations.

PURPOSE(S):

To establish strict control over persons entitled to acquire tax-free ration items; to ensure entitled personnel do not obtain more than one ration card, and for inspection by officers of Her Majesty's Commissioners of Customs and Excise, United Kingdom, with whom the Ration Card program was originally negotiated by the U.S. military authorities. Accredited members of the Naval Investigative Service Office may have access, upon request.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records apply to this system.

BEST COPY AVAILABLE

VOL 54 ISS 209 OCT 31 1989 UMI

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All Ration Cards are maintained on 5" x 8" cards filed and listed in numerical order in logs.

RETRIEVABILITY:

Retrieved by name.

SAFEGUARDS:

Records held in file cabinets in space maintained by Enlisted Personnel Office during working hours and locked after working hours.

RETENTION AND DISPOSAL:

All records maintained for duration of tour of personnel concerned and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Naval Activities, United Kingdom, Box 60, FPO New York 09510–5000.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should visit the U.S. Navy Personnel Support Activity Detachment where attached. Official addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

Personnel should be prepared to present a valid military identification card or Department of Defense identification card to view records pertaining to themselves.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should visit the U.S. Navy Personnel Support Activity where attached. Official addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR Part 701, or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Not applicable.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N10140–4

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR Part 701, or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information concerning vehicles, insurance, inspection and tax is copied from the appropriate document as provided by the individual. Other information is received from the individual directly.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N12711–1

System name:

Labor Management Relations Records (51 FR 18216, May 16, 1986)

Changes:

* * * * *

System location:

Delete lines one through four and substitute with "Office of Civilian Personnel Management (OCPM) (Code 31), Department of the Navy and Designated Contractors; OCPM Regional Offices; * * *"

Categories of individuals covered by the system:

In line five, beginning with "; Navy" delete the entry in its entirety and substitute with "or who are involved in the filing of an Unfair Labor practice complaint which has been referred to the Federal Labor Relations Authority (FLRA) for resolution, or who are involved in a labor negotiations impasse which has been referred to the Federal Service Impasses Panel or an interest arbitrator for resolution, or who are involved in a negotiability dispute which has been referred to the FLRA for resolution; union officials and representatives (both Navy employees and non-employees) involved in the aforementioned processes and in national consultation; independent arbitrators involved in grievance and interest arbitrations concerning Navy activities."

Categories of records in the system:

In line six, beginning with the word "arbitration" delete entry in its entirety and substitute with "case. Field

VOL 54 ISS 209 OCT 31 1989 UMI

activities maintain manual rosters of local union officials and representatives. OCPM Headquarters maintains manual roster of addresses and files concerning national consultation with national/international unions regarding changes in Departmental-level civilian personnel policies. (2) ADP system maintains records by type of case and case number (not individual). Centrally maintained data base (access restricted to authorized users) contains all information pertaining to a specific case. Bargaining unit files contain information about each bargaining unit, including contact information on union local presidents."

* * * * *

Purpose(s):

In line four, beginning with the word "interpretation" delete entry in its entirety and substitute with "processing of unfair labor practice charges; adjudication of negotiability disputes, resolution of negotiations impasses; interpretation of 5 U.S.C. 7101–7135 through 3rd party case decisions; national consultation and other dealings with recognized unions."

Routine uses of records maintained in the system, including categories of users and the purpose of such uses:

In paragraph three, delete lines two through four in their entirety and substitute with "* * * Administrative Law Judge, arbitrator, or other proper 3rd party for the purpose of conducting a hearing or inquiry in connection with an employee's grievance, unfair labor practice charge, impasse, negotiability appeal, or other labor relations dispute." Delete paragraph four in its entirety.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

At end of entry, add "ADP records are stored in a central, contractor maintained data base."

Retrievability:

At end of entry, add "ADP records are retrieved by case subject, activity, bargaining unit, servicing personnel office, command, or 3rd party docket number."

Safeguards:

In line one, delete the word "* * * manual * * *" and at the end of the entry add "Access to the ADP system is controlled through the use of multiple security passwords."

System manager(s) and address:

Delete the entire entry and substitute with "Office of Civilian Personnel Management (Code 31), 800 North Quincy Street, Arlington, VA 22203–1998."

* * * * *

N12711–1

SYSTEM NAME:

Labor Management Relations Records System.

SYSTEM LOCATION:

Office of Civilian Personnel Management (OCPM) (Code 31), Department of the Navy and Designated Contractors; OCPM Regional Offices; and Navy staff headquarters and field activities employing civilians. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Navy civilian employees paid from appropriated and non-appropriated funds, who are involved in a grievance which has been referred to an arbitrator for resolution, or who are involved in the filing of an Unfair Labor practice complaint which has been referred to the Federal Labor Relations Authority (FLRA) for resolution, or who are involved in a labor negotiations impasse which has been referred to the Federal Service Impasses Panel or an interest arbitrator for resolution, or who are involved in a negotiability dispute which has been referred to the FLRA for resolution; union officials and representatives (both Navy employees and non-employees) involved in the aforementioned processes and in national consultation; independent arbitrators involved in grievance and interest arbitrations concerning Navy activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records are comprised of (1) Manual files maintained in paper folders, manually filed by type of case and case number (not individual). Folder contains all information pertaining to a specific case. Field activities maintain manual rosters of local union officials and representatives. OCPM Headquarters maintains manual roster of addresses and files concerning national consultation with national/international unions regarding changes in Departmental level civilian personnel policies. (2) ADP system maintains records by type of case and case number (not individual). Centrally maintained data base (access restricted to authorized users) contains all information pertaining to a specific case. Bargaining unit files contain information about each bargaining unit, including contact information on union local presidents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7101–7135.

PURPOSE(S):

To manage the Labor-Management Relations Program, e.g., administration/implementation of arbitration awards; processing of unfair labor practice charges; adjudication of negotiability disputes, resolution of negotiations impasses; interpretation of 5 U.S.C. 7101–7135 through 3rd party case decisions; national consultation and other dealings with recognized unions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To representatives of the Office of Personnel Management on matters relating to the inspection, survey, audit, or evaluation of Navy Civilian Personnel Management Programs.

To the Comptroller General or any of his authorized representatives, in the course of the performance of duties of the General Accounting Office relating to the Navy's Labor Management Relations Program. To a duly appointed hearing examiner, Administrative Law Judge, arbitrator, or other proper 3rd party for the purpose of conducting a hearing or inquiry in connection with an employee's grievance, unfair labor practice charge, impasse, negotiability appeal, or other labor relations dispute.

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual records are stored in paper folders. ADP records are stored in a central, contractor maintained data base.

RETRIEVABILITY:

Manual records are retrieved by case subject, case number, and/or individual employee names. ADP records are retrieved by case subject, activity, bargaining unit, servicing personnel office, command, or 3rd party docket number.

SAFEGUARDS:

All files are accessible only to authorized personnel having a need to know. Access to the ADP system is controlled through the use of multiple security passwords.

RETENTION AND DISPOSAL:

Case files are permanently maintained. Union official rosters are normally destroyed after a new roster has been established.

SYSTEM MANAGER(S) AND ADDRESS:

Office of Civilian Personnel Management (Code 31), 800 North Quincy Street, Arlington, VA 22203–1998.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Office of Civilian Personnel Management (Code 31), 800 North Quincy Street, Arlington, VA 22203–1998, their servicing personnel office, arbitrator's office, or Federal unions or local unions.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Office of Civilian Personnel Management (Code 31), 800 North Quincy Street, Arlington, VA 22203–1998, their servicing personnel office, arbitrator's office, or Federal unions or local unions.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR Part 701, or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Navy civilian personnel offices; arbitrator's offices; Federal unions and union locals.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

* * * * *

N12930–2

SYSTEM NAME:

Area Coordinator Information and Operation Files.

SYSTEM LOCATION:

Office of Civilian Personnel Management (OCPM) and OCPM field offices, designated contractors, and Navy staff, headquarters, and field activities employing civilians. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees, paid from appropriated and non-appropriated funds, military personnel or private citizens affected by or involved in action of area coordination significance, and speakers, specialists and other interested participants.

CATEGORIES OF RECORDS IN THE SYSTEM:

System is composed of, but not limited to, records compiled in accordance with regulations, correspondence regarding status of EEO investigations, index file of program administration and interested participants including ad hocs, summaries compiled for budget administration, biographies of speakers or of key officials obtained from individual.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations.

PURPOSE(S):

To manage civilian personnel and special projects related to civilian employees.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To representatives of the Office of Personnel Management on matters relating to the inspection, survey, audit or evaluation of Navy civilian personnel management programs or personnel actions, or such other matters under the jurisdiction of the Office of Personnel Management.

To a duly appointed Hearing Examiner or Arbitrator (an employee of another Federal agency) for the purpose of conducting a hearing in connection with an employee's grievance.

To an arbitrator who is given a contract pursuant to a negotiated labor agreement to hear an employee's grievance.

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in paper file folders, list finders, index cards, or logs or other indexing systems.

RETRIEVABILITY:

Records are retrieved by subject matter or by name.

SAFEGUARDS:

Records are available only to authorized personnel having a need to know.

RETENTION AND DISPOSAL:

Records are retained for varying lengths of time as required by local regulations; some records may be maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998 and the heads of Navy Staff, Headquarters, and field activities employing civilians. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the servicing civilian personnel office where assigned or to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998. The request should contain full name, Social Security Number, and address. For personal visits, proof of identification will consist of a Department of Defense or Navy building pass or identification badge or driver's license or other types of identification

VOL 54 ISS 209 OCT 31 1989 UMI

bearing his/her signature or picture or by providing information which may be verified against the record.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the servicing civilian personnel office or to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR Part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Navy Civilian Personnel Offices and their representatives.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N12950–3

System name:

Payroll and Employee Benefits Records (51 FR 18221, May 16, 1986).

Delete the entry in its entirety and substitute with "Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998 and the commanding officers of the employee's activity."

* * * * *

Record source categories:

In line four, delete the word "NCPC" and substitute with "OCPM".

* * * * *

N12950–5

SYSTEM NAME:

Navy Civilian Personnel Data System (NCPDS).

SYSTEM LOCATION:

Office of Civilian Personnel Management (OCPM) and its field offices; operating civilian personnel offices and Navy commands and management offices; and the Navy Regional Data Automation Center (NARDAC) and its designated contractors. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records. Included in this notice are those records duplicated for retrievability at a site closer to where the employee works (e.g., in an administrative office or a supervisor's work area).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department of the Navy civilian employees paid from appropriated and non-appropriated funds and foreign national direct and indirect hire employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system is comprised of automated and non-automated records describing and identifying the employee (e.g., name, Social Security Account Number, sex, birth date, minority designator, citizenship, physical handicap code); the position occupied and the employee's qualifications; salary and salary basis or other compensation and allowances; employee's status in relation to the position occupied and the organization to which assigned; tickler dates for impending changes in status; education and training records; previous military status; functional code; previous employment record; performance appraisal and other data needed for screening and selection of an employee; referral records; professional licenses and publications; and reason for position change or other action affecting the employee and case files pertaining to EEO, MSPB, labor and employee relations, and incentive awards. The records are those found in the NCPDS subsystems: the Navy Automated Civilian Manpower Information System (NACMIS), the Training Information Management System (TIMS), the Personnel Automated Data System (PADS), the Computerized Employee Management Program Administration and Research (CEMPAR), Office of Civilian Personnel Management Customer Support Centers, the Executive Personnel Management Information System (EPMIS) and the NCPDS base level and Headquarters systems.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 5 U.S.C. 4118; E.O. 9397; 5 U.S.C. 2951; E.O. 10450; 42 U.S.C. 2000e, 5 U.S.C. 3135, 5 U.S.C. 4301, et seq., 5 U.S.C. 4501 et seq., 5 U.S.C. 4705 and subparts D, E, F, and G of title 5 U.S.C. and 29 CFR part 1613 et seq.

PURPOSE(S):

To manage and administer the Department's civilian personnel and civilian manpower planning programs and in the design, development, maintenance and operation of the automated system of records. Designated contractors of the Department of the Navy and Defense in the performance of their duties with respect to equipment and system design, development test, operation and maintenance.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

To the Comptroller General or any of his authorized representatives, in the course of the performance of duties of the General Accounting Office.

To the Attorney General of the United States or his authorized representatives in connection with litigation, law enforcement, or other matters under the direct jurisdiction of the Department of Justice or carried out as the legal representative of Executive Branch agencies.

To officials and employees of other departments and agencies of the Executive Branch of government upon request in the performance of their official duties related to the screening and selection of candidates for vacant positions.

To representatives of the United States Department of Labor on matters relating to the inspection, survey, audit or evaluation of the Navy's apprentice training programs or on other such matters under the jurisdiction of the Labor Department.

To representatives of the Veterans Administration on matters relating to the inspection, survey, audit or evaluation of the Navy's apprentice and on-the-job training program.

To contractors or their employees for the purpose of automated processing of data from employee personnel actions and training documents, or data collection forms and other documents.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tapes, punched cards, computer printouts, and microfiche.

RETRIEVABILITY:

Name, Social Security Account Number, and/or employee number.

SAFEGUARDS:

Buildings are protected by guards and locked after normal duty hours. Access to records is limited to those persons whose official duties require such access. Records are stored in locked cabinets or rooms. Computer systems are protected by software systems.

RETENTION AND DISPOSAL:

Records are maintained on a calendar year basis except where noted otherwise. Records are retained in active file until they are one year old and then retired to the Director, National Personnel Records Center, Civilian Personnel Records, 111 Winnebago Street, St. Louis, MO 63118. Records are destroyed when they are 75 years old. Exceptions are: Records on microfiche are destroyed when superseded or when no longer needed for reference. Records on the computer magnetic tapes are permanent. Manual records are maintained on a fiscal year basis and are retained for varying periods from one to five years.

SYSTEM MANAGER(S) AND ADDRESS:

Policy Official: Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

Record Holder: Commanding officers of the employee's activity.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

In the initial inquiry the requester must provide full name, Social Security Number, activity where last employed. A list of other offices the requester may visit will be provided after initial contact is made at the office listed above. At the time of a personal visit, requesters must provide proof of identity containing the requester's signature.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR part 701, or may be obtained from the system manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Navy civilian employees paid from appropriated funds.

CATEGORIES OF RECORDS IN THE SYSTEM:

system of records should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

are available to Government agencies. These exemptions are used whenever the anticipated savings outweigh the administrative costs associated with processing required documentation.

To contractors or their employees for the purpose of automated processing of data from employee personnel actions and training documents, or data collection forms and other documents.

To a duly appointed hearing examiner or arbitrator in connection with an employee's grievance.

To an appointed Administrative Judge for the purpose of conducting a hearing in connection with an employee's formal Equal Employment Opportunity (EEO) complaint.

To officials and employees of schools and other institutions engaged to provide training.

To labor organizations recognized under 5 U.S.C. Chapter 71 when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting working conditions.

To representatives of the Federal Labor Relations Authority.

To representatives of the Merit Systems Protection Board.

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tape, disc, drum and punched cards and computer printouts. Manual records are stored in paper file folders.

RETRIEVABILITY:

Information is retrieved by Social Security Number or other similar substitute if there is no Social Security Number, position number, name, or by specific employee characteristics such as date of birth, grade, occupation, employing organization, tickler dates, academic specialty level.

SAFEGUARDS:

The computer facility and terminal are accessible only to authorized persons that have been properly screened, cleared and trained. Manual and automated records and computer printouts are available only to authorized personnel having a need-to-know.

RETENTION AND DISPOSAL:

Input documents are destroyed after data are converted to magnetic medium. Information is stored in magnetic medium within the ADP system. Information recorded via magnetic medium will be retained permanently. For TIMS and the apprentice programs the computer magnetic tapes are permanent. Manual records are maintained on a fiscal year basis and are retained for varying periods from one to five years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998 and the commanding officers of the employee's activity.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998 or to the civilian personnel officer under his/her cognizance. The request should contain the individual's full name, Social Security Number and name of employing activity. Requesters may visit the civilian personnel office of the naval activity covered by the system to obtain information. In such case, proof of identity will consist of full name, Social Security Number and a third positive identification such as driver's license, Navy building pass or identification badge, birth certificate, Medicare card, etc. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998 or to the civilian personnel officer under his/her cognizance. The request should contain the individual's full name, Social Security Number and name of employing activity. Requesters may visit the civilian personnel office of the naval activity covered by the system to obtain information. In such case, proof of identity will consist of full name, Social Security Number and a third positive identification such as driver's license, Navy building pass or identification badge, birth certificate, Medicare card, etc. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR part 701, or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Categories of sources of records in the system are: the civilian personnel office of the employing activity; the payroll office; OCPM headquarters; the security office of the employing activity; line managers, other designated officials and supervisors; the employee and persons named by the employee as references.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N12950–6

System Name:

Computer Assisted Manpower Analyses System (CAMAS) (51 FR 18223, May 16, 1986)

Changes:

SYSTEM NAME:

Computer Assisted Manpower Analyses System (CAMAS).

SYSTEM LOCATION:

Office of Civilian Personnel Management, and Navy Department Staff, headquarters, and field activities employing civilians. Official mailing addresses are published as an appendix to the Department of the Navy's compilation of systems of records.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Navy civilian employees paid from appropriated funds.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain records from the Personnel Automated Data System (PADS) which contain job related data including individual identification, location information, and salary.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations and E.O. 9397.

PURPOSE(S):

To aggregate manpower planning, including calculating transition rates, forecasting number of retirements, and running models to determine the extent to which projected manpower requirements can be met.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer magnetic tape and disc.

RETRIEVABILITY:

Retrieved by Social Security Number.

SAFEGUARDS:

Records are maintained in areas accessible only to authorized personnel.

RETENTION AND DISPOSAL:

Records are permanent.

SYSTEM MANAGER(S) AND ADDRESS:

Office of Civilian Personnel Management, Department of the Navy, 800 North Quincy Street, Arlington, VA 22203–1998.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998. The request for information must contain full name of the individual, current address and telephone number, and birth date and Social Security Number.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Office of Civilian Personnel Management, 800 North Quincy Street, Arlington, VA 22203–1998.

CONTESTING RECORD PROCEDURE:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5, 32 CFR part 701, or may be obtained from the system manager.

BILLING CODE 3810–01

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection, Customs and Duties.

ADDRESS: Send comments to Ms. Eyvette Flynn, FAR Desk Officer, OMB, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Ms. Jeritta Parnell, Office of Federal Acquisition Policy, GSA (202) 523–6982.

SUPPLEMENTARY INFORMATION:

a. Purpose

United States laws impose duties on foreign supplies imported into the customs territory of the United States. Certain exemptions from these duties are available to Government agencies. These exemptions are used whenever the anticipated savings outweigh the administrative costs associated with processing required documentation. When a Government contractor purchases foreign supplies it must notify the contracting officer to determine whether the supplies should be duty-free. In addition, all shipping documents and containers must specify certain information to assure the duty-free entry of the supplies.

The contracting officer analyzes the information submitted by the contractor to determine whether or not supplies should enter the country duty-free. The information, the contracting officer's determination, and the U.S. Customs forms are placed in the contract file.

b. Annual Reporting Burden

This is estimated as follows: Respondents, 10; total annual responses, 13,300; hours per response, .5; responses, total burden hours, 6,650.

Obtaining Copies of Proposals: Requester may obtain copies from the FAR Secretariat (VRS), Room 4041, GSA Building Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0022, Customs and Duties.

Dated: October 23, 1989.

Margaret A. Willis,

FAR Secretariat.

Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection, Customs and Duties.

ADDRESS: Send comments to Ms. Eyvette Flynn, FAR Desk Officer, OMB, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Ms. Jeritta Parnell, Office of Federal Acquisition Policy, GSA, (202) 523–8982.

SUPPLEMENTARY INFORMATION:

a. Purpose

Under the Trade Agreements Act of 1979, unless specifically exempted by statute or regulation, agencies are required to evaluate offers over a certain dollar limitation not supply an eligible product without regard to the restrictions of the Buy American Act or the Balance of Payments program. Offerors identify excluded end products on this certificate.

The contracting officer uses the information to identify the offered items which are domestic end products. Items having components of unknown origin are considered to have been mined, produced, or manufactured outside the United States or a designated country of the Act.

b. Annual Reporting Burden

This is estimated as follows: Respondents, 10; total annual responses, 11,400; hours per response, .167; responses, total burden hours, 1,904.

Obtaining Copies of Proposals: Requester may obtain copies from the FAR Secretariat (VRS), Room 4041, GSA Building, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0025, the Buy American Act-Trade Agreements Act-Balance of Payments Program Certificate.

DEPARTMENT OF EDUCATION

[CFDA 84.026]

Educational Media Research, Production, Distribution, and Training Program; Correction

AGENCY: Department of Education.

ACTION: Final priority; correction.

SUMMARY: On September 14, 1989, final funding priorities for certain new Direct Grant awards for FY 1990 were published at 54 FR 38160. The notice contained a final priority for Closed-Captioned Children's Program under the Educational Media Research, Production, Distribution, and Training Program, at 54 FR 38164.

The priority is corrected as follows:

On page 38164, in the second column, the fifth line is corrected to read "closed-captioned network, syndicated and public".

FOR FURTHER INFORMATION CONTACT: Joseph Clair, Office of Special Education and Rehabilitative Services, Division of Educational Services, 400 Maryland Avenue, SW., Room 4622, Switzer Building, Washington, DC 20202 Telephone: (202) 732–4503.

Authority: 20 U.S.C. 1451, 1452.

Dated: October 25, 1989.

Robert Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Solicitation for Grant Application

AGENCY: U.S. Department of Energy.

ACTION: Solicitation for grant application.

SUMMARY: The U.S. Department of Energy (DOE), pursuant to the DOE Financial Assistance Rule, 10 CFR 600.9, announces the availability of a solicitation for grant application No. DE–90CH15997 under the States' Initiative Subprogram of the Energy-Related Invention Program (ERIP).

FOR FURTHER INFORMATION CONTACT: Ms. Mary Lou Zambrano, U.S. Department of Energy, Chicago Operations Office, 9800 South Cass Avenue, Argonne, IL 60439, (312) 972–2077.

SUPPLEMENTARY INFORMATION: The objective of this solicitation is to identify and provide support for up to ten innovative projects to be conducted by nonfederal entities in the field of providing support to independent inventors.

ERIP was established in 1974 under the authority of the Federal Non-Nuclear Energy Research and Development Act of 1974 to assist independent and small company inventors. The principal means through which the program has worked with inventors is a program offering technical evaluation of inventions by the National Institute of Standards and Technology (NIST), formerly the National Bureau of Standards (NBS), and the prospect of financial support (grants) form DOE for those inventions identified by NIST as "promising" in terms of technical feasibility, commercial viability and energy impact potential.

Establishement of the States' Initiatives Program in 1986 was prompted by the recognition that the needs of independent and small company inventors were being addressed by numerous programs at the non-federal level. The proliferation of programs during the middle of the decade indicated widespread interest at the state and local level in helping inventors and technology based small businesses succeed. Since that time, program staff have been involved in identifying and characterizing various assistance programs that can be useful to inventors.

This solicitation represents a new effort of the States' Initiatives Program to provide assistance to groups (inventor support groups) which work with independent and small company inventors in the area of invention development and commercialization assistance or otherwise promote the interests of inventors. This solicitation invites proposals for grants to support new initiatives by inventor support groups; it is not intended to offset the cost of established day-to-day operations of existing programs. The grants will be awarded to inventor support groups proposing new, innovative projects aimed at improving assistance to inventors. The grants will be for projects of up to one year in length. Examples of such projects would include experimental inventor-resource matching systems, development of educational materials pertaining to the invention commercialization process or projects which will enhance the standing of inventors as a group.

Project applications must identify a complete project and the availability of resources required to complete it in order to receive consideration. Funding will not be awarded to start a project that will rely upon as yet unidentified resources for completion. Special consideration will be given for projects that are transferable to other inventor support groups for their educational benefit or duplication by them. A final report on the results of each project will be required. Project results will be published in the Inventor Assistance Newsletter published by Argone National Laboratory.

Total funding for this solicitation is $200,000.00 to fund up to ten grants. No grant under this solicitation will exceed $20,000.00. The solicitation is expected to be issued on or about November 6, 1989 with applications due on or about December 8, 1989. If you are interested in receiving the solicitation, send your written request to Mary Lou Zambrano, Team Secretary at the above address.

All responsible sources may submit an application, which will be considered.

Timothy S. Crawford,

Assistant Manager for Administration.

BILLING CODE 6450–01–M

Advisory Committee on Nuclear Facility Safety; Open and Closed Meetings

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Advisory Committee on Nuclear Facility Safety.

Date & Time:
Monday, November 13, 1989, 8:00 a.m. to 10:00 p.m.
Tuesday, November 14, 1989, 1:00 p.m. to 5:00 p.m.

Place: Harvey Hotel, 3100 I–40 West, Amarillo, Texas 79102.

Contact: Wallace R. Kornack, Executive Director, ACNFS, S–2, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/586–1770.

Purpose of the Committee: The Committee was established to provide the Secretary of Energy with advice and recommendations concerning the safety of the Department's production and utilization facilities, as defined in section 11 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014).

Tentative Agenda

November 13, 1989
8:00 a.m. Chairman John F. Ahearne Opens Meeting, Waste Isolation Pilot Plant Report, Committee Business, Review of Issues at Pantex.
Noon. Lunch.
1:00 p.m. Review of Issues at Pantex, Subcommittee Reports, Committee Business.
5:00 p.m. Meeting Adjourned until 8:00 p.m.
8:00 p.m. to 10:00 p.m. Public Comment Session.

November 14, 1989
1:00 p.m. to 5:00 p.m. Closed Meeting.

Public Participation: The meeting on November 13 is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements at the public comment session on November 13 should contact Wallace R. Kornack at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Closed Meeting: Pursuant to section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (U.S.C. App. II (1982)), part of these advisory committee meetings concerns matters listed in 5 U.S.C. 552b(c)(1). Accordingly on November 14, 1989, from approximately 1:00 p.m. until 5:00 p.m., the meeting will be closed to the public.

Transcripts: The transcript of the open meeting will be available for public review and copying at the Freedom of Information Public Reading Room, IE–190, Forrestal Building, 1000 Independence Ave., SW., Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on October 25, 1989.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. RP90–15–000]

Equitrans, Inc. v. Texas Eastern Transmission Corp.; Complaint and Request for Stay

October 24, 1989.

Take notice that on October 20, 1989, pursuant to Section 5 of the Natural Gas Act, 15 USCA § 717d, Section 10(d) of the Administrative Procedure Act, 5 USCA § 705, and Rules 206 and 212 of the Commission's Rules of Practice and Procedure, 18 CFR 385.206 and 385.212, Equitrans, Inc. (Equitrans) filed an emergency complaint against Texas Eastern Transmission Corporation (Texas Eastern) and requests an immediate stay of the Commission's authorization for Texas Eastern to implement a Gas Supply Inventory Reservation Charge (GIC) pending action on the complaint.

Equitrans alleges it has been unable to secure, to the extent requested, the FT-1 firm receipt and delivery points upon which to secure transportation of third party supplies. As a result, Equitrans alleges it is unable to convert the full portion of sales entitlements to transportation entitlements it requested in order to avoid the GIC payments to Texas Eastern.

Equitrans contends that in order to obtain priority to firm receipt and delivery points for FT-1 service, Texas Eastern's sales customers were required to submit nominations for those points by October 1, 1989. Equitrans contends that it fully complied with Texas Eastern's tariff requirements by requesting firm FT-1 conversions of 60,000 dekatherms (dth) per day by letter dated September 25, 1989 and amended on September 29, 1989. However, even though the conversion option was intended to permit up to 100 percent abandonment of the sales service at the sole discretion of the sales customer, Equitrans alleges that it was denied its request for even the 60,000 dth conversion it requested. Equitrans asserts that Texas Eastern informed Equitrans by letter on October 9, 1989, that it would permit only 20,000 dth of firm transportation and that if it still desired FT-1 conversion of the remaining 40,000 dth, it must request alternative firm receipt and delivery points by noon on October 11, 1989, less than 48 hours after the letter was received. Equitrans contends this was insufficient time to arrange for new gas purchase agreements with third parties. In addition, according to Equitrans, it and the other customers were required to execute new ten-year service agreements which provide for, *inter alia*, full or partial conversions from firm sales to firm transportation, by October 16, 1989. Equitrans asserts that it had no meaningful choice but to execute a service agreement providing for only 20,000 dth of firm transportation under Rate Schedule FT-1, and make no change with respect to its remaining sales entitlements.

Equitrans requests that the Commission:

(1) Investigate the policy of Texas Eastern with respect to handling requests for firm transportation receipt and delivery points for FT-1 and standby service customers;

(2) Assure that Texas Eastern give a higher priority to requests for firm receipt and delivery points by customers opting for FT-1 conversions than for standby service;

(3) Direct Texas Eastern to incorporate its policy on allocating FT-1 capacity in its FERC Gas Tariff;

(4) Provide for an iterative process to take place under which a series of requests for firm receipt and delivery points would be made by customers

converting to firm transportation from firm sales service in whole or in part until such time as all requests for firm points have been satisfied at mutually

Waechter, Poitevent, Carrere & Denegre, Suite 1700, One American Plaza, Baton Rouge, Louisiana 70825 on behalf of Walker Resources, Inc. (Applicant)

abandonment previously issued by the Commission in Docket No. CI89–348–000 to the extent necessary to authorize the sale for resale of gas purchased by

unnecessary for Natgas to appear or to be represented at the hearing.

with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural

VOL 54 ISS 209 OCT 31 1989 UMI

converting to firm transportation from firm sales service in whole or in part until such time as all requests for firm points have been satisfied at mutually agreeable points;

(5) Nullify new ten-year service agreements between Texas Eastern and its customers executed on or about October 16, 1989, and permit new agreements to be executed after the new rounds of requests for firm receipt and delivery points have been concluded;

(6) Determine whether denials of requests for firm receipt and delivery points that were made by Texas Eastern in order to reserve the locations where the lowest cost supplies are available for Texas Eastern's system supply; and

(7) Stay the authorization for Texas Eastern to commence billing its sales customers a GIC for purchase deficiencies until after the firm transportation conversions and new service agreements requested above have been completed and executed, respectively.

Any person desiring to be heard or to protest said complaint should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure [18 CFR 385.214, 385.211 (1988)]. All such motions or protests should be filed on or before November 7, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before November 7, 1989.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CF88-72-003]

Gulf Coast Engineering Management, Inc., and Boyce Machinery Corp. (Walker-Roemer Facility; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

October 24, 1989.

On October 17, 1989, Gulf Coast Engineering Management, Inc., 6 Richmond Place, New Orleans, Louisiana 70115 and Boyce Machinery Corporation, c/o Jones, Walker, Waechter, Poitevent, Carrere & Denegre, Suite 1700, One American Plaza, Baton Rouge, Louisiana 70825 on behalf of Walker Resources, Inc. (Applicant) submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located at 2800 Richland Street, Metairie, Louisiana. The facility will consist of an internal combustion engine-generator and a heat recovery boiler. The thermal energy recovered from the facility will be used in pasteurizing and processing milk and milk products, and for space heating and cooling. The net electric power production capacity will be 481 kW. Primary source of energy will be natural gas.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Natgas U.S. Inc.; Application To Amend a Blanket Certificate With Pregranted Abandonment

October 24, 1989.

Take notice that on October 23, 1989, Natgas U.S. INC. (Natgas) of 500, 707 Eighth Avenue, SW., Calgary, Alberta, Canada, T2P 3V3, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder and Section 9 of the Alaska Natural Gas Transportation Act of 1976 to amend its blanket certificate with pregranted abandonment previously issued by the Commission in Docket No. CI89-348-000 to the extent necessary to authorize the sale for resale of gas purchased by Natgas from Northwest Alaskan Pipeline Company (Northwest Alaskan) as part of the Alaska Natural Gas Transportation System (ANGTS) prebuild project. Natgas also request that the Commission amend the blanket certificates of marketers which purchase gas from Natgas to provide such marketers with blanket authorization to sell such gas for resale. In addition, Natgas requests that it be authorized to resell prebuild gas which it purchases from Northwest Alaskan at the contract rates which it negotiates at arm's length with its customers and that similar authority be granted to certificated marketers who purchase such gas from Natgas for resale. Finally, Natgas requests that the Commission find that Commission actions granting the approvals requested are "necessary or related to the construction and initial operation of the * * * [ANGTS]" and grant any waivers or relief as may be necessary to implement the proposal set forth herein. The application is on file with the Commission and open for public inspection.

According to Natgas, the authorization requested is an integral part of a comprehensive settlement agreed to by Pan-Alberta Gas Ltd. and United Gas Pipe Line Company (United) on June 5, 1989, in order to resolve all ongoing disputes pertaining to United's obligation to the ANGTS prebuild project and to release United permanently from all such obligations.

It appears reasonable and consistent with the public interest in this case to prescribe a period of 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 3, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Natgas to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25525 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP90-93-000]

Natgas U.S. Inc.; Application

October 24, 1989.

Take notice that on October 23, 1989, Natgas U.S. Inc. (Natgas), 500, 707 Eighth Avenue, SW., Calgary, Alberta, Canada, T2P 3V3, filed an abbreviated application pursuant to Section 7(c) of the Natural Gas Act, section 9 of the Alaska Natural Gas Transportation Act (ANGTA) and part 157 of the Commission's Regulations for the expedited issuance of a certificate of public convenience and necessity.

By such application, Natgas seeks:

(1) Authorization to sell up to 100,000 Mcf of natural gas per day to Northern Natural Gas Company for resale in interstate commerce;

(2) A finding that such an authorization is necessary or related to the construction and initial operation of the Alaskan Natural Gas Transportation System (ANGTS);

(3) Confirmation that the sale by Natgas to Northern is exempt from Order No. 380 concerning minimum bills, as codified in Section 154.111 of the Commission's Regulations;

(4) Confirmation that Northern may flow through, on an "as-billed" basis, all demand charges paid to Natgas, as an exception to policy established in Opinion No. 256; and,

(5) Waiver of certain tariff and rate regulations so that Natgas' tariff may be in the form of its agreement with Northern and that such tariff may become effective on a specifically defined date in the *pro forma* tariff.

Natgas' proposals are more fully set forth in the application which is on file with the Commission and open to public inspection.

Natgas states that it is a wholly-owned subsidiary of Pan-Alberta Resources, Inc., an affiliate of Pan-Alberta Gas, Ltd. (Pan-Alberta). All of these companies are engaged in various phases of natural gas marketing in both Canada and the United States.

Natgas states that this application is one of several being filed as the result of complex, interrelated agreements reached between the parties with respect to the purchase, sale and transportation of Canadian gas on the pre-build Eastern Leg of the ANGTS. This group of applications includes:

Northwest Alaskan Pipeline Co., Docket No. CP78-123-028

Northwest Alaskan Pipeline Co., Docket No. RP90-16-000

Northern Border Pipeline Co., Docket No. CP78-124-013

Natgas (U.S.) Inc., Docket No. CI89-348-001

United Gas Pipe Line Co., Docket No. CP79-400-004

Northern Natural Gas Co., Natgas (U.S.) Inc., Docket No. CP79-395-007

Natgas states that Pan-Alberta is the export/supplier of 800,000 Mcf per day of natural gas to Northwest Alaskan Pipeline Company (Northwest Alaskan), which sells the gas for resale in interstate commerce to three interstate pipelines. The gas is transported by Northern Border Pipeline Company as part of the pre-build project of the Eastern Leg of the ANGTS. Natgas further states that one on those interstate pipeline repurchasers, United Gas Pipe Line Company, (United) is assigning its rights and obligation to purchase and ship up to 450,000 Mcf per day to Natgas. Natgas states that it will seek to market these supplies of natural gas, which it will now purchase from its affiliate, Pan-Alberta.

Natgas states that this application requests certification of a specific long-term sale for resale in interstae commerce of up to 100,000 Mcf per day of those supplies to Northern pursuant to a Gas Purchase Agreement dated October 16, 1989, between Natgas and Northern. Natgas states that under the Agreement, Northern will have the obligation to purchase a minimum of 20% of the contract quantity on a daily basis and a minimum of 60% of the contract quantity on an annual average basis. The term of the Agreement is through October 31, 2001.

Natgas states that the price of the gas will be based on a multi-part rate which includes a demand charge, Tier I, Tier II and best-efforts commodity charges. The demand charges is equal to 50% of the current demand charge, Northern currently pays to Northwest Alaskan, plus 100/450 th's of Natgas' share of Northern Border's demand charges. The demand charge is limited by a cap through October 31, 1991. The Tier I commodity charge is equal to Northern's then effective weighted average cost of domestic gas and the Tier II and best-efforts commodity charges will be determined on the basis of market factors.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 3, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Natgas to appear or be represented at the hearing.

Lois D.Cashell,

Secretary.

[FR Doc. 89-25526 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL89-55-000]

New England Power Co.; Filing

October 24, 1989.

Take notice that on September 28, 1989, New England Power Company (NEP) filed a Petition for Waiver of Fuel Clause Regulations. NEP requests waiver of the Commission's fuel clause regulations in order to allow flow-through to customers of certain contract termination costs related to uranium supply and enrichment services billed to NEP pursuant to its power contracts with Yankee Atomic Electric Company, Maine Yankee Nuclear Corporation, and Vermont Yankee Nuclear Power Corporation. According to the Company, the benefits of these transactions have

already been passed on to customers as lower fuel expense.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before November 7, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25527 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP78-124-013]

Northern Border Pipeline Co.; Petition To Amend

October 24, 1989.

Take notice that on October 23, 1989, Northern Border Pipeline Company (Northern Border), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP78-124-013, an application pursuant to Sections 7 (b) and (c) of the Natural Gas Act and Section 9 of the Alaska Natural Gas Transportation Act (ANGTA) for amendment of its certificate authorization.

By such application Northern Border seeks: (1) Approval to abandon the transportation of natural gas for United Gas Pipe Company (United); (2) A certificate of public convenience and necessity authorizing the firm transportation of natural gas for Natgas U.S. Inc. (Natgas) through October 31, 2001; and, (3) Pre-granted approval to abandon service to Natgas under certain conditions.

Northern Border's proposals are fully set forth in the application which is on file with the Commission and open to public inspection.

Northern Border indicates that the application is one of several being filed as the result of complex, interrelated agreements reached between the parties with respect to the purchase, sale and transportation of Canadian gas on the pre-built Eastern Leg of the ANGTS. This group of applications includes:

Northwest Alaskan Pipeline Co., Docket No. CP78-123-028;
Northwest Alaskan Pipeline Co., Docket No. RP90-16-000;
Natgas (U.S.) Inc, Docket No. CP90-93-000;
Natgas (U.S. Inc., Docket No. CI89-348-001;
United Gas Pipe Line Co., Docket No. CP79-400-004;
Northern Natural Gas Co., Natgas (U.S.) Inc., Docket No. CP79-396-007.

By this application Northern Border proposes to abandon the firm transportation of 450,000 Mcf per day of natural gas for United. Northern Border receives the natural gas volumes for United's account at a point of interconnection between the facilities of Foothills Pipe lines (Sask.) Ltd. and Northern Border on the international boundary near Port of Morgan, Montana, (Monchy, Saskatchewan). Northern Border transports and redelivers such volumes at existing points of interconnection between the facilities of Northern Natural Gas Company, (Northern) and Northern Border near Aberdeen, South Dakota, Welcome, Minnesota and Ventura, Iowa.

Northern Border states that United purchases the natural gas volumes transported by Northern Border from Northwest Alaskan Pipeline Company (Northwest Alaskan) which in turn purchases them from Pan-Alberta Gas Ltd. (Pan-Alberta).

Northern Border further states that United and Pan-Alberta have entered into a Memorandum of Understanding, dated June 5, 1989 which provides that Pan-Alberta's designee, Natgas U.S. Inc., (Natgas), will assume United's natural gas purchase rights and obligations with Northwest Alaskan and United's natural gas transportation rights and obligations with Northern Border.

Thus, Northern Border now proposes to transport on a firm basis up to 450,000 Mcf per day of natural gas for Natgas from Monchy to Aberdeen, Welcome and Ventura. Northern Border states that Natgas is a natural gas marketer in the United States and is an affiliate of Pan-Alberta. Northern Border states that Natgas and Northern Border have entered into a "U.S. Shippers Service Agreement", dated October 6, 1989, which makes special provision for an alternative credit support arrangement between Natgas and Northern Border.

Northern Border also seeks pre-granted approval for abandonment of the transportation service for Natgas in the event of nonpayment by Natgas. Northern Border states that it will terminate service to Natgas if Natgas fails to make timely payment to Northern Border, fails to maintain a letter of credit or fails to adhere to the specific provision of the alternative credit support arrangement. Northern Border states that its application is being filed under the ANGTA and that ANGTA furnishes an independent and unique basis for approval of the pre-granted abandonment..

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before November 3, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25528 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP90-16-000]

Northern Alaskan Pipeline Co.; Tariff Changes

October 24, 1989.

Take notice that on October 23, 1989, Northwest Alaskan Pipeline Company ("Northwest Alaskan") tendered for filing in Docket No. RP90-16-000 the following revisions to its FERC Gas Tariff, Original Volume No. 2.

Rate Schedule and Tariff Sheet Number
X-1
Fourth Revised Sheet No. 100;
Fourth Revised Sheet No. 101;
Second Revised Sheet No. 106;
Third Revised Sheet No. 109;
Fourth Revised Sheet No. 123;
Fifth Revised Sheet No. 150;
Second Revised Sheet No. 157;
Second Revised Sheet No. 157A;
Third Revised Sheet No. 158;
Fourth Revised Sheet No. 186A;
X-3
Third Revised Sheet No. 300;
Third Revised Sheet No. 301;
Original Sheet Nos. 321A-321I;
Third Revised Sheet No. 322;
Second Revised Sheet No. 350;
Second Revised Sheet No. 386A;
Original Sheet Nos. 386B-386G.

Northwest Alaskan states that the proposed tariff revisions implement, in part, a transaction contemplated in principle by the Memorandum of Understanding between Northwest Alaskan's supplier, Pan-Alberta Gas, Ltd. ("Pan-Alberta") and its purchaser, United Gas Pipe Line Company ("United"). The proposed tariff revisions provide, in summary, for an assignment at Pan-Alberta's request of the Gas Purchase Agreement between Northwest Alaskan and United (the "United Agreement") from United to Natgas U.S. Inc. ("Natgas"), a redetermination of the price to be paid by Natgas under the United Agreement, an increase of the minimum daily volume of gas to be purchased by Northern National Gas Company, Division of Enron Corp. ("Northern"), from Northwest Alaskan, and the elimination of Northern's option to increase its average daily volume of gas purchased from Northwest Alaskan.

These tariff revisions would not become effective unless a notice is filed with the commission by Northwest Alaskan within thirty days of filing the Petition and would not become effective until the time specified in that notice.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before November 3, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25529 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP78-123-028]

Northwest Alaskan Pipeline Co.; Petition To Amend

October 24, 1989.

Take notice that on October 23, 1989, Northwest Alaskan Pipeline Company (Northwest Alaskan), 295 Chipeta Way, Salt Lake City, Utah 84158-0900, filed in Docket No. CP78-123-028, an application pursuant to Section 7 of the Natural Gas Act and Section 9 of the Alaskan Natural Gas Transporation Act (ANGTA). Northwest Alaskan states that its application is necessary or related to the construction and initial operation of the Alaskan Natural Gas Transportation System (ANGTS).

By such application Northwest Alaskan seeks to: (1) Abandon its sale to United Gas Pipe Line Company (United) of an average daily volume of 450,000 Mcf of Canadian natural gas transported through the Eastern Leg of the ANGTS; (2) Amend its current certificate of public convenience and necessity to authorize the sale for resale of an annual average daily volume of 450,000 Mcf to Natgas U.S. Inc. (Natgas), as a replacement for United; and (3) Amend its current certificate of public convenience and necessity to extend the authorization for sale for resale through October 31, 2001 of a maximum daily volume of up to 880,000 Mcf per day, plus two percent tolerance, not to exceed on an annual basis, a daily average of 800,000 Mcf.

Northwest Alaskan's proposals are more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest Alaskan indicates that the application is one of several being filed as the result of complex, interrelated agreements reached between the parties with respect to the purchase, sale and transportation of Canadian gas on the pre-build Eastern Leg of the ANGTS. This group of applications includes:

Northwest Alaskan Pipeline Co., Docket No. RP90-16-000;
Northern Border Pipeline Co., Docket No. CP78-124-013;
Natgas (U.S.) Inc., Docket No. CP90-93-000;
Natgas (U.S.) Inc., Docket No. CI89-348-001;
United Gas Pipe Line Co., Docket No. CP79-400-004;
Northern Natural Gas Co., Natgas (U.S.) Inc., Docket No. CP79-396-007.

Northwest Alaskan states that the overall transaction proposed by this group of applications is subject to a final Closing Agreement which will have terms addressing and resolving all issues relating to the potential bankruptcy of a party and any potential losses or liabilities that result. Northwest Alaskan further states that if it has not filed a notice with the Commission within thirty days of this application, the application will be deemed automatically withdrawn.

Northwest Alaskan states that upon the recommendation of the United States Government it initiated the pre-build projects of the Eastern and Western Legs of the ANGTS. With respect to the Eastern Leg, Northwest Alaskan states that it entered into a contract, dated March 9, 1978, with Pan-Alberta Gas, Ltd. for the purchase of 800,000 Mcf per day of natural gas which was to be imported by Northwest Alaskan and resold to three interstate natural gas pipelines. Of that volume, United was to have purchased 450,000 Mcf per day, Northern Natural Gas Company (Northern)—200,000 Mcf per day, and Panhandle Eastern Pipe Line Company (Panhandle)—150,000 per day.

Northwest Alaskan states that the sale to United has been amended several times, most recently by the Commission in Docket No. RP87-34-000 and 001 on June 16, 1987. This amendment approved a two-year settlement of take-or-pay and *force majeure*, disputes between United and Northwest Alaskan. The settlement was later extended through October 31, 1988. Northwest Alaskan states that upon further negotiations, United has agreed to assign its Northwest Alaskan natural gas purchase rights and obligations to Pan-Alberta's designee, now Natgas. Northwest Alaskan states that Natgas is a natural gas marketer in the United States and is an affiliate of Pan-Alberta.

Thus, by this application, Northwest Alaskan seeks approval of the abandonment the sale to United of 450,000 Mcf per day and re-certification of the sale of that volume to Natgas.

Northwest Alaskan also seeks approval of an amendment of its certificate to extend the term of its sales to Natgas, Northern, and Panhandle through October 31, 2001. Northwest Alaskan further specifically requests that it be authorized to make sales for resale in interstate commerce of a maximum of 880,000 Mcf per day, plus a two percent tolerance, not to exceed on an annual average daily basis 800,000 Mcf per day.

Finally, Northwest Alaskan states that it cannot and will not accept an order which does not provide that each component of the order becomes effective simultaneously, and which does not allow for a prospective period in which it can review the contents of the order. Northwest Alaskan also wants the order to be effective only after the date it specifies in its further notice to the Commission. Northwest Alaskan further seeks waiver of § 157.20(a) which would otherwise require it to accept a certificate within thirty days of issuance.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before November 3, 1989, file with the Federal Energy Regulatory Commission,

Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25530 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP87-34-009]

Northwest Alaskan Pipeline Co.; Extension of Tariff Provisions

October 25, 1989.

Take notice that on October 24, 1989, Northwest Alaskan Pipeline Company ("Northwest Alaskan") tendered for filing in Docket No. RP87-34-009 the following tariff sheets:

Rate Schedule and Tariff Sheets Number X-3

Original Sheet No. 308BBB.2;
Original Sheet No. 308FFF.2;
Original Sheet No. 358VV.2;
Original Sheet No. 358AAA.2

Northwest Alaskan proposed that these tariff sheets be effective on November 1, 1989.

Northwest Alaskan states that these tariff sheets would continue in effect certain aspects of the current interim agreement among Northwest Alaskan, United Gas Pipe Line Company ("United") and Pan-Alberta Gas Ltd. ("Pan-Alberta"), which would otherwise expire on October 31, 1989, from November 1, 1989 through December 31, 1989 (the "Extended Interim Period'). The current interim agreement (the "Interim Agreement") consists of the Tenth Amendment to the Gas Purchase Agreement between United and Northwest Alaskan, the Twentieth Amending Contract to the Gas Sales Contract between Northwest Alaskan and Pan-Alberta and the Marketing and Transportation Agreement between United and Pan-Alberta, which are contained in Northwest Alaskan's FERC Gas Tariff Original Volume No. 2, Rate Schedule X-3 at tariff sheets numbered 30800 through 308FFF and 358HH through 358AAA.

Northwest Alaskan states that the provisions of the Interim Agreement to be extended for the Extended Interim Period are paragraphs 5(b), 7, 7(a), 7(b), 7(c), 7(d), 7(e), 7(f), 7(h), 7(i), 8, 9, 9(b), 11, 12, 13, 14, 17 and 18 of the Tenth Amendment and the Twentieth Amending Contact and paragraphs 3(a), 3(b), (5(a), 5(b), 6, 7, and 8 of the Marketing and Transportation Agreement.

Northwest Alaskan states that United and Pan-Alberta have entered into a Memorandum of Understanding dated June 5, 1989 which sets forth among other things, the basic principles upon which definitive agreements shall be reached with respect to the purchase, sale and transportation of Canadian gas subsequent to the expiration of the Interim Agreement. The purpose of the requested extension is to preserve that status quo and to grant the parties an opportunity to finalize and obtain necessary approvals of those definitive agreements.

Northwest Alaskan has requested that the Commission approve the requested extension of the Interim Agreement provisions of Northwest Alaskan's tariff to be effective on November 1, 1989 and find that the extension is in the public interest.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before November 1, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP87-103-000 and RP88-262-000, et al. (Not Consolidated)].

Panhandle Eastern Pipe Line Co.; Change of Date of Informal Settlement Conference

(October 24, 1989).

By notice issued on October 18, 1989, an informal settlement conference was scheduled to convened in the above-proceedings on Friday, November 3, 1989, at 9:30 a.m. in a hearing room of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC, 20426. The settlement conference will be convened on November 2, 1989, at 2 p.m. instead of November 3, 1989 at 9:30 a.m. and, if necessary, the settlement conference will continue through November 3, 1989.

Any party, as defined by 18 CFR 385.102(c), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, please contact John J. Keating, (202) 357-5762 or Donald A. Heydt, (202) 357-5248.

Lois D. Cashell,

Secretary.

[FR Doc. 89-25532 Filed 10-30-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP79-400-004 and CP79-396-007]

United Gas Pipe Line Co. et al; Petition To Amend

October 24, 1989.

Take notice that on October 23, 1989, United Gas Pipe Line Company (United), Northern Natural Gas Company, Division of Enron Corp. (Northern), and Natgas U.S. Inc. (Natgas), (jointly as the applicants), filed an application in the above-captioned dockets pursuant to Sections 7(b) and (c) of the Natural Gas Act, and Section 9 of the Alaska Natural Gas Transportation Act (ANGTA), for the expedited issuance of an amendment to a certificate of public convenience and necessity.

By such application the applicants seek: (1) Approving the "partial" abandonment of the firm exchange of up to 450,000 Mcf per day of natural gas between United States and Northern authorized in Docket Nos. CP79-396 and CP79-400; (2) Authorizing the exchange on a firm basis of 75,000 Mcf per day of natural gas between Northern and Natgas, as successor to United, and the exchange of amounts in excess of 75,000 Mcf per day, up to 450,000 Mcf per day, on a best-efforts basis; and (3) Extend the term of the exchange through October 31, 2001.

The applicants' proposals are more fully set forth in the application which is on file with the Commission and open to public inspection.

United, Northern, and Natgas state that their application is one of several being filed as the result of complex, interrelated agreements reached among the parties with respect to the sale, purchase, and transportation of Canadian gas on the pre-build Eastern Leg of the Alaskan Natural Gas Transportation System (ANGTS). This group of applications includes:

Northwest Alaskan Pipeline Co. Docket No. RP90-16-000;
Northwest Alaskan Pipeline Co. Docket No. CP78-123-028;
Northern Border Pipeline Co. Docket No. CP78-124-013;
Natgas (U.S.) Inc. Docket No. CP90-93-000;
Natgas (U.S.) Inc. Docket No. CI89-348-001.

The applicants state that United purchase up to 450,000 Mcf per day of natural gas from Northwest Alaskan Pipeline Company (Northwest Alaskan), which Northwest Alaskan imports from Pan-Alberta Gas, Ltd. (Pan-Alberta). The natural gas is then transported by the Northern Border Pipeline Company (Northern Border). United takes delivery of these volumes via a firm exchange of natural gas with Northern, which interconnects at various locations with Northern Border. This exchange is for the mutual benefit of United and Northern, and is on a cost-free basis.

The applicants state that as a result of an agreement among United, Pan-Alberta, and Northwest Alaskan, Natgas, an affiliate of Pan-Alberta, will replace United in the purchase and shipment of 450,000 Mcf per day. By this application the applicants seek to partially reassign to Natgas United's rights and obligations in the natural gas exchange with Northern.

More specifically, the applicants propose to abandon United's obligation to deliver 450,000 Mcf per day to Northern and the obligation of Northern to deliver 450,000 Mcf per day to United. Applicants request that a certificate be issued authorizing the exchange of natural gas between Northern and Natgas on a firm, cost-free basis of up to 75,000. Mcf per day, and the cost-free exchange of volumes in excess of 75,000, up to 450,000 on a best-efforts basis. The applicants state that they have amended and assigned the existing exchange agreement between Northern and United by a further agreement provided with the application. Further, this agreement contains a listing of the firm and alternative exchange points to be used by Northern and Natgas.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before November 3, 1989, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Energy Research

Continuation of Solicitation for Special Research Grants and Research Opportunity Announcement for Research Contracts, No. 90-1

AGENCY: Department of Energy.

ACTION: Annual notice of continuation of availability of research grants and contracts.

SUMMARY: The Office of Energy Research (ER) of the Department of Energy hereby announces its continuing interest in receiving applications/proposals for Special Research Grants or Research Contracts supporting work in the following ER program offices: Basic Energy Sciences, Health and Environmental Research, Fusion Energy, Scientific Computing, Field Operations Management, Superconducting Supercollider, and High Energy and Nuclear Physics. Information about submission of applications/proposals, eligibility, limitations, evaluation and selection processes, and other policies and procedures are specified, for grants, in 10 CFR part 605 which was published in the **Federal Register** on April 15, 1985 (50 FR 14856) and, for contracts, in the Research Opportunity Announcement published on November 8, 1988 (53 FR 45234). The Catalog of Federal Domestic Assistance number is 81.049.

DATES: Applications and proposals may be submitted at any time in response to this Notice of Availability but in all cases must be received by DOE on or before October 31, 1990.

ADDRESSES: Applicants/proposers may obtain forms and additional information from Director, Acquisition and Assistance Management Division, Office of Energy Research, ER-64, U.S. Department of Energy, Washington, DC 20545, (301) 353-5544. Completed applications or proposals must be sent to this same address.

SUPPLEMENTARY INFORMATION: As mentioned above, the solicitations for Special Research Grants and the Research Opportunity Announcement for research contracts were published in the **Federal Register**. Those solicitations specify the policies and procedures which govern the application/proposal, evaluation, and selection processes for research grants and contracts. It is anticipated that approximately 409 million dollars will be available for award in FY 1990. DOE is under no obligation to pay for any costs associated with the preparation or submission of applications/proposals. DOE reserves the right to fund, in whole or in part, any, all, or none of the applications/proposals submitted in response to this notice.

Issued in Washington, DC, on October 17, 1989.

D.D. Mayhew,

Deputy Director for Management, Office of Energy Research.

Office of Fossil Energy

[FE Docket No. 89-53-NG]

Amerigas International Corp.; Application To Export Natural Gas to Mexico

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Mexico.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on September 13, 1989, of an application filed by Amerigas International Corporation (Amerigas) requesting blanket authorization to export from the United States to Mexico up to 54.75 Bcf of natural gas over a two-year period beginning on the date of first delivery. Amerigas intends to use existing pipeline facilities within the United States and at the international border for transportation of the exported gas. Amerigas states that it will advise the DOE of the date of first delivery and submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

VOL
54
ISS
209
OC
31
1989
UMI

DATE: Protests, motions to intervene, or notices of intervention, as appliable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 30, 1989.

ADDRESS: Office of Fuels Program, Fossil Energy, U.S. Department of Energy, Room 3F–056, FE–50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Perry Bolger, Office of Fuels Program, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3056, 1000 Independence Ave, SW., Washington, DC 20585. (202) 586–1789.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION:

Amerigas, a subsidary of AP Propane, Inc., a Delaware corporation, is located in Houston, Texas, and was organized to engage in the international marketing of natural gas, light hydrocarbons, and gaseous petroleum chemicals. Amerigas intends to export natural gas to Mexico for spot-market sales, primarily to Petroleos Mexicanos (Pemex). Amerigas currently is negotiating with Pemex a contract for the sale of up to 60,000 Mcf per day. Amerigas anticipates purchasing all the gas required to serve this authorization from natural gas producers in the states of Texas and New Mexico. Amerigas states that each sales transaction would be negotiated at arms length with Pemex and would be consistent with the public interest.

This export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export of natural gas is in the public interest, domestic need for the gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. The applicant asserts that there is no current need for the domestic gas that would be exported under the proposed arrangements. Parties opposing this arrangement bear the burden of overcoming this assertion.

All parties should be aware that if this blanket export application is granted, the authorization may permit the export of the gas at the international border point where existing transmission facilities of Del Norte Pipeline near El Paso, Texas, connect with the facilities of Pemex near Ciudad Juarz, Chihuahua, Mexico, or at any other existing border exit facility. Further, all parties should be aware that, in accordance with its present policy and past practice, if DOE approves the blanket authorization, it may limit the terms to two years. This limitation, if imposed, presumes that the exports would take place under contracts with terms of two years or less.

Amerigas requests that an authorization be granted on an expedited basis. A decision on Amerigas' request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

NEPA Compliance

The DOE has determined that compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, can be accomplished by means of a categorical exclusion. On March 29, 1989, the DOE published in the **Federal Register** (54 FR 12474) a notice of amendments to its guidelines for compliance with NEPA. In that notice, the DOE added to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the DOE's action is not a major Federal action under NEPA. Unless the DOE receives comments indicating that the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590.

Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

A decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and response filed by parties pursuant to this notice, in accordance with 10 CFR Sec. 590.316.

A copy of Amerigas's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on October 27, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 89–25620 Filed 10–30–89; 8:45 am]

BILLING CODE 6450–01–M

[FE Docket No. 89–15–NG]

Great Lakes Gas Transmission Co.; Conditional Order Amending Authorization To Import Natural Gas From and Export Natural Gas to Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of conditional order amending authorization to import natural gas from and export natural gas to Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it has issued a conditional order approving an amendment to Great Lakes Gas Transmission Company's (Great Lakes) authorization to import natural gas from and export natural gas to Canada. The order issued in FE docket No. 89–15–NG increases by 417,500 Mcf the currently authorized maximum daily volumes Great Lakes may import from and export to Canada and thereby raises the total maximum daily volumes Great Lakes may import and export through November 1, 2005, from 987,500 Mcf to 1,405,000 Mcf.

Final approval of this import is conditioned on DOE's completion of its responsibilities under the National Environmental Policy Act of 1969 and its reexamination at that time of this conditional order.

A copy of this order is available for inspection and copying in the Office of Fuels Program Docket Room, 3F–056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 25, 1989.

Constance L. Buckley,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

[FE Docket No. 89–64–NG]

Libra Marketing, Inc.; Application To Export Natural Gas to Mexico

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Mexico.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on September 14, 1989, of an application filed by Libra Marketing, Inc. (Libra), requesting blanket authorization to export from the United States to Mexico up to 146 Bcf of natural gas over a two-year period beginning on the date of first delivery. Libra intends to use existing pipeline facilities within the United States and at the international border for transportation of the exported gas. Libra states that it will advise the DOE of the date of first delivery and submit quarterly reports detailing each transaction.

The application was filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 30, 1989.

ADDRESS: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Room 3F–056, FE–50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Perry Bolger, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F–055B, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–1789.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION:

Libra, a Texas corporation with its principal place of business in Corpus Christi, Texas, is an international marketer of natural gas, light hydrocarbons, and gaseous petroleum chemicals. Libra intends to export natural gas to Mexico for spot market sales, primarily to Petroleos Mexicanos (Pemex). Libra anticipates purchasing all the gas required to serve this authorization from natural gas producers in the States of Texas, Louisiana, and New Mexico. Libra states that each sales transaction would be negotiated at arms length with Pemex or other purchasers and that the terms of each would reflect market conditions.

This export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export of natural gas is in the public interest, domestic need for the gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. The applicant asserts that there is no current need for the domestic gas that would be exported under the proposed arrangements. Parties opposing this arrangement bear the burden of overcoming this assertion.

All parties should be aware that if this blanket export application is granted, the authorization may permit the export of the gas at any point of exit on the international border where existing pipeline facilities are located.

Libra requests that an authorization be granted on an expedited basis. A decision on Libra's request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

NEPA Compliance

The DOE has determined that compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, can be accomplished by means of a categorical exclusion. On March 27, 1989, the DOE published in the **Federal Register** (54 FR 12474) a notice of amendments to its guidelines for compliance with NEPA. In that notice, the DOE added to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the DOE's action is not a major Federal action under NEPA. Unless the DOE receives comments indicating that the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to

VOL 54 ISS 209 OCT 31 1989 UMI

this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and response filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Libra's application is available for inspection and copying in the Office of Fuels Programs Docket Room, Room 3F-056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on October 23, 1989.

Panhandle Trading Co.; Order Granting Blanket Authorization To Import and Export Natural Gas

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of order granting blanket authorization to import natural gas from and export natural gas to Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy gives notice that it has issued an order granting Panhandle Trading Company (PTC) blanket authorization to import and export natural gas. The order issued in FE Docket No. 89-42-NG authorizes PTC to import up to 100 Bcf of Canadian natural gas and to export up to 100 Bcf of domestically produced natural gas to Canada for short-term and spot market sales over separate two-year periods beginning on the dates of the first import and the first export.

A copy of the order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 24, 1989.

Open Meeting of International Environmental Technology Transfer Advisory Board

Under Public Law 92-463, notice is hereby given that a meeting of the International Environmental Technology Transfer Advisory Board (IETTAB) will be held on December 7, 1989 in the Main Lounge of the National Press Club, 14th and F Streets, NW., Washington, DC. The meeting is open to the public and will run from 8:30 a.m. until approximately 5:00 p.m.

The purpose of this meeting is to review the need for transfer of environmental technolgy to low income countries to eliminate ozone depleting substances and greenhouse gases as well as similar needs regarding other pollution control or prevention. The Board will review ways and means to facilitate finance and aid for such environmental technology transfer.

Public comments can be made through written statements which will be distributed to Board Members. Written statements must be sent in care of the Executive Secretary listed below no later than November 17, 1989, in order to distribute to Members before the meeting time. Seating for interested members of the public is limited to seventy seats. Seats will be filled on a first-come basis. To confirm your interest in attending, contact the Executive Secretary by November 17, 1989.

FOR MORE INFORMATION CONTACT: Mark Kasman, Executive Secretary, IETTAB, Office of International Activities (A-106), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, (202) 382-4870.

Extension of the Public Comment Period for the Proposed Determination To Restrict the Specification of Leonard Pond and Its Wetlands as Disposal Sites

AGENCY: Environmental Protection Agency.

ACTION: Notice to extend the comment period for August 30, 1989, § 404(c) proposed determination.

SUMMARY: A Public Notice entitled "Proposed Determination to Restrict the Specification of Leonard Pond and its Wetlands as Disposal Sites" was published in the **Federal Register** on August 30, 1989 (54 FR 35827). That notice indicated that comments should be received at the address listed below on or before October 16, 1989.

During the public comment period landowners within the area of the proposed determination and the U.S. Fish and Wildlife Service asked for an extension to the comment period in order to obtain and submit information which pertains directly to the environmental values of the site. Since this information could influence the nature and scope of the section 404(c) action, EPA believes there is good cause for extending the comment period. Therefore, EPA is extending the period for comment on the proposed determination until close of business, November 27, 1989. This time extension is made under authority of 40 CFR 231.6.

DATE: Comments should be postmarked on or before November 27, 1989

FOR FURTHER INFORMATION CONTACT: Mr. Ralph W. Abele, EPA Water Quality Branch, JFK Federal Building, WWP-1900, Boston, MA 02203-2211, (617) 565-4438.

Dated: October 24, 1989.

Paul G. Keough,

Acting Regional Administrator, Region I.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Social Security Administration

1990 Cost-of-Living Increase and Other Determinations

AGENCY: Social Security Administration, HHS.

ACTION: Notice.

SUMMARY: The Secretary has determined—(1) A 4.7 percent cost-of-living increase in benefits under title II (section 215(i)) of the Social Security Act (the Act);

(2) An increase in the Federal Supplemental Security Income (SSI) (title XVI) monthly benefit amounts for 1990 to $386 for an eligible individual, $579 for an eligible individual with an eligible spouse, and $193 for an essential person (section 1617 of the Act);

(3) The average of the total wages for 1988 to be $19,334.04;

(4) The Social Security contribution and benefit base to be $50,400 for remuneration paid in 1990 and self-employment income earned in taxable years beginning in 1990;

(5) The amount of earnings a person must have to be credited with a quarter of coverage in 1990 to be $520;

(6) The monthly exempt amounts under the Social Security retirement earnings test for taxable years ending in calendar year 1990 to be $780 for beneficiaries age 65 through 69 and $670 for beneficiaries under age 65;

(7) The "old-law" contribution and benefit base to be $37,800 for 1990.

We also describe the computation of benefits for a worker and the worker's family who first become eligible for benefits in 1990, and the computation of the old-age, survivors, and disability insurance (OASDI) fund ratio used to determine whether the automatic increase in benefits under title II of the Act is affected by the "stabilizer" provision.

Finally, we are publishing a table of OASDI "special minimum" benefit amounts. This table provides the range of primary insurance amounts and the corresponding maximum family benefits under the "special minimum" benefit provision, as revised to reflect the automatic benefit increase. These benefits are payable to certain individuals with long periods of relatively low earnings.

FOR FURTHER INFORMATION CONTACT: Jeffrey L. Kunkel, Office of the Actuary, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965-3013.

SUPPLEMENTARY INFORMATION: The Secretary is required by the Act to publish within 45 days after the close of the third calendar quarter of 1989 the benefit increase percentage and the revised table of "special minimum" benefits (section 215(i)(2)(D)). Also, the Secretary is required to publish before November 1 the average of the total wages for 1988 (section 215(i)(2)(C)(ii)) and the OASDI fund ratio for 1989 (section 215(i)(2)(C)(iii)). Finally, the Secretary is required to publish on or before November 1 the contribution and benefit base for 1990 (section 230(a)), the amount of earnings required to be credited with a quarter of coverage in 1990 (section 213(d)(2)), the monthly exempt amounts under the Social Security retirement earnings test for 1990 (section 203(f)(8)(A)), the formula for computing a primary insurance amount for workers who first become eligible for benefits or die in 1990 (section 215(a)(1)(D)), and the formula for computing the maximum amount of benefits payable to the family of a worker who first becomes eligible for old-age benefits or dies in 1990 (section 203(a)(2)(C)).

Cost-of-Living Increases

General

The cost-of-living increase is 4.7 percent for benefits under titles II and XVI of the Act.

Under title II, old-age, survivors, and disability insurance benefits will increase by 4.7 percent beginning with

the December 1989 benefits, which are payable on January 3, 1990. The kinds of benefits payable to individuals entitled under this program are old-age,

Consumer Price Index for the calendar quarter ending September 30, 1989, exceeds that for the calendar quarter ending September 30, 1988, by 4.7

Section 227 of the Act provides flat-rate benefits to a worker who became age 72 before 1969 and was not insured under the usual requirements, and to his

average wage for 1988 is determined to be $19,334.04.

Contribution and Benefit Base

General

of coverage for every taxable year in which $400 or more of self-employment income was earned. Beginning in 1978, wages generally are no longer reported on a quarterly basis; instead, annual

203(f)(8)(B) for computing the exempt amount applicable for years after 1982. The monthly exempt amount for 1989 was determined by this formula to be $740. Under the formula, the exempt

VOL 54 ISS 209 OCT 31 1989 UMI

the December 1989 benefits, which are payable on January 3, 1990. The kinds of benefits payable to individuals entitled under this program are old-age, disability, wife's, husband's, child's, widow's, widower's, mother's, father's, and parent's insurance benefits. This increase is based on the authority contained in section 215(i) of the Act (42 U.S.C. 415(i)).

Under title XVI, Federal SSI payment levels will also increase by 4.7 percent effective for payments made for the month of January 1990 but paid on December 29, 1989. This is based on the authority contained in section 1617 of the Act (42 U.S.C. 1382f). The percentage increase effective January 1990 is the same as the title II benefit increase and the annual payment amount is rounded, when not a multiple of $12, to the next lower multiple of $12.

Automatic Benefit Increase Computation

Under section 215(i) of the Act, the third calendar quarter of 1989 is a cost-of-living computation quarter for all the purposes of the Act. The Secretary is therefore required to increase benefits, effective with December 1989, for individuals entitled under section 227 or 228 of the Act, to increase primary insurance amounts of all other individuals entitled under title II of the Act, and to increase maximum benefits payable to a family. For December 1989, the benefit increase is the percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers from the third quarter of 1988 through the third quarter of 1989. Automatic benefit increases may be modified by a "stabilizer" provision under certain adverse financial conditions that are described in the section on the OASDI fund ratio. The December 1989 benefit increase is not affected by this provision.

Section 215(i)(1) of the Act provides that the Consumer Price Index for a cost-of-living computation quarter shall be the arithmetic mean of this index for the 3 months in that quarter. The Department of Labor's Consumer Price Index for Urban Wage Earners and Clerical Workers for each month in the quarter ending September 30, 1988, was: for July 1988, 117.2; for August 1988, 117.7; and for September 1988, 118.5. The arithmetic mean for this calendar quarter is 117.8 (after rounding to the nearest 0.1). The corresponding Consumer Price Index for each month in the quarter ending September 30, 1989, was: for July 1989, 123.2; for August 1989, 123.2; and for September 1989, 123.6. The arithmetic mean for this calendar quarter is 123.3. Thus, because the Consumer Price Index for the calendar quarter ending September 30, 1989, exceeds that for the calendar quarter ending September 30, 1988, by 4.7 percent, a cost-of-living benefit increase of 4.7 percent is effective for benefits under title II of the Act beginning December 1989.

Title II Benefit Amounts

In accordance with section 215(i) of the Act, in the case of insured workers and family members for whom eligibility for benefits (i.e., the worker's attainment of age 62, or disability or death before age 62) occurred before 1990, benefits will increase 4.7 percent beginning with benefits for December 1989 which will be received January 3, 1990. In the case of first eligibility after 1989, the 4.7 percent increase will not apply.

For eligibility after 1978, benefits are generally determined by a benefit formula provided by the Social Security Amendments of 1977 (Pub. L. 95-216), as described later in this notice.

For eligibility before 1979, benefits are determined by means of a benefit table. In accordance with section 215(i)(4) of the Act, the primary insurance amounts and the maximum family benefits shown in this table are revised by (1) increasing by 4.7 percent the corresponding amounts established by the last cost-of-living increase and the last extension of the benefit table made under section 215(i)(4) (to reflect the increase in the contribution and benefit base for 1989); and (2) by extending the table to reflect the higher monthly wage and related benefit amounts now possible under the increased contribution and benefit base for 1990, as described later in this notice. A copy of this table may be obtained by writing to: Social Security Administration, Office of Public Affairs, Office of Public Inquiries, 4100 Annex, Baltimore, MD 21235.

Section 215(i)(2)(D) of the Act also requires that, when the Secretary determines an automatic increase in Social Security benefits, the Secretary shall publish in the **Federal Register** a revision of the range of the primary insurance amounts and corresponding maximum family benefits based on the dollar amount and other porvisions described in section 215(a)(1)(C)(i). These benefits are referred to as "special minimum" benefits and are payable to certain individuals with long periods of relatively low earnings. In accordance with section 215(a)(1)(C)(i), the attached table shows the revised range of primary insurance amounts and corresponding maximum family benefit amounts after the 4.7 percent benefit increase.

Section 227 of the Act provides flat-rate benefits to a worker who became age 72 before 1969 and was not insured under the usual requirements, and to his or her spouse or surviving spouse. Section 228 of the Act provides similar benefits at age 72 for certain uninsured persons. The current monthly benefit amount of $151.90 for an individual under sections 227 and 228 of the Act is increased by 4.7 percent to obtain the new amount of $159.00. The present monthly benefit amount of $76.10 for a spouse under section 227 is increased by 4.7 percent to $79.60.

Title XVI Benefit Amounts

In accordance with section 1617 of the Act, Federal SSI benefit amounts for the aged, blind, and disabled are increased by 4.7 percent effective January 1990. Therefore, the yearly Federal SSI benefit amount of $4,416 for an eligible individual, $6,636 for an eligible individual with an eligible spouse, and $2,208 for an essential person, which became effective January 1989, are increased, effective January 1990, to $4,632, $6,948, and $2,316 respectively after rounding. The corresponding monthly amounts for 1990 are determined by dividing the yearly amounts by 12, giving $386, $579, and $193, respectively. The monthly amount is reduced by subtracting monthly countable income. In the case of an eligible individual with an eligible spouse, the amount payable is further divided equally between the two spouses.

Average of the Total Wages for 1988

The determination of the average wage figure for 1988 is based on the 1987 average wage figure of $18,426.51 announced in the **Federal Register** on October 31, 1988 (53 FR 43932), along with the percentage increase in average wages from 1987 to 1988 measured by annual wage data tabulated by the Social Security Administration (SSA). The average amounts of wages calculated directly from this data were $17,416.59 and $18,274.38 for 1987 and 1988, respectively. To determine an average wage figure for 1988 at a level that is consistent with the series of average wages for 1951 through 1977 (published December 29, 1978, at 43 FR 61016), we multiplied the 1987 average wage figure of $18,426.51 by the percentage increase in average wages from 1987 to 1988 (based on SSA-tabulated wage data) as follows (with the result rounded to the nearest cent):

Average wage for
1988=$18,426.51×$18,274.38÷$17,416.59=$19,334.04. Therefore, the average wage for 1988 is determined to be $19,334.04.

Contribution and Benefit Base

General

The contribution and benefit base is $50,400 for remuneration paid in 1990 and self-employment income earned in taxable years beginning in 1990.

The contribution and benefit base serves two purposes:

(1) It is the maximum annual amount of earnings on which Social Security taxes are paid.

(2) It is the maximum annual amount used in determining a person's Social Security benefits.

Computation

Section 230(c) of the Act provides a table with the contribution and benefit base for each year 1978, 1979, 1980, and 1981. For years after 1981, section 230(b) of the Act contains a formula for determining the contribution and benefit base. Under the prescribed formula, the contribution and benefit base for 1990 shall be equal to the 1989 base of $48,000 multiplied by the ratio of (1) the average amount, per employee, of total wages for the calendar year 1988 to (2) the average amount of those wages for the calendar year 1987. Section 230(b) further provides that if the amount so determined is not a multiple of $300, it shall be rounded to the nearest multiple of $300.

Average Wages

The average wage for calendar year 1987 was previously determined to be $18,426.51. The average wage for calendar year 1988 has been determined to be $19,334.04 as stated herein.

Amount

The ratio of the average wage for 1988, $19,334.04, compared to that for 1987, $18,426.51, is 1.0492513. Multiplying the 1989 contribution and benefit base of $48,000 by the ratio 1.0492513 produces the amount of $50,364.06, which must then be rounded to $50,400. Accordingly, the contribution and benefit base is determined to be $50,400 for 1990.

Quarter of Coverage Amount

General

The 1990 amount of earnings required for a quarter of coverage is $520. A quarter of coverage is the basic unit for determining whether a worker is insured under the Social Security program. For years before 1978, an individual generally was credited with a quarter of coverage for each quarter in which wages of $50 or more were paid, or an individual was credited with 4 quarters of coverage for every taxable year in which $400 or more of self-employment income was earned. Beginning in 1978, wages generally are no longer reported on a quarterly basis; instead, annual reports are made. With the change to annual reporting, section 352(b) of the Social Security Amendments of 1977 (Pub. L. 95-216) amended section 213(d) of the Act to provide that a quarter of coverage would be credited for each $250 of an individual's total wages and self-employment income for calendar year 1978 (up to a maximum of 4 quarters of coverage for the year). Individuals generally must have self-employment income of at least $400 in a taxable year in order to be credited with any quarters of coverage.

Computation

Under the prescribed formula, the quarter of coverage amount for 1990 shall be equal to the 1978 amount of $250 multiplied by the ratio of (1) the average amount, per employee, of total wages for calendar 1988 to (2) the average amount of those wages reported for calendar year 1976. The section further provides that if the amount so determined is not a multiple of $10, it shall be rounded to the nearest multiple of $10.

Average Wages

The average wage for calendar year 1976 was previously determined to be $9,226.48. This was published in the **Federal Register** on December 29, 1978, at 43 FR 61016. The average wage for calendar year 1988 has been determined to be $19,334.04 as stated herein.

Quarter of Coverage Amount

The ratio of the average wage for 1988, $19,334.04, compared to that for 1976, $9,226.48, is 2.0954947. Multiplying the 1978 quarter of coverage amount of $250 by the ratio of 2.0954947 produces the amount of $523.87, which must then be rounded to $520. Accordingly, the quarter of coverage amount is determined to be $520 for 1990.

Retirement Earnings Test Exempt Amounts

(a) Beneficiaries Aged 70 or Over

Beginning with months after December 1982, there is no limit on the amount an individual 70 or over may earn and still receive Social Security benefits.

(b) Beneficiaries Aged 65 through 69

The retirement earnings test monthly exempt amount for beneficiaries aged 65 through 69 is stated in the Act at section 203(f)(8)(D) for years 1978 through 1982. A formula is provided in section 203(f)(8)(B) for computing the exempt amount applicable for years after 1982. The monthly exempt amount for 1989 was determined by this formula to be $740. Under the formula, the exempt amount for 1990 shall be the 1989 exempt amount multiplied by the ratio of (1) the average amount, per employee, of the total wages for calendar year 1988 to (2) the average amount of those wages for calendar year 1987. The section further provides that if the amount so determined is not a multiple of $10, it shall be rounded to the nearest multiple of $10.

Average Wages

Average wages for this purpose are determined in the same way as for the contribution and benefit base. Therefore, the ratio of the average wages for 1988, $19,334.04, compared to that for 1987, $18,426.51, is 1.0492513.

Exempt Amount for Beneficiaries Aged 65 through 69

Multiplying the 1989 retirement earnings test monthly exempt amount of $740 by the ratio of 1.0492513 produces the amount of $776.45. This must then be rounded to $780. The retirement earnings test monthly exempt amount for beneficiaries aged 65 through 69 is determined to be $780 for 1990. The corresponding retirement earnings test annual exempt amount for these beneficiaries is $9,360.

(c) Beneficiaries Under Age 65

Section 203 of the Act provides that beneficiaries under age 65 have a lower retirement earnings test monthly exempt amount than those beneficiaries aged 65 through 69. The exempt amount for beneficiaries under age 65 is determined by a formula provided in section 203(f)(8)(B) of the Act. Under the formula, the monthly exempt amount for beneficiaries under age 65 is $540 for 1989. The formula provides that the exempt amount for 1990 shall be the 1989 exempt amount for beneficiaries under age 65 multiplied by the ratio of (1) the average amount, per employee, of the total wages for calendar year 1988 to (2) the average amount of those wages for calendar year 1987. The section further provides that if the amount so determined is not a multiple of $10, it shall be rounded to the nearest multiple of $10.

Average Wages

Average wages for this purpose are determined in the same way as for the contribution and benefit base. Therefore, the ratio of the average

VOL 54 ISS 209 OCT 31 1989 UMI

wages for 1988, $19,334.04, compared to that of 1987, $18,426.51, is 1.0492513.

Exempt Amount for Beneficiaries Under Age 65

Multiplying the 1989 retirement earnings test monthly exempt amount of $540 by the ratio 1.0492513 produces the amount of $566.60. This must then be rounded to $570. The retirment earnings test monthly exempt amount for beneficiaries under age 65 is thus determined to be $570 for 1990. The corresponding retirement earnings test annual exempt amount for these beneficiaries is $6,840.

Computing Benefits After 1978

General

The Social Security Amendments of 1977 provided a new method for determining an individual's primary insurance amount. This method uses a formula based on "wage indexing" and was fully explained with interim regulations and final regulations published in the **Federal Register** on December 29, 1978, at 43 FR 60877 and July 15, 1982, at 47 FR 30731 respectively. It generally applies when a worker after 1978 attains age 62, becomes disabled, or dies before age 62. The formula uses the worker's earnings after they have been adjusted, or "indexed," in proportion to the increases in average wages of all workers. Using this method, we determine the worker's "average indexed monthly earnings." We then compute the primary insurance amount, using the worker's average indexed monthly earnings. The computation formula is adjusted automatically each year to reflect changes in general wage levels.

Average Indexed Monthly Earnings

To assure that a worker's future benefits reflect the general rise in the standard of living that occurs during his or her working lifetime, we adjust or "index" the worker's past earnings to take into account the change in general wage levels that has occurred during the worker's years of employment. These adjusted earnings are then used to compute the worker's primary insurance amount.

For example, to compute the average indexed monthly earnings for a worker attaining age 62, becoming disabled, or dying before attaining age 62, in 1990, we divide the average of the total wages for 1988, $19,334.04, by the average of the total wages for each year prior to 1988 in which the worker had earnings. We then multiply the actual wages and self-employment income as defined in section 211(b) of the Act credited for each year by the corresponding ratio to obtain the worker's adjusted earnings for each year. After determining the number of years we must use to compute the primary insurance amount, we pick those years with highest indexed earnings, total those indexed earnings and divide by the total number of months in those years. This figure is rounded down to the next lower dollar amount, and becomes the average indexed monthly earnings figure to be used in computing the worker's primary insurance amount for 1990.

Computing the Primary Insurance Amount

The primary insurance amount is the sum of three separate percentages of portions of the average indexed monthly earnings. In 1979 (the first year the formula was in effect), these portions were the first $180, the amount between $180 and $1,085, and the amount over $1,085. The amounts for 1990 are obtained by multiplying the 1979 amounts by the ratio between the average of the total wages for 1988, $19,334.04, and for 1977, $9,779.44. These results were then rounded to the nearest dollar. For 1990, the ratio is 1.9770089. Multiplying the 1979 amounts of $180 and $1,085 by 1.9770089 produces the amounts of $355.86 and $2,145.05. These must then be rounded to $356 and $2,145. Accordingly, the portions of the average indexed monthly earnings to be used in 1990 are determined to be the first $356, the amount between $356 and $2,145, and the amount over $2,145.

Consequently, for individuals who first become eligible for old-age insurance benefits or disability insurance benefits in 1990, or who die in 1990 before becoming eligible for benefits, we will compute their primary insurance amount by adding the following:

(a) 90 percent of the first $356 of their average indexed monthly earnings, plus

(b) 32 percent of the average indexed monthly earnings over $356 and through $2,145, plus

(c) 15 percent of the average indexed monthly earnings over $2,145.

This amount is then rounded to the next multiple of $.10 if it is not already a multiple of $.10. This formula and the adjustments we have described are contained in section 215(a) of the Act (42 U.S.C. 415(a)).

Maximum Benefits Payable to a Family

General

The 1977 Amendments continued the long established policy of limiting the total monthly benefits which a worker's family may receive based on his or her primary insurance amount. Those amendments also continued the then existing relationship between maximum family benefits and primary insurance amounts but did change the method of computing the maximum amount of benefits which may be paid to a worker's family. The Social Security Disability Amendments of 1980 (Pub. L. 96–265) established a new formula for computing the maximum benefits payable to the family of a disabled worker. This new formula is applied to the family benefits of workers who first become entitled to disability insurance benefits after June 30, 1980, and who first become eligible for these benefits after 1978. The new formula was explained in a final rule published in the **FEDERAL REGISTER** on May 8, 1981, at 46 FR 25601. For disabled workers initially entitled to disability benefits before July 1980, or whose disability began before 1979, the family maximum payable is computed the same as the old-age and survivor family maximum.

Computing the Old-Age and Survivor Family Maximum

The formula used to compute the family maximum is similar to that used to compute the primary insurance amount. It involves computing the sum of four separate percentages of portions of the worker's primary insurance amount. In 1979, these portions were the first $230, the amount between $230 and $332, the amount between $332 and $433, and the amount over $433. The amounts for 1990 are obtained by multiplying the 1979 amounts by the ration between the average of the total wages for 1988, $19,334.04, and the average for 1977 $9,779.44. This amount is then rounded to the nearest dollar. For 1990, the ratio is 1.9770089. Multiplying the amounts of $230, $332, and $433 by 1.9770089 produces the amounts of $454.71, $656.37, and $856.04. These amounts are then rounded to $455, $656, and $856. Accordingly, the portions of the primary insurance amounts to be used in 1990 are determined to be the first $455, the amount between $455 and $656, the amount between $656 and $856, and the amount over $856.

Consequently, for the family of a worker who becomes age 62 or dies in 1990, the total amount of benefits payable to them will be computed so that it does not exceed:

(a) 150 percent of the first $455 of the worker's primary insurance amount, plus

(b) 272 percent of the worker's primary insurance amount over $455 through $656, plus

(c) 134 percent of the worker's primary insurance amount over $656 through $856, plus

(d) 175 percent of the worker's primary insurance amount over $856.

This amount is then rounded to the next lower multiple of $.10 if it is not already a multiple of $.10. This formula and the adjustments we have described are contained in section 203(a) of the Act (42 U.S.C. 403(a)).

"Old-Law" Contribution and Benefit Base

General

The 1990 "old-law" contribution and benefit base is $37,500. This is the base that would have been effective under the Act without the enactment of the 1977 amendments. The base is computed under section 230(b) of the Act as it read prior to the 1977 amendments.

The "old-law" contribution and benefit base is used by:

(1) the Railroad Retirement program to determine certain tax liabilities and tier II benefits payable under that program to supplement the tier I payments which correspond to basic Social Security benefits,

(2) the Pension Benefit Guaranty Corporation to determine the maximum amount of pension guaranteed under the Employee Retirement Income Security Act (as stated in section 230(d) of the Act), and

(3) Social Security to determine a "year of coverage" in computing the "special minimum" benefit and in computing benefits for persons who are also eligible to receive pensions based on employment not covered under section 210 of the Act.

Computation

The base is computed using the automatic adjustment formula in section 230(b) of the Act as it read prior to the enactment of the 1977 amendments. Under the formula, the "old-law" contribution and benefit base shall be the "old-law" 1989 base multiplied by the ratio of (1) the average amount, per employee, of total wages for the calendar year of 1988 to (2) the average amount of those wages for the calendar year of 1987. If the amount so determined is not a multiple of $300, it shall be rounded to the nearest multiple of $300.

Average Wages

The average wage for calendar year 1987 was previously determined to be $18,426.51. The average wage for calendar year 1988 has been determined to be $19,334.04, as stated herein.

Amount

The ratio of the average wage for 1988, $19,334.04, compared to that for 1987, $18,426.51, is 1.0492513. Multiplying the 1989 "old-law" contribution and benefit base amount of $35,700 by the ratio of 1.0492513 produces the amount of $37,458.27 which must then be rounded to $37,500. Accordingly, the "old-law" contribution and benefit base is determined to be $37,500 for 1990.

OASDI Fund Ratio

General

Section 215(i) of the Act was amended by section 112 of Public Law 98–21, the Social Security Amendments of 1983, to include a "stabilizer" provision that can limit the automatic OASDI benefit increase under certain circumstances. If the combined assets of the OASI and DI Trust Funds, as a percentage of annual expenditures, are below a specified level, the automatic benefit increase is equal to the lesser of (1) the increase in average wages or (2) the increase in prices. The threshold level specified for the OASDI fund ratio is 20.0 percent for benefit increases for December of 1989 and later. The amendments also provide for subsequent "catch-up" benefit increases for beneficiaries whose previous benefit increases were affected by this provision. "Catch-up" benefit increases occur only when trust fund assets exceed 32.0 percent of annual expenditures.

Computation

Section 215(i) specifies the computation and application of the OASDI fund ratio. The OASDI fund ratio for 1989 is the ratio of (1) the combined assets of the OASI and DI Trust Funds at the beginning of 1989, including advance tax transfers for January 1989, to (2) the estimated expenditures of the OASI and DI Trust Funds during 1989, excluding transfer payments between the OASI and DI Trust Funds, and reducing any transfers to the Railroad Retirement Account by any transfers from that account into either trust fund.

Ratio

The combined assets of the OASI and DI Trust Funds at the beginning of 1989 (including advance tax transfers for January 1989) equaled $134,428 million, and the expenditures are estimated to be $235,674 million. Thus, the OASDI fund ratio for 1989 is 57.0 percent, which exceeds the applicable threshold of 20.0 percent. As a result, the "stabilizer" provision does not affect the benefit increase for December 1989.

(Catalog of Federal Domestic Assistance Programs Nos. 13.802–13.805, and 13.807 Social Security Programs.)

Dated: October 26, 1989.

Louis W. Sullivan,

Secretary of Health and Human Services.

SPECIAL MINIMUM PRIMARY INSURANCE AMOUNTS AND MAXIMUM FAMILY BENEFITS

Special minimum primary insurance amount payable for Dec. 1988	Number of years required at minimum earnings level	Special minimum primary insurance amount payable for Dec. 1989	Special minimum family benefit payable for Dec. 1989

National Institutes of Health

Meeting of the Program Advisory Committee on the Human Genome

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Program Advisory Committee on the Human Genome on December 4, and a joint NIH and DOE subcommittee meeting on December 5, 1989, (as specified in the Memorandum of Understanding) at the National Institutes of Health, Bethesda, Maryland. The meeting will take place from 8:30 a.m. to 5:30 p.m. on December 4, and the joint subcommittee meeting will take place from 9:00 a.m. to 1:00 p.m. on December 5 in the Shannon Building, Wilson Hall, 9000 Rockville Pike, Bethesda, Maryland. The meeting will be open to the public.

This will be the third meeting of the Program Advisory Committee on the Human Genome. The purpose of the meeting is to discuss the planning, organization, and progress of the human genome project at the National Institutes of Health.

Dr. Elke Jordan, Deputy Director of the National Center for Human Genome Research, National Institutes of Health, Shannon Building, Room 201, Bethesda, Maryland 20892, (301) 496–0844, will furnish the meeting agenda, rosters of Committee members and consultants, and substantive program information upon request.

Dated: October 24, 1989.

Betty J. Beveridge,

Committee Management Office, NIH.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N–89–2076]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: October 21, 1989.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Letter of Transmittal, 24 CFR part 390

Office: Government National Mortgage Association (GNMA)

Description of the Need for the Information and its Proposed Use: GNMA provides these forms for use by issuers of mortgage-backed securities to transmit the required materials to request approval of an application, to provide GNMA with a Resolution of the Board of Directors and Certificate of Authorized Signatures, and to furnish the servicing agreement.

[ID-942-00-4730-12]

Idaho: Filing of Plats of Survey; Idaho

The plats of survey of the following described lands were officially filed in the Idaho State Office, Bureau of Land Management, Boise, Idaho, effective 10:00 A.M., date October 23, 1989.

The plat representing the dependent resurvey of the west boundary, portions of the south and north boundaries, and subdivisional lines, and the subdivision of certain sections in T. 14, S., R. 46 E., Boise Meridian, Idaho, Group No. 732, was accepted September 27, 1989.

This survey was executed to meet certain administrative needs of this Bureau.

The plat representing the dependent resurvey of portions of the east and north boundaries and a portion of the subdivisional lines, the subdivision of section 1, and the survey of Lot 1, T. 3 N., R. 41 E., Boise Meridian, Idaho, Group No. 765, was accepted October 11, 1989.

The plat representing the dependent resurvey of portions of the north boundary and subdivisional lines, H.E.S. 260 and a portion of H.E.S. No. 555, the subdivision of section 6, and the survey of certain lots in section 6 and 7, T. 3 N., R. 42 E., Boise Meridian, Idaho, Group No. 766, was accepted October 11, 1989.

These surveys were executed to meet certain administrative needs of the U.S. Forest Service.

All inquires about these lands should be sent to the Idaho State Office, Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho, 83706.

Duane E. Olsen,

Chief Cadastral Surveyor for Idaho.

BILLING CODE 4310-GG-M

[OR-942-00-4730-12; GPO-027]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Oregon State Office, Portland, Oregon, thirty (30) calendar days from the date of this publication.

Willamette Meridian

Oregon

T. 3 N., R. 2 W., accepted 9/15/89
T. 3 N., R. 3 W., accepted 9/29/89
T. 2 N., R. 3 W., accepted 10/6/89
T. 29 S., R. 3 W., accepted 9/29/89
T. 30 S., R. 7 W., accepted 9/15/89
T. 13 S., R. 8 W., accepted 9/15/89
T. 5 S., R. 3 E., accepted 10/6/89
T. 5 S., R. 4 E., accepted 10/6/89
T. 28 S., R. 14 E., accepted 10/6/89

Washington

T. 39 N., R. 25 E., accepted 9/29/89
T. 32 N., R. 35 E., accepted 8/25/89

If protests against a survey, as shown on any of the above plat(s), are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

The plat(s) will be placed in the open files of the Oregon State Office, Bureau of Land Management, 825 NE Multnomah, Portland, Oregon 97208, and will be available to the public as a matter of information only. Copies of the plat(s) may be obtained from the above office upon required payment. A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, Portland, Oregon, a notice that they wish to protest prior to the proposed official filing date given above. A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 825 NE Multnomah Street, P.O. Box 2965, Portland, Oregon 97208.

Dated: October 20, 1989.

BILLING CODE 7020-02-M

[Inv. Nos. 731–TA–426–428]

Certain Telephone Systems and Subassemblies Thereof From Japan, Korea, and Taiwan; Commission Determination to Conduct a Portion of Its Hearing In Camera

AGENCY: U.S. International Trade Commission.

ACTION: Closure of a portion of Commission hearing to the public.

SUMMARY: Upon request of certain respondents and without objection from the petitioner, the U.S. International Trade Commission has unanimously determined that the unique circumstances of this investigation warrant that a portion of its hearing be conducted *in camera*. *See* 19 CFR 201.13, 201.35(b)(3). The *in camera* portion of the hearing will consist of two phases. In phase one, the presentations will be limited to arguments relevant to the proper analysis of AT&T's financial data and the relevance of its McKinsey study. In phase two, the parties will be allowed to comment on all other business proprietary information.

In determining to undertake this unusual procedural step, the Commission strongly reaffirms the desirability of conducting its business in public. However, given the dominant position of the petitioner in the domestic industry and its involvement in a wide array of activities in addition to, but also related to, the production of small business telephone equipment, including refurbishing, renting, leasing, selling and distributing such equipment, an *in camera* session devoted to the proper understanding of its financial condition is appropriate. Moreover, none of the parties to this investigation have raised any objection to this procedure. *See* 19 CFR 201.35(b)(4). In the interests of procedural equity, the Commission has determined not to limit the *in camera* session solely to the petitioner's business proprietary information.

After the completion of the petitioner's public presentation and questioning of the petitioner by the Commission, the hearing will be recessed. The *in camera* session will take place when the Commission reconvenes following the recess. Only those individuals who have been granted access to business proprietary information under a Commission Administrative Protective Order (APO) and are included on the Commission's APO service list will be allowed to attend the *in camera* session. *See* 19 CFR 201.35(b)(1), (2). During phase one of the *in camera* session, the relevant AT&T and McKinsey personnel will be allowed to attend. They will, however, be excused at the end of phase one. All those planning to attend that session should present proper identification in order to be admitted to the hearing room.

During phase one of the *in camera* hearing, respondents will first present their arguments relating to the financial condition of AT&T and the relevance of its McKinsey study. The Commission will then question the respondents as appropriate. Petitioner may then respond. Petitioner also will be questioned by the Commission. At the conclusion of phase one, all AT&T and McKinsey personnel will be excused.

During phase two of the *in camera session*, petitioner will be allowed to address all other BPI matters. Respondents may then reply. Both groups will be questioned by the Commission as appropriate.

Respondents will be allowed up to 20 minutes to make their collective presentation, allocated as they choose between phase one and phase two, with that amount deducted from their allotted time. Petitioner will be allowed up to 15 minutes to make its collective presentation, allocated as it chooses between phase one and phase two, with that amount of time deducted from its allotted time.

At the conclusion of the *in camera* portion of the hearing, the Commission will take a brief recess and will reconvene in public session to complete their public questioning of the petitioner, if necessary. The Commission will then consider the public presentation of respondents.

FOR FURTHER INFORMATION CONTACT: Stephen A. McLaughlin, Esq., Office of the General Counsel, U.S. International Trade Commission, tel. 202–252–1095.

AUTHORITY: The General Counsel has certified, pursuant to Commission Rule 201.39, 19 CFR 201.39, that, in her opinion, a portion of the Commission's hearing in *Telephone Systems and Subassemblies Thereof from Japan, Korea, and Taiwan*, Inv. Nos. 731–TA–426–428 (Final) may be closed to the public to prevent the disclosure of confidential financial information.

By order of the Commission.

Issued: October 26, 1989.

Kenneth R. Mason,

Secretary.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31544]

Jaxport Terminal Railway Co.; Lease and Operation Exemption—Terminal Railroad Facilities in Jacksonville, Duvall County, FL

Jaxport Terminal Railway Company (JTR), a noncarrier, has filed a notice of exemption to lease and operate 8.72 miles of rail line owned by the Municipal Docks Railroad (MDR), a unit of the Jacksonville Port Authority. The line is located between Norfolk Southern milepost 5–C and CSX Transportation, Inc., milepost 632.08, and extends eastward from the F&J junction to the Talleyrand Docks and Terminal. The transaction was to be consummated on the effective date of this notice, September 14, 1989.[1]

Any comments must be filed with the Commission and served on Frank J. Pergolizzi, Slover & Loftus, 1224 Seventeenth Street, NW., Washington, DC 20036.

Applicant must retain its interest in and maintain the historic integrity of all sites and structures on the line that are 50 years old or older until completion of the section 106 process of the National Historic Preservation Act, 16 U.S.C. 470 is achieved. *See Class Exemption—Acq. of Oper. of R. Lines Under 49 U.S.C. 10901*, 4 I.C.C.2d 305 (1988).[2]

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d), may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: October 25, 1989.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

DEPARTMENT OF LABOR

Review Panel for the Job Training Partnership Act Presidential Awards; Meeting

The Review Panel for the Job Training Partnership Act (JTPA) Presidential Awards was renewed by Notice dated August 8, 1988, for a two-year period, and published August 12, 1988, 53 FR 30482, to advise the Secretary of Labor on the selection of the Presidential Awards recipients.

Notice is hereby given of the meetings of the Review Panel for the JTPA Presidential Awards and its working groups during a two-week period to begin November 20, 1989.

TIME AND PLACE: 10:00 a.m., Room S5515, Seminar Room 2, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC 20210.

These meetings will be closed under the authority of section 10(d) of the Federal Advisory Committee Act. The Panel will review and discuss personal information regarding the nominees, disclosure of which would constitute a clearly unwarranted invasion of privacy.

FOR FURTHER INFORMATION, CONTACT: Robert N. Colombo, Director, Office of Employment and Training Programs, U.S. Department of Labor, Employment and Training Administration, 200 Constitution Avenue, NW., Room N–4703, Washington, DC 20210. Telephone: 202–535–0577.

Signed at Washington, DC, this 25th day of October, 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

[TA–W–21,739]

Myers Drilling Co.; Midland, Texas; Termination of Investigation; Correction

This notice corrects the language in the **Federal Register** of March 3, 1989 at page 9096 (54 FR 9096), FR Document 89–5029, denoting the TA–W number of the active certification covering the instant worker group.

Under Myers Drilling Co., Midland TX; Termination of Investigation, the last line on page 9096, the active certification number covering the petitioning group of workers should be "TA–W–21,592" instead of TA–W–21,739.

Signed at Washington, DC, this 20th day of October 1989.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued druing the period of October 1989.

[1] JTR states that even though the lease became effective on July 24, 1989, common carrier operations would not begin until the notice became effective. It notes that it has performed all terminal railroad operations on the property during the interim period, solely as contract agent of MDR, in MDR's name and pursuant to MDR's filed tariffs.

[2] JTR certifies that it has identified to the appropriate State Historic Preservation Officer all sites and structures 50 years old and older that will be transferred as a result of this transaction.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of

TA–W–23,315; L & S Shirt Co., Inc., New York, NY

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–23,275; SSMC, Inc., Fairfield, NJ

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

A certification was issued covering all workers separated on or after April 1, 1989.

TA–W–23,231; Joy Footwear Co., Hialeah, FL

A certification was issued covering all workers separated on or after July 28, 1988.

TA–W–23,242; Samsung International, Inc., Ledgewood, NJ

TA–W–23,268; Oil Well Perforators, Inc., Englewood, CO

A certification was issued covering all workers separated on or after August 3, 1988.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absoulte decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-23,282; V'Lora Swimwear, Inc., Bloomfield, NJ

TA-W-23,270; Parker Seal Co., Berea, KY

TA-W-23,277; Snyder Tank Corp., Galeton, PA

TA-W-23,229; Honeywell, Inc., Solid State Electronics Div, Colorado Springs, CO

TA-W-23,272; Pharoah Corp., East Newark, NJ

TA-W-23,330; Syltron, Inc., PMG, Luquillo PR

TA-W-23,252; Dotti Original, Inc., Elizabeth, NJ

TA-W-23,286; Circuline Fabrics, Inc., Brooklyn, NY

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-23,284; Michel T. Halbouty Energy Co., Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-23,289; GE Lighting, Troy, MI

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-23,267; North Central Oil Corp., Houston, TX

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA-W-23,315; L & S Shirt Co., Inc., New York, NY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,282; Grant Oil Country Tubular Corp., Houston, TX

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,329; Sooner Completion Co., Enid, OK

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-21,635; Kerr Finishing, Inc., Travelers Rest, SC

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,336; B & B Tool & Supply Co., Inc., Casper, WY

U.S. imports of oilfield machinery are negligible.

TA-W-23,339; BOP Repair & Machine, Inc., Casper, WY

U.S. imports of oilfield machinery are negligible.

TA-W-23,318; Miller Taxidermy, Aransas Pass, TX

The investigation revealed that criterion (1) has not been met. Employment did not decline during the relevant period as required for certification.

TA-W-23,309; Dailey Petroleum Services, Inc., Lafayette, LA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,394; National Semiconductor Corp., Danbury, CT

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,279; Sovonics Solar Systems, Troy, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,320; Moriarty Welding & Fabrication, Buffalo, NY

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-23,290; GNB, Inc., Dunmore, PA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,276; Service America Corp., Springdale, AR

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,275; SSMC, Inc., Fairfield, NJ

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,256; First Financial Management Corp., Thrift Services Div., Englewood, CO

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,260; J.C. Penny Co., Inc., Merchandise Testing Center, New York, NY

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,230; Harnischfeger Corp., Cedar Rapids, IA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,298; PPG Industries, Inc., Glass Research Center, Pittsburgh, PA

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,236; MCENA, Inc., Midland, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-23,263; Meilink Steel Safe Co., Toledo, OH

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-23,257; Guy Friel & Sons, Inc., Smyrna Mills, ME

Increased imports did not contribute importantly to workers separations at the firm.

Affirmative Determination

TA-W-23,142; Garan, Inc., Adamsville, TN

A certification was issued covering all workers separated on or after June 27, 1988.

TA-W-23,262; Koelling Metals, St. Louis, MO

A certification was issued covering all workers separated on or after August 1, 1988.

TA-W-23,233; Leviton Manufacturing Co., Inc., West Kingston, RI

A certification was issued covering all workers separated on or after July 19, 1988.

TA-W-23,244; Teledyne Wisconsin Motors, West Allis, WI

A certification was issued covering all workers separated on or after April 1, 1989.

TA-W-23,231; Joy Footwear Co., Hialeah, FL

A certification was issued covering all workers separated on or after July 19, 1988 and before April 30, 1989.

TA-W-23,251; Diamond Well Service, Inc., Casper, WY

A certification was issued covering all workers separated on or after July 27, 1988.

TA-W-23,249; Beta Manufacturing Co., Warren, MI

A certification was issued covering all workers separated on or after August 3, 1988.

TA-W-23,273; Rod Ric Corp., Odessa, TX

A certification was issued covering all workers separated on or after January 1, 1989.

TA-W-23,223; Edmar Creations, Inc./ The Edmar Co., Clifton, NJ

A certification was issued covering all workers separated on or after July 13, 1988.

TA-W-23,248; Barlyn Manufacturing Corp., Newark, NJ

A certification was issued covering all workers separated on or after June 7, 1988.

TA-W-22,860; Kaypro Corp., Solana Beach, CA

A certification was issued covering all workers separated on or after April 14, 1988.

TA-W-23,293; Harris Graphics Corp., Pawcatuck, CT

A certification was issued covering all workers separated on or after August 7, 1988.

TA-W-23,297; Ottenheimer & Co., Inc., Bozarth Facility, Vichy, MO

A certification was issued covering all workers separated on or after August 8, 1988 and before May 30, 1989.

TA-W-23,301; Sherwood Medical Co., Tucson, AZ

A certification was issued covering all workers separated on or after June 30, 1988.

TA-W-23,327; RPI International, Inc., Boulder, CO

A certification was issued covering all workers separated on or after January 1, 1989.

TA-W-23,302; Teledyne Exploration Co., Metairie, LA

A certification was issued covering all workers separated on or after July 28, 1988.

TA-W-23,303; Teledyne Exploration Co., Houston TX

A certification was issued covering all workers separated on or after July 28, 1988.

TA-W-23,242; Samsung International, Inc., Ledgewood, NJ

A certification was issued covering all workers separated on or after July 20, 1988.

TA-W-23,278; Somerset Knitting Mills, Philadelphia, PA

A certification was issued covering all workers separated on or after August 7, 1988.

TA-W-23,274; RWIMCO, Inc., Cisco, TX

A certification was issued covering all workers separated on or after August 7, 1988.

TA-W-23,322; Niagara Paper Co., Inc., Buffalo, NY

A certification was issued covering all workers separated on or after August 21, 1988.

TA-W-23,266; Nichols Casing Crews, Inc., Oklahoma City, OK

A certification was issued covering all workers separated on or after August 2, 1988

TA-W-23,280; Texaco USA, West Region, Producing Dept., Casper, WY

A certification was issued covering all workers separated on or after August 2, 1988.

TA-W-23,280A; Texaco USA, West Region, Producing Dept., Operating at Other Locations in WY

A certification was issued covering all workers separated on or after August 2, 1988.

TA-W-23,280; Texaco USA. West Region, Producing Dept., Operating at Various Locations in The Following States:

South Dakota

Dislocated Worker Unit, South Dakota Department of Labor, 700 Governor's Drive, Pierre, South Dakota 57501,

Dislocation and Worker Adjustment Assistance Act (EDWAA) provides that the Department of Labor (DOL or Department) shall fund programs for States to assist dislocated workers. Section 311(b)(2) of JTPA provides that States will designate or create an identifiable State Dislocated Worker Unit (DWU) or office with the capability to respond rapidly, onsite, to permanent plant closures and substantial layoffs throughout the State. The DWU is a key feature of the States' implementation of the new programs under EDWAA.

On March 6, 1989, the Assistant Secretary of Labor sent a letter to each of the Governors to verify a listing of their State DWU designated entity, and on April 25, 1989 the original list was published. Revisions to the listing have been received, so DOL is publishing this notice.

Signed at Washington, DC this 24th day of October, 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

BILLING CODE 4510–30–M

Job Training Partnership Act: Announcement of Proposed Noncompetitive Grant Awards

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of intent to award a noncompetitive grant.

SUMMARY: The Employment and Training Administration (ETA) announces its intent to award a grant on a basis noncompetitive to National Council on the Aging to provide specialized services under the authority of the Job Training Partnership Act (JTPA).

DATES: It is anticipated that this grant agreement will be executed by November 22, 1989 and will be funded for one year. Submit comments by 4:45 p.m. (Eastern Time), on November 15, 1989.

ADDRESS: Submit comments regarding the proposed award to: U.S. Department of Labor, Employment and Training Administration, Room C–4305, 200 Constitution Avenue NW., Washington, DC 20210, Attention: Betty Koonce; Reference FR–DAA–104.

SUPPLEMENTARY INFORMATION: The Employment and Training Administration (ETA) announces its intent to award a noncompetitive grant to the National Council on the Aging. The proposed grantee will help the JTPA system to promote the increased utilization of Older Workers in private industry through the provision of technical information services and materials to the business sector regarding the productivity and profitability of employing and retaining older workers. Grantee will conduct seminars to build the capacity of the states and SDAs in conducting more effective programs for older workers. Funds for this activity are authorized by the Job Training Partnership Act (JTPA), as amended, title IV—Federally Administered programs. The proposed funding is $250,000 for a period of twelve (12) months.

Signed at Washington, DC, on October 17, 1989.

Robert D. Parker,

ETA Grant Officer.

[FR Doc. 89–25593 Filed 10–30–89; 8:45am]

BILLING CODE 4510–30–M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 89–93; Exemption Application No. D–7364 et al.]

Grant of Individual Exemptions; National Rural Utilities Cooperative Finance Corp. (CFC), et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

National Rural Utilities Cooperative, Finance Corporation (CFC)
Located in Washington, DC.

[Prohibited Transaction Exemption 89–93; Exemption Application No. D–7364]

Exemption

The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to certain transactions, described in the summary of facts and representations of the notice of proposed exemption (referred to below), between CFC and certain employee benefit plans (the Plans). CFC may be deemed to be a party in interest with respect to the Plans as a result of providing services to a trust in situations where the assets of the trust are considered to be "plan assets" as a result of the Plans acquiring significant equity interests in the trust in the form of pass-through certificates (the Certificates). The exemption will be effective provided that:

A. The decision by a Plan to engage in the transactions is made by a fiduciary of the Plan which is independent of CFC as well as the trustee of the trust; and

B. The terms of each such transaction are no less favorable to the Plan than the terms available in a similar transaction involving unrelated parties.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on June 14, 1989 at 54 FR 25356.

Effective Date: The effective date of this exemption is July 22, 1987.

Written Comments: The applicant submitted a few written comments with respect to the notice of proposed exemption (the Notice).

Paragraph 4 of the Notice states that in June 1986, Congress passed legislation (the Legislation) permitting rural electric utilities to take advantage of the reductions in interest rates by prepaying their high interest loans from the Federal Financing Bank of the United States Treasury (the FFB Loans), without any prepayment penalty or fees, through the issuance of debt to private lenders (i.e. private notes) which would be guaranteed by the Rural Electrification Agency (REA). Paragraph 4 states further that REA has adopted regulations (the Regulations) implementing the Legislation, and has accepted prepayment applications submitted by a number of cooperative electric utilities (the Cooperatives).

In addition, paragraph 5 of the Notice stetes that CFC has formulated a program (the Program) to permit the Cooperatives to refinance their FFB Loans in accordance with the Regulations at competitive rates, and that the Program has been approved by REA as complying with the Regulations.

The third paragraph of Paragraph 5 of the Notice states that the Regulations require that the interest rates on the private notes issued by the Cooperatives must be at least 50 basis points lower than the weighted average interests rate borne by the FFB Loans being repaid.

The applicant states that the Regulations have been revised, effective as of February 1988, to require that the interest rates on the private notes be equal to or lower than the weighted average interest rate borne by the FFB Loans being repaid, taking into account savings achieved during earlier periods following the refinancing of such FFB Loans. CFC states that it continues to assume all risks associated with interest rate fluctuations.

Paragraph 13 of the Notice states that a number of Cooperatives have submitted applications to REA to refinance their FFB Loans under the Program. The applicant states that all of the Cooperatives mentioned in paragraph 13 have refinanced their FFB loans in accordance with the Program, except for Cajun Electric Power Cooperative, Inc. The applicant states further that Western Illinois Power Cooperative, Inc., which was not mentioned in paragraph 13, has also refinanced its FFB Loan under the Program, although the Certificates resulting from such refinancing have not yet been resold by CFC.

After consideration of the entire record, the Department has determined to grant the exemption.

Ophthalmic Associates, P.A. Employees' Pension Plan (the Pension Plan) and Ophthalmic Associates, P.A. Employees' Money Purchase Pension Plan (the Money Purchase Pension Plan; collectively, the Plans)
Located in Lansdale, PA

[Prohibited Transaction Exemption 89–94; Exemption Application Nos. D–7684 and D–7685, respectively]

Exemption

The restrictions of section 406(b)(2) of the Act shall not apply to the transfer by the Pension Plan to the Money Purchase Pension Plan of a 50 percent tenant-in-common interest in certain improved real property and cash, provided the terms of the transaction are at least as favorable to the Money Purchase Pension Plan as those obtainable in an arm's-length transaction with an unrelated party. In addition, the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the assumption, by the Money Purchase Pension Plan, of certain pre-existing loan, lease and sublease obligations of the Pension Plan with persons who are parties in interest with respect to both Plans, provided the terms of the transaction are at least as favorable to the Money Purchase Pension Plan as those obtainable in an arm's length transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on August 23, 1989 at 54 FR 35094.

Jon A. Harding, D.M.D., P.S., Employees' Amended and Restated Money Purchase Pension Plan and Trust (the Plan)
Located in Spokane, Washington

Prohibited Transaction Exemption 89–95; Exemption Application No. D–8030]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale for cash by the Plan of certain real property (the Real Property) to Helen M. Harding, a party in interest with respect to the Plan, provided that the price paid be no less than the fair market value of the Real Property on the date of sale, as established by an independent and qualified appraiser of real estate.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on August 8, 1989 at 54 FR 32542.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 25th day of October, 1989.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 89-25565 Filed 10-30-89; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D-7902, et al.]

Proposed Exemptions; Ohio Bank & Savings Company Employees' Profit Sharing Plan and Trust, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5671, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Ohio Bank and Savings Company Employees' Profit Sharing Plan and Trust (the Plan) Located in Findlay, OH

[Exemption Application No. D-7902]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the proposed purchase by the Plan of certain real property (the Property) located in Findlay, Ohio which is leased to the Ohio Bank and Savings Company (the Employer), the sponsor of the Plan; (2) the proposed lease of the Property by the Plan to the Employer; and (3) the proposed potential purchase of the Property by the Employer from the Plan; provided that all terms of such transactions are no less favorable to the Plan than those which the Plan could obtain in arm's-length transactions with an unrelated party.

Summary of Facts and Representations

1. The Plan is a defined contribution plan with 143 participants and total assets of $959,718.00 as of December 31, 1988. The Employer is a state-chartered bank organized under the laws of the state of Ohio with its corporate headquarters in Findlay, Ohio. The Employer serves as the trustee and administrator of the Plan through committees appointed from among its employees, officers and directors.

2. The Employer maintains its principal place of business in premises located in downtown Findlay, Ohio at 236 South Main Street. Situated nearby is the Property, which is utilized as a parking lot by the Employer. The Employer leases the Property (the Original Lease) from W. Dean Fouts and Joyce M. Fouts (Fouts), whom the Employer represents to be unrelated to the Plan and the Employer. The Original Lease, a ten-year triple-net lease effective November 1, 1988, was executed after the Employer loaned the Fouts $140,000 (the Loan) to adapt the Property for use as the Employer's parking lot. Since the Original Lease was executed, the Fouts have expressed a desire to sell the Property and the Employer has determined that ownership of the Property and income therefrom under a lease to the Employer would constitute a desirable investment for the Plan. Accordingly, the Employer is proposing that the Plan purchase the Property for cash from the Fouts and immediately commence leasing the Property to the Employer under an agreement which provides for the Employer's potential future purchase of the Property from the Plan. The Employer is requesting an exemption to permit such transactions under the terms and conditions described herein.

3. The interests of the Plan with respect to the proposed transactions will be represented by an independent fiduciary, Ronald C. Pfeiffer (the Fiduciary), an institutional investment services professional with the firm of McDonald & Company Securities, Inc. in Findlay, Ohio, who represents that he has substantial knowledge and experience in fiduciary responsibilities under the Act and that he is independent of the Employer. The Fiduciary will represent the Plan in the Plan's proposed purchase of the Property from the Fouts, in the execution of the proposed lease with the Employer (the New Lease) and in the oversight and enforcement of the Employer's obligations under the New Lease for its duration. The Fiduciary will also represent the Plan in any potential sale of the Property to the Employer pursuant to one of three provisions in the New Lease as described herein.

4. The Property consists of eight contiguous lots of commercially-zoned real property located at 100 North Main Street in the central business district in the City of Findlay, County of Hancock, Ohio. All buildings on the Property, having been condemned, were removed by the Fouts in preparation of the Property's 19,200 square feet of surface area for asphalt paving suitable for automobile parking. This adaptation of the Property has resulted in the creation of fifty-six parking spaces and the Property remains accessible to full utilities and municipal police and fire protection. As of August 17, 1988, the Property had a fair market value of $149,000, according to Larry E. McCormick and J.F. Lamberjack, professional real property appraisers with the firm of Midwest Appraisal Service (Midwest) in Findlay, Ohio.

5. It is proposed that the Plan will pay the Fouts cash for the Property in the amount of $142,000, a price negotiated with and accepted by the Fouts. The Fouts will deliver to the Plan fee simple title in the Property free of all liens and mortgages. The Loan will be repaid in full before the transfer of the Property.

6. The New Lease will be a triple-net lease for an initial term of ten years commencing on the date of the Plan's purchase of the Property. The Plan's interests as landlord under the New Lease will be represented exclusively by the Fiduciary. With the Fiduciary's approval and ninety days advance written notice, the New Lease is renewable at the expiration of the initial term for one additional term of five years under the same terms applicable to the initial term. The New Lease authorizes the Fiduciary to terminate the New Lease without penalty of any sort to the Plan in the event, during the New Lease, the Fiduciary receives and accepts a bona fide offer for the purchase of the Property. Under the New Lease the Employer will pay annual rent in monthly installments at the rate of no less than the Property's fair market annual rental value. The New Lease provides that during its first three years the annual rent will be the greater of $14,784 or the Property's fair market annual rental value upon commencement of the New Lease as determined by an independent professional real estate appraiser selected by the Fiduciary. Thereafter, the Fiduciary shall cause the Property to be appraised every three years by an independent appraiser, at the expense of the Employer, and the annual rent will be increased in the amount, if any, by which the Property's fair market rental value has increased since the previous appraisal.

In addition to obligations for payment of all taxes and all costs of maintenance and repair on the Property, the Employer is required under the New Lease to provide full fire and extended coverage insurance of the Plan's interests in the Property and to provide general public liability insurance. The Employer is also required to obtain rent insurance in the amount of six months net rent. Under the New Lease the Employer will agree to indemnify and hold harmless the Plan against and from any and all claims of any nature arising from the Employer's use of the Property.

7. The New Lease will include a provision granting the Employer a right of first refusal (the Right) with respect to the Property. Accordingly, upon the Fiduciary's acceptance of a bona fide offer for the purchase of the Property or any part thereof during the New Lease, including any renewal, and after the Fiduciary has determined such acceptance to be in the best interests of the Plan's participants and beneficiaries, the Employer will be entitled to purchase the Property or part thereof from the Plan upon the same terms as the bona fide offer accepted by the Fiduciary. However, the Right authorizes only a cash purchase of the Property by the Employer, regardless of other non-cash terms of the bona fide offer, and the bona fide offer is limited to one which equals or exceeds the Property's fair market value at the time of the offer as determined by an independent professional real estate appraiser selected by the Fiduciary.

8. A purchase option (the Option) on the part of the Employer will also be among the New Lease's provisions. Pursuant to the Option, the Employer will have the right, subject to the approval of the Fiduciary, to purchase the Property from the Plan by providing written notice in compliance with the Option at least ninety days prior to the expiration of the initial or renewal term of the New Lease. The Fiduciary represents that it will approve of a sale of the Property by the Plan only after having determined that the continued holding of the Property would not be in the best interests of the participants and beneficiaries of the Plan. The Option provides that any purchase of the Property thereunder will be for cash in the amount of no less than the greater of $142,000 or the Property's fair market value as determined at the time of such purchase by an independent professional real estate appraiser selected by the Fiduciary. In any sale pursuant to the Option the Employer will pay all closing costs and other fees and expenses related to the transfer of the Property.

9. The New Lease also includes a provision (the Put) which empowers the Fiduciary to require the Employer to Purchase the Property from the Plan any time after the tenth year of the New Lease, following two consecutive years of unsuccessful efforts to sell the Property, if the Fiduciary so elects. Any purchase of the Property pursuant to the Put will be for cash in the amount of the greater of $142,000 or the fair market value of the Property at the time of the Put's exercise as determined by an independent professional real property appraiser selected by the Fiduciary. In any sale pursuant to the Put the Employer will pay closing costs and other expenses related to the transfer of the Property.

10. The Fiduciary represents that after a complete investigation of the proposed transactions, including an inspection of the Property, he has determined that the Plan's acquisition of the Property and its lease to the Employer under the New Lease would be in the best interests and protective of the participants and beneficiaries of the Plan. The Fiduciary has ascertained that the Plan's investment in the Property will leave the Plan appropriately liquid and diverse, as it will constitute the Plan's sole investment in real property and will represent less than twenty five percent of the Plan assets. In this regard, the Fiduciary notes that, because of the particular provisions of the New Lease, the Plan will not be compelled to retain the Property among its assets in the event, which he represents to be unlikely, that ownership of the Property ceases to be in the best interests of the participants and beneficiaries of the Plan. The Fiduciary finds little or no risks to the Plan from the proposed transactions due to the protective provisions of the New Lease.

The Fiduciary represents that he will continually monitor and oversee the performance by the Employer of the tenant obligations under the New Lease and will move without delay to remedy any breaches or defaults thereunder. The Fiduciary states that in the event the Right, the Put or the Option are exercised under the New Lease, he will cause the Property to be sold only at such time as he determines that continuing to hold the Property is not in the best interests of the Plan and will ensure that the Property is sold only for no less than its fair market value.

11. In summary, the applicant represents that the proposed transactions satisfy the criteria of section 408(a) of the Act for the following reasons: (1) The interests of the Plan with respect to the purchase of the Property, the execution and maintenance of the New Lease and the

potential sale of the Property to the Employer pursuant to the New Lease will be represented exclusively by the Fiduciary, who represents himself to be independent of the Employer; (2) The Plan will pay the Fouts cash for the Property in an amount not exceeding its fair market value and will obtain fee simple title free of all liens; (3) The Plan's ownership of the Property as proposed will present little or no risks to the Plan due to the protective and triple-net provisions of the New Lease which ensure that the Plan will receive rental payments of no less than the Property's fair rental market value; (4) The New Lease provides for its termination if the Fiduciary determines to sell the Property before the completion of the initial or renewal terms of the New Lease; (5) The Put enables the Plan to require the Employer to purchase the Property in the event the Fiduciary determines that it is not in the best interests of the Plan to retain the Property and is not able to sell the Property to an unrelated buyer; (6) Any sale of the Property to the Employer under the New Lease will occur only after the Fiduciary has determined that continued ownership of the Property would not be in the best interests of the Plan; and (7) The sale provisions of the New Lease ensure that the Plan will receive cash in the amount of no less than the Property's fair market value.

Capital Guardian Trust Company (Capital Guardian) Located in Los Angeles, CA

(Application No. D–7929)

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply to the cross-trading of securities by Capital Guardian for employee benefit plan accounts (Plans) for which Capital Guardian acts as a fiduciary.

Conditions and Definitions

1. This exemption is subject to the following conditions:

(a) A Plan's participation in the cross-trade program is subject to a written authorization executed in advance by a fiduciary with respect to each such Plan, the fiduciary of which is independent of Capital Guardian;

(b) The authorization referred to in paragraph (a) is terminable at will without penalty to such Plan, upon receipt by Capital Guardian of written notice of termination; and

(c) Before an authorization is made, the authorizing Plan fiduciary must be furnished with any reasonably available information necessary for the authorizing fiduciary to determine whether the authorization should be made, including (but not limited to) a copy of this exemption, an explanation of how the authorization may be terminated, a description of Capital Guardian's cross-trade practices, and any other reasonably available information regarding the matter that the authorizing fiduciary requests;

2. (a) No more than three (3) business days prior to the execution of any cross-trade transaction, Capital Guardian must inform an independent fiduciary of each Plan involved in the cross-trade transaction: (i) That Capital Guardian proposes to buy or sell specified securities in a cross-trade transaction if an appropriate opportunity is available; (ii) the current trading price for such securities; and (iii) the total number of shares to be acquired or sold by each such Plan;

(b) Prior to each cross-trade transaction, the transaction must be authorized either orally or in writing by the independent fiduciary of each Plan involved in the cross-trade transaction;

(c) If a cross-trade transaction is authorized orally by an independent fiduciary, Capital Guardian will provide written confirmation of such authorization in a manner reasonably calculated to be received by such independent fiduciary within one (1) business day from the date of such authorization;

(d) The authorization referred to in this paragraph (2) will be effective for a period of three (3) business days; and

(e) No more than ten (10) days after the completion of a cross-trade transaction, the independent fiduciary authorizing the cross-trade transaction must be provided a written confirmation of the transaction and the price at which the transaction was executed;

3. (a) The cross-trade transaction is effected at the closing price for the security on the date of the transaction, and such price is within 10 percent of the closing price of the security on the day before the date on which Capital Guardian receives authorization by the independent Plan fiduciary to engage in the cross-trade transaction;

(b) The securities involved in the cross-trade transaction are those for which there is a generally recognized market; and

(c) The cross-trade transaction is affected only where the trade involves less than 5 percent of the aggregate average daily trading volume of the securities which are the subject of the transaction for the week immediately preceding the authorization of the transaction;

4. (a) Capital Guardian furnishes the authorizing Plan fiduciary at least once every three months, and not later than 45 days following the period to which it relates, a report disclosing: (i) A list of all cross-trade transactions engaged in on behalf of the Plan; and (ii) with respect to each cross-trade transaction, the highest and lowest prices at which the securities involved in the transaction were traded on the date of such transaction; and

(b) The authorizing Plan fiduciary is furnished with a summary of the information required under this paragraph 4(a) at least once per year. The summary must be furnished within 45 days after the end of the period to which it relates, and must contain the following: (i) A description of the total amount of Plan assets involved in cross-trade transactions during the period; (ii) a description of Capital Guardian's cross-trade practices, if such practices have changed materially during the period covered by the summary; (iii) a statement that the Plan fiduciary's authorization of cross-trade transactions may be terminated upon receipt by Capital Guardian of the fiduciary's written notice to that effect; and (iv) a statement that the Plan fiduciary's authorization of the cross-trade transactions will continue in effect unless it is terminated;

5. The cross-trade transaction does not involve assets of any Plan established or maintained by Capital Guardian or any of its affiliates;

6. All Plans which will participate in the cross-trade program will have total assets of at least $25 million;

7. Capital Guardian receives no fee or other compensation (other than its agreed investment management fee) with respect to any cross-trade transaction;

8. Capital Guardian is a discretionary investment manager with respect to Plans participating in the cross-trade program;

9. For purposes of this exemption:

(a) "cross-trade" transaction means a purchase and sale of securities between accounts for which Capital Guardian or an affiliate of Capital Guardian is acting as a trustee or investment manager;

(b) "affiliate" means any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with Capital Guardian;

(c) "Plan account" means an account holding assets of one or more employee benefit plans which are subject to the Act, for which Capital Guardian acts as a fiduciary.

Summary of Facts and Representations

1. Capital Guardian is a trust company organized under the laws of the State of California and supervised by the California banking authorities. Capital Guardian is a wholly-owned subsidiary of the Capital Group, an organization which, through its subsidiaries, provides a broad range of financial services to a variety of different clients, including employee benefit plans, registered investment companies, college endowment funds, and foundations.[1] Capital Guardian currently provides investment management services to 120 employee benefit plans. Other companies affiliated with the Capital Group provide investment advisory services to accounts, principally mutual funds, the underlying securities of which the applicant represents are not plan assets subject to the Act. Capital Guardian currently has more than $16 billion in assets under management. With respect to the Plans participating in the cross-trading program, it is represented that Capital Guardian is a discretionary investment manager.

2. Capital Guardian sometimes receives instructions from an employee benefit plan or other client to liquidate all or a portion of an investment account. In addition, Capital Guardian sometimes must dispose of securities held in a client account in order to bring the portfolio into compliance with client-imposed investment guidelines. For example, such investment guidelines for an account may require the sale of a security that has increased in value which Capital Guardian might otherwise continue to hold in the account. In addition, an affiliate of Capital Guardian may make a discretionary determination to dispose of securities for an account not involving plan assets. However, it is represented that cross-trade transactions will not involve assets of any Plan established or maintained by Capital Guardian or any of its affiliates.

3. It is represented that Capital Guardian's disposition of a particular security for one client account may involve a security which a portfolio manager may desire to purchase for one or more of Capital Guardian's other accounts. If Capital Guardian acquires such securities for one of its other accounts, it has an opportunity to save substantial commissions for both the liquidating account and the acquiring account. This saving is caused by an independent broker effecting a cross-trade transaction, which involves matching Capital Guardian's sell orders for a particular day with its buy orders for the same day and the execution of trades between the accounts in off-market transactions. The independent broker is prepared to execute these transactions for Capital Guardian for one cent per share. By contrast, if Capital Guardian were to execute the same trades on the open market, it is represented that the commission would be six to seven cents per share for each of the purchase and sale transactions. Accordingly, cross-trade transactions can be made at lower costs than open market trades.

4. Capital Guardian's portfolio managers make decisions regarding which securities to purchase or sell for client accounts considering all of the relevant facts and circumstances, including the composition of the portfolios and the liquidity requirements of the Plan accounts. Such decisions, it is represented, are not influenced by the fact that an opportunity for a cross-trade transaction may, or may not, be available. The matching of sale and purchase orders is represented to be largely automatic.

5. Under the proposed exemption, only Plans with at least $25 million in assets will participate in the cross-trade program. A Plan fiduciary which is independent of Capital Guardian must provide written authorization allowing the Plan's participation in Capital Guardian's cross-trade program before any specific cross-trade transactions are executed. This authorization will be terminable at will upon written notice by the appropriate independent Plan fiduciary. Capital Guardian will receive no additional fee for providing such service. No penalty or other charge will be made as a result of the termination of a Plan's participation in the program. In addition, before any such general authorization is granted, Capital Guardian will provide the authorizing Plan fiduciary with all materials necessary to permit an evaluation of the cross-trade program. These materials will include a copy of the exemption, an explanation of how the authorization may be terminated, a description of Capital Guardian's cross-trade practices, and any other available information which the authorizing Plan fiduciary may reasonably request.

6. In addition to requiring a general authorization of a Plan's participation in Capital Guardian's cross-trade program, an independent fiduciary of each Plan must specifically authorize each cross-trade transaction. Any such authorization will be effective only for a period of three (3) business days and will be subject to certain pricing and volume limitations (see representations 9 and 10, respectively). The authorization to proceed with the transaction may be either oral or written. If a cross-trade transaction is authorized orally by an independent fiduciary, Capital Guardian will provide a written confirmation of such authorization in a manner reasonably calculated to be received by such independent fiduciary within one (1) business day from the date of such authorization. The Plan fiduciary will be sent a written confirmation of the cross-trade, including the price at which it was executed, within ten (10) days of the completion of the transaction.

7. At least once every three months and not later than forty-five (45) days following the period to which it relates, Capital Guardian will provide the authorizing Plan fiduciary with a report setting forth: (a) A list of all the cross-trade transactions conducted on behalf of the Plan account during the previous period; and (b) with respect to each cross-trade transaction, the highest and lowest prices at which the subject securities were traded on the date of such transaction. In addition, at least once a year, and not later than 45 days after the end of the period to which it relates, each Plan fiduciary will be provided with a summary of the quarterly reports, including: (a) A description of the total amount of Plan assets involved in cross-trade transactions completed during the year; (b) a statement that the Plan's fiduciary's authorization to participate in the cross-trade program can be terminated without penalty upon Capital Guardian's receipt of a written notice to that effect; (c) a statement that the fiduciary's authorization of the Plan's participation in the program will continue unless it is terminated; and (d) a description of any material change, if any, in Capital Guardian's cross-trade practices during the period covered by the summary. It is represented that these reports will provide the Plan fiduciaries with a mechanism for monitoring the operation of the cross-trade program. The applicant further represents that the authorization procedures, particularly

[1] All future references to Capital Guardian will also include affiliated companies in the Capital Group.

BEST COPY AVAILABLE

VOL 54 ISS 209 OCT 31 1989 UMI

VOL 54 ISS 209 OCT 31 1989 UMI

the requirement of specific authorization for each cross-trade transaction, would prevent Capital Guardian from favoring one account at the expense of another in a cross-trade transaction.

8. The securities involved in the cross-trade transaction will be those only for which there is a generally recognized market.

9. A cross-trade transaction will be effected at the closing price for the security on the date of the transaction. Such price must be within 10 percent of the closing price of the security on the day before the date on which Capital Guardian receives authorization by the independent Plan fiduciary to engage in the cross-trade transaction. This condition, together with the specific authorization requirements, it is represented, would prevent Capital Guardian from using cross-trade transactions to benefit one client to the detriment of another client. This safeguard requires monitoring market activity and avoids executing trades at prices that were not contemplated at the time the independent fiduciaries authorized such transactions.

10. A cross-trade transaction will be effected only where the trade involves less than 5 percent of the aggregate average daily trading volume for the securities involved in the transaction for the week immediately preceding the authorization of the transaction. It is represented that this condition will help to minimize the potential impact which a large trade might have in the sale of securities on the open market.

11. Capital Guardian represents that it is highly unlikely that situations will arise in which it will be necessary to allocate cross-trade opportunities among several accounts. It is possible, however, that situations may arise where securities to be sold for a client account present an attractive investment opportunity for more than one other account. In this regard, the applicant represents that the issues presented in allocating cross-trade opportunities among client accounts are no different than the issues which Capital Guardian must face daily in determining the allocation of limited investment opportunities among client accounts. Capital Guardian will make these decisions considering all the relevant facts and circumstances in a manner which it believes to be consistent with its fiduciary responsibilities under the Act and which is equitable to all accounts involved. In making such allocation decisions, Capital Guardian will consider, among other things, the relative liquidity needs of the accounts, the composition of the portfolios and the number of cross-trade opportunities which have been made available to the accounts. In this regard, Capital Guardian does not believe that an automatic allocation system would be appropriate because it would interfere with the proper discharge of its fiduciary duties as an investment manager.[2]

12. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 408(a) of the Act because among other things:

(a) An independent Plan fiduciary must provide written authorization, which is terminable at will, to Capital Guardian to permit the Plan to participate in the cross-trading program;

(b) Oral or written authorization must be provided by the independent Plan fiduciary to Capital Guardian prior to each cross-trade transaction;

(c) All cross-trades will be executed at the closing price for the security on the date of the transaction;

(d) A cross-trade transaction will be effected only if certain price and volume requirements are satisfied;

(e) All securities involved in cross-trades will be ones for which there is a generally recognized market;

(f) Capital Guardian will receive no additional fees as a result of the proposed cross-trades;

(g) Capital Guardian will provide periodic reporting of the cross-trade transactions to the participating Plan's independent fiduciary;

(h) The Plans participating in the cross-trade program will save significant sums of money because of reduced brokerage commissions;

(i) All Plans participating in the cross-trade program must have assets of not less than $25 million; and

(j) The cross-trade transaction does not involve the assets of any Plan established or maintained by Capital Guardian or any affiliates thereof.

For Further Information Contact: Mrs. B.S. Scott of the Department, telephone (202) 523-8883. (This is not a toll-free number.)

Samuel Shapiro & Co., Inc. Profit Sharing Trust (the Plan) Located in Baltimore, Maryland

[Exemption Application No. D-8072]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedure set forth in ERISA Procedures 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed sale by the Plan of common stock of Samuel Shapiro & Co. (of D.C.), Inc. (the D.C. Company), to Samuel Shapiro & Co., Inc. (the Company), the sponsor of the Plan and a Subchapter S Corporation under the Code, in connection with the proposed merger of the Company and the D.C. Company, provided that the sales price for the stock is not less than the fair market value of the stock on the date of sale.

Summary of Facts and Representations

1. The Plan is a profit sharing plan which, as of December 31, 1988, had approximately 54 participants and total assets of approximately $6,491,114. The Profit Sharing Trust Committee (the Committee) is the named fiduciary of the Plan. The members of the Committee are M. Sigmund Shapiro (Mr. Shapiro), Morris E. Horwitz and Julius Braverman. The trustee of the Plan (the Trustee) is the Mercantile-Safe Deposit & Trust Company, located in Baltimore, Maryland.

The Committee has the authority under the Plan to appoint an investment advisor to invest the Plan's assets. The Committee has appointed Rothchild and Company of Baltimore, Maryland (the Advisor) as an investment advisor. The applicant states that the decision-makers for investment of the Plan's assets are the Committee and the Advisor.

2. The Company is a Maryland corporation and the D.C. Company is a Delaware corporation (together, the Companies). The Companies are engaged in the business of providing customs brokerage and freight forwarding services. Mr. Shapiro is the President and the Chairman of the Board of Directors of the Company. Mr. Shapiro owns 92.5% of the stock of the Company (the Company Stock).

The Company owns 72% of the common stock of the D.C. Company (the D.C. Company Stock) and Mr. Shapiro owns 3% of the D.C. Company Stock. The Plan owns 25% of the D.C. Company Stock. The Plan acquired the D.C. Company Stock as a contribution from the Company in 1989 prior to the effective date of the Act. The applicant represents that because the Company is a Subchapter S Corporation under the Code, Mr. Shapiro is a shareholder-employee with respect to the Plan as the owner of more than 5% of the Company Stock.[3] However, the D.C. Company is not a Subchapter S Corporation under the Code. The applicant states that the D.C. Company presently cannot operate as a Subchapter S Corporation due to the Plan's ownership of the D.C. Company Stock (see section 1361 of the Code).

3. The applicant represents that a proposal has been made to merge the Companies (the Merger), in order to simplify administration and eliminate duplication of operational expenses. After the Merger, the combined organization will be a Subchapter S Corporation.

The applicant states that the Merger would be accomplished as follows: (1) The Board of Directors of the Companies would recommend to the stockholders that the Companies be merged; (2) the stockholders of each of the Companies would approve the Merger by at least a two-thirds vote; (3) an Agreement of Merger (the Agreement) would be filed with the Secretary of State of Delaware and Articles of Merger (the Articles) would be filed with the State Department of Assessments and Taxation of Maryland; (4) pursuant to the Agreement and the Articles, the D.C. Company would be merged into the Company, and the assets and liabilities of the D.C. Company would be transferred to the Company; (5) pursuant to the Merger all stockholders of the D.C. Company (except the Plan) would receive Company Stock in exchange for their D.C. Company Stock; and (6) the Plan would receive cash in change for its D.C. Company Stock. Therefore, the Plan would not own any D.C. Company Stock after the Merger and would not own any Company Stock as a result of the Merger.

4. The Committee and the Advisor (together, the Plan Fiduciaries) represent that the Plan's continued investment in the D.C. Company Stock is not in the best interest of the Plan. The Plan Fiduciaries state that the D.C. Company Stock has limited potential for appreciation and that the interest of the Plan's participants and beneficiaries would be served better by an investment which is more likely to appreciate in value. In this regard, the Plan Fiduciaries state that the D.C. Company has had an erratic earnings history and that the future profitability of the D.C. Company is uncertain. Moreover, the Plan Fiduciaries note that the long-term management direction of the D.C. Company is unclear due to the age of the key executive, Mr. Shapiro. In addition, the Plan Fiduciaries believe that the progressively increasing expenses of operating the D.C. Company may cause a decline in the value of the D.C. Company Stock. Finally, the Plan Fiduciaries state that the D.C. Company Stock is not publicly traded and the Plan should have an investment which is more liquid in nature.

5. The D.C. Company Stock was appraised on July 10, 1989 by Harvey D. Gold (Mr. Gold), an independent, qualified appraiser in Baltimore, Maryland, as having a fair market value of $9000 per share as of May 31, 1989. The applicant states that Mr. Gold will update his appraisal of the D.C. Company Stock prior to the Merger.

6. The Plan Fiduciaries represent that the proposed sale of the D.C. Company Stock to the Company would be in the best interest of the Plan and its participants and beneficiaries. The Plan Fiduciaries state that the Plan will receive cash equal to the value of the D.C. Company Stock, as established by Mr. Gold's appraisal. In addition, the proposed ttansaction will provide the Plan with funds which can be invested in assets with more certain income earning potential and greater likelihood for future appreciation. The Plan will not pay any commissions or other expenses with respect to the proposed sale.

7. In summary, the applicant represents that the proposed transaction will meet the statutory criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because: (a) the sale will be a one-time transaction for cash; (b) the Plan will receive an amount which is not less than the fair market value of the D.C. Company Stock, as established by an independent, qualified appraiser; (c) the Plan will not pay any commissions or other expenses with respect to the sale; and (d) the transaction will allow the Plan to divest itself of the D.C. Company Stock and acquire investments yielding a higher rate of return.

For Further Information Contact: Mr. E.F. Williams of the Department at (202) 523-8883. (This is not a toll-free number.)

Dudley M. Baker, M.D. Profit Sharing Plan and Trust (the Plan) Located in Bennington, Vermont

[Application No. D-8157]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408 (a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), (406)(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed loan of $25,000 (the Loan) to Dudley M. Baker, M.D. (Dr. Baker), a party in interest with respect to the Plan, by Dr. Baker's individually directed account in the Plan, provided that the terms and conditions of the proposed Loan are no less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated third party at the time of the making of the proposed Loan.

Summary of Facts and Representations

1. The Plan is a frozen Keogh plan with two participants, one of whom is Dr. Baker. As of the end of the Plan's 1988 plan year the assets in Dr. Baker's individually directed separate account amounted to $160,033. Dr. Baker, a surgeon doing business as a sole proprietor, is an owner-employee as defined in section 401(c)(3) of the Code.

2. It is proposed that a loan of $25,000 be made to Dr. Baker from his separate account in the Plan. The Loan will not affect the account of the Plan's other participant. The Loan would be secured by the account of Mrs. Geraldine Baker (Dr. Baker's wife) in Massachusetts Financial Services' Managed Municipal Bond Trust which held 8,143.098 shares worth $10.71 each as of July 19, 1989. The applicant represents that the account balance securing the Loan will at all times exceed the outstanding Loan balance.

3. The Loan will be at a rate 2 percent over the prime rate charged for similar loans on the date of the Loan by First Vermont Bank and Trust Company (the Bank) of Bennington, Vermont, an unrelated bank, and will be repaid over a five-year period with equal quarterly payments of principle and interest. The applicant and the Bank represent that these terms are no less favorable to the Plan than those obtainable from an unrelated third party.

[2] The Department is expressing no opinion herein as to the applicability of any of the provisions of part 4 of title I of the Act to the allocation decisions made by Capital Guardian on behalf of the Plans participating in the cross-trading program.

[3] Section 408(d) of the Act prohibits any transaction in which a plan acquires for the plan any property from or sells any property to any person who is with respect to the plan an owner-employee, as defined under section 401(c)(3) of the Code, or shareholder-employee, as defined under section 1372 of the Code. However, the Department has the authority under section 408(a) of the Act to provide an exemption for such a transaction.

VOL 54 ISS 209 OCT 31 1989 UMI

4. In summary, the applicant represents that the proposed transaction will satisfy the provisions of section 408 (a) of the Act because: (a) The Loan will be adequately secured at all times; (b) Only 15.6% of Dr. Baker's account will be invested in the Loan; (c) The terms and conditions of the Loan are no less favorable to the Plan than those obtainable from an unrelated party; and (d) Dr. Baker, the only participant whose account is affected by this proposed transaction, has determined that the proposed transaction would be in the interest of his account in the Plan, and desires that the proposed transaction be consummated.

Notice to Interested Persons: Because Dr. Baker is the only person in the Plan to be affected by the proposed transaction, it has been determined that there is no need distribute the notice of proposed exemption to interested persons. Comments and requests for a public hearing are due 30 days from the date of publication of this notice of proposed exemption in the **Federal Register.**

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Hotel Employees and Restaurant Employees International Union Welfare Plan (the Plan) Located in Naperville, Illinois

[Application No. L–7754]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a) of the Act shall not apply to: the lease arrangement (the Arrangement) comprising five written agreements executed on July 6, 1988—namely: a Lease of Personal Property, a Computer Security Agreement, an Option To Purchase (covering leased computer equipment), a Software Program License Agreement, and a Software System Support Agreement—between (a) the Plan and (b) Resource Information Management Systems (RIMS) and its wholly owned subsidiary, Winthrop Financial Group, Inc. (Winthrop), parties in interest with respect to the Plan, covering computer equipment and software previously leased to the Plan's former administrator, William L. Meyers, Inc. (Meyers), provided the terms of the Arrangement are as favorable to the Plan as those the Plan could obtain in a similar transaction with unrelated parties.

EFFECTIVE DATE: If the proposed exemption is granted, the exemption will be effective as of July 6, 1988, the date the agreements comprising the Arrangement were executed.

Summary of Facts and Representations

1. The Plan

The Plan was established by the Hotel Employees and Restaurant Employees International Union to provide health and welfare benefits for its members. It is administered by a Taft-Hartley joint board of trustees (the Trustees), of whom there are currently seventeen. As of September 12, 1988, the Plan covered approximately 106,000 participants. The approximate fair market value of the total assets of the Plan was $65,749,327 as of March 31, 1987. The percentage of the fair market value of the Plan's total assets involved in the exemption transaction is 0.5%. As of September 12, 1988, no Plan assets were invested in loans to any party in interest involved in this exemption transaction, in property leased to any such party in interest, or in securities issued by such party in interest.

2. Meyers

From its inception to July 31, 1988, the Plan was administered by Meyers. The applicant, the Martin E. Segal Company (Segal), the independent fiduciary in charge of (among other things) the Plan's agreements with RIMS and Winthrop, states that as the size of the Plan increased, the Trustees became aware of the development of a number of administrative problems and delays in claim processing. Consequently, in 1986 the Trustees retained Segal as a consultant to evaluate Plan administration, particularly relating to the services provided by Meyers.

3. Segal—General Information

The applicant, Segal, represents that it: was founded in 1939, is among the largest employee benefit consulting firms in the country, is headquartered in New York, has 15 regional offices around the country, and provides, through its 600 employees, consulting and actuarial services to more than 3,000 employee benefit plans covering nearly eight million employees and their dependents. Segal also represents that it has substantial experience with the establishment and operation of welfare benefit plans and that, as a major employee benefit consulting firm, it has substantial experience in advising clients on the selection of computer equipment and software and is familiar with current state-of-the-art systems. Segal states that it was already familiar with the RIMS system before Segal became involved in the termination of Meyers' contract with the Plan (described below) and that in Segal's November 1986 report to the Trustees, Segal commented favorably on the RIMS system. Segal represents that it has no interest in or relation to Meyers, RIMS, or Winthrop.

4. Segal's Evaluation of and Recommendations re: Plan Administration

In November 1986, Segal submitted its report on Meyers' administrative services. This report was critical of the Meyers operation, particularly with respect to the abilities of its management-level executives, while noting, nevertheless, that a number of very capable and knowledgeable employees were trying to do a competent job. This report also identified alternative solutions to the Plan's administrative problems, suggesting that the Trustees (a) select another third-party administrator to replace Meyers, or (b) self-administer the Plan, either by acquiring the services of Meyers' staff or by hiring entirely new employees. After studying the relative merits of each proposal, the Trustees decided to self-administer the Plan. The Trustees at that time hoped to acquire the services of many of Meyers' employees and to acquire Meyers' offices, equipment, and computer systems, either by purchase or lease.

5. The Plan's Negotiations with Meyers

In September 1987, the Trustees authorized Segal, along with outside counsel for the Trustees, to begin negotiations with Meyers concerning the termination of Meyers' administrative contract and the possible sale of Meyers' assets to the Plan. On November 13, 1987, the Trustees formally adopted a resolution to terminate Meyers for cause as Plan administrator. The Trustees directed Segal to discharge Meyers at an appropriate time, based on the progress of Segal's negotiations with Meyers, and to negotiate the acquisition of Meyers' assets at a price determined by Segal.

On January 20, 1988, Segal notified Meyers that, pursuant to the six-month termination provision in Meyers' contract with the Plan, Meyers would be terminated as Plan administrator effective July 31, 1988. Segal then continued negotiations with Meyers regarding Meyers' termination and the transition to self-administration. Segal states that these negotiations were lengthy and difficult, involving a number of disputes with Meyers, some of which were not resolved as of the date of the exemption application. Segal represents that in conducting these negotiations, it was guided by the following principles and concerns:

(a) Meyers must remain in operation to provide services to the Plan until July 31, 1988, thereby avoiding any disruption in Plan administration;

(b) The Plan must obtain access to Meyers' employees to arrange for their employment by the Plan;

(c) Plan employees must be provided with full, active cooperation by Meyers and its employees, and complete access to those documents, information, data, and software that are the Plan's property in Meyers' possession;

(d) It would be more efficient and less expensive for the Plan to use certain equipment and office space currently used by Meyers; and

(e) The Plan's new administrative system must be operational as of August 1, 1988. For this reason, time deadlines were imposed on negotiations, and alternative courses of action, including court enforcement actions, were considered.

In the negotiation process, Segal initially explored the possibility of the Plan's purchasing all of Meyers' assets, including its office furniture, computer software, and equipment leases, but because the parties involved were unable to agree to the terms for these transactions, this possibility was rejected. However, the Plan has sublet some office space leased by Meyers in connection with its Plan administration activities.[4]

6. Segal's Appointment as Independent Fiduciary for the Plan

By May 12, 1988, Segal was appointed Independent Fiduciary for the Plan in connection with the settlement of litigation concerning the administration of the Plan. In both *McLaughlin* v. *Hanley*, No. 86–421–LDG (D. Nev. 1988) and *McLaughlin* v. *Gerace*, No. 85–3669 (D. N.J. 1988), the Secretary of Labor alleged violations of Part 4 of Subtitle B, Title I of the Act in connection with certain aspects of the Plan's administration. These cases were settled pursuant to the entry of two substantially similar Consent Decrees, on May 12, 1988 and April 12, 1988, respectively, after lengthy negotiations among the parties. Segal was not a party to this litigation and therefore had no direct role in the settlement negotiations or the preparation of the Consent Decrees. Among other things, these Consent Decrees provided for the appointment of an independent named fiduciary with certain specifically enumerated responsibilities relating to Plan administration, including, for example, the authority to terminate Meyers as Plan administrator, to oversee benefit delivery arrangements, to monitor performance of Plan service and benefit providers, and to oversee record keeping and claims processing.

Segal's authority as Independent Fiduciary is limited to the authority granted under the Consent Decrees, which provide that Segal, as Independent Fiduciary, must generally make either binding or non-binding recommendations to the Trustees for their approval before undertaking actions on behalf of the Plan. The Consent Decrees allocate to the Trustees authority in a number of areas involving Plan investments and operation, as well as the authority to monitor the activities of the Independent Fiduciary and to petition the courts for its removal. By the terms of the Consent Decrees, the district courts retain jurisdiction over the parties and Segal "for the purpose of administration, application and interpretation" of the Consent Decrees. Segal is required to provide to the courts, the Trustees, and the Secretary semi–annual reports describing its activities as Independent Fiduciary for the Plan.

7. Termination of Meyers' Contracts

Meyers, Segal, and the Trustees executed a severance agreement on July 6, 1988, governing all aspects of the termination of Meyers and the transition to self-administration. The termination of Meyers' position as Plan administrator became effective on July 31, 1988, as scheduled. Segal states that as of August 1, 1988, the Plan commenced administration at its new offices in Naperville, Illinois.

Segal advises that through the period ending July 31, 1988, the payment of benefits on behalf of the Plan was made by Meyers through a computer system supplied by RIMS. As part of this system, Meyers entered into an exclusive licensing agreement with RIMS for the use of RIMS software. Segal explains that under the terms of the licensing agreement, Meyers alone had the right to use this software and could not transfer that right to any other entity, including the Plan.

Segal states that because Meyers' position as administrator of the Plan was terminated as of July 31, 1988, a termination of the lease between RIMS and Meyers was made possible. Meyers and RIMS and Winthrop executed a termination agreement on July 6, 1988, under which Meyers relinquished all its rights and title to the RIMS equipment and software it had leased. In return, RIMS released Meyers from its obligations, including the financial obligations incurred by Meyers in connection with the lease and exclusive software licensing agreement.

8. The Plan's Acquisition of Computer Equipment and Software

Segal represents that in connection with the transition to self-administration, it considered various methods of acquiring or leasing computer equipment and software for the Plan. Among other things, Segal took into account that a major cost of the change to self-administration would be the expense of computer conversion, part of which is attributable to the cost of software and hardware (programming and equipment). Segal explains that this expense also involves the cost of moving the equipment, the effort needed to identify the data elements and acquaint new technical staff with the style and location of information within the existing computer files, the transfer and control of the current and historical data from the old computers to their replacements, and the start-up and training of technical and operation staff handling the new systems. Segal states that all these conversion efforts require expertise and a great deal of staff time.

Segal considered purchasing or leasing computer equipment and software different from that which had been used by Meyers. However, Segal concluded that the acquisition of an entirely different computer system would be impractical because the Plan would have to transfer all its data from the old system to the new system as well as to spend time correcting the inevitable errors accompanying such a transfer. Segal noted that an important consideration was that staff would have to be retrained to operate the new equipment and software. Segal determined that this alternative was unnecessarily costly and impractical at this time.

In considering possible computer systems for the Plan, Segal contacted RIMS to discuss leasing new, upgraded equipment and software which would be generally compatible with the then-existing system. Although the software used by Meyers would be compatible with the new system the software licensed exclusively to Meyers would not be available to the Plan absent a

[4] The Department is proposing no exemption with respect to such subleasing and is expressing no opinion herein as to whether or not such subleasing satisfies the requirements of either section 408(b)(2) or section 406(a)(1) of the Act.

VOL 54 ISS 209 OCT 31 1989 UMI

separate agreement between the Plan and RIMS. Segal states that RIMS was willing to sell a new computer system and to license software to the Plan for approximately $480,000.

At the same time, Segal considered the possibility of leasing the RIMS system then leased to Meyers. Segal asserts that using this system would avoid the disruption of services which would be inherent in any change of computer systems, particularly as the Plan planned to hire employees who had experience using the same RIMS system. Segal states that RIMS was willing to lease the equipment and software to the Plan (assuming that it was available and no longer used by Meyers) for approximately $360,000, a present value equivalent of $315,000 after discounting for time payments over three years at ten percent.

Segal determined that leasing the RIMS system previously used by Meyers was the most cost effective and efficient method of securing computer services for the Plan. Segal's prior experience had shown that the RIMS system was competitively priced and a good system. In Segal's opinion, continued use of the existing system would reduce the start-up costs for switching to self-administration of the Plan. Moreover, significant training and start-up costs would be eliminated due to the familiarity with the system of Meyers' staff, whom the Plan intended to hire. Furthermore, the computer software was already in place to handle the Plan's benefit claims. Thus, service to participants and beneficiaries would suffer the least disruption through this decision. Consequently, Segal began negotiations with RIMS to lease the system then used by Meyers.

In connection with the severance agreement, and in light of the termination agreement between RIMS and Meyers, Segal made a binding recommendation to the Trustees for the approval of the RIMS lease for the computer system used by Meyers. The Trustees reviewed this recommendation at their meeting on June 29, 1988, and approved a resolution putting this recommendation into effect. Pursuant to this resolution, RIMS (and its wholly owned subsidiary, Winthrop) and the Plan entered into an agreement providing for a 32-month lease for the computer system. They also executed an option-to-purchase agreement which gives the Plan the ability to purchase the equipment it currently leases.

The lease of computer equipment and software from RIMS and Winthrop by the Plan commenced on August 1, 1988, pursuant to the contracts between the Plan and RIMS or Winthrop executed July 6, 1988. Because the RIMS system was already substantially in place when the Plan took over its own administration on August 1, 1988, no shutdown of administrative services was necessary. Segal states that some RIMS computers were installed in the Naperville, Illinois office over the weekend of July 30–31, and they were operational and paying claims on August 1; while in other Plan offices, the systems were already in place. Segal asserts that only leasing the equipment previously used by Meyers could have achieved this result, and that leasing this system successfully avoided any shutdown of Plan operations. Thus, Segal opines that the leasing of the subject computer equipment and software was clearly in the best interests of the Plan's participants and beneficiaries, and necessary and appropriate for the efficient and economical administration of the Plan.

9. The Party-in-Interest Status of RIMS and Winthrop

Segal asserts that although RIMS has had a contractual relationship with Meyers, RIMS has had no relationship (as a service provider or otherwise) with the Plan prior to the Plan's lease with RIMS and Winthrop. Segal also represents that although the Plan entered into a lease for the same equipment and software previously leased by Meyers, the Plan did not assume Meyers' lease, and Meyers is not a party, directly or indirectly, to the lease agreement between RIMS and the Plan. Segal explains that Winthrop is the leasing agent for RIMS and, as such, provided no services with respect to the hardware or software formerly leased to Meyers. However, upon execution of the Software System Support Agreement (described below), RIMS became a service provider to the Plan and, therefore, a party in interest thereto, as did Winthrop due to its status as a wholly owned subsidiary of RIMS, pursuant to paragraphs (B) and (G), respectively, of section 3(14) of the Act.

10. Current RIMS/Winthrop Contractual Arrangements

Segal explains that the Plan currently has the following contractual relationships with RIMS or Winthrop:

(a) A Lease of Personal Property between the Plan and Winthrop;

(b) A Computer Equipment Security Agreement between the Plan and Winthrop;

(c) The Option: An Option To Purchase the computer equipment leased by the Plan from Winthrop;

(d) A Software Program License Agreement between the Plan and RIMS; and

(e) A Software System Support Agreement between the Plan and RIMS.

Segal represents that all of these agreements are standard form contracts which represent the common practice within the industry and summarizes the terms of these agreements as follows:

(a) Lease of Personal Property: This is the lease of computer hardware for 32 months by the Plan from Winthrop. The equipment was installed at the Plan's administrative offices in Naperville, Illinois and Atlantic City, New Jersey. For the first 27 months of the lease, rental payments are $13,039.10 per month; for months 28 through 32, the rental payments are reduced to $2,811.96. (The last five payments are reduced to reflect the deposit supplied to Winthrop by the Plan.)

(b) Computer Equipment Security Agreement: The Plan provided to Winthrop a security interest in the Qantel computer and computer-related equipment until the Plan's obligations under the Lease of Personal Property are satisfied.

(c) The Option: The Plan has the right to purchase the computer equipment from Winthrop for approximately $19,000, representing 10 percent of the initial computer equipment cost, at the expiration of the term of the computer equipment lease (see (a), above) or any renewal or extension term thereof. The computer equipment would be sold in an "as is" condition.

(d) Software Program License Agreement: RIMS provides to the Plan a non-exclusive license to use its programs on the equipment rented from Winthrop and will also provide training for Plan personnel. In return, the Plan will pay RIMS $96,500.

(e) Software System Support Agreement: RIMS agrees to provide the Plan with telephone support services for the use of its licensed programs. In addition, RIMS will supply all final versions of all new releases of the programs during the terms of the lease. The Plan is required to maintain at each installation site a key operator who has taken the RIMS training program. These key operators will be the sole Plan employees to request support from RIMS. This agreement has a term of one year, beginning August 1, 1988, with automatic one-year renewals unless either party provides the other party with 30-days prior written notice of its intent not to renew. The Plan will pay RIMS a fee of $1,845.58 per month for the first one year term.

11. Comparison of the Plan's and Meyers' Contracts

Segal states that Meyers and RIMS/Winthrop had standard form contracts which represented the common practice within the industry and that Meyers had the following agreements with RIMS or Winthrop:

(a) Lease of Personal Property,

(b) Software Program Licenses Agreement, and

(c) System Support Agreement.

Segal also represents that the agreements between the Plan and RIMS/Winthrop and the agreements between Meyers and RIMS/Winthrop are substantially the same and are all the standard form contracts developed by RIMS/Winthrop which were in use at the time the parties entered into the contracts.

Segal represents that although the first year fee paid by the Plan for system support services is greater than the initial fee paid by Meyers under its 1985 systems support services agreement with RIMS, the increase in the amount of the fee from 1985 (payable by Meyers) to 1988 (payable by the Plan) was a result of changing market conditions. Segal represents further that the fee currently charged by RIMS reflects industry fee levels and is reasonable in light of the services to be provided. Further, Segal represents that the overall cost increases reflected in the Plan's 1988 agreements with RIMS and Winthrop merely indicate changes in the market for this equipment and these services since 1985. Segal notes that the lease payments by the Plan are essentially the same as those paid by Meyers and will result in a significant savings for the Plan. While the systems servicing fees have increased, Segal states that those increased fees represent reasonable compensation for the services rendered and that leasing the RIMS equipment previously used by Meyers is clearly in the best interests of the Plan and its participants and beneficiaries because of the efficiencies and cost savings involved.

12. Monitoring by Segal

Segal represents that as court-appointed independent fiduciary to the Plan, Segal will monitor the Plan's agreements with RIMS and Winthrop and will act to protect the Plan's interest therein throughout the duration of said agreements. With regard to the Option (see 10(c), above), Segal makes the following representations:

(a) The Option is appropriate and commercially reasonable in a lease of this type (see 10(a), above);

(b) If Segal elects to exercise the Option, such election will only be made to the extent that the purchase of the equipment is in the Plan's best interest;

(c) Segal will ensure that the Option is not exercised if Segal determines that the Plan's purchase of the equipment is not in the Plan's best interests; and

(d) If the Option is to be exercised, Segal will determine the leased equipment's fair market value as of the date of purchase by the Plan and will ensure that the purchase price to be paid by the Plan does not exceed said fair market value.

13. Summary

In summary, Segal (the applicant) represents that the Arrangement satisfies the exemption criteria set forth in section 408(a) of the Act because:

(a) Having considered alternative arrangements, Segal, an independent fiduciary with respect to the Plan, believes that the Arrangement is in the best interests of the Plan and its participants and beneficiaries because it preserves the continuity of Plan administration, including the processing of participants' and beneficiaries' claims, while conserving the Plan's assets;

(b) Segal, which has extensive experience in the operation of multiemployer benefit plans and is familiar with state-of-the-art computer systems, has negotiated the terms of the Arrangement on behalf of the Plan, with the approval of the Trustees;

(c) As independent fiduciary to the Plan, Segal has expressed the opinions that (i) the increases (compared to the amounts payable by Meyers under its contracts with RIMS/Winthrop) in payments required from the Plan under its Lease of Personal Property with Winthrop (see 10(a), above) and under its Software System Support Agreement with RIMS (see 10(e), above) are due to changing market conditions, and (ii) although the first year fee paid by the Plan for system support services is more than the initial fee paid by Meyers under its 1985 systems support services agreement, the fee currently charged to the Plan reflects industry fee levels and is reasonable in light of the services to be provided;

(d) As independent fiduciary to the Plan, Segal is responsible for oversight of record keeping and claims processing for the Plan, among other duties, and will monitor the contracts between the Plan and RIMS or Winthrop, pursuant to the Arrangement, acting to protect the Plan's interests therein throughout their duration; and

(e) With respect to the Option, Segal represents that: (i) the Option is appropriate and commercially reasonable in a lease of this type (see 10(a), above); (ii) if Segal elects to exercise the Option, such election will only be made to the extent that the purchase of the equipment is in the Plan's best interest; (iii) Segal will ensure that the Option is not exercised if Segal determines that the Plan's purchase of the equipment is not in the Plan's best interests; and (iv) if the Option is to be exercised, Segal will determine the leased equipment's fair market value as of the date of purchase by the Plan and will ensure that the purchase price to be paid by the Plan does not exceed said fair market value.

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 89–75]

Intent To Grant Co-Exclusive Patent Licenses

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of intent to grant co-exclusive licenses.

SUMMARY: NASA hereby gives notice of intent to grant National Water Management Corporation of San Jose, California, Stearman Industries, Incorporated, of Tavares, Florida, and Alten Water Treatment Corporation of Palo Alto, California, each a limited, revocable, royalty-bearing, co-exclusive license to practice the invention as described in U.S. Patent No. 4,172,786 for "Ozonation of Cooling Tower Waters," which issued October 30, 1979, to the Administrator of the National Aeronautics and Space Administration on behalf of the United States of America. The proposed co-exclusive licenses will contain appropriate terms, limitations and conditions in accordance with NASA Patent Licensing Regulations, 14 CFR part 1245, subpart 2. NASA will negotiate the final terms and conditions and grant the co-exclusive licenses, unless written objections to this Notice are received within 60 days of the date of this Notice. The Director of Patent Licensing will review the written objections and then recommend to the Associate General Counsel (Intellectual Property) whether to grant the co-exclusive licenses.

DATE: Comments to this notice must be received January 2, 1989.

ADDRESS: National Aeronautics and Space Administration, Code GP, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Lupuloff, (202) 453–2430.

Dated: October 19, 1989.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; Cooperative Agreement

AGENCY: National Endowment for the Arts.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of a Cooperative Agreement for the design and implementation of a process for conducting independent assessments of the readiness of approximately 80 panel-recommended organizations which have applied to the Endowment to participate in the Advancement Program. The recipient of the Cooperative Agreement will prepare written reports which will provide professional judgment on each organization's financial and organizational status and capacity to develop through the 15-month period of technical assistance services provided by the program. The recipient will also identify principal areas of need in order to ensure the assignment of appropriate consultants and to permit planning for supplementary workshops or specialized assistance. Those interested in receiving the Solicitation package should reference Program Solicitation PS 90–03 in their written request and include two (2) self-addressed labels. Verbal requests for the Solicitation will not be honored.

DATES: Program Solicitation PS 90–03 will be available approximately November 8, 1989, with proposals due on December 8, 1989.

ADDRESS: Requests for the Solicitation should be addressed to National Endowment for the Arts, Contracts Division, Room 217, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: William Hummel or Anna Mott, Contracts Division, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Washington, DC 20506 (202/682–5482).

William I. Hummel,

Director, Contracts and Procurement Division.

BILLING CODE 7537–01–M

Arts and Artifacts Indemnity Panel Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. Law 92–463 as amended) notice is hereby given that a meeting of the Arts and Artifacts Indemnity Panel of the Federal Council on the Arts and the Humanities will be held at 1100 Pennsylvania Avenue, NW., Washington, DC 20506, in Room 730, from 9:00 a.m. to 5:00 p.m. on Tuesday, November 21, 1989.

The purpose of the meeting is to review applications for Certificates of Indemnity submitted to the Federal Council on the Arts and the Humanities for exhibitions beginning after January 1, 1990.

Because the proposed meeting will consider financial and commercial data and because it is important to keep value of objects, methods of transportation and security measures confidential, pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 16, 1978, I have determined that the meeting would fall within exemptions (4) and (9) of U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of views and to avoid interference with the operations of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Stephen J. McCleary, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, or call 202/786–0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7537–01–M

NATIONAL SCIENCE FOUNDATION

Establishment of a Routine Use for Microdata for the Survey of Doctorate Recipients

Background

The National Science Foundation (NSF) collects information on the characteristics of a sample of individuals who have received a doctoral-level degree in science and engineering fields. This biennial survey is referred to as the Survey of Doctoral Scientists and Engineers. The survey results are currently analyzed

statistically by employees and contractors of the National Science Foundation and the co-sponsors of the survey (the National Institutes of Health, the Department of Agriculture and the Department of Energy). There have been numerous requests from the research community to make the microdata from this survey more readily available for secondary analysis.

Plans for the Release of Microdata

It is NSF's intent to release microdata from the 1989 and subsequent Surveys of Doctoral Scientists and Engineers in two formats that are intended to be used only for statistical purposes. For the 1989 survey we intend to produce the following:

(1) A public use tape will be prepared with selected information on 1989 survey respondents. This tape will include information obtained from these 1989 respondents prior to 1989 in addition to their 1989 responses. All direct identifiers (e.g., name, social security number, address, and phone number) will be stripped from this tape. In addition, information which could be easily used to identify someone indirectly will either be stripped from the tape or otherwise disguised. For example, sex and race will not be included on the tape. Instead of identifying colleges and universities by name, these institutions will be grouped by type of institution. This tape will be made available to the public.

(2) A limited access tape for 1989 survey respondents designed to serve statistical research needs that cannot be met by the public use tape will be prepared. This tape will be stripped of direct identifiers, but it will contain other information stripped from the public use tape (e.g., sex and race). Release of the limited access tape will only be made under stringent safeguards. It is expected that researchers wishing to use this tape will need to:

(a) Submit a prospectus explaining the research to be conducted. This prospectus will be reviewed by relevant NSF program staff.

(b) Sign a non-disclosure form.

(c) Use the tape at a computer facility designated by NSF.

(d) Agree to cite NSF and the Survey of Doctoral Recipients in any published results.

(e) Agree to provide two copies of all resulting publications to NSF.

(f) Comply with other procedures developed by NSF to protect the privacy of individuals.

For survey years after 1989 we will produce similar tapes to the 1989 tapes. These tapes will only include information for individuals responding to the 1989 or subsequent surveys.

Individuals wishing to comment on the proposed routine use of the microdata from the Survey of Doctoral Scientists and Engineers should submit comments in writing to the following address within thirty days of the publication date of this notice: Dr. Carolyn F. Shettle, National Science Foundation, Room L–611, 1800 G Street, NW., Washington, DC 20550.

Dated: October 26, 1989.

William L. Stewart,

Director, Division of Science Resources Studies, National Science Foundation.

[FR Doc. 89–25555 Filed 10–30–89; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–423]

Northeast Nuclear Energy Co.; Millstone Nuclear Power Station, Unit No. 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–49 to Northeast Nuclear Energy Company (the licensee), for Millstone Unit 3 located in the Town of Waterford, Connecticut.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would provide revised Technical Specifications to decrease the reactor trip set point and allowable value for the reactor coolant pump (RCP) low shaft speed (underspeed trip set point) from 97.8 to 95.8 percent of rated speed and from 94.6 to 92.5 percent rated speed, respectively.

The proposed action is in accordance with the licensee's application dated August 1, 1989.

The Need for the Proposed Action:

The proposed changes are needed to prevent unnecessary plant trips which could result from electrical grid disturbances.

Environmental Impacts of the Proposed Action:

The proposed changes to the Technical Specifications would not affect plant effluents during normal or accident conditions. Accordingly, there are no significant radiological/non-radiological environmental impacts associated with the proposed licensing action.

Alternatives to the Proposed Action:

Since the staff concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and might result in additional plant trips.

Alternative Use of Resources:

The action would involve no use of resources not previously considered in the "Final Environmental Statement related to the operation of Millstone Nuclear Power Station Unit No. 3" dated December 1984.

Agencies and Persons Consulted:

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding No Significant Impact

The staff has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the forgoing environmental assessment, we conclude that the proposed actions will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated August 1, 1989, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards Meeting; Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the advisory Committee on Reactor Safeguards will hold a meeting on November 16–18 1989 in Room P–110, 7920 Norfolk Avenue, Bethesda, Maryland. Notice of this meeting was published in the Federal Register on October 18, 1989.

Thursday, November 16, 1989

Room P–110, 7920 Norfolk Avenue, Bethesda, MD.

8:30 a.m.–8:45 a.m.: Comments by ACRS Chairman (Open)—The ACRS Chairman will report on items of current interest.

8:45 a.m.–11:00 a.m.: Nuclear Power Plant Accident Management (Open)—The Committee will review and report on a proposed NRC generic letter and NUREG/CR report on accident management at nuclear power plants. Representatives of the NRC staff will participate.

11:00 a.m.–12:00 Noon: Definition of "Adequate Protection" (Open)—The Committee will discuss a proposed report to the Commission on ACRS and NRC staff positions regarding the definition of "adequate protection" as it relates to the NRC quantitative safety goals. Representatives from the NRC staff will participate, as appropriate.

1:00 p.m.–1:45 p.m.: Standardized PWRs (Open)—The Committee will hear a briefing regarding the status of the NRC staff's review of proposed standardized PWRs, including the WAPWR SP/90, Westinghouse AP–600, and the CESSAR-System 80 plus.

1:45 p.m.–3:15 p.m.: Access Authorization at Nuclear Power Plants (Open/Closed)—The Committee will review and report on the proposed final rule, 10 CFR part 743, "Access Authorization Program for Nuclear Power Plants." Representatives of the NRC staff will participate, as appropriate.

Portions of the session will be closed as required to discuss safeguards and security information at nuclear power plants.

3:30 p.m.–5:00 p.m.: Integration of the Nuclear Regulatory Process (Open)—The Committee will discuss proposed ACRS recommendations on how best to integrate the nuclear regulatory process.

5:00 p.m.–6:00 p.m.: Three Mile Island Nuclear Station, Unit 2 (Open)—The Committee will hear a briefing regarding analysis of the loss of cooling accident at TMI–2.

Friday, November 17, 1989

8:30 a.m.–12:30 p.m.: GE Advanced Boiling Water Reactor (Open/Closed)—The Committee will review and report on the initial portion (Mod 1) of the NRC staff's review of the GE Advanced boiling Water Reactor.

Representatives of the NRC staff and the GE Company will participate as appropriate in the discussion regarding this standardized plant design.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to this design. Representatives from the NRC staff will participate, as appropriate.

1:30 p.m.–4:30 p.m.: Nine Mile Point Nuclear Station, Unit 1 (Open)—The Committee will review and report on the proposed restart of this nuclear plant which has been shut down for an extended period due to safety-related reasons. Representatives from the NRC staff and licensee will participate, as appropriate.

4:45 p.m.–5:15 p.m.: Future Activities (Open)—The Committee will discuss anticipated ACRS subcommittee activities, items proposed for consideration by the full Committee, and ACRS meeting dates for CY 1990.

5:15 p.m.–6:15 p.m.: Generic Issue—87, HPCI Steam Line Break Without Isolation (Open)—The Committee will discuss a proposed ACRS report to the NRC regarding the resolution of this generic issue proposed by the NRC staff.

Saturday, November 18, 1989

8:30 a.m.–12:30 p.m.: Preparation of ACRS Reports to the NRC (Open)—The Committee will discuss proposed ACRS reports to the NRC regarding items considered during this meeting.

1:30 p.m.–2:30 p.m.: ACRS Subcommittee Activities (Open)—The Committee will hear and discuss reports of ACRS subcommittee activities including thermal-hydraulic phenomena and ACRS policies and practices.

2:30 p.m.–2:45 p.m.: Appointment of ACRS Members (Open/Closed)—The Committee will hear and discuss a report regarding the status of the appointment of candidates proposed for selection as ACRS members.

Portions of this session will be closed as necessary to discuss information the release of which would represent a clearly unwarrranted invasion of personal privacy.

2:345 p.m.–3:00 p.m.: Activities of ACRS Members (Open)—The Committee will discuss related activities of ACRS members.

3:00 p.m.–3:30 p.m.: Miscellaneous (Open)—The Committee will complete discussion of items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on September 27, 1989 (54 FR 39594). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and televison cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Public Law 92–463 that it is necessary to close portions of this meeting as noted above to discuss safeguards and security information at nuclear plants (5 U.S.C. 552b(c)(3), information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)), and Proprietary Information applicable to matters being discussed (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301/492–8049), between 7:30 a.m. and 4:15 p.m.

Dated: October 26, 1989.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Request for Approval of OPM Attitudinal Survey Submitted to OMB for Expedited Clearance

AGENCY: Office of Personnel Management.

ACTION: Expedited Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces an expedited request for clearance of the attached OPM attitudinal telephone survey. This survey is required to carry out OPM's statutory mandate to study the operation and administration of the Federal Employees Health Benefits Program and to formulate a comprehensive reform package for Congress by February 7, 1990, as required by Public Law 101–76.

Approximately 1,500 annuitants are expected to be contacted by telephone on a one time only basis; each telephone survey requires approximately 10 minutes to complete, for a total burden of 250 hours. A copy of the proposed survey questions appear below.

For copies of this proposal, call Larry Dambrose on (202) 632–0199.

DATES: Comments on this proposal should be received within 5 working days from the date of this publication. This is an expedited clearance and OMB approval is requested within 1 day after the fifth working day of this publication.

ADDRESSES: Send or deliver comments to—Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Abby Block, (202) 632–4958.

U.S. Office of Personnel Management

Constance Berry Newman,

Director.

FEHB Annuitant Telephone Survey

I am conducting a survey for the Office of Personnel Management about the Federal Employees Health Benefits Program. We are interested in your opinions about the program. The information you provide will be used by OPM in developing proposed changes to the Federal Employees Health Benefits Program.

First I'd like to ask you some questions about yourself.

ABOUT YOURSELF

1. Are you married? yes no
2. How much per month is your gross annuity, to the closest hundred dollars?
3. To which of the following age groups do you belong?
   a. under 55
   b. 55 to 64
   c. 65 or older
4. To which health plan do you belong? _____
5. Are you enrolled as Self Only or Self and Family?
6. If family, how many dependents, including your spouse, are covered under your FEHB Plan? _____
7. How long have you been in your current plan? _____
8. How many years have you been covered under the FEHB Program? _____
9. How many times did you and/or your covered family members visit a health care provider, other than a dentist, during the past year? _____
10. Were you and/or a covered family member an overnight patient in a hospital during 1989? yes no
11. Are you now covered by Medicare? _____ Own Coverage _____ Spouse Coverage _____ Not Covered
12. Will you be covered at age 65? _____ Own _____ Spouse _____ Will Not Be Covered

ABOUT FEHB

Now I'm going to ask you a few questions about the Federal Employees Health Benefit Program.

1. Why did you choose your current health plan?
   1. price
   2. special benefits
   3. wanted an HMO
   4. familiar with plan
   5. recommended
   6. covered by plan under another's enrollment
   7. organizational sponsorship
   8. other _____

Please answer A or B to the next two questions.

2. If the premiums were the same, would you pick (A) a plan that required you to pay a $300 deductible after which the plan then paid 80% of hospital and doctors' bills, or (B) a plan that had a $100 deductible and then paid 70% of hospital and doctors' bills?
3. If the premiums were the same, would you pick (A) a plan that paid 80% of hospital and doctors' bills and had a $3000 limit on your total out of pocket expenses for the year, or (B) a plan that paid 70% of hospital and doctors' bills and had a $1500 limit on your total out of pocket expenses for the year?

Please answer AGREE or DISAGREE to the rest of the questions.

4. I think that every FEHB plan should provide, at a minimum, the same basic benefits package.
5. I would prefer a health plan that is strong in basic benefits, such as hospital, physician services and prescription drugs, without extras such as dental, vision, and hearing.
6. I would prefer a plan that covers my typical expenses such as visits to the dentist or to my physician for regular check-ups over a plan that emphasizes hospital and major medical coverage.
7. I think the FEHB Program should be simpler and have fewer plans to choose from than the current program.
8. Employee organization plans should be able to offer benefits in a restructured FEHB Program.
9. There should be an HMO alternative wherever one is available.
10. There should be benefits packages tailored specifically for employees, annuitants, and Medicare covered annuitants.
11. There should be different Government contribution rates for employees, annuitants, and Medicare covered annuitants.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review of the Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash (202) 272–2142

Upon Written Request Copy Available From: Securities & Exchange Commission, Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549

Reinstatement; Rule 17a–3; File No. 270–26, Rule 17a–4; File No. 270–242

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for reinstatement for OMB clearance, Rule 17a–3 which requires certain reports to be made by exchange members, brokers, and dealers. Six thousand respondents incur an estimated burden of two hundred and forty nine hours to comply with the rule; and Rule 17a–4 which requires exchange members, brokers and dealers to preserve for prescribed periods of time certain records required to be made by Rule 17a–3 and other Commission rules. Eight thousand and eight hundred respondents incur an estimated average of two hundred and fifty burden hours to comply with the rule.

The estimated average burden hours are made solely for the purpose of the Paperwork Reduction Act and are not derived from a comprehensive or even a representative survey or study of costs of SEC rules. Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and Gary Waxman, Clearance Officer, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: October 23, 1989.

Jonathan Katz,

Secretary.

[Rel. No. 34-27369; File No. SR-NASD-89-48]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Filing and Immediate Effectiveness of Proposed Rule Change Relating to Modification of Grace Period to Establish New SOES Exposure Limit

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act"), notice is hereby given that on October 16, 1989, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change modifies the grace period for restoration of SOES exposure limits in NASDAQ/NMS securities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change increases the grace period allowed by the NASD for renewal by NASDAQ/NMS market makers of their SOES exposure limit.[1] Failure by a market maker to renew its exposure limit results in a suspension from SOES. This modification has been necessitated by the extraordinary market conditions encountered on Friday, October 13, 1989. Section (c)(2)(E) of the SOES rules provides that the duration of the standard grace period will be established and published by the Association. Article VII Section 3 of the By-Laws allows Association action regarding the operation of a system owned by the NASD or its subsidiaries under emergency or extraordinary market conditions.

The NASD believes that the rule change is consistent with Section 15 A (b)(6) of the Act which, among other things, requires the rules of the Association to be designed to perfect the mechanism of a free and open market and national system and in general to protect investors and the public interest. The rule change will facilitate SOES participants' ability to continue to function in the SOES market under extraordinary market conditions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the proposed rule change imposes any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Act and subparagraph (e) of Rule 19b-4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by November 21, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: October 19, 1989.

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Midwest Securities Trust Company Relating to Procedues Regarding the Payment of Cash in Lieu of Bonds in Portions Less Than $1,000 Principal Amount in Bond Issues Paying in Kind

October 24, 1989.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 12, 1989, the Midwest Securities Trust Company ("MSTC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached as Exhibit A is the text of a proposed rule change of MSTC which interprets and clarifies MSTC's current procedures regarding the payment of cash-in-lieu of bonds in portions less than $1,000 principal amount in bond issues paying in kind (PIK).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Under current MSTC procedures, MSTC does not process fractional shares (those in denominations of less than one share) or bonds for denominations in principal amount less than $1,000 ("baby bonds"). MSTC also does not process stock dividend allocations in fractional shares and accordingly distributes cash in lieu of fractional shares. The proposed rule change clarifies that, as in the case of payments in cash of fractional shares, MSTC will also distribute cash in lieu of the "baby bond" portion of interest distributions involving PIK issues.

The proposed rule change is consistent with Section 17A of the Act, in that it promotes the prompt and accurate clearance and settlement of PIK bond transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MSTC does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Act and subparagraph (e) of Rule 19b-4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities & Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to File No. SR-MSTC-89-08 and should be submitted by November 21, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Administrative Bulletin

August 3, 1989

To: All participants.
Attention: Dividend manager/head cashier.
Subject: Cash-in-lieu of baby bonds.

Due to the increase in bond issues paying in kind (PIC), MCC/MSTC will commence to pay cash-in-lieu of the baby bond portions (less than $1,000 principal amount) of this type of distribution. This policy change becomes effective immediately and will maintain interfacing compatibility with other RIO members.

MCC/MSTC will also pay cash-in-lieu of baby bonds on any type of distribution resulting in a baby bond residue. On all claims made by, or against, MCC/MSTC, the baby bond portion will also be paid in the form of cash-in-lieu.

Questions regarding this bulletin may be directed to your Participant Services Representative

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Changes and Notice of Filing and Order Granting Accelerated Approval to Amendments to Proposed Rule Changes Relating to Basket Trading

I. Introduction

On June 2, 1989, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and rule 19b–4 thereunder,[2] a proposed rule change to trade "Exchange Stock Portfolios" ("ESP's"), standardized baskets of stocks, on the floor of the exchange. The proposed rule change consists of changes to existing Exchange rules, the adoption of a new "800 series" of rules that apply solely to ESP trading, the adoption of guidelines to implement certain provisions of the proposed rules, and an ESP fee schedule. Amendments No. 1, 2, and 3, submitted on September 1 and 13 and October 18, 1989, respectively, proposed additional changes to the Exchange's rules, fees and the statements of purposes governing the proposed rule change.[3]

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26908, June 8, 1989), and by publication in the **Federal Register** (54 FR 25516, June 15, 1989). Nine comment letters were received regarding the proposed rule change.[4]

[1] 15 U.S.C 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1989).

[3] In Amendment No. 2, The NYSE proposed, among other things, that the Commission initially approve proposed NYSE Rules 805 and 806 for only a 6-month period. In amendments No. 2 and 3, the exchange requested accelerated approval of file No. SR–NYSE–89–05, as amended.

[4] *See* notes 59–71, *infra* and accompanying text.

II. Description of the Proposal

A. ESP Description.

The ESP service enables the trading of standardized baskets of stocks at an aggregate price in a single execution on the Exchange's stock Floor.[5] An ESP trade will result in a transfer to the buyer of ownership of each of the component stocks. When the transaction is completed, the buyer will be entitled to all rights attending ownership of the basket stocks (including rights to vote and receive dividends), and will be free to sell or hold each stock separately.

That same buyer may later sell the basket stocks he acquired, either individually or through another ESP trade. In order to sell the basket stocks through the ESP service, they must be identical as a group with the standardized ESP basket at the time of sale. If a buyer has sold individual basket stocks and has not separately re-acquired them, or if changes have been made to the index sincethe basket was purchased, the buyer will havew to "rebalance" his position by purchasing or borrowing the additional securities so that he can deliver all the current ESP stocks in their proportionate number of shares.

Initially, ESP trading will be available for executions of a standardized basket of 500 stocks comprising the "Standard & Poor's ("S&P") 500 ("S&P 500") Portfolio Index."[6] At the commencement

[5] NYSE Rule 800(b)(iii) defines the term "basket" as "a group of stocks that the Exchange designates as eligible for execution in a single trade through the ESP service and that consists of stocks whose inclusion and relative representation in the group are determined by the inclusion and relative representation of their current market prices ina widely-disseminated stock index reflecting the stock market as a whole." *See also* the definition contained in proposed Rule 431(a)(8). NYSE Rule 801: (1) Limits ESP trading to baskets that the Exchange has approved; (2) authorizes the Exchange to change the component stocks comprising a basket; and (3) requires that a basket's component stocks have been admitted to dealings for ESP purposes on an "issued", "when issued", or "when distributed" basis. *See also* NYSE Rule 804.

[6] Section 12(a) of the act generally prohibits the trading of a security on a national securities exchange unless the security is requested on the exchange. Upon application by an exchange and Commission approval, however, section 129(f)(1) of the Act and Rule 12f–1 thereunder authorize the Commission to extend unlisted trading privileges ("UTP") to any security registered pursuant to Sections 12(b) or (g) of the Act. The NYSE's S&P 500 Portfolio Index currently is comprised of 39 stocks that are not listed for trading on the NYSE. Pursuant to Section 12(f) of the Act, the Exchange has submitted applications for UTP in 206 stocks for the limited purpose of ESP stock basket trading based upon the S&P 500 Portfolio Index, which the Commission has approved by seperate order. Because the composition of the market baskets will change from time to time as the composition of the S&P 500 Index changes, it will be necessary for the

Continued

of ESP trading, each 500-stock ESP will have a value of approximately $5 million.[7]

The S&P 500 Portfolio Index is nearly identical to the S&P 500 Index, containing the same stocks and with virtually the same capitalization weighting. It differs in two respects to accommodate standardized basket trading. First, the S&P 500 Portfolio Index is designed so that fractional share interests that would result from a basket derived directly from the S&P 500 Index are rounded up or down to the nearest whole share. Because of this factor, a basket based on the S&P 500 Portfolio Index will not contain fractional shares.

Second, in order to decrease the occasions when rebalancing is necessary to liquidate a basket position, the Exchange may not adjust the S&P 500 Portfolio Index every time S&P adjusts the S&P 500 Index. At a minimum, the Exchange will adjust the S&P 500 Portfolio Index each calendar quarter. The Exchange will determine when additional adjustments will be made to the S&P 500 Portfolio Index in response to adjustments made to the S&P 500 Index. Generally, such additional adjustments will be made whenever an index stock is substituted or some other corporate event occurs that affects significantly an index stock's relative capitalization in the S&P 500 Index, such as the issuance of stock dividends or special cash distributions. Whenever an adjustment is made to the S&P 500 Portfolio Index, all intervening changes to the S&P 500 Index will be incorporated as well.[8]

The NYSE states that even with these two differences, the S&P 500 Portfolio Index closely tracks the S&P 500 Index. During the latter half of 1988, the "tracking" error between the two indexes never exceeded .02 index points.

Under § 220.18(a) of Regulation T,[9] ESP trades would be subject to the 50% initial margin requirement applicable to exchange-traded equity securities. In addition, basket stocks that are acquired through an ESP transaction would be subject to the 25% maintenance margin requirement set out in NYSE Rule 431(c)(1).

B. ESP Market Structure.

1. *Competitive Basket Market Makers.*—The Exchange will not use its standard specialist system to trade ESPs, but instead will employ a market structure consisting of "Competitive Basket Market Makers" ("CBMMs"), Exchange specialists, Floor brokers, and an ESP "Basket Book Broker" ("BBB"). The CBMMs will perform the principal market-making function for ESP trading,[10] and registration as a CBMM will trigger specific market-making obligations. In contrast to the traditional exchange specialist, CBMMs will not be required to maintain a presence on the Floor. They may fulfill their market-making functions through their upstairs ESP terminals, which will provide them with the same basket data available to the crowd on the Floor, plus order-entry capability and identification of their own entered orders. Under proposed NYSE Rule 36.20, CBMMs (or CBMM nominees) on the Floor also will have telephone access to their upstairs desks.

Pursuant to NYSE Rule 807A(a), a NYSE member or member organization may register as a CBMM by satisfying such registration requirements as the Exchange may from time to time specify. Registered CBMMs must meet a minimum $10 million capital requirement over and above any and all other federal and/or Exchange capital requirements.[11] Exchange members or member organizations registered as CBMMs in the ESP market basket would be treated as specialists for margin purposes, and would be entitled to good faith margin treatment for ESP transactions effected in their CBMM accounts.[12]

NYSE Rule 807A(e) authorizes CBMMs to withdraw voluntarily their CBMM registration with proper notice to the Exchange. The NYSE Guidelines for the 800 Series Rules—Basket Trading ("Basket Guidelines") establish a 30 day written notice requirement for withdrawal of a CBMM registration. A CBMM, however, may not give such notice prior to the 60th day after its registration becomes effective, and hence must remain registered as a CBMM until at least the 90th day following the effective date of its registration. A member or member organization so withdrawing its CBMM registration will not be eligible to re-register as a CBMM for 30 days after such withdrawal. Moreover, a CBMM may petition the Exchange's Department of Market Surveillance in writing to suspend its CBMM market-making obligations, but only for cause.

In return for the CBMM franchise, member firms undertake certain affirmative market-making obligations set forth in NYSE Rule 807B. The following specific obligations govern CBMM market-making activities: (1) A CBMM may make a proprietary bid or offer only in a manner consistent with the maintenance of a fair and orderly market; (2) a CBMM must help alleviate temporary disparities between supply and demand; (3) a CBMM must effect proprietary trades in a reasonable and orderly manner in relation to the market in general and to the basket market; and (4) a CBMM must maintain a continuous, two-sided quotation in the basket subject to a specified bid-ask parameter.[13] The rule authorizes a

NYSE to request UTP in additional securities in the future. Section 12(f)(5) of the Act requires that 10 days' notice be provided to the issuer of a security for which UTP has been requested. This requirement could hamper trading in standardized market baskets, as the NYSE cannot receive 10 days advance notice of changes in the S&P 500 Index.To remedy this, the Commission is considering a new rule [Rule 12a–7] that will exempt from section 12(a), solely for the purpose of market basket trading, securities included in a standardized market basket product approved by the Commission pursuant to section 19(b) of the Act.

[7] The dollar value of a basket bid or offer is determined by multiplying the basket multiplier and the number of index points bid or offered. NYSE Rule 801.10. Pursuant to NYSE Rule 800(b)(v), the term "basket multiplier" is defined as an amount which, when multiplied by the current price of a basket expressed in index points, establishes the dollar value of the basket. Subject to compliance with Rule 19b–4 under the Act, the Exchange shall from time to time specify each basket's multiplier. The Exchange will issue specifications setting forth the number of shares of each of a basket's component stocks that comprise a basket based upon a formula that determines the percentage of the total index that each component stock represents. NYSE Rule 801.10.

[8] The NYSE states that index information will be readily available to investors. The Exchange will use S&P's Index Alert System to disseminate current information about the composition and capitalization weighting of the S&P 500 Portfolio Index. In addition, the Exchange will maintain in files available to the public current data on the composition of the component stocks and their relative representation in the Index and the method of calculating the Index. The Exchange also will make available computer disks containing all current data on the state of the Index as well as a facility for disseminating current data on the component stocks through commercial electronic mail.

[9] 12 CFR 220.10(a) (1989).

[10] In addition to the CBMMs' principal market-making function for ESP trading, specialists and the BBB perform a secondary, passive ESP market-making function. *See* notes 17–32, *infra* and accompanying text.

[11] NYSE Rule 807A(d). *See also*, Rule 15c3–1 under the Act, 17 CFR 240.15c3–1 (1989); NYSE Rule 325.

[12] Under proposed NYSE Rule 431(e)(2)(D), a member organization may clear and carry a CBMM's ESP trades upon such margin as the member and market maker may agree so long as the resulting margin adequately covers the risk attendant to the Market Functions Account (*i.e.*, CBMM account) in which the ESP transactions are carried. Moreover, NYSE Rule 807A(g) authorizes a CBMM to have a bank or a member finance its ESP transactions in a special or joint account on a margin basis that is mutually agreeable with the carrying organization.

[13] In addition, NYSE Rule 803 imposes on CBMMs obligations comparable to those that Rule 11Ac1–1 under the Act, 17 CFR 240.11Ac1–1 (the firm quote rule) and NYSE Rule 60 impose with respect to

Continued

CBMM to comply with its market-making obligations by having a Floor broker represent and execute orders on its behalf.

The Basket Guidelines include provisions governing the withdrawal of CBMM registration, the suspension of CBMM market-making obligations, and the transfer of CBMM registration. The Basket Guidelines also require CBMMs to maintain certain books and records, and to file certain reports with the Exchange.

2. *Basket Book Broker.*—The BBB will be a Floor broker who will perform a secondary, passive ESP market-making function. The BBB will maintain a bid and offer in the ESP basket, but will not be required to maintain a presence on the Floor. The BBB will maintain his bid and offer through his upstairs ESP terminal, which will provide him with the same basket data available to the crowd on the Floor, plus order-entry capability and identification of his own entered orders. Under proposed NYSE Rule 36.20, the BBB (or BBB nominee) on the Floor also will have telephone access to his upstairs desk.

The BBB will be subject to the same capital requirements as CBMMs. The BBB will be required to register with the Exchange, and may withdraw his registration upon 30 days' written notice to the Exchange. The Basket Guidelines establish a 30 day written notice requirement for withdrawal of a BBB registration. A BBB, however, may not give such notice prior to the 60th day after its registration becomes effective, and hence must remain registered as a BBB until at least the 90th day following the effective date of its registration. A member or member organization so withdrawing its BBB registration will not be eligible to re-register as a BBB for 30 days after such withdrawal. Moreover, a BBB may petition the Exchange's Department of Market Surveillance in writing to suspend its BBB market-making obligations, but only for cause.

In return for the BBB franchise, member firms undertake certain affirmative market-making obligations set forth in NYSE Rule 807B. The following specific obligations govern BBB market-making activities: (1) A BBB may make a proprietary bid or offer only in a manner consistent with the maintenance of a fair and orderly market; (2) a BBB must help alleviate temporary disparities between supply and demand; (3) a BBB must effect proprietary trades in a reasonable and orderly manner in relation to the market in general and to the basket market; and (4) a BBB must maintain a continuous, two-sided quotation in the basket subject to a specified bid-ask parameter.[14] The rule authorizes a

Tier 1" quotation will be derived from the weighted summation of the prevailing bids and offers for each of the basket's component stocks as disseminated through the consolidated

to the consolidated tape.[24] Because the ESP system will calculate and disseminate the aggregate Tier 1 and Tier 2 quotes only once every 15

crowd to see both the ESP bid-offer spread and the depth of the ESP market.

Only the BBB's terminal has both execution and confirmation capabilities. All basket executions must be entered

(offer) no more than ⅛ point lower (higher) than that rounded value. The BBB must establish his Tier 2 bid (offer) no more than ¼ point lower (higher)

and the lowest offer will have priority.[25] Aggregate Tier 1 and Tier 2 bids and offers, however, are accorded priority over all other bids and offers at the same price. Otherwise, bids and offers

VOL 54 ISS 209 OCT 31 1989 UMI

CBMM to comply with its market-making obligations by having a Floor broker represent and execute orders on its behalf.

The Basket Guidelines include a general requirement that a CBMM must maintain a spread of not greater than two index points during normal market conditions as the bid-ask parameter. Nevertheless, whenever the spread in the S&P 500 Index quote [14] exceeds two points, the required bid-ask spread can equal that spread.

Although CBMMs, like Floor brokers and BBBs, can represent customer orders, as a general matter, NYSE Rule 809 establishes that only CBMMs can initiate basket trades for their own accounts on the Floor or from terminals.[15] Thus, only CBMMs can facilitate a customer's ESP transaction.[16] In addition, proposed NYSE Rule 111(g) authorizes a CBMM to initiate proprietary trades to liquidate a position in a component stock that the CBMM established through basket transactions in the same trading session, whether acquired to accommodate customers, to meet his market-making obligations, or otherwise.

2. *Specialists.* NYSE specialists in the individual stocks comprising the ESP basket will, in the aggregate, act as one passive ESP market maker. Whenever all of the basket's component stocks listed on the Exchange are open for trading, NYSE Rule 803(e) requires that the Exchange automatically calculate and disseminate through the ESP system at 15-second intervals the aggregate Tier 1 and Tier 2 quotations in all basket stocks.[17]

A specialists's "Tier 1 component stock" quotation means the price of the best published bid and published offer for a basket's component stock that is listed on the Exchange.[18] An "aggregate Tier 1" quotation will be derived from the weighted summation of the prevailing bids and offers for each of the basket's component stocks as disseminated through the consolidated quotation system, plus the Tier 1 "mini-basket" bid and offer for the non-NYSE component stocks.[19] When a basket order is executed at the aggregate Tier 1 quote, upon receiving the basket execution notice through the ESP service, a specialist must assign, take, or supply the number of shares of the component stock at the execution price needed to complete one basket and must report the size and price as a trade to the consolidated tape.[20]

NYSE Rule 800(b)(xii) defines a "Tier 2 component stock" quotation as a bid or offer for the number of shares of a basket's component stock necessary to comprise three baskets. NYSE Rule 803(e) specifies that the "aggregate Tier 2" quotation derives from the weighted summation of the prevailing bids and offers for each of the component stocks necessary to fill three baskets, plus the Tier 2 "mini-basket" bid and offer for the non-NYSE component stocks.[21] The aggregate Tier 2 quote represents a bid or offer for three baskets, and is designed to operate as a limit off-market, away from the Tier 1 quote. The Basket Guidelines specify that the quotes for the component stocks comprising the Tier 2 aggregate quotation may each be "auto-quoted" at, or ⅛ or ¼ point away from, the Tier 1 individual quote.[22] If a basket order is executed at the aggregate Tier 2 quote, each component stock specialist must assign, take, or supply at the execution price the number of shares of his specialty stock needed to complete three baskets.

When the ESP system sends a basket execution notice to the component stock specialist indicating that a basket order has been executed at the aggregate Tier 1 or Tier 2 quotation, the specialist must assign the execution at the execution price to interest on his book or in the trading crowd in accordance with existing stock rules of priority and precedence,[23] as well as report the price to the consolidated tape.[24] Because the ESP system will calculate and disseminate the aggregate Tier 1 and Tier 2 quotes only once every 15 seconds, and because of the human and system time involved in entering an ESP trade and disseminating the execution notices, the Tier 1 or Tier 2 execution price indicated in a basket execution notice may be superior or inferior to the prevailing market quotation at the time the specialist receives the execution notice. Nevertheless, the execution price indicated in the execution notice always will apply. If the execution price indicated in the notice is inferior to the prevailing market price, the specialist must assign the execution to the bid or offer then having priority at the price indicated in the notice. If the execution price indicated in the notice is superior, the specialist must take or supply the necessary shares. The specialist also is required to take or supply the necessary shares when the size of the interest on the book or in the trading crowd at or better than the execution price is insufficient or, in a non-firm market, when it is impractical for him to assign the execution to the book or trading crowd.[25]

3. *The Basket Book Broker.* Under NYSE Rule 808, the BBB presides over all ESP executions, executes orders entrusted to him, maintains the ESP display unit, arranges the opening of the ESP market, presides over the ESP call market, maintains a market in mini-baskets, reports ESP trades to market data vendors, and otherwise generally supervises the ESP market. Qualified members or member organizations may register as a BBB,[26] and the BBB franchise may be operated on a rotational basis.[27] Each BBB must arrange to have a member qualified to act as a BBB in attendance during all business hours.

The ESP display unit is maintained by the BBB. The display unit on the Floor provides members in the trading crowd ESP market data that is also available off-Floor through vendors (*i.e.*, the ESP last sale price and current best quote, with sizes), as well as the size interest at each minimum tick away from the prevailing bid and offer for the basket. Thus, the display unit allows the trading crowd to see both the ESP bid-offer spread and the depth of the ESP market.

Only the BBB's terminal has both execution and confirmation capabilities. All basket executions must be entered into the system by the BBB, and only the BBB's data display identifies the entering member firms. The BBB uses a terminal to perform its order entry function. CBMMs also may enter orders through their upstairs terminals. CBMMs and brokers in the crowd also may enter orders in terminals near the trading location. If the CBMM or broker order would result in an execution, then the BBB would enter the execution into the system.

The BBB has responsibility for the ESP limit order "book." NYSE Rule 808(f) requires a BBB to execute promptly any immediately-executable limit orders entrusted to him at the price shown on the display unit, in accordance with price and time priority, against the prevailing contra-side interest until the order is filled, and to place promptly any other limit orders on the basket display unit.

In conjunction with specialist participation for purposes of Tier 1 and Tier 2 basket executions, the BBB acts also as a passive market maker with respect to those stocks that are not NYSE-listed.[28] The BBB makes a market in the "mini-basket" [29] by disseminating "Tier 1 mini-basket" quotations and "Tier 2 mini-basket" quotations, *i.e.*, "bids and offers for the mini-basket that are related to the markets for the stocks included in the mini-basket in accordance with such parameters as the Exchange may from time to time prescribe." [30] The Basket Guidelines provide that the BBB must establish Tier 1 and Tier 2 quotes expressed in ⅛ point increments either as follows or pursuant to such other criteria as the Exchange's Market Surveillance Department may prescribe. In establishing his Tier 1 quote, the BBB must round the weighted sum of the bids (offers) for the mini-basket's component stocks down (up) to the nearest ⅛ point and must set his bid (offer) no more than ⅛ point lower (higher) than that rounded value. The BBB must establish his Tier 2 bid (offer) no more than ¼ point lower (higher) than his Tier 1 bid (offer). When a basket order is executed at the aggregate Tier 1 or Tier 2 quotation, the BBB must take or supply the necessary mini-baskets at the price indicated in the basket execution notice.[31] Upon the execution of a basket transaction, NYSE rule 808.15 requires the BBB to report for dissemination, and submit to the Exchange for comparison, such transaction-related information as the Exchange prescribes.[32]

C. ESP Trading Rules.[33]

1. *Acceptable Orders, Limit Orders and the Book.* NYSE Rule 802(d) permits only market and limit orders to be entered on the basket display unit. Additionally, in contrast to traditional block trading procedures,[34] the ESP rules provide no special rules to handle large "one-sided" stock basket orders. Rather, the rules for ESP trading provide that orders may be executed against opposite-side limit orders on the display unit at their displayed prices, in accordance with price and time priority, until the order is filled, thereby allowing a larger buyer or seller of baskets to "walk the book" without having to effect the execution at a single "clean-up" price.[35]

2. *Rules of Priority, Parity and Precedence.* For purposes of ESP trading, NYSE Rule 805 makes no distinction between proprietary and customer basket orders. Accordingly, ESP priority rules, based strictly on time and price, apply equally to agency and principal interest.[36]

ESP baskets will trade in an auction market based on strict time and price priority, and traditional rules of priority or precedence based on size do not apply to ESP trading.[37] The highest bid and the lowest offer will have priority.[38] Aggregate Tier 1 and Tier 2 bids and offers, however, are accorded priority over all other bids and offers at the same price. Otherwise, bids and offers displayed on the basket display unit enjoy priority based on the order of entry into the ESP service.[39] Basket orders will retain time priority once they are entered on the display unit, and intervening trades will not result in a new auction.[40]

3. *Crossing Orders.* Under NYSE Rule 805(d), a member may cross two agency orders without exposing either side, but only at a price that is better than the best bid and offer on the ESP display unit and only if the crossing price is announced to the trading crowd. Thus, a Floor broker or CBMM can cleanly cross customer orders for ESPs anywhere within the prevailing ESP quote, by executing the cross on the Floor, and then giving it to the BBB to enter into the system.[41]

CBMMs also can enter agency crosses through their terminals by sequential entry of each side, although they risk a break-up during the time it takes to enter the second side. In either case, if the crossing price is at or away from the prevailing bid of offer, the broker or CBMM can execute the cross only by clearing the book of all quotes that have priority. Although CBMMs, like Floor brokers and BBBs, can represent customer orders, as a general matter, under NYSE Rule 809 only CBMMs can initiate basket trades for their own accounts on the Floor or from terminals.[42]

Proposed NYSE Rule 808(a) permits CBMMs to facilitate a customer's order at a price that is better than the best bid or offer on the ESP display unit, after communicating the facilitation price to other members in the trading crowd.[43] NYSE Rule 808(b) prohibits another Exchange member from interceding in the facilitation if the proposed facilitation price is only one "minimum variation" (*i.e.*, .01 index points) better than the prevailing quote on the customer's side of the market.[44] When a

---

quotations for individual stocks. Basket quotations always will be firm under Rule 803, except when the basket market is in the call mode. *See* NYSE Rule 815.

[14] The S&P 500 Index quotation reflects the mathematical aggregation of all the bid and offer quotations of the component stocks multiplied by their respective percentage weighting.

[15] Pursuant to NYSE Rule 809, a non-CBMM member may initiate proprietary basket trades on the Floor to offset a basket transaction made in error or, subject to NYSE Rule 92, a non-CBMM member on the Floor may accept proprietary basket orders initiated off the Floor.

[16] *See* NYSE Rule 808.

[17] *See* proposed NYSE Rule 104.11A. NYSE Rule 803(e) permits specialist participation in the basket market through aggregate Tier 1 and Tier 2 quotes only when all the NYSE-listed stocks that comprise the S&P 500 Portfolio Index are open. Thus, no component stock specialist participates in the basket market unless all participate.

[18] *See* NYSE Rule 800(b)(xi). The terms "published bid" and "published offer" have the meaning given to them in Rule 11Ac1–1 under the Act, 17 CFR 240.11Ac1–1. *See also* proposed NYSE Rule 104.11A.

[19] *See* NYSE Rule 803(e). *See also* notes 28–32, *infra* and accompanying text for a description of the BBB's obligation to supply the Tier 1 and Tier 2 "mini-basket" quotations.

[20] *See* NYSE Rules 800(b)(iv), 800(b)(xi), and proposed NYSE Rule 104A.11A.

[21] *See* note 30, *infra* and accompanying test, for a definition of "mini-basket" quotations.

[22] The Basket Guidelines provide that the Exchange's Department of Market Surveillance may grant requests for wider settings consistent with applicable Exchange Depth Guidelines.

[23] *See* NYSE Rules 71 and 72.

[24] *See* proposed NYSE Rule 104.11A.

[25] *Id.*

[26] The BBB may be affiliated with a CBMM, but the two units must be separated in accordance with the guidelines of NYSE Rule 98. *See* NYSE Rule 808(h).

[27] A BBB may withdraw its registration by providing the Exchange's Department of Market Surveillance with 30 days' written notice. NYSE Rule 808(g).

[28] As discussed above, ESP trading initially will be available for executions of a standardized basket of 500 stocks based on the S&P 500 Portfolio Index, which is nearly identical to the S&P 500 Index. Because the S&P 500 Portfolio Index currently is comprised of 39 stocks that are not listed for trading on the NYSE, UTP will be necessary in order to trade these non-NYSE-listed issues as part of an ESP stock basket. *See* discussion at note 6, *supra*.

[29] NYSE Rule 800(b)(ix) defines the term "mini-basket" as "a group of stocks that consist of those of a basket's stocks that are not listed for trading on the Exchange and whose inclusion and relative representation in the group are determined by the inclusion and relative representation of their current market prices in the stock index from which the basket is derived."

[30] NYSE Rule 808.20(a).

[31] NYSE Rule 808.20(b).

[32] *See also* NYSE Rule 817.

[33] *See* File No. SR–NSCC–88–06. Securities Exchange Act Release No. 27021 (July 11, 1989), 54 FR 30125 (July 18, 1989), and Securities Exchange Act Release No. 27207 (September 1, 1989), 54 FR 37859 (September 13, 1989) for a description of the clearance and settlement rules applicable to ESPs. *See also* NYSE rule 817.

[34] *See, e.g.*, NYSE rule 127.

[35] *See* NYSE Rule 808(f).

[36] The Exchange has proposed that the Commission initially approve Rule 805 for only a six-month period. Once the Exchange has experience in the operation of Rule 805 in the basket market, the Exchange will propose permanent approval of Rule 805, either in its current form or modified in light of market experience.

[37] *See, e.g.*, NYSE Rules 71 and 72.

[38] NYSE Rules 805(a) and 805(c).

[39] NYSE Rules 805(b)(i) and 805(c).

[40] NYSE Rules 805(b)(iii) and 805(c).

[41] As stated *supra* note 3, the Exchange has proposed that the Commission approve Rule 805 for only a six-month period.

[42] *See* note 15, *supra* and accompanying text.

[43] The Exchange has proposed that the Commission initially approve NYSE Rule 806 for only a six-month period. Once the Exchange has experience in the operation of Rule 806 in the basket market, the Exchange will propose permanent approval of Rule 806, either in its current form or modified in light of market experience.

[44] *See* NYSE Rule 802(b).

VOL 54 ISS 209 OCT 31 1989 UMI

facilitation is more than the minimum variation from the prevailing quote, NYSE Rule 808(b) permits another member to intercede in a CBMM's facilitation trade by taking or supplying all of the baskets that the customer seeks at a price that is better for the customer than the facilitation price.

4. *Split Orders.* NYSE Rule 802.30 allows CBMMs to accommodate a customer's need for a customized basket through "split" orders that enable a CBMM to participate on the same side of the transaction with a customer. In a "vertical split", a customer takes or supplies all shares of specified component stocks of a basket and the CBMM takes or supplies the remainder. A CBMM may not take or supply more than 100 stocks when vertically splitting an order for a customer, whether as part of an agency cross under Rule 805 or as a facilitation under Rule 806.[45] In a "horizontal split", a customer takes or supplies a specified percentage of each component stock's basket shares, rounded to the nearest whole share, and the CBMM takes or supplies the residual percentage of every stock in the basket.

5. *Index-on-Close Orders.* The Exchange's proposed "Index-on-Close" ("IOC") order would enable baskets to trade at 4:00 p.m. at the not-yet-known closing value of the S&P 500 Index. IOC orders may be placed at any time during the day prior to the close of trading, but only as crosses. Because the closing S&P 500 Index value is based on the weighted sum of the closing prices of the 500 component stocks, the IOC trade price will be appended and disseminated after the 4:00 execution of the IOC orders.[46]

6. *Trading Halts and Call Markets.* ESP basket trading would halt under NYSE Rule 816(b) when market activity triggers the Rule 80B "circuit breakers".[47] Moreover, under NYSE Rule 816(b), the Exchange's Senior Officers or Floor Directors can halt ESP trading when the condition of the market so warrants.[48]

In addition, under Rule 816(b) and the Basket Guidelines, a call market is mandatory if more than 30% of the weighted value of the index is not open for trading *and* trading in the related futures contract has reached the daily price limit (or trading in the contract has halted). Under NYSE Rule 816(a) and the Basket Guidelines, the Exchange's Senior Officers or Floor Directors may initiate a call market if market conditions make it unreasonable to conduct basket trading pursuant to regular auction procedures. The Basket Guidelines establish standards that NYSE officials may consider in making such a determination, including an unreasonably wide spread in the S&P 500 Index quote or the triggering of the NYSE Rule 80A "sidecar"provisions.[49] Under NYSE Rule 816(b), the existence of a call market suspends the obligations of specialist, BBBs, CBMMs to establish, maintain, and communicate component stock, mini-basket, and basket quotations.

The BBB must conduct the call market as follows. At the commencement of a call market, the BBB will begin to collect indications of interest in the basket and enter them into the display unit. Within five minutes of entry into the call mode, the BBB must disseminate the initial indications of interest to the Floor and to the CBMM terminals.[50] The BBB must update the indications whenever appropriate, but at least every fifteen minutes, even if only to indicate that there is no new interest.[51] The BBB may execute any matching interest that the indication process elicits at the end of each fifteen-minute cycle. If the match consists of paired market orders, a Floor Governor must determine that the proposed execution price is fair under the circumstances.[52]

The BBB may not reinitiate the continuous market until the later of (1) fifteen minutes after the dissemination of the initial indications or (2) five minutes after the most recent dissemination. Following the approval of the Exchange's Senior Officers or Floor Directors, the BBB may reopen the auction market with a quotation.[53]

7. *Openings and Reopenings.* NYSE Rule 815 permits the basket market to open or reopen only at a single price, and requires that all market orders be executed at that price. All market orders are matched. If there is an order imbalance, then the BBB will attempt to satisfy the imbalance with the limit orders on the book at a single price, unless the imbalance is significant enough to warrant entry into a call market.

D. *Price Allocations.* Member firms have indicated to the Exchange that they will use the Institutional Delivery ("ID") System of the Depository Trust Company ("DTC") to confirm transactions with customers and to effect customer settlement.[54] Because the ID System requires that member firms provide individual prices for each of the basket component stocks, NYSE Rule 817.20 provides a methodology to allocate a basket execution price to each of the basket's 500 component stocks.[55] The NYSE believes that the single price allocation methodology should avoid confusion among member firms and institutional users of the ESP product. The methodology would allocate an execution price based on the relative representation of each of the component stocks in the basket, as determined by the closing price of each stock on the day prior to trade date.[56] Where a customer buys or sells a basket that contains fewer than all 500 stocks, the calculation will exclude the omitted component stock(s).

E. *Fees.* The ESP fee schedule proposes fees intended to recover the Exchange's costs in developing and operating the ESP market. The initial fees are $200 per unit (*i.e.*, per basket) per side, $125 per unit per side for crosses, and an access fee of $12,000 per year in advance for each CBMM terminal line.

F. *Purpose and Benefit.* Given the increased institutionalization of the stock market and the growth of index-related trading strategies, the Exchange has proposed the ESP service to address the need for an institutional stock

[45] NYSE Rule 802.40.

[46] *See* NYSE Rule 802.20.

[47] NYSE Rule 80B, the Exchange's "circuit breaker" rule, provides procedures for one-hour trading halt in the trading of all securities after a 250-point decline in the Dow Jones Industrial Average ("DJIA") and a two-hour trading halt after a 400-point decline. *See* Securities Exchange Act Release No. 26196 (October 19, 1988), 53 FR 41637 (order approving NYSE, American Stock Exchange, Chicago Board Options Exchange, and National Association of Securities Dealers circuit breaker proposals).

[48] The Commission notes in addition that the practical effect of a Commission-ordered suspension of trading in a basket component stock pursuant to section 12(k) of the Act, 15 U.S.C. 781(k), would be a halt in ESP basket trading. Because transactions in such a security would be prohibited while such a trading halt was in effect, basket transactions could not take place until the suspension of trading ended.

[49] NYSE Rule 80A, the "sidecar" rule, imposes certain trading restrictions on orders entered into the NYSE's automated order-routing system, the Super Designated Order Turnaround ("SuperDOT") System, during period of significant market declines. The rule applies when the price of the S&P 500 futures contract traded on the Chicago Mercantile Exchange falls 12 points below the previous trading day's closing value. Once activated, program trading-related market orders entered into SuperDOT are routed into a separate file. *See* Securities Exchange Act Release No. 26198 (October 19, 1988), 53 FR 41637.

basket trading system with physical delivery of the underlying component stocks. The Exchange contends that the ESP service will address market inefficiencies resulting from the fragmented executions currently accorded program trading strategies.[57] The Exchange believes that the proposed ESP market structure is designed to attract and concentrate the "block positioning"[58] capital necessary to support ESP trading. The Exchange further believes that ESP trading will reduce the transaction and price impact costs associated with current index-related trading strategies through the ESP service's single, aggregated execution function. Finally, the Exchange states that the ESP trading service may reduce the price volatility associated with institutional demands and selling pressures that their index-oriented trading strategies currently transmit to individual component stocks and which may translate into overall market volatility.

III. *Comments Received.* The Commission received nine comment letters in response to its request for comments on the proposed rule change. The Commission received a comment letter from the Commodity Futures Trading Commission ("CFTC")[59] stating that ESP transactions are "spot transactions in securities", and therefore are not "contracts of sale of a commodity for future delivery under section 2(a)(1)(A) of the Commodity Exchange Act."[60]

The Commission also received a comment letter from the Chicago Board of Trade ("CBOT"), a commodities exchange registered with the CFTC as a contract market.[61] The CBOT letter commended the NYSE for developing the ESP service, and asserted that the ESP service will have a positive influence on liquidity in the markets as an efficient execution mechanism for trading a standardized basket of stocks at a single, aggregate price on the Floor of the NYSE.

A third comment letter was received from the Alliance of Floor Brokers ("AFB"),[62] whose membership is comprised predominantly of NYSE Floor brokers. In general, the AFB letter criticizes certain aspects of the ESP market structure as anti-competitive. The AFB also believes that ESP trading may exacerbate structural market risks that already exist because of the unequal regulatory treatment accorded derivative products. The AFB argues that, in comparison to existing equity auction market trading procedures, the alternative trading procedures envisioned by the ESP system ultimately would result in a fragmented securities market structure with increased market volatility. In a report appended to its comment letter, the AFB made the following specific comments.

(1) The AFB criticized the lack of compatibility of the ESP rules package with traditional auction market concepts embodied in NYSE Rule 92 that attempt to eliminate conflicts of interest that may arise in an auction market environment. The AFB argued that a CBMM should be required to hand off all customer orders to an independent agent if the CBMM seeks to continue to trade for its own account.

(2) The AFB contends that parity[63] should be allowed at the basket point-of-sale, because absolute time and price priority will serve to dampen participation by portfolio managers if they must reveal their trading intentions in advance.

(3) The AFB argues that all crosses, whether agency to agency or principal to agency, should be subject to price betterment at the basket point-of-sale and that all brokers, not just CBMMs, should be permitted to effect facilitation crosses.

(4) The AFB argues for more basket order interaction with the "trading crowd," and contends that the BBB should be allowed to stop basket commitments whenever appropriate in the hope of achieving price improvement.

(5) The AFB contends that when a specialist receives a basket execution notice, that execution should receive a better price in the equity pieces whenever available at the equity point-of-sale.

(6) The AFB contends that the ability of a larger buyer or seller to disadvantage the limit orders on the book essentially with prior knowledge that inferior priced prints will take place is counter to existing block trading rules. Specifically, the AFB argues that this type of dealing is predatory when the prior knowledge is shared with a market maker who then takes part of the contra side at a clean up price after intervening public orders have been disadvantaged. Accordingly, the AFB believes some form of block trading protection is necessary for ESP transactions.

(7) The AFB agreed with the Exchange's logic supporting its request for short sale relief when the specialist is required to participate in an execution and the specialist is short the stock. The AFB also supported the Exchange's request for short sale relief when a CBMM supplies stock on a minus or zero-minus tick because the prices of the individual equity prices are priced independently. The AFB, however, criticized the NYSE's request to extend short sale relief to the basket point-of-sale as a potentially disruptive deregulatory initiative. The AFB also claims that such relief would foment a regime of anti-competitive and inequitable short sale regulation in comparison to the regulation of the short selling of individual stocks. Specifically, the AFB posits the example of shorting an industry group (*i.e.*, oil stocks) through ESP short sales in a fashion that is otherwise not available in the retail equity market.

Richard Ney & Associates Asset Management Inc. ("Ney"), an investment management company, criticized the configuration of ESP transaction reporting.[64] The Commission also received letters from Thomas G. and Ruth M. Roberts ("the Roberts") and from Dr. Burton Roger ("Dr. Roger"), individual investors residing in California, who similarly criticized the Exchange's proposed transaction reporting plan as it would apply to the basket's constituent stocks.[65]

[57] "Program trading" generally is defined as the simultaneous entry, but separate execution, of multiple orders together in a package trade. NYSE Rule 80A defines "program trading" as "either (A) index arbitrage or (B) any trading strategy involving the related purchase or sale of a 'basket' or group of 15 or more stocks having a total value of $1 million or more. Program trading includes the purchases or sales of stocks that are part of a coordinated trading strategy, even if the purchases or sales are neither entered or executed contemporaneously, not part of a trading strategy involving options or futures contracts on an index stock group, or options on any such futures contracts, or otherwise relating to a stock market index."

[58] Section 3(a)(38) of the Act, 15 U.S.C. 78c(a)(38), defines the term "market maker" as "any dealer acting in the capacity of a block positioner." NYSE Rules 97 and 127 generally govern the block positioning operations of Exchange member organizations.

VOL 54 ISS 209 OCT 31 1989 UMI

Specifically, Ney, the Roberts, and Dr. Roger criticized the lack of real time price and volume reporting for the ESP stock components when NYSE specialists do not participate in a basket execution. Tucker Anthony, Inc. ("Tucker Anthony"), an investment management firm,[66] criticizes the ESP system as an institutional and proprietary trading vehicle whose trading will increase market volatility. Tucker Anthony also criticized the NYSE's proposed exemptions from the short sale rule, and expressed concern regarding the operational aspects of basket trading.

The eighth comment letter was from Junius W. Peake, a securities trading systems consultant, and Morris Mendelson, a finance professor ("Peake-Mendelson letter"), who together question the overall need for the ESP trading system, and argue that the ESP service is an inefficient protfolio execution system that would lead to market fragmentation and exacerbated price discontinuities.[67] The Peake-Mendelson letter also requests a more complete vetting of the market structure implications of ESP trading in a public hearing. The ninth comment letter was from the John Hancock Freedom Securities Corp. ("John Hancock Securities letter"),[68] a holding company for three broker-dealer subsidiaries that are NYSE member organizations. The John Hancock Securities letter reiterated several criticisms raised by the AFB,[69] including concern over the proposed strict price and time priorities applicable to ESP trading and the proposed regulatory treatment of ESP short sales.

The Exchange generally addressed these commentator's concerns and other issues raised by Commission staff in a letter to Commission staff ("September 6 letter"), which further explains the rationale underlying ESP trading and its accompanying market structure, as well as clarifies its requests for relief from certain trading practice rules of the Commission.[70] In its September 6 letter, the Exchange notes that ESP trading is structured with the goal of providing institutional customers and member firms with a trading vehicle suited for an institutional, composite-asset market. The Exchange believes that the rules supporting ESP trading are designed appropriately to accommodate the particular needs of the portfolio market in a fair and competitive market structure.

In response to the specific issues raised in the comment letters, the Exchange made the following comments.

(1) In response to the concern that the proposed ESP market structure would require CBMMs to make markets while allowing them to handle customer orders, the Exchange contends that if CBMMs cannot trade for their own accounts while holding customer orders, they would either have to cease providing two-sided quotations while holding customer orders, or they would have to hand off all of their customer orders. The Exchange concluded that the former alternative would lead to inadequte support for the product, while the latter alternative ignores a fundamental market reality, namely, that the potential ESP market-making firms are the very same firms that are likely to handle customer orders. Accordingly, the Exchange struck a balance between the two competing concerns by proposing a basket market structure that allows a market maker holding customer orders to maintain a two-sided quotation, while executing customer orders against those quotations and otherwise trading in furtherance of its affirmative obligations.

(2) In response to the contention that parity should be allowed at the basket point-of-sale, the Exchange contends that absolute time and price priority is essential to attracting upstairs capital to the ESP basket market. The Exchange states that strict priorities are necessary to assure upstairs market makers that an order will be executed when the market reaches the specified price, thus providing them with an incentive to place and leave orders in the system. The Exchange notes that the minimum ESP tick is 1/100th the size of the tick in the average Exchange-traded stock, and should provide traders ample room to compete by betttering the market.

(3) In response to the suggestion that all crosses should be subject to price betterment at the basket point-of-sale, the Exchange stated that it believes that the limitations on when ESP crosses must be exposed for price improvement are reasonable when viewed in the context of the absolute time and price priorities imposed by the ESP rules. The Exchange contends that no exposure is necessary for agency crosses because both sides of the order will receive prices better than the prevailing quotations in the market. The Exchange further contends that the lack of exposure for principal crosses when the price to the customer is a minimum tick inside the bid or offer is reasonable because the customer receives an immediate execution at the best available price. In addition, it encourages market makers to bring order flow to the Floor because it provides them with certainty in executing crosses, so long as they are prepared to provide the customer the best possible price.

In response to the argument that all brokers should be able to effect facilitation crosses, the Exchange stated its belief that allowing only CBMMs to effect proprietary crosses is an appropriate limitation when viewed in the overall context of the ESP market structure. In particular, because market makers will assume significant obligations and will incur significant costs in helping to maintain a fair and orderly market, the Exchange believes it is reasonable to limit to CBMMs the ability to effect facilitation crosses. The Exchange believes that without this limitation it would be difficult to attract sufficient market-making expertise.

(4) The Exchange notes, in response to the argument for more basket order interaction with the trading crowd, that the ESP rules provide for price improvement at the basket point-of-sale: because orders are "flashed" electronically to all market participants, both upstairs and Floor traders can interact with that order and improve the best bid or offer in the system.

(5) In response to the argument for price improvement at the equity point-of-sale, the Exchange argues that the issue of possible price improvement at the equity point-of-sale in a basket execution that involves Tier 1 or Tier 2 specialist participation arises because the specialist's aggregate quotations are updated only every 15 seconds, and an unavoidable delay occurs between the basket execution and the integration of that execution in the markets for the component stocks. As a result, when a specialist receives a basket execution notice, there could be a quotation in the stock superior to the price specified in the notice. The Exchange contends that it is reasonable to award the benefits of the improved price to the participant in the market for the component stock, who is much more likely to be a retail customer interested in receiving the best price for his order. The Exchange further contends that such a resoluton is a reasonable one for a basket customer who may view a speedy execution with price certainty as more important than a relatively insignificant improvement in the price of a $5 million basket.

(6) In response to concerns raised regarding the ability of large buyers or sellers to walk the book, the Exchange notes that the ESP basket market is an institutional market comprised of the equivalent of large block orders competing for execution according to strict price and time priorities. Accordingly, the Exchange believes that ESP trading does not require a regulatory structure modeled on its retail auction market which is designed to integrate both retail and institutional order flow and to protect retail order flow from inferior block executions at "gap" prices.[71]

(7) Finally, in response to concerns raised about the NYSE proposal for relief from the short sale rule, the Exchange notes that ESPs, much like options and futures, will be priced derivatively. Because the Exchange also expects ESP trading to be somewhat discontinuous, with potentially long intervals between trades, the Exchange believes that there is not likely to be much of a price relationship between the last tick in the ESP market and the actual direction of market movements in the ESP market and the actual direction of market movements in the component stocks. The Exchange contends, moreover, that it is impractical to apply the short sale rule at the basket point-of-sale since it will not be easy to determine when a person is "short" a basket that contains 500 component stocks. Thus, the Exchange reasons that it is impractical and competitively disadvantageous to apply short sale restrictions at the basket point-of-sale.

In response to the suggestion that a market participant might use the market basket to short a particular industry group, the Exchange counters that the risk inherent in such a trading strategy is prohibitively expensive, because the trader would be required to cover the unwanted stock short positions at a price no higher than the price at which it sold the stocks. Moreover, the Exchange notes that the general anti-fraud rules of the Exchange and the Commission will apply fully to ESP trading, and that the Exchange's detailed surveillance procedures will operate to capture any such anomalous trading patterns that may evidence a manipulative or otherwise fraudulent trading strategy.

IV. Discussion.

A. Introduction

After careful consideration of the comments received, applicable statutory provisions, and relevant policy considerations, the Commission believes that the NYSE's basket trading proposal is reasonably desinged to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trades, provide for an equitable allocation of fees, and is consistent with the maintenance of fair and orderly markets. For these reasons and for the additional reasons set forth below, the Commission finds that approval of the Exchange's proposed rule change relating to stock basket trading is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of sections 6(b) (4) and (5).[72]

B. Benefits of Market Baskets

Both the Division of Market Regulation's Report on *The October 1987 Market Break* [73] and an NYSE-commissioned Study entitled *An Overview of Program Trading and Its Impact on Current Market Practices* ("Katzenbach Report") recommend, among other things, the listing and trading of a basket of stocks on an exchange as a means to enhance efficiency and, possibly, the market's ability to absorb institutional portfolio trading.[74] As noted in the Staff Report, the creation of one or more posts for the purpose of trading actual baskets or portfolios of stock could alter the dynamics of program trading, because the availability of such basket trading could, in effect, restore program trades to more traditional block trading techniques.[75] The Staff Report noted further that, while arbitrage ultimately would flow to individual component stocks, many institutional investors and member firms effecting arbitrage transactions could focus their equity transactions at the basket post where the market makers and trading crowd could provide efficiencies associated with effecting transactions in a portfolio of securities as opposed to individual stocks. This could add an additional layer of liquidity and concentrated capital to the market in order to help absorb the volume and velocity of trading associated with index-related trading strategies.[76]

Furthermore, because ESP market basket will be traded on the Exchange Floor at a single location in an "open book" environment, members in the crowd will be able to see both the ESP bid-offer spread and the depth of the ESP market, *i.e.*, the size of the buying and/or selling interest at each minimum tick away from the prevailing bid and offer for the basket. Program trading order flow entered into the system and imbalances resulting therefrom thus will be disclosed, thereby ameliorating curent market information limitations in identifying program trade executions (or overhanging program orders) in the individual stocks.[77] Finally, by creating a trading vehicle for an aggregated basket of standardized portfolios of stocks in a single execution with minimal "execution slippage," [78] the ESP trading system will provide an efficient mechanism to trade, clear and settle stock baskets.

The Commission believes the ESP trading will provide institutional investors with a cost efficient means to make investment decisions based on the direction of standardized measures of stock market segments and the stock market as a whole, and may provide stock market participants several advantages over existing methods of effecting progam trades of stocks and transactions in portfolios of securities. The Commission recognizes that the ESP market will have different trading dynamics than the market for the individual stocks, and that the

regulatory structure for individual stocks may not be best suited for ESP trading. For the reasons discussed below, the Commission finds that the

be able to facilitate customer orders through proprietary trading on the Floor.[80] Thus, only CBMMs may effect proprietary cross transactions.

Commission finds that it is consistent with the Act for the NYSE to build in necessary incentives to ensure active market-making participation.

Designated Order Turnaround ("DOT") system. The Commission is satisfied that the NYSE's present surveillance and examination programs are capable of detecting any such improper trading.

F. Price Improvement and Price Protection

As discussed above, the ESP rules provide variations from the usual NYSE market structure in several other

and Tier 2 specialist executions are appropriate because it is reasonable to award the benefit of any improved price to the participant in the market for the component stock, who is much more

VOL 54 ISS 209 OCT 31 1989 UMI

regulatory structure for individual stocks may not be best suited for ESP trading. For the reasons discussed below, the Commission finds that the deviations from this structure proposed by the NYSE reasonably are designed to promote just and equitable principles of trade and fair and orderly markets. Furthermore, the Commission believes that ESP trading will not lead unduly toward a more fragmented and volatile market, because the "open book" environment, customer crossing and facilitation rules, and the combination of both "auction" and "dealer" attributes in the trading system for ESPs are consistent with the development of an open and competitive national market system.

C. Margin

As discussed above, ESP trades would be subject to the to percent initial margin requirement applicable to exchange-traded equity securities. Market makers who are designated as CBMMs in the ESP market basket would be treated as specialist for margin purposes, and would be entitled to good faith margin treatment for ESP transactions effected in their CBMM account.

Because the purchase of an ESP results in the physical delivery of each stock composing the basket, Regulation T requires a 50 percent initial margin requirement. For the same reasons, the Commission believes that it is appropriate to apply the NYSE equity security maintenance margin requirement of 25 percent to ESPs.

The Commission also finds that, in light of their affirmative market making obligations, the NYSE proposal appropriately treats CBMMs as "specialists" for the purpose of receiving exempt credit treatment under Regulation T and U.[79] In order for CBMMs to qualify for exempt credit, however, the Commission believes that it is necessary for CBMMs to segregate market-making positions from other positions (*e.g.*, proprietary and arbitrage transactions).

D. Agency Crosses, Proprietary Trading and Customer Facilitations

Rule 805(d) provides that any member or member organization may cross agency orders. As discussed above, however, under NYSE Rules 806 and 809 only CBMMs can initiate basket trades for their own accounts on the Floor or from terminals, and CBMMs alone will be able to facilitate customer orders through proprietary trading on the Floor.[80] Thus, only CBMMs may effect proprietary cross transactions.

In response to concerns voiced by the commentators that these provisions were anti-competitive, the Exchange contended that such a structural tradeoff was necessary to attract sufficient upstairs market-making participation.[81] In return for this trading "monopoly", the Exchange emphasized that CBMMs will be required to undertake specific affirmative obligations in connection with their ESP market-making operations. For example, Rule 807 establishes affirmative market-making obligations, including the requirement to maintain a fair and orderly ESP market. Moreover, CBMMs must help alleviate temporary disparity between supply and demand through proprietary trading operations. In addition, CBMMs also must maintain a continuous, two-sided firm quotation in the basket.

The Exchange also emphasized that CBMMs will incur the terminal and other systems and personnel costs necessary to support their market-making function. Furthermore, once registered, operation of a CBMM franchise demonstrates a significant capital commitment to the ESP market because a CBMM will not be permitted to withdraw its registration except on 30 days' notice,[82] and if a CBMM does withdraw its registration, it will not be permitted to re-register for 30 additional days.

The Commission believes that the unique capabilities provided to market makers in the ESP market raise difficult questions under the Act. On the one hand, the limitations on direct proprietary facilitations by other NYSE members may discourage their use of ESPs, thus reducing liquidity. On the other hand, the NYSE is attempting to provide, through CBMM participation, a continous basket trading market, something which has heretofore been unavailable. It is difficult to predict whether the market will expand and be characterized by active basket trading, or whether trading will be sporadic. At least in its initial stages, when the latter assumption may be correct, the Commission finds that it is consistent with the Act for the NYSE to build in necessary incentives to ensure active market-making participation. Accordingly, the Commission has determined to approve, on a temporary six-month basis, the NYSE's limitations on proprietary trading contained in NYSE Rule 806. If during the next six months, however, ESPs become actively traded, no artificial market-making incentives should be necessary and the Commission would expect the NYSE to revise its rules to permit basket trading and facilitation by all member firms.

E. Customer Protection Rules and Rules of Priority, Parity and Precedence

1. Customer Protection

NYSE Rule 92 protects against conflicts of interest when a member holds a customer order and trades for a proprietary account by imposing specific requirements on how the member must price and handle customer orders in these circumstances. Under NYSE Rule 800(c)(i), however, a member who holds or has knowledge of a customer's unexecuted order for one or more of a basket's component stocks still may initiate proprietary basket transactions, despite the otherwise contrary application of Rule 92. Thus, while holding customer orders, the ESP rules allow a market maker to maintain a two-sided quotation, executing customer orders against those quotations and otherwise trading in furtherance of its affirmative obligations. The Rule 92 restrictions apply when a CBMM seeks to trade for its own account at the then-prevailing bid or offer (if not pursuant to its affirmative obligations), or to break up a facilitation.[83]

The Commission believes that the exceptions proposed for CBMMs are appropriate measures to facilitate liquidity in an institutional market. Because of the size of the ESP's unit of trading and the screen-based trading system employed, ESPs require the participation of large, well-capitalized upstairs firms. Because these firms are integrated, any restriction on their ability to handle customer orders almost certainly would discourage them from registering as CBMMs. While the Commission is concerned over the potential that CBMMs might prefer their own proprietary order over a customer order or "frontrun" that customer order, the Commission recognizes that effectively the same potential for abuse exists today when upstairs firms execute programs through the NYSE's Designated Order Turnaround ("DOT") system. The Commission is satisfied that the NYSE's present surveillance and examination programs are capable of detecting any such improper trading. The Commission also notes that the Rule 92 restrictions still apply when a CBMM seeks to "hit" the then-prevailing bid or offer for a proprietary account (if not pursuant to its affirmative obligations), or to break up a facilitation. Accordingly, in light of the unique market structure of ESPs and the institutional nature of the market, the Commission finds that the NYSE's limitation of Rule 92 is consistent with the Act.

2. *Rules of Priority, Parity and Precedence.* Pursuant to NYSE Rule 805, the ESP basket market will trade under a regime of strict price and time priority. Accordingly, for purposes of determining ESP execution priorities, there is no distinction between proprietary and customer basket order.[84]

The Commission agrees with the Exchange that rules of time and price priority are appropriate in an institutional basket product that will trade in lots of $5 million. Coupled with the "open book" environment of the ESP basket market, rules of time priority should promote a more "transparent" ESP market by providing institutions with an incentive to place and leave orders in the system. This should result in order flow and imbalances being more fully disclosed, thereby ameliorating current market information limitations that may result when program trades are executed in the individual stocks. The alternative of granting institutional customer orders a preference over market maker orders would allow institutions to price broker-dealer CBMMs out of the market without those institutions accepting the affirmative obligations required of market makers. The result might be significant disincentives to market making and less liquidity. Accordingly, because the Commission believes that strict time and price priority provides a fair market regimen for ESPs, the Commission has determined to approved NYSE Rule 805 for a six-month period.

F. Price Improvement and Price Protection

As discussed above, the ESP rules provide variations from the usual NYSE market structure in several other instances to accommodate ESP trading. First, the rules for ESP trading allow orders to be executed against opposite-side limit orders on the display unit at their displayed prices, in accordance with price and time priority, until the order is filled, thereby allowing a larger buyer or seller of baskets to "walk the book" without having to effect the execution at a single "clean-up"price.[85]

Second, the proposed ESP rules [86] provide that when a specialist receives a notice indicating the execuion of a Tier 1 or Tier 2 basket trade, he or she must assign that interest at the price specified in the notice to whomever has priority at that time or take or supply the component stock at the execution price.[87]

The Commission believes that the trading rules proposed by the NYSE are consistent with the Act. The "gap pricing" protections set forth in NYSE Rule 127 for block transactions in individual securities are designed to ensure that small public limit orders do not receive block executions inferior to those of the block trade. Application of similar protections in the ESP market would first raise difficult definitional questions as to what was an ESP block. In addition, it is not clear that the sophisticated institutions participating in the ESP market require the identical protections developed for retail public investors in the equity market. In this connection, it is important to note that the absolute time priority provided in the ESP market protects limit orders from being "sized out" by larger orders that would be provided precedence in the market for individual securities. Therefore, the Commission believes that the absence of gap pricing protections for ESP limit orders in light of the institutional nature of the market and the advantage provided limit orders by time priority is appropriate.

Similarly, the Commission believes that the special rules regarding Tier 1 and Tier 2 specialist executions are appropriate because it is reasonable to award the benefit of any improved price to the participant in the market for the component stock, who is much more likely to be a retail customer interested in receiving the best price for his order, and because a basket customer is likely to view a speedy execution with price certainty as more important than a relatively insignificant improvement in the price of a $5 million basket.

G. Exemption Requests

The Exchange has requested that the Commission grant exemptions from Rules 10a–1, 10b–6, 10b–7, 10b–8, 10b–10, 10b–13, 15c1–5, and 15c1–6 under the Act [88] to facilitate trading in ESPs.[89]

Rule 10a–1 provides that short sales [90] of exchange-listed securities may not be effected at a price less than the price at which the immediately preceding sale was effected ("minus tick") or at a price equal to the last sale if the last preceding transaction at a different price was at a higher price ("zero-minus tick"). The Exchange has requested relief from Rule 10a–1 in three areas. First, the Exchange seeks an exemption form Rule 10a–1 as it would apply to the individual component stocks traded in an ESP transaction and to transactions in the ESPs themselves. Second, the Exchange requests an exemption analogous to the "block positioner" exemption in paragraph (e)(13) of Rule 10a–1.[91] The requested exemption would permit CBMMs selling stock acquired in an ESP transaction to disregard, when netting positions for purposes of Rule 10a–1, a short position that is the subject of one or more offsetting positions created in the course of bona fide arbitrage, risk arbitrage, or bona fide hedging activities. Third, the Exchange is requesting relief from the operation of the short sale rule as it would apply to a specialist's obligation to trade for its own account when the specialist participates in a Tier 1 or a Tier 2 execution through a "passive sale," *i.e.*, when the specialist is acting

---

[79] The BBB also will be entitled to exempt credit, but only with respect to transactions entered into pursuant to its role as passive market maker in the "mini-basket."

[80] A non-CBMM member may initiate proprietary basket trades on the Floor to offset a basket transaction made in error, however, or, subject to NYSE Rule 92, a non-CBMM member on the Floor may accept proprietary basket orders initiated off the Floor.

[81] NYSE September 6 letter, *supra* note 70.

[82] In addition, because the member or member organization may not give such notice prior to the 60th day after its registration becomes effective, a CBMM must continue to function as such for at least 90 days. *See* Basket Guidelines.

[83] *See supra* note 44.

[84] In contrast, Rule 11a1–1(T)(a)(3) under the Act, 17 CFR 240.11a1–1(T)(a)(3), generally provides an exemption from Section 11(a) conditioned on providing customer orders priority over orders of the exchange member handling those orders at the same price. Members whose ESP orders are subject to Section 11(a)'s limitations will have available the exemptions provided in Rule 11a2–2(T) as well as Rule 11a1–1(T) in executing these orders.

[85] *See* NYSE Rule 808(f).

[86] *See* proposed NYSE Rule 104.11A(b).

[87] Moreover, although NYSE Rule 812 requires a CBMM to guarantee the purchase or sale of a basket at the price at which he "stops" a basket, the Exchange is not requiring the BBB to "stop" basket market orders to achieve price improvement. Because of the fact that ESP baskets trade in lots of $5 million, the Commission believes it is reasonable for the Exchange not to require the BBB to stop basket orders in what may prove to be an illusory attempt at achieving price improvement, because the BBB would ultimately bear the risk of any adverse market moves whenever it would stop a basket commitment.

[88] 17 CFR 240.10a–1, 240.10b–6, 240.10b–7, 240.10b–8, 240.10b–10, 240.10b–13, 240.15c1–5 and 240.15c1–6 (1989).

[89] *See* letters from Donald J. Solodar, Senior Vice President, NYSE, to Larry Bergmann, Associate Director, SEC, dated September 25 and October 12, 1989.

[90] A short sale is defined in Rule 3b–3 under the Act, 17 CFR 240.3b–3, as any sale of a security that the seller does not own or any sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller. Rule 3b–3 provides further that a person shall be deemed to own a security only to the exent that that person has a net long position in that security.

[91] *See* Securities Exchange Act Release No. 20715 (March 6, 1984), 49 FR 9414 (March 13, 1984).

VOL 54 ISS 209 OCT 31 1989 UMI

as the seller of last resort who is required to fulfill a trading commitment at a given price.

Rule 10b–6 limits the ability of underwriters, issuers, or certain other persons to bid for or purchase a security being distributed, or a related security, during the distribution of that security. Rule 10b–7 regulates stabilizing transactions in connection with an offering of securities. Rule 10b–8 restricts bids and purchases of rights, and offers and sales of the underlying stock, by persons participating in a rights offering. Rule 10b–10 requires broker-dealers to provide customers with a written confirmation that includes the identity, price, and number of shares or units of a security purchased or sold by the customer.[92] Rule 10b–13 prohibits persons making a tender offer for a security from purchasing or arranging to purchase that security otherwise than pursuant to the tender offer. Rule 15c1–5 requires a broker-dealer to disclose that it has a control relationship with an issuer before executing a transaction in that issuer's securities. Rule 15c1–6 requires a broker-dealer to disclose any participation or financial interest in the distribution of a security, at or before the completion of a transaction in such security for the account of a customer.

The Commission believes that transactions in ESPs generally do not involve the same concerns that are applicable to transactions in individual stocks, and that appropriate conditional relief from Rules 10a–1, 10b–6, 10b–7, 10b–8, 10b–10 is necessary if the benefits of ESP trading are to be achieved. With respect to Rules 15c1–5 and 15c1–6, in recognition of the unique nature of ESP transactions, the Division has determined that transactions in ESPs are unlikely to give rise to the abuses the rules were designed to prevent and accordingly, the Division is taking a no-action position under these rules. Accordingly, the Commission's staff today has issued a letter granting certain exemptions and taking certain no-action positions with respect to the treatment of transactions in ESPs under these rules.

H. NYSE Rules 95, 96, 97, 104, 107, 112 and 312(g)

A variety of Exchange rules impose transaction restrictions designed to ameliorate conflicts of interest that arise in connection with the intersection of proprietary trading operations and customer operations. Proposed Rule 800(c) would exempt ESP trading from these customer protection rules.

For example, NYSE Rule 95.20 generally prohibits specialists from initiating discretionary orders in specialty stocks. Proposed NYSE Rule 800(c)(ii) would allow a specialist to originate basket orders for discretionary accounts even if the basket contains his specialty stocks, despite the otherwise contrary provisions of NYSE Rule 95.20. Similarly, a member who holds or has granted an option on a basket's component stock may still initiate proprietary basket transactions under Rule 800(c)(iii), despite the otherwise contrary operation of Rule 98.

Exchange Rule 97 generally restricts block positioners from trading in a manipulative manner that would be inconsistent with the informational advantages derived from the intersection of their customer and proprietary trading operations. Proposed Rule 800(c)(iv) exempts a member from the operation of the otherwise applicable tick tests contained in Rule 97 if he or she has acquired a long stock position as a result of a member's basket transactions.

Additionally, a stock specialist may initiate basket transactions under Rule 800(c)(v), even if the basket contains a specialty stock, despite the otherwise contrary provisions of Rule 104. Nevertheless, under Rule 800(c)(vi), a specialist, registered competitive market maker or competitive trader must include in any calculation of his aggregate stock position any stock that he has acquired by means of one or more basket transactions for the purposes of the stock trading limitations imposed by Rules 104, 107 and 112.

Finally, NYSE Rule 312(g) places restrictions on an Exchange member corporation effecting transactions, or making recommendations, in its own securities or in securities issued by any corporation controlling, controlled by, or under common control with the member corporations (collectively, an "affiliated issue"). The rule is designed to protect against potential conflicts of interest and potential misuses of corporate information. Applied literally to basket trading, however, the rule would prohibit a member firm that is affiliated to any of the component companies included in a standardized market basket product approved by the Commission from: (1) Making recommendations or effecting customer transactions in baskets, (2) making a market in baskets, or (3) executing "split" orders for customers in baskets if the customer wanted to exclude the stock of the affiliated issuer, because the member firm would have to buy or sell the stock for its own account to accommodate the customer.

Paragraph (vii) of NYSE Rule 800(c) would apply Rule 312(g) to market baskets [93] as follows: (1) Member corporations of the NYSE would be permitted to recommend and effect customer market basket transactions without restrictions; (2) an Exchange member corporation that is a market maker in stock baskets (*e.g.*, CBMMs on the NYSE or other exchange-designated basket market makers) would be permitted to buy and sell baskets for proprietary accounts without restrictions; (3) if an Exchange member that is a CBMM or other exchange-designated basket market maker liquidates one or more component stock positions with respect to a basket that it holds in its market-making inventory, the CBMM or such other exchange-designated basket market maker will have until the close of the day following such action to liquidate its position in the stock of an affiliated issuer; and (4) if an Exchange member corporation that is neither a CBMM nor a basket market maker designated on another exchange acquires a position in the stock of an affiliated issuer through its execution of a split order, the member corporation would have until the close of business on the day following the transaction to dispose of the position in the stock of the affiliated issuer.

The Exchange contends that the Rule 800(c) provisions appropriately balance customer protection concerns against potential conflicts that could arise while members and member organizations service customers and provide liquidity to the basket market. Consistent with the no-action position taken by the Commission staff with regard to the operation of Rules 15c1–5 and 15c1–6 under the Act,[94] the Commission believes that the amended operation of Exchange Rules 95, 96, 97, 104, 107, 112 and 312(g) as they relate to ESP trading strike an appropriate balance between customer protection concerns and any potential trading abuses by members and member organizations, because investors will make basket trading decisions based on the market as a whole and not on stock-specific criteria, and any proprietary trading undertaken by a member or member organization in this connection does not entail the

[92] *See* notes 54–56, *supra* and accompanying text for a description of the NYSE's proposed methodology for allocating an execution price to each component stock in a basket.

[93] Amendment No. 3 to the Exchange's rule filing clarifies that the operation of NYSE Rule 800(c)(vii) is generic in its application to baskets traded on other national securities exchanges.

[94] *See* note 92 *supra* and accompanying text.

manipulative concerns that these Exchange rules are intended to address in the context of individual stock trading.

I. Transaction and Quotation Data Reporting

Pursuant to Rule 11Aa3–1 under the Act,[95] the NYSE is required to collect and disseminate transaction data on securities listed and traded on the Exchange. The NYSE will provide trading facilities through the ESP service for reported securities (as components of baskets) but will not report transactions in the component stocks, as is required by Rule 11Aa3–1.[96]

The Exchange intends to disseminate basket last sale information and quotations to market data vendors, thereby assuring that all ESP market participants will have ready access to the ESP transaction reports and quotations. Tier 1 and Tier 2 executions in the NYSE-listed component stocks will be disseminated to market data vendors in the same manner as individual executions in the component stocks. In addition, proposed Rule 803 will impose on members obligations consistent with those imposed by Rule 11Ac1–1 under the Act [97] and Exchange Rule 60 with respect to the quotations for individual stocks. Basket quotations always will be firm under Rule 803, except when the market is in a call mode. However, outside of the existing markets in the individual component stocks trading on the Exchange in compliance with Rules 11Aa3–1 and 11Ac1–1, no quotes or last sale reporting will be available for the individual constituent stocks that comprise a stock basket when it trades under the ESP market structure, unless an order is executed against a Tier 1 or Tier 2 aggregate quotation.

For the first six months of ESP trading, the NYSE will not disseminate on a consolidated basis the total trading volume for each of the component stocks represented by ESP transactions either during or after the trading day. The NYSE believes that its proposal to exclude end-of-day transaction volume in the ESP component stocks from the consolidated transaction volume figures is appropriate to provide the Commission and the Exchange with an opportunity to assess whether the absence of individual basket component stocks in the end-of-day consolidated volume figures merits modification in light of actual trading experience.[98] The NYSE has, however, committed at the end of the first six months of basket trading to submit to the Commission a proposed rule change that will provide for the inclusion of end-of-day transaction volume in the ESP component stocks in the consolidated transaction volume figures.[99]

Ney, the Roberts, and Dr. Roger criticized the proposed configuration of ESP transaction reporting, which would not include price and volume breakdowns in the component stocks of a basket trade. Because ESP trades are executed at aggregated prices, the Exchange contends that a last sale reporting requirement for the price and volume of a basket's individual component stocks does not translate well into the ESP context.

The Commission agrees with the Exchange that, with the exception of specialist Tier 1 and Tier 2 executions, real-time last sale and volume reporting for the individual component stocks underlying a basket trade would not be appropriate in the ESP context. Pricing of the baskets is based on the aggregate value of the underlying securities and thus any assignment of a "price" to any of the component stocks in the basket would be arbitrary. For these reasons, the Commission believes that the proposed reporting requirements, even though they deviate to a certain extent from the requirements of Rule 11Aa3–1, are, nevertheless, consistent with the Act. In addition, the Commission believes that a six-month delay in implementing consolidated reporting of end-of-day transaction volume in the basket component stocks is reasonable in order to determine whether such consolidation would provide useful information to market participants.

The Commission believes that conditional relief from Rule 11Aa3–1 for ESP transactions is necessary and appropriate. Accordingly, the Commission has issued an order exempting the NYSE from certain requirements in that rule with respect to transactions in ESPs.[100]

J. Surveillance Procedures

The proposed ESP market structure raises various surveillance concerns. The Commission believes that the Exchange's enhanced ESP surveillance procedures should capture any potentially abusive trading practices of market participants attempting to profit unfairly from the information advantages that their fiduciary and market positions entail. In this connection, the Commission expects the Exchange to exercise its Rule 814 authority to surveil ESP training through routine post-trade monitoring, program trading reports, revamped Form 81s, intermarket surveillance, its surveillance agreement with the Chicago Mercantile Exchange and the Exchange's own frontrunning circular. The Exchange should be able to monitor and police derivative activity relating to ESP trading and program trading, as well as questionable transactions that may relate to customer conflicts of interest. Finally, the Commission believes that the Exchange should use its existing procedures to discipline members and member organizations that abuse their fiduciary positions and informational advantages to the detriment of customers and the public interest.

V. Conclusion.

The Commission believes that the ESP market structure balances appropriately the competing concerns of various Exchange constituencies in a manner consistent with just and equitable principles of trade. Given the institutional character of stock portfolio trading that ESP trading is designed to capture, the Commission agrees that the Exchange's chosen market structure, which accords institutions strict price-time priority, is a fair and competitive market structure. Finally, the Commission's section 19 authority and the Rule 19b–4 process allow the Commission and the Exchange sufficient flexibility to modify ESP trading in light of actual trading experience and any future developments that materially affect the ESP market structure.[101]

[95] Rule 11Aa3–1, the transaction reporting rule, generally requires that exchanges file transaction reporting plans governing the collection, processing and dissemination of last sale data on securities traded on the exchanges. 17 CFR 240.11Aa3–1 (1988).

[96] By separate order, The Commission has granted the NYSE an exemption from this requirement. *See* Securities Exchange Act Release No. 27390 (October 26, 1989).

[97] 17 CFR 240.11Ac1–1 (1989). Rule 11Ac1–1 imposes quote collection obligations on exchanges and associations and requires broker-dealer quotations, subject to specific exceptions, to be firm at the price and size publicly disseminated. The Commission notes that Rule 11Ac1–1 applies to quotations for ESP baskets.

[98] *See* letter from Richard A. Grasso, President and CEO, NYSE, to Brandon C. Becker, Associate Director, Division of Market Regulation, SEC, dated October 4, 1989.

[99] *Id.* The Exchange has reserved the right to provide views and information that would express its continued opposition to the addition of end-of-day transaction volume in the ESP component stocks in the consolidated transaction volume figures.

[100] *See supra* note 90.

[101] The Commission believes that the 30 day comment period that accompanied publication of the Exchange's proposal and the Commission's continued willingness to entertain all comments that precede its action as providing an adequate public forum to vet all the issues and concerns that may have accompanied the ESP proposal. Accordingly, it is unnecessary to hold public hearings on the NYSE proposal.

Accordingly, based upon the aforementioned factors, the Commission finds that the Exchange's proposed rule change relating to the trading of ESP stock baskets is properly within its jurisdiction and consistent with the requirements of sections 6(b)(4) and (5) and the rules and regulations thereunder.[102]

The Commission finds good cause for approving those portions of the NYSE's proposal that were amended by Amendments 1, 2, and 3 prior to the thirtieth day after the date of publication of the amendments in the **Federal Register**. The original filing was the subject of a 35-day notice period that generated several comment letters. The amendments made only minimal changes to the proposal as noticed. In addition, accelerated approval is necessary because ESP trading is scheduled to begin on October 26, 1989. Because of the Commission view of the benefits that may result from the trading of a basket of stocks on a national securities exchange, the Commission believes a good cause finding is justified.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing also will be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by November 21, 1989.

[102] The Commission notes that approval of the proposed rule change is based upon a determination that the terms of ESP basket trading are consistent with the requirements of the Act. If the terms of the ESP basket market structure, including the index multiplier, are changed in any material way, however, it would be necessary for the NYSE to submit a proposed rule change to the Commission in order to afford the public an opportunity to review the proposed modification and for the Commission to review its prior determination.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[103] that proposed Rules 805 and 806 are approved for a six-month period ending on April 30, 1990 and that the remaining proposed rule changes be, and hereby are, approved.

By the Commission.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

[FR Doc. 89-25598 Filed 10-30-89; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 34-27383; File No. SR-CBOE-88-20]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change and Filing and Order granting Accelerated Approval of Amendments to Proposed Rule Change Relating to Market Basket Trading

I. Introduction

On may 12, 1989, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b-4 thereunder,[2] a proposed rule change that establishes Exchange rules to govern the trading of "market basket contracts" on the floor of the Exchange.

The proposed rule change was published for comment in Securities Exchange Act Release No. 26882 (June 1, 1989), 54 FR 24442 (June 7, 1989).[3] The Exchange subsequently submitted amendments to its proposed rule change.[4] No direct comment letters were received regarding the proposed rule change, although commentators did discuss the CBOE proposal in responding to proposals by other exchanges to trade baskets of stock.[5]

[103] 15 U.S.C. 78s(b)(2) (1982).

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1989).

[3] The proposed rule change published for comment was Amendment No. 2 to SR-CBOE-88-20 and was filed with the Commission on May 12, 1989. The CBOE originally filed SR-CBOE-88-20 with the Commission on November 1, 1988, and filed Amendment No. 1 to the filing with the Commission on January 13, 1989.

[4] The Commission received Amendments No. 3, 4, and 5 to the CBOE proposal on September 21, 1989, September 26, 1989 and October 6, 1989, respectively. The Exchange requested accelerated approval of File No. SR-CBOE-88-20, as amended. The notable changes made in these amendments are described in this order.

[5] The New York Stock Exchange, Inc. ("NYSE") filed with the Commission a proposal that sets forth a framework for trading "Exchange Stock Portfolios" ("ESPs"), standardized baskets of stocks, on the floor of the NYSE. *See* Securities Exchange Act Release No. 26926 (June 8, 1989), 54 FR 25516 (June 15, 1989). Additionally, the Midwest Stock Exchange, Inc. ("MSE") filed with the Commission a proposal to establish a secondary trading session for the execution of transactions in portfolios of securities. *See* Securities Exchange Act Release No. 26887 (June 1, 1989), 54 FR 24779 (June 9, 1989). For a discussion of the comments applicable to the CBOE proposal, see *infra* notes 34-39 and accompanying text.

II. Background and Description of Market Baskets

A. Description and Terms of Market Basket Contracts

A CBOE market basket contract enables the trading of standardized baskets of stocks at an aggregate price in a single execution on the Exchange's floor.[6] A market basket trade will result in a transfer to the buyer of ownership of each of the component stocks. When the transactions is completed, the buyer will be entitled to all rights attending ownership of the basket stocks (including rights to vote and receive dividends), and will be free to sell or hold each stock separately.

That same buyer may later sell the basket stocks he acquired, either individually or through another market basket trade. In order to sell the basket stocks through market basket contracts, they must be identical as a group with the standardized basket at the time of sale.[7] If a buyer has sold individual basket stocks and has not separately reacquired them, or if changes have been made to the index since the basket was purchased, the buyer who then decides to sell a basket will have to "rebalance" his position so that he can deliver all the current market basket stocks in their proportionate number of shares.[8]

[6] The number of shares of individual stock shall be determined by dividing the outstanding float of the particular security by the divisor of the index and multiplying this value by the index multiplier, subject to the requirement that any fractional amount is to be rounded to the nearest whole share. For example, if XYZ Corp. has 130.257 million shares outstanding and the divisor for the S&P 500 (expressed to four decimal places) is 3022.4168 million, the weighted number of shares for XYZ Corp. would be 0.0431 (130.257 million ÷ 3022.4168 million). The purchaser of the S&P 500 market basket would receive 216 shares (.0431 × 5,000, the index multiplier for the basket contract) of XYZ stock, together with the stock of the other companies whose shares comprise the index in amounts corresponding to their respective weighting in the index.

[7] The process will be simpler for offsetting transactions that occur during a single trading day. Specifically, the Exchange proposes that if a customer has purchased and sold the same market basket contract on the same date, then the customer will receive a confirmation statement reflecting the terms of such purchase and sale, including the amount of any credit or debit to the customer's account.

[8] If a change occurs in the composition of either the S&P 100 or S&P 500, the composition of the

Continued

The CBOE proposes to trade market basket contracts based on the Standard & Poor's 100 Stock Price Index ("S&P 100") and the Standard & Poor's 500 Stock Price Index ("S&P 500").[9] The Exchange proposal provides that determinations as to the composition of the index, the index divisor, and the number of shares outstanding of each of the component stocks shall be determined by the Exchange after the close of business on the date preceding the trade date.[10] The index multiplier for both the S&P 100 basket ("OBE") and S&P 500 basket ("MBX") contract is 5,000, and, accordingly, the value of a single OBE and MBX contract is approximately $1,610,000 and $1,730,000, respectively.[11]

B. Market Structure for the Trading of Market Basket Contracts

1. DPM and Market Makers

The Exchange proposes to trade market basket contracts under its Designated Primary Market Maker ("DPM") program. In acting as a market maker, the DPM will fulfill all the obligations of a market maker along with the other market basket market makers that are at the market basket post. Additionally, the DPM will fulfill the responsibilities of the Order Book Official by, among other things, maintaining the limit order book and displaying bids and offers in the book.[12]

The Exchange also proposes to appoint market makers to trade the market basket contracts. These market basket market makers will supplement the DPM in making markets and thereby provide additional liquidity to the market basket post. Under the proposal, market makers in market basket contracts will be obligated to perform a similar function to market makers in classes of options. In general, a market maker will be expected to engage in a course of dealings reasonably calculated to contribute to the maintenance of a fair and orderly market. Specifically, market basket market makers, when present in the trading crowd, will be expected to compete with other market makers to improve the markets of market basket contracts. Moreover, when present in the trading crowd, the market basket market makers are expected to update market quotations in response to changed market conditions. In addition, the market basket market makers will be expected to make markets and, at the request of another member or the DPM, provide bid and/or offer quotations that are subject to immediate acceptance for one contract. The Exchange believes this one-contract requirement is appropriate based on the size of each market basket contract.[13] Moreover, if a bid and/or offer quotation larger than one contract is displayed, then the trading crowd (including the DPM) will be required to sell or buy such greater number of contracts.

2. Financial Requirements for DPM and Market Makers

In addition to the requirement of a Clearing Member Guarantee,[14] the Exchange proposes to establish financial requirements for the market basket DPM and market makers. Specifically, the CBOE proposes to require the market basket DPMs to have $10,000,000 in excess net capital.[15]

The Exchange also proposes to require a market maker to have $450,000 of net liquidating equity in order to be eligible to trade market basket contracts.[16] In addition to this initial capital requirement, the CBOE proposal contains a maintenance requirement for market makers of $225,000 net liquidating equity. The net equity requirement can be met from either an individual account, joint account, [17] or group account.[18] According to the CBOE, this net liquidating equity standard does not require that specific funds be dedicated to market basket trading; rather, the standard is designed to ensure that only market makers with a substantial equity position are allowed to trade market basket products.

The Exchange believes these financial requirements will ensure that participating market makers have sufficient capital to withstand day-to-day price movements in the securities comprising the market baskets.[19]

stocks that comprise the applicable market basket will change the following trade day. Accordingly, changes in the composition of the market baskets will complicate liquidating transactions by market participants and investors.

[9] Section 12(a) of the Act generally prohibits the trading of a security on a national securities exchange unless the security is registered on the exchange. Upon application by an exchange and Commission approval, however Section 12(f)(1) of the Act and Rule 12f-1 thereunder authorize the Commission to extend unlisted trading privileges ("UTP") to any security registered pursuant to Section 12 (b) or (g) of the Act. The CBOE has requested UTP in the companies comprising the S&P 100 and S&P 500 Index.

[10] The CBOE states that index information will be readily available to investors. For Example, S&P's Index Alert System provides current information about the composition and capitalization weighting of the S&P 100 and 500 Indexes. The Exchange will maintain in files available to the public current data on the composition of the component stocks and their relative representation in the indexes.

[11] Based on S&P 100 and S&P 500 Index values on September 8, 1989.

[12] In addition, the DPM will be required continuously to display the highest bid and the lowest offer voiced in the trading crowd, execute customer orders left on his book, and disclose, upon request, information regarding the depth of the market.

[13] Interpretation .05 to CBOE Rule 8.7. establishes a similar bidding/offering five-contract requirement for options market makers. The monetary value of five OEX contracts, however, is approximately $20,000, in comparison to a value of $1,600,000 for one MBX basket.

[14] CBOE Rule 8.5 provides that no market maker shall make any transaction on the floor of the Exchange unless a Letter of Guarantee has been issued for such member by a clearing member, approved by the Options Clearing Corporation ("OCC"), and filed with the Exchange. With respect to market basket contracts, a market maker Letter of Guarantee must acknowledge that the market maker is approved to trade market basket contracts. Additionally, special notations will be placed on the badges of market makers that are qualified to trade market baskets.

[15] The Exchange reserves the right to waive this requirement in unusual circumstances, such as permitting a DPM, whose capital drops below the capital requirement, to continue its function where the markets are volatile or disruptive, and no other Exchange member reasonably can be expected to fulfill the DPM function. *See* letter from Mary L. Bender, First Vice President, Division of Regulatory Services, CBOE, to Howard Kramer, Assistant Director, Division of Market Regulation, SEC, dated September 27, 1989. For the purpose of this requirement, net capital shall be computed in accordance with the requirements of Rule 15c3-1 under the Act. Excess net capital shall mean the amount of net capital in excess of the amount required under Rule 15c3-1.

[16] By contrast, a member acting as a floor broker will be required to have $225,000 of net liquidating equity in order to qualify to trade market basket contracts. Net liquidating equity is defined as the sum of the net value of a market maker's long and short positions adjusted for any credit or debit balance. *See* Rule 15c3-1(c)(2)(x)(B)(2).

[17] *See* letter from Margaret E. Wiermanski, Director, Credit Policies and Special Projects, Department of Financial Compliance, CBOE, to Mark McNair, Staff Attorney, Division of Market Regulation, SEC, dated September 1, 1989. A joint market maker account is an account in which more than one market maker participates. The Exchange approves all joint accounts and, for surveillance purposes, each joint account is assigned an acronym that begins with the letter "Q." If a joint account trades market basket contracts, then only one individual market maker can trade market basket contracts for the benefit of the joint account at any time unless the Exchange grants an exception.

[18] A group account involves several traders trading for the same market maker account, where the equity in each trader's account is aggregated to determine the equity position of the group account. For example, broker-dealer *ABC* is a market maker firm that has employed four individuals to trade on its behalf ("nominees") at the Exchange. Each nominee has an acronym and an account, but the accounts identify *ABC* as the ultimate beneficiary. For purposes of the minimum capital requirements, the nominee accounts are combined to determine how many, if any, nominees would be permitted to trade market basket contracts for the group account For example, if the combined net liquidating equity for *ABC* is $1,000,000, then the market maker firm could have no more than two nominees trading market basket contracts at the same time.

[19] Specifically, the Exchange examined the daily close-to-close price moves for the Indexes for the last three years. The Exchange, consistent with its methodology for assessing risk in other areas such as margin requirements, sought to develop financial requirements that would meet the close-to-close

Continued

Moreover, the Exchange notes that there are a significant number of OEX and SPX Options market makers [20] who currently meet the proposed financial

in the maintenance of a fair and orderly market for the market basket contracts. Because a market basket contract is a stock product and not an options

confirmation of customer transactions, member organizations must provide details, not only as to the market basket transaction itself, but also information

margin requirements applicable to exchange-traded equity securities would be appropriate for market basket contracts.[28]

of OCC and OCC's correspondent stock clearing corporations.[53]

III. Comments Received

the CBOE letter notes that many of the market structure issues identified in the AFB comment letters are specifically addressed in the CBOE proposal.

VOL 54 ISS 209 OCT 31 1989 UMI

Moreover, the Exchange notes that there are a significant number of OEX and SPX Options market makers [20] who currently meet the proposed financial requirements that would be eligible to trade market baskets.[21] The Exchange proposed an initial entry requirement higher than the maintenance level to ensure that day-to-day price changes in equities do not prevent market makers from committing equity to trading market basket contracts.[22]

3. Location of the Market Basket Posts

The Exchange proposes to trade market baskets adjacent to the posts where index options are traded. The Exchange believes that this arrangement will enhance the efficiency of both markets by minimizing price disparities between market baskets and index options. Additionally, the Exchange believes this arrangement will facilitate hedging and other trading strategies involving both types of index contracts. Moreover, the Exchange believes that this arrangement will not present any of the potential abuses generally associated with side-by-side trading because both the market basket and index options contracts are priced derivatively in relation to the prices of the underlying stocks in the principal markets where such stocks are traded.

C. Application of Exchange Rules to Market Basket Contracts

The Exchange proposes to apply most of its rules for options to the trading of market baskets. The Exchange believes that these rules are suitable to the trading of market baskets and will assist in the maintenance of a fair and orderly market for the market basket contracts. Because a market basket contract is a stock product and not an options contract, however, there are areas where the Exchange proposes to modify the applicable Exchange rules.

1. Net Capital Requirements

Broker-dealers, at the end of the trading day, will be long or short the component stocks as a result of the market basket transactions. Accordingly, the Exchange notes that the normal "haircuts" for stocks set out in the Commission's net capital rule will apply to transactions in market basket contracts. Additionally, the CBOE notes that positions in the component stocks resulting from the trading of market baskets will be subject to lesser haircuts when these positions are offset by broad-based index options or futures contracts.[23]

2. Customer Protection Rules

The Exchange proposes to apply substantially all of its customer protection rules to market basket trading.[24] In considering the applicability of its customer protection rules, the Exchange notes that the dollar value of the unit of trading for market baskets most likely will limit the interest in these contracts only to the largest and most sophisticated institutional investors. Accordingly, the Exchange believes that these institutional investors may not require the same protections as do retail investors. Nevertheless, the Exchange proposes that market basket transactions will be subject to Exchange rules covering supervision, suitability, restrictions on acting for persons affiliated with exchanges or other members, assuming losses, communications with customers, and complaints.[25] With respect to the confirmation of customer transactions, member organizations must provide details, not only as to the market basket transaction itself, but also information as to the identity, price and number of shares of each of the component stocks that comprise the basket.[26] The CBOE proposal provides that members who participate in the Institutional Delivery System ("IDS") of the Depository Trust Company may use the confirmations generated by IDS to satisfy customer confirmation requirements.[27]

3. Position and Exercise Limits

The Exchange believes that the position limits and exercise limits applicable to options contracts should not be applicable to market basket contracts because there will be no open interest in, and no exercise of, market basket contracts. Instead, all transactions in market baskets will be settled by the delivery of the component stocks. Thus, the Exchange believes that exercise limits have no application to market baskets. Additionally, the Exchange believes that because there are no numerical restrictions on the ownership of individual common stock, the position limits that apply to transactions in options should not apply to market basket transactions.

4. Margin

Because the purchase of a market basket contract results in the physical delivery of each stock composing the basket, Regulation T requires a 50% margin requirement. Moreover, the applicable Exchange rules provide for maintenance margin requirements of 25% and 30% for long and short positions, respectively. In this regard, the CBOE received a staff opinion from the Federal Reserve System that the margin requirements applicable to exchange-traded equity securities would be appropriate for market basket contracts.[28]

The Exchange also proposes to clarify the margin rules applicable to market makers in market basket contracts. Specifically, the Exchange believes that market basket market makers should be entitled to "good faith margin" treatment for all transactions in market basket contracts, as would any other specialist who makes a market in a particular security.[29] Movever, the Exchange believes that Regulation T affords good faith margin treatment for positions in broad-based index options taken by market basket makers, provided that the market maker is using the options to hedge stock positions acquired through market basket trading and he is a market maker in both the market basket and the index option. Accordingly, index options market makers who are not market makers in market baskets would not receive good faith margin treatment for market basket transactions that hedge their index options positions.[30]

D. Clearing and Settlement of Proposed Contracts

The CBOE proposed that OCC will perform the clearing and settlement functions for the Exchange's market basket products.[31] OCC has submitted a proposal to the Commission to amend its rules to enable it to perform such functions for the trading of baskets of stock.[32]

Specifically, the Exchange proposes that the buyer of the market basket contract will be obligated to purchase and the seller will be obligated to sell a quantity of shares of each component stock of the designated index. The settlement of the purchase and sale of the underlying component stocks will take place on the fifth business day after trade date in accordance with the rules of OCC and OCC's correspondent stock clearing corporations.[33]

III. Comments Received

The Commission did not receive any comment letters in response to its request for comments on the proposed rule. The Commission, however, did receive responses to a similar proposal by the NYSE to trade baskets of stock.[34] Specifically, the Commission received a comment letter from the Commodity Futures Trading Commission ("CFTC") that stated that the NYSE market basket proposal was not a futures contract under the Commodity Exchange Act, and a Chicago Board of Trade ("CBT") letter that commended the NYSE proposal to trade baskets of stock.[35]

The Commission also received comment letters from the Alliance of Floor Brokers ("AFB"), whose membership is predominately comprised of NYSE floor brokers, on both the NYSE proposal [36] and the MSE proposal.[37] The AFB letters raised objections to each exchange's respective proposal and stated that their reservations extended to the CBOE "ersatz stock" proposal. In general, the AFB claimed not to be unequivocally and arbitrarily opposed to portfolio products, but believed that the regulations and trading practices applicable to individual stock transactions generally should apply to stock basket transactions.

In response to the comment letters, the CBOE argues that although the AFB comment letters argue that both the NYSE and MSE proposals have very specific defects,[38] neither AFB letter specifically discussed any shortcomings in the CBOE proposal.[39] Additionally, the CBOE letter notes that many of the market structure issues identified in the AFB comment letters are specifically addressed in the CBOE proposal. Specifically, the CBOE notes that because of its concern with order exposure and competition, the CBOE proposal utilizes a competitive market maker and DPM trading system to trade market baskets. The CBOE also notes that all the present safeguards to ensure public priority in options trading will apply to basket trading. In particular, for example, there will be a public limit order book in place and basket orders will be routed via the CBOE's computerized "Order Routing System."

The CBOE also responded to AFB criticisms regarding possible exemptive relief from the short sale rule for market basket products. Specifically, the CBOE believes that sales of market baskets should be exempted from the "tick test" of Rule 10a–1 under the Act because the underlying rationale for the Rule is not applicable to market basket trading. Moreover, the Exchange notes that application of the tick test to market baskets could effectively preclude market basket trading during a declining market, when the "shock absorbing" benefits of market basket trading would be most useful.

IV. Discussion

A. Introduction

After careful consideration of the comments received, applicable statutory provisions, and relevant policy considerations, the Commission believes that the CBOE's market basket proposal is reasonably designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and, in general, protect investors and the public interest. For these reasons and for the additional reasons set forth below, the Commission finds that approval of the Exchange's proposed rule change relating to the trading of market basket contracts is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, in general, and the requirements of sections 6(b) (4) and (5) and the rules and regulations thereunder, in particular.[40]

B. Benefits of Market Baskets

The Division of Market Regulation's Report on *The October 1987 Market*

---

price moves for 95% of trading days. Moreover, the CBOE, in calculating market maker exposure, assumed the market maker would have an unhedged position of ten market basket contracts on the same side of the market and such an exposed position would be unusual for a market maker. Accordingly, the Exchange believes the proposed $450,000 financial requirement for market makers, which would cover 95% of one day price moves based on closing prices for 10 MBX baskets, is sufficient and appropriate. *See* letter from Mary Bender, First Vice President, Division of Regulatory Services, CBOE, to Brandon Becker, Associate Director, Division of Market Regulation, dated August 21, 1989.

[20] "OEX" and "SPX" are options contracts traded on the Exchange and based on the S&P 100 Index and S&P 500 Index, respectively.

[21] The Exchange represents that as of July 1989, with respect to OEX and SPX traders with monthly trading volume in excess of 10,000 contracts, approximately 70 traders maintain net liquidating equity of $225,000 or more, of which 50 traders maintain net liquidating equity greater than $450,000. *See* CBOE letter, *supra* note 19.

[22] A trader falling below the maintenance level will be permitted only to effect liquidating market basket transactions as a market maker. As long as his account maintains positive equity, however, he would not be precluded from trading option contracts on the Exchange.

[23] *See* letter from Mary L. Bender, First Vice President, Division of Regulatory Services, CBOE, to Michael Macchiaroli, Assistant Director, Division of Market Regulation, dated January 27, 1989.

[24] Because the buyer is acquiring a basket of securities rather than an option, delivery of an options disclosure document is not required.

[25] The original CBOE proposal included a requirement that a member organization provide a customer, before or contemporaneous with the first written confirmation of a market basket transaction, a written description, substantially in the form provided by the Exchange, of the mechanics and risks of trading in market basket contracts. The Exchange has amended its proposal to delete this requirement. The Exchange believes that this requirement is not necessary because only sophisticated institutional investors will trade the product. Additionally, because market basket contracts are not options, the CBOE further amended its proposal to make the rules for market basket contracts relating to dealing with the public more closely comparable to the rules of other self-regulatory organizations that regulate the trading of stocks. Specifically, many CBOE rules were adopted in recognition that the unique attributes of options required special safeguards and procedures that are not required for a customer's non-options accounts and transactions. For example, the CBOE proposal provides that certain rules relating to the opening of customer options accounts, such as registration of options principals and delivery of the options disclosure document, will not be applicable to market baskets.

[26] Such information is required by the provisions of Rule 10b–10 of the Act. The Exchange's proposed Rule 26.10 provides that each confirmation shall show the class of a market basket contract, contract price, number of market basket contracts purchased or sold, number of individual component underlying stocks, commissions, date of transaction and settlement date, whether the transaction is a purchase or sale, and whether it is a principal or agency transaction.

[27] The CBOE proposal also provides that the derived prices of component stocks of a market basket contract shall be based upon the market basket transaction price and calculated in accordance with an algorithm provided by the CBOE.

[28] *See* letter from Mary L. Bender, First Vice President, Division of Regulatory Services, CBOE, to Laura Homer, Securities Credit Officer, Board of Governors of the Federal Reserve System, dated May 17, 1989, and letter from Laura Homer, Securities Credit Officer, Board of Governors of the Federal Reserve System, to Mary L. Bender, First Vice President, Division of Regulatory Services, CBOE, dated June 8, 1989.

[29] *See* Regulation T, 12 CFR § 220.12(b)(3)(i).

[30] In this regard, the CBOE received a Federal Reserve Board staff opinion that agreed with the CBOE's application of good faith margin to market basket market makers. *See* Homer Letter, *supra* note 28, at 2.

[31] Presently, OCC provides such functions for the Exchange's options contracts.

[32] *See* Securities Act Release No. 27157 (August 21, 1989), 54 FR 35743 (August 29, 1989). OCC filed amendments to the proposal with the Commission on September 21, 1989 and October 13, 1989.

UMI

Break ("Staff Report"),[41] and an NYSE-commissioned study entitled *An Overview of Program Trading and Its Impact on Current Market Practices* ("Katzenbach Report"), recommend, among other things, the listing and trading of a basket of stocks on an exchange as a means to enhance market efficiency and, possibly, the market's ability to absorb institutional portfolio trading.[42] As noted in the Staff Report, the creation of one or more posts for the purpose of trading actual baskets or portfolios of stock could alter the dynamics of program trading because the availability of such a basket trading mechanism could, in effect, restore the execution of program trades to more traditional block trading techniques.[43] The Staff Report noted further that, while arbitrage ultimately would flow to indivdiual component stocks, many institutional investors and member firms effecting arbitrage transactions could focus their equity transaction at the basket post where the market makers and trading crowd could provide efficiencies associated with effecting transactions in a portfolio of securities as opposed to individual stocks. This could add an additional layer of liquidity and concentrated capital to the market in order to help absorb the volume and velocity of trading associated with certain index-related trading strategies.[44]

Furthermore, because market baskets will be traded on the Exchange Floor at a single location in an "open book" environment, members in the crowd will be able to see the bid offer spread and inquire as to the depth of the market (*i.e.*, the size of the buying and/or selling interest at each minimum tick away from the prevailing bid and offer for the basket). Program trading order flow entered into the system and imbalances resulting therefrom thus will be disclosed, thereby ameliorating current market information limitations in identifying program trade executions (or overhanging program orders) in the individual stocks.[45] Finally, by creating a trading vehicle for an aggregated basket of standardized protfolios of stocks in a single execution with minimal "execution slippage",[46] the trading of market baskets will provide an efficient mechanism to trade, clear and settle stock baskets.

The Commission believes that the CBOE market baskets will provide institutional investors with a cost efficient means to make investment decisions based on the direction of standardized measures of stock market segments and the stock market as a whole, and may provide stock market participants several advantages over existing methods of effecting program trades of stocks and transactions in portfolios of securities. For the reasons discussed below, the Commission finds that the market structure proposed by the CBOE reasonably is designed to promote just and equitable principles of trade and fair and orderly markets. Furthermore, the Commission believes that market basket trading will not lead unduly toward a more fragmented and volatile market, and that the CBOE proposal to trade market baskets is consistent with the development of an open and competitive national market system.

C. Price Dissemination and Reporting

The CBOE proposes to disseminate basket last sale information and quotations through the Options Price Reporting Authority ("OPRA"), thereby ensuring that all market participants will have ready access to market basket transaction reports and quotations.[47] Rule 11Aa3–1 under the Act requires, however, an exchange to file a transaction reporting plan that would govern transaction reporting of certain securities traded on that exchange. Because CBOE will be trading securities subject to transaction reporting requirements and has not filed a transaction reporting plan, it has requested an exemption from that requirement. The Commission has granted the exemption in Securities Exchange Act Release No. 27391 (October 26, 1989) ("Exemption Order").

CBOE Rule 26.11(e) imposes on Exchange members an obligation to make firm quotes for market basket contracts, which is consistent with the requirement in Commission Rule 11Ac1–1 that quotations be firm.[48] However, no quotes or last sale reports will be generated or disseminated for the individual constituent stocks comprising a market basket during the trading day.

For the first six months of basket trading, the CBOE will not disseminate on a consolidated basis the total trading volume represented by basket trades. While the Commission is aware of the limited usefulness of price information on the underlying securities in the baskets, it believes that dissemination of the share volume in the underlying securities is important information and should be included in the daily consolidated volume for each of the underlying securities. Because this presents a number of technological difficulties for CBOE, CBOE has represented that it will evaluate trading in the baskets over a six-month period and, at the end of that period in consultation with the Commission, CBOE will reconsider whether its volume dissemination prodocures should be modified.[49]

D. Market Structure

The Commission believes that the trading structure for market basket contracts is adequate to provide fair and orderly markets. The DPM system has been employed by the CBOE for other new products, and will help to ensure continuous quotations for the basket products. Moreover, supplemental market making support for this relatively "expensive" product will be provided by potentially dozens of market basket market makers. These market makers will be obligated to make markets, and, specifically, provide bid and/or offer quotations which will be subject to immediate acceptance.

[41] Division of Market Regulation, *The October 1987 Market Break* (February 1988).

[42] *See also* Securities and Exchange Commission Recommendations Regarding the October 1987 Market Break contained in Testimony of David S. Ruder, Chairman, SEC, Before the U.S. Senate Committee on Banking, Housing, and Urban Affairs, on February 3, 1988.

[43] Staff Report at 3–16. For a detailed description of current block trading mechanisms, *see* the *Report of the Presidential Task Force on Market Mechanisms*, at VI–9 to VI–11 (January 1988) ("Brady Report").

[44] *Id.* Similar ideas have been discussed in J. Grundfest, "Would More Regulation Prevent Another Black Monday?", Address before the CATO Institute Policy Forum on July 20, 1988, at 13–14 (copies available at the Commission); H. Stoll and R. Whaley, "Program Trading and The Monday Massacre" (November 4, 1987) (copies available at the Owen Graduate School of Management, Vanderbilt University); and H. Stoll, *Portfolio Trading*, Working Paper No. 87–14 (September 1987) (copies available at the Owen Graduate School of Management, Vanderbilt University).

[45] The CBOE's concept of an open, fully-disclosed book to support market basket trading is consistent with suggestions offered by various studies of the October 1987 Market Break. *See also* Wells Fargo Investment Advisors, *Reflections on the Stock Market Crash of October 1987* (January 25, 1988).

[46] "Execution slippage" is defined as the adverse price impact that currently accompanies the fragmented execution of program trades. *See, e.g.*, the Katzenbach Report at note 29.

[47] OPRA is responsible for collecting from the options exchanges last sale and quotation information for all standardized options and disseminating that information to private vendors.

[48] 17 CFR § 240.11Ac1–1 (1989). The Commission notes that Rule 11Ac1–1 requires that disseminated quotations include the size associated with the quote. OPRA, the facility through which CBOE basket quotes will be reported cannot, however, disseminate size. Thus, CBOE requested an exemption from this requirement, which the Commission granted in the Exemption Order.

[49] *See* letter from Nancy R. Crossman, First Vice President and General Counsel, CBOE, to Howard L. Kramer, Assistant Director, Division of Market Regulation, SEC, dated October 11 , 1989. *See* Exemption Order for further discussion.

The Commission believes the proposed financial requirements for the DPM and market makers to trade market basket contracts are appropriate. Specifically, the financial requirement for the DPM will ensure that the DPM has sufficient resources to perform effectively its market obligations. Additionally, the Commission believes the initial and maintenance financial requirements for market makers are sufficient to ensure that only those persons or firms with adequate equity to trade contracts worth over $1,000,000 will receive market maker status. At the same time, these financial standards are not so high as to result in an inadequate number of market basket market makers. The Commission believes that the Exchange has balanced concerns regarding liquidity and required capital, and, accordingly, designed standards to ensure sufficient market making resources at the market basket trading post.

In regard to the physical location of the market basket pit, the Commission does not believe that the location of the market basket trading post adjacent to the post or posts where traditional index options are traded raises side-by-side trading concerns. Specifically, both the market basket contracts and index options contracts are based on the prices of a group of stocks, none of which by itself accounts for a significant weighting of the applicable index.[50] In addition, the underlying stocks for the baskets are not traded on the CBOE. Accordingly, Exchange market makers will not have a market informational advantage of the nature and dimension that specialists in individual stocks traded on the primary market would have. Therefore, the Commission does not believe that permitting CBOE members to be market makers for index options and market baskets will create an undue advantage that would undermine the maintenance of fair and orderly markets. Additionally, the Commission believes that the close proximity of the index options and market basket posts will allow CBOE market makers to hedge both their index options and stock basket positions more efficiently. The Commission believes that this opportunity to hedge may enhance the depth and liquidity of the index options and market basket markets, thereby improving the quality of these markets.

E. Application of Current Rules to Market Basket Contracts

The Commission believes that the application of the existing Exchange options trading rules to market basket transactions will assist in the maintenance of a fair and orderly market for the new market basket contracts. Moreover, the Commission believes that the application of the current trading rules will promote just and equitable principles of trade at the market basket trading post and protect investors and the general public.

In addition, the Commission recognizes that because transactions in market basket contracts result in the transfer of the underlying stocks, certain Exchange rules designed for options contracts are not appropriate for the trading of market basket contracts. Specifically, position and exercise limits are not appropriate for market basket contracts, because the transactions are not leveraged and the underlying securities are actually acquired. Additionally, for the same reasons, the Commission believes that the applicable margin rules for both customers and market basket market makers should be based on the rules applicable to the underlying stock involved in a market basket transaction.

The Commission also believes that the proposed rules regarding customer protection are appropriate for market basket contracts. The Commission recognizes that because of the size of a market basket contract only institutional or sophisticated investors will invest in them. The Commission agrees with the Exchange that such investors do not require a special disclosure document that describes the risks of trading baskets of stocks. The Commission notes, however, that the Exchange will apply substantially all of its customer protection rules, including suitability requirements, to market basket transactions.[51]

F. Exemption Requests

The Exchange has requested that the Commission grant exemptions from Rules 10a–1; 10b–6, 10b–8, 10b–10, 10b–13, 15c1–5, and 15c1–6 under the Act[52] to facilitate trading in market basket contracts.[53]

Rule 10a–1 provides that short sales[54] of exchange-listed securities may not be effected at a price less than the price at which the immediately preceding sale was effected ("minus tick") or at a price equal to the last sale if the last preceding transaction at a different price was at a higher price ("zero-minus tick"). The Exchange has requested relief from Rule 10a–1 in two respects. First, the Exchange seeks an exemption from Rule 10a–1 as it would apply to the individual component stocks in the S&P 100 and S&P 500 market basket contracts and to transactions in the market basket contract itself. Second, the Exchange requests an exemption analogous to the "block positioner" exemption in paragraph (e)(13) of Rule 10a–1.[55] The requested exemption would permit DPMs and market basket market makers, selling stock acquired in a market basket transaction, to disregard, when netting positions for purposes of Rule 10a–1, a short position that is the subject of one or more offsetting positions created in the course of bona fide arbitrage, risk arbitrage, or bona fide hedging activities.

Rule 10b–6 limits the ability of underwriters, issuers, or certain other persons to bid for or purchase a security being distributed, or a related security, during the distribution of that security. Rule 10b–7 regulates stabilizing transactions in connection with an offering of securities. Rule 10b–8 restricts bids and purchases of rights, and offers and sales of the underlying stock, by persons participating in a rights offering. Rule 10b–10 requires broker-dealers to provide customers with a written confirmation that includes, among other things, the identity, price and number of shares or units of a security purchased or sold by the customers.[56] Rule 10b–13 prohibits persons making a tender offer for a security from purchasing or arranging to purchase that security otherwise than pursuant to the tender offer. Rule 15c1–5 requires a broker-dealer to disclose that it has a control relationship with an issuer before executing a transaction in that issuer's securities. Rule 15c1–6 requires a broker-dealer to disclose its participation or financial interest in the

[50] As of August 31, 1989, the five largest companies in the S&P 50 (IBM, Exxon, GE, AT&T, and GM) comprised 10.97 percent of the Index. The five largest companies in the S&P 100 (IBM, Exxon, GE, AT&T, and Philip Morris) comprised 28.49 percent of the Index.

[51] To the extent relevant, the Commission incorporates in this order its response to the comments on the NYSE's ESP proposal.

[52] 17 C.F.R. §§ 240.10a–1, 240.10b–6, 240.10b–7, 240.10b–8, 240.10b–10, 24010b–13, 240.15c1–5, and 240.15c1–6 (1989).

[53] *See* letters from Nancy Crossman, General Counsel, CBOE to Larry E. Bergmann, Associate Director, Division of Market Regulation, SEC, dated September 6, 1989, September 18, 1989, and October 10, 1989.

[54] A short sale is defined in Rule 3b–3 under the Act, 17 CFR § 2403b–3, as any sale of a security that the seller does not own or any sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller. Rule 3b–3 provides further that a person shall be deemed to own a security only to the extent that such person has a new long position in the security.

[55] *See* Securities Exchange Act Release No. 20715 (March 6, 1984), 49 FR 9414 (March 13, 1984).

[56] See *supra*, note 25.

VOL 54 ISS 209 OC 31 1989 UMI

distribution of a security at or before the completion of a transaction in such security for the account of a customer of that broker-dealer.

The Commission believes that transactions involving standardized baskets of stocks generally involve the same regulatory concerns that are applicable to transactions in individual stocks, and that appropriate conditional relief from Rules 10a–1, 10b–6, 10b–7, 10b–8, 10b–10, and 10b–13 is necessary and appropriate if the benefits of trading in market basket contracts are to be achieved. With respect to Rules 15c1–5 and 15c1–6, in recognition of the unique nature of market basket contract transactions, the Division has determined that transactions in market baskets are unlikely to give rise to the abuses the rules were designed to prevent and accordingly, the Division is taking a no-action position under those rules. Accordingly, the Commission's staff today has provided exemptions or other appropriate relief with respect to the treatment of transactions in market basket contracts under these rules.

V. Conclusion

The Commission believes that the market structure for trading market baskets is consistent with just and equitable principles of trade. Moreover, given the institutional character of stock portfolio trading that market basket trading is designed to capture, the Commission believes that the Exchange's chosen market structure is a fair and competitive market structure. Finally, the Commission's Section 19 authority and the Rule 19b–4 process allow the Commission and the Exchange sufficient flexibility to modify market basket trading in light of actual trading experience and any future developments.[57]

Accordingly, based upon the aforementioned factors, the Commission finds that the Exchange's proposed rule change relating to the trading of market baskets is properly within its jurisdiction and consistent with the requirements of Sections 6(b)(4) and (5) of the Act and the rules and regulations thereunder.[58]

[57] The Commission believes that the 30 day comment period that accompanied publication of the Exchange's proposal, and the Commission's continued willingness to entertain all comments that preceded this action, provided an adequate public forum in which to examine all the issues and concerns regarding the Exchange's market basket proposal. Accordingly, it is unnecessary to hold public hearings on the CBOE proposal.

The Commission notes that approval of the proposed rule change is based upon a determination that the terms of market basket trading are consistent with the requirements of the Act. If the terms of the market basket contract, including the index multiplier, or market structure are changed in any material way, however, it would be necessary for the CBOE to submit a proposed rule change in order to afford the public an opportunity to review and comment on the proposed modification and for the Commission to review its prior determination.

The Commission finds good cause for approving those portions of the proposal that were amended by Amendments No. 3, 4, and 5 prior to the thirtieth day after the date of publication of the amendments in the **Federal Register**. The original filing was the subject of a 30-day notice period and the amendments made only minimal changes to the proposal as noticed. In addition, accelerated approval is necessary because market basket trading is scheduled to begin on October 26, 1989. Because of the Commission view of the benefits that may result from the trading of market baskets on a national securities exchange, the Commission believes a good cause finding is justified.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filings also will be available for inspection and copying at the principal office of the CBOE. All submission should refer to file number SR–CBOE–88–20, and should be submitted by November 23, 1989.

It is therefore ordered, pursuant to section 19(b)(2) of the act,[59] that the proposed rule change (SR–CBOE–88–20) be, and hereby is, approved.

By the Commission.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change to Establish a Secondary Trading Session for the Execution of Transactions in Portfolios of Securities

I. Introduction

On April 28, 1989, the Midwest Stock Exchange, Inc. ("Midwest" or "Exchange") submitted to the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change [3] designed to establish a Secondary Trading Session for the execution of transaction in portfolios of securities through its new automated Portfolio Trading System ("PTS" or "System").[4] Concurrent with its April 28, 1989 filing, Midwest filed with the Commission's Division of Market Regulation ("Division") a proposed transaction reporting plan pursuant to Commission Rules 11Aa3–1 and 11Aa3–2 under the Act.[5]

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1988).

[3] Additionally, Midwest stated that it intends to submit an application to the Commission's Division of Market Regulation for unlisted trading privileges ("UTP") pursuant to Section 12(f) of the Act, 15 U.S.C. § 781(f). *See* letter from J. Craig Long, Vice President and General Counsel, to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated April 27, 1989 ("April 27 letter"). Specifically, Midwest will apply for UTP in those securities which comprise a part of the Standard and Poor's ("S&P") 500 Index and which Midwest does not trade currently pursuant to UTP.

[4] Amendment No. 1, submitted by the Midwest on May 31, 1989, deletes changes to Article XX, Rule 12 and Article XXI, Rules 2, 3, 4, 8, 9, 12 and 13 as proposed in the Exchange's original filing submitted on April 28, 1989. Amendment No. 1 also adds an Interpretation and Policy, to be set forth in Article VIII, Rule 9 of the Midwest's Rules, that clarifies the application of the Exchange's off-board trading restrictions to member transactions in securities traded on the Exchange. In particular, the Interpretation and Policy clarifies that implementation of the Midwest's proposed Secondary Trading Session will not prohibit members from effecting transactions in securities listed or admitted to unlisted trading privileges on the Exchange, where the member acts as principal or agent, on any organized exchange, or over-the-counter market in any foreign country, outside of the trading hours of the Exchange's Primary Trading Session.

[5] 17 CFR §§ 240.11Aa3–1 and 240.11Aa3–2 (1989). The Midwest also has requested an exemption from the requirements of paragraph (b)(2)(viii) of Rule 11Aa3–1 for transactions effected through the System. *See* letter from J. Craig Long, Midwest, to Mary Revell, Branch Chief, SEC, dated September 12, 1989.

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26887, June 2, 1989), and by publication in the **Federal Register** (54 FR 24779, June 9, 1989). The Commission received one comment on the proposed rule change.[6]

II. Description of the Proposal

A. PTS Product Description and Market Structure

Proposed Midwest Rule 10(b), Article IX would establish a Secondary Trading Session to be conducted from 3:30 p.m. to 5:00 p.m. Central Time (4:30 p.m. to 6:00 p.m. Eastern Standard Time) for the limited purpose of permitting the execution of transactions in qualified portfolios of equity securities through the PTS.[7] The rules governing the Secondary Trading Session are to be set forth in a new Article XXXV of the Midwest's Bylaws.[8]

The Midwest's Floor will not be open during the Secondary Trading Session. Rather, all qualified portfolio transactions will be executed through the PTS, an automated, screen-based trading system maintained by Midwest. Exchange members will be permitted access to the PTS through dial-up modems, but Exchange specialists, odd-lot dealers and registered market makers may not participate as such during the Secondary Trading Session.

The Midwest's Secondary Trading Session is limited to transactions in portfolios of "Eligible Securities." These are defined in proposed Rule 2(d), Article XXXV as all securities that are listed for trading on the Exchange or to which UTP have been granted. The Midwest's Secondary Trading Session will allow portfolio transactions in both "standardized portfolios" and "non-standardized portfolios". Proposed Rule 2(a), Article XXXV defines the term "standardized portfolios" as any group of Eligible Securities that are the subject of an option contract traded on a national securities exchange or a futures contract traded on a contract market designated by the Commodity Futures Trading Commission. Rule 2(b) defines a "non-standardized portfolio" as any group of Eligible Securities consisting of at least 20 securities, where the value of any one security does not exceed 20 percent of the contract price of the shares in the portfolio as executed.

Proposed Midwest Rule 9, Article XXXV establishes objective and subjective pricing parameters for stock portfolio transactions executed through the PTS. Using the last reported price after the New York Stock Exchange ("NYSE") close for each of the securities comprising a portfolio as reported on the Consolidated Transaction Reporting System or the NASDAQ Transaction Reporting System on the day the portfolio transaction is to be executed, the price at which the portfolio transaction is executed may not be less than 95% or greater than 105% of the aggregate value of the securities comprising the portfolio. Additionally, proposed Rule 9, Article XXXV specifies that the price of each security comprising a portfolio may not be less than 90% or greater than 110% of the last reported price for that security. Furthermore, the price at which a portfolio transaction is executed, both in the aggregate and on a security-by-security basis, must be fair, taking into consideration all relevant circumstances, including market conditions with respect to such security or securities at the time of the transaction, the expense involved, and the fact that the member or member organization is entitled to a profit. Upon application by a member or member organization, Rule 9 permits an officer of the Exchange to exempt transactions on a case-by-case basis from the operation of the objective portfolio pricing parameters.

Under proposed Rule 5, Article XXXV, bids or offers in portfolios entered into the PTS must be made in minimum increments of $.01. Bids or offers in Eligible Securities comprising a portfolio must be made in increments of 1/10,000 of a dollar per share.[9]

B. PTS Order Entry and Trading Rules

1. Acceptable Orders

All qualified protfolios traded in the PTS are deemed to consist of a single unit of trading, which is comprised of the number of shares of each security in the portfolio as specified in the bid and offer. All bids and offers entered into the PTS are deemed to be firm quotations to buy or sell the portfolio at the stated price as if made available for an individual security in accordance with Rule 11Ac1-1 under the Act.[10]

Only orders for portfolios may be executed during the Secondary Trading Session. No other orders for the purchase or sale of securities will be accepted for execution. Any orders for the purchase or sale of securities entered in Midwest's Primary Trading Session that remain unfilled at the close will be held over for execution during the next Primary Trading Session and will not be executed during the Secondary Trading Session. Thus, there will be no interaction between orders in individual securities left open at the end of the Primary Trading Session and portfolio executions that take place during the Secondary Trading Session.

A personal computer ("PC") may be used for order entry into the PTS. A member or member organization may make a bid or offer to purchase or sell a portfolio by entering into the System the total value of the portfolio, the symbol and quantity of all eligible securities comprising a non-standardized portfolio, and the settlement terms of other than "regular way" transactions. In the event that an Exchange member or member organization attempts to trade a portfolio that contains a non-eligible security, a PTS systems check would disallow the input, and generate a rejection. Similarly, if a portfolio did not meet the standards for concentration and issue composition, the PTS would generate a rejection.

2. Price Protections and Order Execution

Members may enter crossed orders or unmatched bids and offers into the system. When crosses are entered, the System will first search all unmatched orders to determine whether there is an order in the System for the same portfolio at the same or a better price. If there is no better quotation, the cross will be executed, provided the transaction price is within the applicable pricing parameters.[11] If there is a better quotation, the cross will not be permitted and a message to that effect will be sent to the member attempting to effect the transaction.

If an unmatched bid or offer is entered, and the member or member organization wished to sell a specific portfolio at a price equal to or lower than a published bid, or it wishes to buy a specific portfolio at a price equal to or higher than a published offer, then Rule

[6] *See* notes 21–34, *infra* and accompanying text.

[7] The Primary Trading Session currently is conducted on the Floor of the Exchange from 8:30 a.m. to 3:00 p.m. Central Time.

[8] The Article XXXV Rules apply to Exchange contracts made on the Exchange during the Secondary Trading Session. Except to the extent that specific Article XXXV Rules govern, or unless the context otherwise requires, the provisions of Midwest's Constitution and all other rules and policies of the Board of Governors are applicable to the execution of portfolio transactions through the PTS.

[9] The Midwest has stated that the relatively small portfolio valuation increments were chosen to reflect current business practice: customers price a portfolio to the nearest cent, and then allocate the portfolio's dollar value to each stock in the portfolio. In allocating the portfolio's value to the stocks, customers may need to use a fraction of a cent to value each stock.

[10] Midwest Rule 6(a), Article XXXV.

[11] *See* April 27 letter, *supra* note 3.

6(b), Article XXXV requires the member or member organization to "satisfy" such a pre-existing quotation prior to executing any order at that price. The member could then contact the other

accepted in any given Secondary Trading Session, then the bid or offer will be retained for the next Secondary Trading Session, unless it is a day order.[12]

underlying securities is important information that should be included in the daily consolidated volume for each of the underlying securities. This presents a number of technological

public and the regulatory agencies responsible for the oversight of the markets are deprived of important information regarding trading activity in various securities.

The Midwest believes that the

could interact with portfolios, brokers would have the incentive to change their individual stock price allocation in order to avoid this result.

In order to accommodate trading in the System, Midwest has requested

The AFB believes that Midwest's Secondary Trading Session may exacerbate existing structural market risks because of the unequal regulatory treatment accorded transactions in PTS portfolios and regular way transactions

6(b), Article XXXV requires the member or member organization to "satisfy" such a pre-existing quotation prior to executing any order at that price. The member could then contact the other side and personally negotiate a price at which the transaction an take place, because PTS does not operate as an order interaction system. One of the two members would then enter a matched bid and offer into the system for execution.

An Exchange member or member organization that has accepted for execution an order to purchase or sell a portfolio of securities on behalf of a customer through the PTS cannot fill the order by selling or purchasing such portfolio for its own account if it is holding an unexecuted order on behalf of another customer to sell or purchase a portfolio at the same or a better price.[12] Similarly, no Exchange member or member organization that has accepted an order to purchase or sell a portfolio of securities on behalf of a customer through the PTS may fill such an order by selling or purchasing such portfolio for its own account or the account of a customer, if another member or member organization has entered a quotation into the System to sell or purchase such a portfolio at the same or a better price.[13]

When a bid or offer is accepted over the phone by another member or member organization, the portfolio transaction must be executed in accordance with Rule 7, Article XXXV. In order to execute an order, a member or member organization must enter into the System a matched bid and offer for a portfolio.[14] An Exchange member or member organization must then enter specified information describing the executed portfolio transaction into the System.[15] If a bid or offer is not accepted in any given Secondary Trading Session, then the bid or offer will be retained for the next Secondary Trading Session, unless it is a day order.[16]

C. Transaction Reporting Plan

The Midwest has filed a transaction reporting plan ("Plan") that is limited specifically to portfolio transactions executed during the Exchange's Secondary Trading Session.[17] Pursuant to the Plan, when a portfolio is executed through the PTS, Midwest will disseminate real-time transaction reports for the portfolios, but not for the individual securities that comprise the portfolios, from 3:30 p.m. to 5:00 p.m., Central Time (the hours of the Secondary Trading Session), on all trading days.[18] The Exchange will make available to vendors and subscribers: (1) the aggregate price of the portfolio; and (2) the symbol and quantity for each security comprising the portfolio.[19] At the end of each Secondary Trading Session, Midwest will provide to news vendors and subscribers a report on the aggregate number of shares of each of the securities purchased and sold during that session, as well as aggregate System volume.

The Plan submitted by the Midwest does not provide for the consolidation of transaction reports from other markets trading the same securities. The Commission has decided to gant Midwest a temporary exemption, for six months, from the requirement in Rule 11Aa3–1 that the Plan provide a mechanism for the consolidation of last sale data on these securities with last sale data from other markets trading the same securities. While the Commission is aware of the limited usefulness of price information on the underlying securities in a portfolio transaction executed during Midwest's Secondary Trading Session, it believes that dissemination of the share volume in the underlying securities is important information that should be included in the daily consolidated volume for each of the underlying securities. This presents a number of technological difficulties for Midwest, however, and the Commission has therefore decided to grant a temporary exemption from this requirement to allow Midwest adequate time to make the necessary arrangements to have this volume data included in the end-of-day consolidated volume.[20]

D. Fees

For portfolio transactions executed through the PTS, proposed Rule 13, Aticle XXXV imposes transaction fees equal to the greater of $100 per portfolio transaction or $.025 per $1,000 valuation. Midwest members and member organizations that elect to participate in PTS are required to pay a monthly fee of $2,500, payable quarterly in advance. The monthly access fee will be reduced by an amount equal to the amount of transaction fees such member or member organization pays.

E. Purpose and Benefits

Midwest has proposed its Secondary Trading Session to permit the efficient execution of transactions in portfolios of securities subject to the regulatory oversight of the Midwest. The Exchange contends that the Secondary Trading Session is designed to address some of the effects of NYSE Rule 390, which generally prohibits a NYSE member, or any broker or dealer affiliated with a NYSE member, from effecting any transaction in most NYSE-listed securities as a principal in the over-the-counter market or from acting as agent of both parties in an over-the-counter transaction. Because these prohibitions are not applicable to transactions effected in any foreign country outside of NYSE trading hours, many brokers for large institutional investors in portfolios of securities that desire to execute transactions based on the closing prices of securities on the NYSE effect such transactions off-shore, usually in London.

The Exchange contends that these overseas execution procedures are unsatisfactory from several viewpoints. First, these transactions take place without the benefit of exchange oversight and without the regulatory protection afforded participants in U.S. security markets. In addition, such transactions are not reported to the public. Thus, issuers, the investing

[12] Midwest Rule 8(a), Article XXXV. This rule is designed to address concerns raised by the conflict of interest that may arise because of the intersection of a member firm's customer and proprietary trading operations.

[13] Midwest Rule 8(b), Article XXXV.

[14] Portfolio transactions between Exchange member or member organization or between members and their customers must be entered into the System by only one member or member organization. Midwest Rule 7(a), Article XXXV.

[15] An executed portfolio transaction must be accompanied by the following items of information: (1) the name of the executing member or member organization and its Exchange symbol; (2) the name of the clearing member or members, if not the entering member; (3) the symbol, quantity and price, in decimals, for each security in the portfolio; (4) the total value of the portfolio; and (5) the settlement terms, if other than "regular way." Midwest Rule 7(b), Article XXXV. Upon entry of this information, an Exchange contract will be made for each security comprising the portfolio; (4) the total value of the portfolio; and (5) the settlement terms, if other than "regular way." Midwest Rule 7(b), Article XXXV.

Upon entry of this information, an Exchange contract will be made for each security comprising the portfolio.

[16] Midwest Rule 4(a), Article XXXV.

[17] *See* Securities Exchange Act Release No. 27385 (October 26, 1989) (Commission order approving Midwest Plan and exemptions from certain requirements of Rule 11Aa3–1 under the Act).

[18] However, Rule 11Aa3–1 under the Act requires that transactions in the individual securities be reported. Thus, by separate order the Commission has granted Midwest an exemption from this requirement. *See supra* note 17.

[19] The Plan also provides the terms of access for vendors who wish to retransmit the data. The Plan provides for no vendor fees for access to the information but would require subscribers to pay "appropriate" fees for receipt of the data. The Commission notes that any fees established by the Midwest that would be charged to PTS subscribers must be filed with the Commission.

[20] *See* Midwest Plan approval order, *supra* note 17.

public and the regulatory agencies responsible for the oversight of the markets are deprived of important information regarding trading activity in various securities.

The Midwest believes that the Secondary Trading Session will permit broker-dealers to execute transactions in portfolios rapidly through the PTS automated trading system maintained by Midwest, and will provide disclosure to the public of trade information concerning such transactions. In addition, the Midwest notes that it will maintain a complete audit trail of all transactions effected in the Secondary Trading Session, permitting the Commission and the Midwest to monitor better the after-hours institutional market.

As discussed above, there will be no interaction between orders in individual securities left open on Midwest during the Primary Trading Session and portfolio executions during the Secondary Trading Session. The Exchange claims that this aspect of the System is a necessary consequence of the limited trading environment being supported during the Secondary Trading Session. The PTS is not designed or intended to be an after-hours automated execution system for individual securities and small groups of securities. Midwest states that at the present time it is not prepared to advocate an off-floor, electronic trading mechanism for these types of orders, which can benefit from open outcry or widespread dissemination of firm quotations reflecting buying and selling interest.

Integration of orders from the Primary Trading Session into the Secondary Trading Session also would require fundamental changes in the way limit orders are handled. Brokers that do not want their customers' orders to be executed after hours would have to mark those orders or withdraw them prior to the close of the Primary Trading Session. Customers would be faced with the decision whether to obtain an after-hours execution or wait until the opening of the Primary Trading Session the following day when there could be an even greater price movement.

Finally, the Exchange contends that its proposed price allocation process makes the entire notion of order interaction somewhat specious. Under its proposed rules package, individual stock prices have the potential to be set derivatively so long as they are within the applicable pricing parameters set forth in Rule 9, Article XXXV. Therefore, the Exchange believes that it would be inappropriate to initiate order executions based on that price. Similarly, if individual stock orders could interact with portfolios, brokers would have the incentive to change their individual stock price allocation in order to avoid this result.

In order to accommodate trading in the System, Midwest has requested exemptive relief from the operation of Commission Rules 10a–1 and 11Aa3–1 as they would otherwise apply to portfolio trading through the PTS during the Secondary Trading Session. The Exchange believes that these rules would impede the operation of the alternative trading procedures that govern trading through the PTS during its Secondary Trading Session without providing any regulatory benefits.

III. Comments Received

The Commission received one comment on the proposed rule change from the Alliance of Floor Brokers ("AFB"),[21] whose membership is comprised predominantly of NYSE floor brokers. In general, the AFB comment letter argues that in comparison to existing equity market trading procedures, the unequal regulatory treatment envisioned by the Secondary Trading Session and the supporting System would result ultimately in a fragmented securities market structure with increased market volatility. The AFB questions the Midwest's rationale supporting its proposed rule change, as well as the overall need for the Secondary Trading Session.

The AFB also levels more specific criticisms at the Exchange's proposal. For example, the AFB contends that the pricing mechanisms that govern stock portfolio trading during Midwest's Secondary Trading Session do not provide for sufficient price transparency, order interaction and ultimate price betterment. Furthermore, the AFB comments that the Secondary Trading Session's proposed crossing rules do not consider adequately the "price conditionality" [22] of some proposed cross transactions, nor do the portfolio pricing parameters account adequately for the possibility of severe price variances from closing prices that may result from the proposed price parameters that would govern Midwest's Secondary Trading Session. The AFB also criticized the Midwest's proposed Plan for reporting trades executed during the Secondary Trading Session.

The AFB believes that Midwest's Secondary Trading Session may exacerbate existing structural market risks because of the unequal regulatory treatment accorded transactions in PTS portfolios and regular way transactions in individual securities. The AFB particularly criticizes the exemption to the short selling rule that would apply during the Secondary Trading Session. The AFB argues that in comparison to existing equity procedures, short selling during the Secondary Trading Session would result ultimately in a fragmented securities market structure with increased market volatility.

The Exchange responded to the AFB's concerns and other issues raised by Commission staff in a letter to Commission staff.[23] The letter addressed the market structure and regulatory concerns raised by the proposal and explained further the rationale for implementing a Secondary Trading Session for executing portfolio transactions.

In its letter the Exchange notes that its Secondary Trading Session is structured with the goal of providing institutional customers and member firms with a trading vehicle that allows a largely institutional composite-asset market to rebalance stock portfolios after the NYSE close to reflect the last reported sale on the consolidated transaction reporting system. The Exchange believes that the rules supporting its Secondary Trading Session are designed appropriately to accommodate the particular needs of its market niche in a fair and competitive market structure. Finally, Midwest believes that it proposal will result in improvements in the areas cited by the AFB by bringing a share of the after-hours institutional market in portfolio transactions under the auspices of the Commission and Exchange oversight and by requiring transactions to be reported.

The Exchange also answers the AFB's specific criticisms. In response to the concern raised by the AFB that the proposed price parameters afford too much leeway in pricing portfolio transactions, the Exchange stated that it believes that the flexibility in its proposed price parameters are necessary to accommodate institutional trading in a composite-asset market where stock transactions with otherwise separate executions are executed in aggregated portfolios at a single price, and will therefore allow parties to a portfolio transaction to price portfolios

[21] *See* letter from Michael D. Robbins, President, AFB, to Jonathan G. Katz, Secretary, SEC, dated August 18, 1989.

[22] A proposed cross transaction may be "price conditional" to the extent that one or both sides of the trade would delay executing the cross at the market in the hope that a better execution price may be found in other buying or selling interest.

[23] *See* letter from J. Craig Long, General Counsel, Midwest, to Jonathan G. Katz, Secretary, SEC, dated September 11, 1989.

in response to the buying and selling interest of their customers, as well as respond to changed market conditions after the close of regular trading. The Exchange contends that the price limits

Secondary Trading Session is designed appropriately to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of

needs in this area. The Midwest system is another attempt to provide a program trading service for institutional investors. The Commission agrees with Midwest that the Secondary Trading

price of the shares in a "non-standardized portfolio" as executed.

The Commission agrees with Midwest that the price parameters afford institutions the flexibility to price

decision to deny order interaction between its Primary and Secondary Trading Sessions is reasonable to ensure that limit orders are not triggered by potentially unrepresentative prices of

The Commission believes it is appropriate, particularly in view of the absence of price reporting in the individual stocks comprising portfolios, to exempt transactions during Midwest's

VOL 54 ISS 209 OCT 31 1989 UMI

in response to the buying and selling interest of their customers, as well as respond to changed market conditions after the close of regular trading. The Exchange contends that the price limits assure that the execution prices of a portfolio and its component securities will be fair and consistent with prevailing market conditions and fundamental corporate valuations.

In response to the AFB's criticism of the proposed crossing procedures for the Secondary Trading Session, Midwest notes that its Secondary Trading Session will permit matched orders to be crossed only if there is not an unmatched order in the PTS at the same or a better price. Citing the Cincinnati Stock Exchange's ("CSE") National Securities Trading System ("NSTS") as an example,[24] the Exchange claims that its PTS provides the same level of order interaction and price competition approved by the Commission in other electronic trading systems.

Midwest responded to the AFB's critique of the proposed transaction reporting plan for trades executed during the Secondary Trading Session by emphasizing that its Secondary Trading Session represents a marked improvement over current market practices, where overseas portfolio transactions are not reported either to the Commission or the public. Under Midwest's proposed transaction reporting plan for its Secondary Trading Session, real time portfolio transaction reports will be disseminated to vendors and subscribers along with aggregate shares traded. Thus, the Exchange notes that the investing public will no longer be deprived of important information regarding portfolio trading activity in various securities.

Finally, the AFB suggested that the Secondary Trading Session is susceptible to manipulation of individual securities and insider trading abuses. In response, the Exchange emphasizes that the lack of a price effect for the individual stocks that comprise a portfolio and the Exchange's detailed surveillance procedures will deter and capture any trading abuses.

IV. Discussion

A. Introduction

After careful consideration of the comments received, applicable statutory provisions, and relevant policy considerations, the Commission concludes that Midwest's proposed Secondary Trading Session is designed appropriately to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and is consistent with the maintenance of fair and orderly markets, an open and competitive national market system, and the ability of a national securities exchange to enforce compliance with its rules. For these reasons and for the additional reasons set forth below, the Commission finds that approval of the Exchange's proposed rule change relating to a Secondary Trading Session is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of section 6(b).[25]

Over the past several years the use of composite-asset trading techniques and strategies by institutional investors has increased substantially. Both the stock exchanges and private information vendors have developed products to facilitate the trading of portfolios of securities.[26] In addition, broker-dealers have used exchanges-for-physicals ("EFPs") [27] to satisfy their customers' needs in this area. The Midwest system is another attempt to provide a program trading service for institutional investors. The Commission agrees with Midwest that the Secondary Trading Session may provide a useful means for executing portfolio trades in U.S. securities that currently are being executed overseas. Moreover, the System may be helpful in soliciting contra-side interest for portfolios orders.

As described below, the Commission also believes that the market structure Midwest has designed to support its Secondary Trading Session balances appropriately the competing concerns of various Exchange constituencies and its institutional clientele in a manner consistent with just and equitable principles of trade. Given the institutional character of stock portfolio trading that the Secondary Trading Session is designed to capture, the Commission agrees that the Exchange's chosen market structure, which accords price protections and trade reporting, as well as the benefits of Commission and Exchange oversight pursuant to the Act, is a fair and competitive market structure. Furthermore, the Commission believes that Midwest's Secondary Trading Session will not, as the AFB contends, lead unduly toward a more fragmented and volatile market. The Secondary Trading Session responds to existing demand for a means to effect portfolio trades at an aggregate price reflective of the market closing prices of the component securities. By definition, these transactions will not occur during regular equity trading hours. The Secondary Trading Session offers the very real benefits of trade reporting, consolidated surveillance, and pricing protections which ensure that matched bids and offers do not "trade through" an unmatched quotation.[28]

B. Portfolio Pricing Parameters.

As discussed above, each individual security in a portfolio traded in the System must be priced within a range of plus or minus 10% of the last reported price for that security on the day the portfolio transaction is executed, provided that the portfolio itself is priced within a range that is plus or minus 5% of the aggregate closing prices of the securities comprising the portfolio. Further, no one security shall consist of more than 20% of the contract price of the shares in a "non-standardized portfolio" as executed.

The Commission agrees with Midwest that the price parameters afford institutions the flexibility to price portfolio transactions executed during the Exchange's Secondary Trading Session in response to changed market conditions, such as currency movements after the close of regular equity trading hours, or because of differing estimates of equities' values. It would be unnecessarily rigid to require that prices on the system reflect precisely the closing prices for the constituent securities in the Primary Trading Session.

With respect to the AFB's concerns regarding the transparency of the PTS price mechanism and the flexibility of the price parameters that govern portfolio trading during the Secondary Trading Session, the Commission recognizes that although the individual prices allocated among the stocks that comprise a protfolio are somewhat derivative, the plus or minus 10% price limit on an individual stock will operate as a reasonable limit on the actual price variance that a particular stock may experience. Moreover, the additional plus or minus 5% price limit on the portfolio as a whole also operates, on average,[29] as a further restriction on the discretion of pricing an individual component stock. The Commission notes furthermore that proposed Rule 9, Article XXXV requires all portfolio transactions executed during the Secondary Trading Session both in the aggregate and on a security-by-security basis to be fair, taking into consideration all the relevant circumstances attendant to the transaction. The Commission believes Midwest's Secondary Session pricing parameters strike an appropriate balance between allowing institutions and Exchange members the flexibility to price transactions according to economic fundamentals while restricting the ability of market participants to effect trades at prices that do not benefit from open outcry or the widespread dissemenation of firm quotations during regular equity trading hours.

C. Order Interaction and Price Protections

The Commission believes that Midwest's Secondary Trading Session's order interaction and price protecton rules are consistent with fair and orderly markets. First, Midwest's decision to deny order interaction between its Primary and Secondary Trading Sessions is reasonable to ensure that limit orders are not triggered by potentially unrepresentative prices of constituent securities executed after the close of the primary markets for those securities. The composite-asset nature of the portfolios traded over the System, combined with the fact that the Secondary Trading Session will operate in a discontinuous manner, makes the prices of the individual securities less indicative of the prices obtained during the Primary Trading Session, and therefore not useful triggers for limit orders. Second, because the PTS will permit matched orders to be crossed only if there is not an unmatched order in the System at the same or a better price, the Secondary Trading Session's proposed crossing rules provide an opportunity for price betterment and preserve time and price priority for portfolios.

D. Transaction Reporting

As described above, the Midwest has filed with the Commission a proposed Plan for reporting transactions executed during the Secondary Trading Session. The Midwest also has requested exemptions from certain requirements of Rule 11Aa3–1 under the Act for transactions executed through the System. Because the Commission agrees with Midwest that the proposed configuration for transaction reporting during the Secondary Trading Session is appropriate, the Commission has issued a separate order approving the Plan and the exemptions.[30]

E. Short Sale Exemption

The Exchange has requested that the Commission grant an exemption from Rule 10a–1 under the Act [31] to facilitate transactions in the Secondary Trading Session.[32] Rule 10a–1 provides that short sales [33] of exchange-listed securities may not be effected at a price less than the price at which the immediately preceding sale was effected ("minus tick") or at a price equal to the last sale if the last preceding transaction at a different price was at a higher price ("zero-minus tick").

The Commission believes it is appropriate, particularly in view of the absence of price reporting in the individual stocks comprising portfolios, to exempt transactions during Midwest's Secondary Trading Session from the operation of the short sale rule. Accordingly, the Commission's staff will issue a letter granting appropriate relief from Rule 10a–1 with respect to such transactions.

V. Conclusion

Midwest's Secondary Trading System should improve the portfolio trading process by providing a means to disseminate buying and selling interest for portfolio orders. To the extent that Midwest's Secondary Trading Session does not integrate all segments of the securities markets, the Commission agrees with Midwest that these departures are reasonably necessary to accommodate the unique aspects of the PTS without deviating from the concept of fair and orderly markets. Finally, the Commission's Section 19 authority and the Rule 19b–4 process allow the Commission and the Exchange sufficient flexibility to modify the rules governing portfolio trading on Midwest during its Secondary Trading Session in light of actual trading experience and any future developments that materially affect the Secondary Trading Session's market structure.[34]

Based upon the aforementioned factors, the Commission finds that the Exchange's proposed rule change relating to the after-hours trading of stock baskets is consistent with the requirements of Sections 6(b) (4) and (5) of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[35] that the proposed rule change be, and hereby is, approved.

By the Commission.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

[26] *See, e.g.*, Securities Exchange Act Release No. 27383 (October 26, 1989) (Commission order approving File No. SR–NYSE–89–05, a proposed rule change submitted by the NYSE designed to enable the trading of standardized baskets of stocks at an aggregate price in a single execution on the NYSE floor); Securities Exchange Act Release No. 27383 (October 26, 1989) (Commission order approving File No. SR–CBOE–89–20, a proposed rule change submitted by the Chicago Board Options Exchange ("CBOE") also designed to enable the trading of standardized baskets of stocks at an aggregate price in a single execution on the CBOE floor); and letter from Brandon Becker, Associate Director, Division of Market Regulation, SEC, to Lloyd H. Feller, Esq., Morgan Lewis and Bockius, dated July 28, 1987 (Commission no-action letter issued under Sections 5 and 6 of the Act on behalf of request by Jeffries and Co., Inc. to implement a computerized order entry mechanism to allow for trading customized portfolios of stocks at a single price).

[27] An EFP generally may be defined as the exchange of a long (short) futures position for an equivalently valued long (short) stock position. This normally takes place after the NYSE close and is completed in accordance with Commodity Futures Trading Commission ("CFTC") regulations. In the CFTC Division of Trading and Markets *Report on Exchanges of Futures for Physicals*, dated October 1, 1987 ("CFTC Report"), an EFP was defined as "a transaction in which one party buys the physical commodity and simultaneously sells (or gives up a long) futures contract. The price of the exchanged futures position, the quantity of the futures and cash commodity, and other terms are privately negotiated by the parties rather than being competitively executed in the pit." CFTC Report at 2. The CFTC has interpreted Section 4c(a) of the Commodity Exchange Act, 7 U.S.C. § 6c(a), and CFTC Regulation 1.38, 17 C.F.R. § 1.38, to permit individual contract markets, such as the Chicago Mercantile Exchange, to establish rules permitting and governing EFP transactions.

[28] The Commission's approval order issued today for the NYSE's basket proposal, *supra* note 26, addresses comments received by the AFB on that product. The Commission incorporates its responses to the AFB's comments on the NYSE proposal to the AFB's comments on the PTS to the extent that the comments are the same for both proposals.

[29] The Commission notes that the combination of the price limits and the different weighing of stocks in a portfolio accounts for the sliding scale price mechanism as applied to individual stocks.

[30] *See* Midwest Plan approval order, *supra* note 17.

[31] 17 CFR 240.10a–1 (1989).

[32] *See* letter from J. Craig Long, Vice President and General Counsel, Midwest, to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated April 27, 1989.

[33] A short sale is defined in Rule 3b–3 under the Act, 17 CFR § 240.3b–3, as any sale of a security that the seller does not own or any sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller.

[34] The Commission notes that approval of the proposed rule change is based upon a determination that the terms of Midwest's Secondary Trading Session and the PTS are consistent with the requirements of the Act. If the terms of Midwest's Secondary Trading Session's market structure are changed in any material way, however, it would be necessary for the Midwest to submit a proposed rule change in order to afford the public an opportunity to review and comment on the proposed modification and for the Commission to review its prior determination.

VOL 54 ISS 209 OCT 31 1989 UMI

[Release No. 34-27385; File No. SR-MSE-89-02]

Self-Regulatory Organizations; Midwest Stock Exchange, Inc.; Order Approving Proposed Transaction Reporting Plan

On April 28, 1989, the Midwest Stock Exchange, Inc. ("Midwest" or "Exchange") submitted to the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Rules 11Aa3-1 and 11Aa3-2 under the Securities Exchange Act of 1934 ("Act"),[1] a proposed transaction reporting plan ("Plan") governing the collection, consolidation and dissemination of information on transactions in reported securities that are executed during the Midwest Secondary Trading Session.[2] As part of the proposal, the Exchange requested certain exemptions under Rule 11Aa3-1.[3] The Plan was noticed in Securities Exchange Act Release No. 26887, June 2, 1989, 54 FR 24779. The Commission received one comment on the proposed rule.

Description of the Plan

The transaction reporting plan filed by Midwest is specifically limited in application to trading during the Exchange's Secondary Trading Session. All qualified portfolio transactions can be executed during Midwest's Secondary Trading Session through the PTS, an automated, screen-based trading system maintained by Midwest. The Midwest's Secondary Trading Session is limited to transactions in portfolios of "Eligible Securities."[4] Pursuant to the Plan, Midwest will disseminate last sale transaction reports for each portfolio, but not the individual securities composing the portfolio. Midwest will make available to vendors and subscribers: (1) the aggregate price of the portfolio; and (2) the symbol and quantity for each security in the portfolio.[5] The Plan further provides that Midwest will make transaction reports available to information vendors from 3:30 p.m. to 5:00 p.m., Central Time, on all trading days [6] and that at the end of each Secondary Trading Session, Midwest will make available to vendors the aggregate number of shares of each of the securities that were purchased and sold during that session.

The Plan also contains provisions for ensuring the accuracy and validity of transaction reports. The Plan provides that all trades in portfolio transactions will be reported immediately upon execution to Midwest through the PTS pursuant to the requirements in Article XXXV of Midwest's rules. In addition, the Plan provides a description of how Midwest will verify the accuracy of the reports and how Midwest will review portfolio transaction reports for compliance with the pricing parameters for portfolios contained in Rule 9, Article XXXV. Finally, the Plan provides that all contracts with vendors and subscribers explicitly provide that the information provided them must be used consistently with all applicable statutes and regulations and must not be used in a fraudulent or manipulative manner.

Comments

The Commission received one comment on the proposed Plan from the Alliance of Floor Brokers ("AFB").[7] In general, the AFB argues that in comparison to existing equity market trading procedures, the different regulatory treatment envisioned by the Secondary Trading Session would result in a fragmented securities market structure. More specifically, the AFB contends that the pricing mechanisms that govern stock portfolio trading during the Secondary Trading Session do not provide for sufficient price transparency, order interaction and ultimate price improvement. The AFB argues that Midwest has not properly addressed the lack of pricing transparency, and is concerned that some individual securities prices may be somewhat arbitrary and unreflective of their actual price movements.

Midwest responded to the AFB's critique by emphasizing that its Secondary Trading Session represents a marked improvement over current market practices, where overseas portfolio transactions are not reported, either to the Commission or to the public.[8] Under the Plan, real-time portfolio transaction reports will be disseminated to vendors and subscribers along with aggregated shares traded. Thus, the Exchange noted that the investing public will no longer be deprived of important information regarding portfolio trading activity in various securities.

In addition, Midwest believes that the pricing of portfolio tranactions between institutional buyers and sellers is actually based on the aggregate portfolio price, not on the prices of individual securities. As a result, although Midwest's rules require reporting of individual security prices for audit trail and clearing purposes, and require that these prices be within a 10% range of the close, Exchange members and their customers are free to allocate the portfolio's price among the individual securities at their own discretion. Individual security prices therefore may be somewhat derivative and not reflective of the price movements in any particular security. Thus, Midwest is concerned that disseminating these arbitrarily determined prices to the general public may be misleading and potentially harmful to the market.

Discussion

A. Standards of Review

In reviewing the Plan, the Commission must determine that it meets the standards set forth in Section 11A of the Act and Rules 11Aa3-1 and 11Aa3-2 thereunder. The Commission believes that the Plan, as described above, substantially meets these standards.

Rule 11Aa3-1(b)(2) provides that any National Market System ("NMS") plan shall specify, at a minimum: (1) the listed equity and NASDAQ securities or classes of such securities for which transaction reports are required by the plan; (2) the reporting requirements for transactions in listed equity securities or NASDAQ/NMS securities for any broker or dealer subject to the plan; (3) the manner of collecting, processing, sequencing, making available and disseminating transaction reports and the last sale data reported pursuant to such plan; (4) the manner such transaction reports reported pursuant to the plan are to be consolidated with transaction reports from exchanges and associations reported pursuant to any other effective transaction reporting plan; (5) the applicable standards and methods that will be used to ensure promptness of reporting and the accuracy and completeness of transaction reports; (6) any rules or procedures that may be adopted to ensure that transaction reports or last sale data will not be disseminated in a fraudulent or manipulative manner; (7) specific terms of access to transaction reports made available or disseminated pursuant to the plan; and (8) that transaction reports or last sale data made available to any vendor for display on an interrogation device identify the marketplace where each transaction was executed.[9]

B. Exemptions From Rule 11Aa3-1

Because of the limited purposes of the Plan and limited nature of the Plan itself, Midwest requested that the Commission grant three exemptions from the requirements of Rule 11Aa3-1.[10] Specifically, Midwest requests exemptions from the Rule's requirements to: (1) report transactions in reported securities; (2) specify in the Plan the method of consolidation with transaction reports from exchanges and associations reported pursuant to any other effective transaction reporting plan; and (3) provide market identifiers for last sale transaction reports disseminated pursuant to the Plan.[11]

Paragraphs (c) (1) and (2) of Rule 11Aa3-1 require Midwest to disseminate last sale transaction reports for individual reported securities traded on the Exchange.[12] The Plan provides for the dissemination of transaction reports for each portfolio, but not the individual securities composing the portfolio.[13] As noted above, however, Midwest will make transaction reports on the portfolios available during the Secondary Trading Session and at the end of each Session it will provide the aggregate number of shares of each of the securities traded that day. The Commission agrees with the Exchange that real-time last sale transaction reporting for the individual stocks underlying a portfolio transaction is not necessary in the Secondary Trading Session context. The Commission concurs that dissemination of prices of the individual securities composing the portfolio may be of limited value. For the reasons discussed above, the Commission believes that dissemination of transaction reports only for the portfolios, rather than for the underlying securities, is consistent with the goal of publicly disseminating accurate and useful transaction information. Thus, the Commission believes that it is appropriate to grant an exemption from this requirement of Rule 11Aa3-1.

Rule 11Aa3-1(b)(2)(iv) requires that provision be made in the plan for the consolidation of transaction reports from other markets trading the same securities. The Commission has decided to grant Midwest a temporary exemption, for six months from the date of this order, from the requirement that the Plan provide a mechanism for the consolidation of last sale data on these securities with last sale data from other markets trading the same securities.[14] While the Commission is aware of the limited usefulness of price information on the underlying securities in the portfolio, it believes that dissemination of the share volume in the underlying securities is important information and should be included in the daily consolidated volume for each of the underlying securities. This presents a number of technological difficulties for Midwest, however, and thus the Commission has decided to grant a temporary exemption from this requirement to allow Midwest adequate time to make the necessary arrangements to have this volume data included in the end-of-day consolidated volume.

Finally, Midwest requested an exemption from the requirement of Rule 11Aa3-1(b)(2)(viii) that it provide market identifiers on the disseminated portfolio transaction reports. It requires, however, that NMS plans provide market identifiers. Therefore, Midwest requested an exemption from this specific provision. Because Midwest will be the only marketplace reporting transactions to vendors pursuant to the Plan, all trades will be known by vendors as Midwest Trades. Midwest believes, therefore, that there is no benefit to be gained by requiring that transaction reports contain marketplace identifiers. The Commission agrees that unless and until any other market becomes a party to the Plan and transactions in that market are reported pursuant to the Plan, it is not necessary that the Plan provide market identifiers for transaction reports. Thus, the Commission believes it is appropriate to grant Midwest an exemption from the requirements of Rule 11Aa3-1(b)(2)(viii).

Conclusion

For the reasons discussed above, the Commission finds that the Midwest transaction reporting plan and the exemptions under Rule 11Aa3-1 are consistent with the requirements of the Act and the rules and regulations thereunder and, in particular, Section 11A(a)(1) and Rules 11Aa3-1 and 11Aa3-2.

It is therefore ordered, pursuant to section 11A of the Act and Rules 11Aa3-1 and 11Aa3-2 thereunder, that the proposed transaction reporting plan be, and hereby is, approved. Further, the Commission hereby orders that Midwest be granted the following exemptions from Rule 11Aa3-1: (1) the requirement under paragraphs (c) (1) and (2) that Midwest disseminate transaction reports for individual reported securities traded on the Exchange; (2) the requirement under paragraph (b)(2)(viii) that transaction reports include market identifiers; and (3) a temporary exemption for a six-month period commencing on the date of this order from the requirement under paragraph (b)(2)(iv) that the Plan provide for the consolidation of transaction reports from other markets trading the same security.

By the Commission.

Dated: October 26, 1989.

BILLING CODE 8010-01-M

[1] 17 CFR 240.11Aa3-1 and 240.11Aa3-2 (1989).

[2] Proposed Midwest Rule 10(b), Article IX will establish a Secondary Trading Session to be conducted from 3:30 p.m. to 5:00 p.m. Central Time for the limited purpose of permitting the execution of transactions in qualified portfolios of equity securities through the new automated Portfolio Trading System ("PTS" or "System"). Brokers for institutional investors in portfolios of securities that desire to execute transactions based on closing prices of securities on the NYSE often effect such transactions offshore, usually in London. These transactions take place without exchange oversight and without regulatory protection for participants in U.S. securities markets. Further, such transactions are not reported to the public. Midwest developed the Secondary Trading Session to provide a facility for broker-dealers to execute transactions in portfolios in the United States. The Commission approved the proposed rule change submitted by Midwest to establish the Secondary Trading Session in a separate order issued today. *See* Securities Exchange Act Release No.

[3] *See* letter from J. Craig Long, Vice President, General Counsel and Secretary, Midwest, SEC, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated September 12, 1989, and letter from J. Craig Long to Kathryn Natale, Assistant Director, Division of Market Regulation, SEC, dated October 18, 1989.

[4] Eligible securities are defined in proposed Rule 2(d), Article XXXV as all securities that are listed for trading on the Exchange or to which unlisted trading privileges ("UTP") have been granted.

[5] The Plan also provides the terms of access for vendors who wish to retransmit the data. The Plan provides for no vendor fees for access to the information but would require subscribers to pay "appropriate" fees for receipt of the data.

[6] This corresponds to the hours of the Secondary Trading Session.

[7] *See* Letter from Michael D. Robbins, President, AFB, to Jonathan G. Katz, Secretary, SEC, dated August 18, 1989.

[8] *See* letter from J. Craig Long, Vice President and General Counsel, Midwest, to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated April 27, 1989 ("April 27 letter").

[9] Additionally, Rule 11Aa3-2, to the extent that it is applicable, requires that a NMS plan describe the terms and conditions under which brokers, dealers, and/or self-regulatory organizations will be granted or denied access.

[10] The Commission has authority under paragraph (g) of Rule 11Aa3-1 to grant exemptions from the provisions of the Rule.

[11] *See* note 3.

[12] "Reported securities" are securities for which there is in effect a transaction reporting plan.

[13] As noted above, Midwest will disseminate the volume of the stocks comprising baskets but will not disseminate the price of those component stocks.

[14] The Commission anticipated that the portfolios traded in the Secondary Trading Session will consist mostly, if not entirely, of securities already subject to transaction reporting requirements pursuant to the Consolidated Transaction Reporting Plan (the plan governing transaction reporting of New York and American Stock Exchange stocks) or the National Association of Securities Dealers' transaction reporting plan. Among other things, these plans provide for real-time reporting of the price and volume on trades in securities subject to the plans.

VOL 54 ISS 209 OCT 31 1989 UMI

[Rel. No. 34-27388; File No. 7-5309 and 7-5356]

Self-Regulatory Organizations; Findings and Order Granting Applications for Unlisted Trading Privileges; New York Stock Exchange, Incorporated

October 26, 1989.

The New York Stock Exchange, Inc. ("NYSE") has filed application with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) and (C) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 12f-1 [2] thereunder for unlisted trading privileges ("UTP") in the 205 securities listed in the attached *Exhibit A* [3] for the purpose of trading Exchange Stock Portfolio ("ESPs") which are based on the Standard & Poor's 500 Portfolio Index ("Index").[4]

As indicated by *Exhibit A*, the NYSE is applying for UTP on 98 stocks registered on the American Stock Exchange ("Amex") and 107 over-the-counter securities ("OTC") that are quoted on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") but that are not listed and registered on any national securities exchange. Last sale information relating to the exchange-listed stocks is reported in the consolidated transaction reporting system. Last sale information on the ITC stocks is reported through NASDAQ facilities.

Two comment letters were submitted on the NYSE's UTP application.[5] The Amex stated that, although the NYSE's UTP application caused some confusion for the Amex-listed companies that were included in the application, the Amex believed that any such confusion would be eliminated if the Commission limited the grant of UTP to the sole purpose of trading these securities as part of the ESP and then only to the extent that the securities are actually included in the ESP, as indicated by the NYSE in its application.

The NASD letter expressed concern that the application of exchange off-board trading restrictions [6] to the proposed market baskets of both the NYSE and CBOE would prohibit the NASD from trading exchange listed stocks as part of a similar market basket product. In their view, the approval of the UTP applications only would be appropriate if the Commission conditioned such approval on "reciprocal unlisted trading privileges [7] to all NYSE securities included in future basket products that may be traded in the NASDAQ market, free of any off-board trading restrictions applicable to such basket products." The NASD stated that, without such a condition, the Commission could not find that the grant of UTP would have no anti-competitive effect as required under section 12(f)(2) of the Act.

Under section 12(f) of the Act the Commission may approve UTP applications if it finds, after notice and opportunity for hearing, that the extensions of UTP pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors. Further, in considering the NYSE's application for extension of UTP in the 107 NASDAQ stocks, section 12(f)(2) of the Act requires the Commission to consider, among other matters, the public trading activity in such securities, the character of such trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system. The Commission may not grant such application if any rule of the national securities exchange making an application under section 12(f)(1)(C) of the Act would unreasonably restrict competition among dealers in such securities or between such dealers acting in the capacity of market makers who are specialists and such dealers who are not specialists.

After careful review, the Commission has determined that granting the NYSE's UTP application for the limited purpose of accommodating trading on the NYSE's ESPs is consistent with the maintenance of fair and orderly markets and the protection of investors. As noted above, the NYSE's UTP application is *not* intended to (nor does it) permit them to make individual markets in the stocks on which UTP has been requested, but rather to permit the NYSE to trade its market basket product, ESPs. The Commission today approved the NYSE's proposal to trade a basket of stocks at a single trading location on the exchange.[8] The Commission's approval order concludes that the NYSE proposal could offer a means to enhance the efficient execution of portfolio trades and, possibly increase the market's ability to absorb institutional portfolio trading. In particular, the order notes that liquidity increases resulting from trading in basket products could help absorb the volume and velocity of trading associated with index-related trading strategies, thereby reducing volatility. Based on the above, the Commission believes that the granting of UTP on the requested stocks for the sole purpose of accommodating trading on NYSE's market basket product is consistent with the maintenance of fair and orderly markets and the protection of investors.

The Commission also believes that approval of the NYSE's request for UTP on the 107 OTC stocks is appropriate and meets the requirements under section 12(f)(2) of the Act. First, because the grant of UTP on the OTC securities is limited to effecting transactions in ESPs, the Commission does not believe the concerns that have been previously raised relating to the extension of UTP on OTC stocks to a national securities exchange are directly applicable.[9] For example, among other things, the Commission has been concerned with procedures for assuring coordinated market information if OTC issues were traded on an exchange.[10] Because the OTC issues on which the NYSE has requested UTP only will trade as part of a market basket and not individually, however, these concerns are not raised. Further, because the grant of UTP does *not* permit market making in the individual securities by the NYSE, the other factors which section 12(f)(2) directs the Commission to consider do not raise concerns. For example, the trading of the OTC securities as part of a basket should not have any negative impact on the public trading activity in such securities or their existing market and should not have any potential to change the existing primary market for the individual stocks.[11] In this regard, we note that the 31 OTC issues that currently comprise the ESP make up a small component of the composite index value, thus assuring that any impact on the underlying NASDAQ market will be minimal.

Finally, the Commission is cognizant of the competitive implications raised by the NASD about approving UTP on the OTC issues without limiting the application of exchange off-board trading restrictions to market baskets. In this context, the Commission would be concerned about any exchange restrictions that would limit the ability of any market to quote and trade a market basket product similar to the market baskets approved for trading on the NYSE and CBOE.

Accordingly, it is ordered, pursuant to section 12(f) of the Act, that the NYSE's application for unlisted trading privileges in the securities listed in the attached *Exhibit A* for the limited purpose of trading such securities as part of the NYSE's ESPs and only to the extent that the securities actually are included in the Index on which the ESPs will be based is hereby approved.

By the Commission.

Jonathan G. Katz,

Secretary.

[1] 15 U.S.C. 78l(F)(1) (1982).

[2] 17 CFR 240.12f-1 (1989).

[3] *See* Securities Exchange Act Release Nos. 27248, September 15, 1989 and 27328, October 2, 1989. Notice of the application was given by publication in the *Federal Register* (54 FR 38778). We note that this order does not grant UTP on Jerrico, Inc., as originally requested by the NYSE, because that stock has since been deleted from the Index. As discussed below, the Commission received two comment letters regarding this application.

[4] *See* File No. SR-NYSE-89-05. The NYSE application includes the 39 stocks currently comprising the INDEX that are not listed and registered on the NYSE (The remaining 461 stocks comprising the Index are currently registered and traded on the NYSE). The NYSE believes that the remaining 166 stocks on which they have applied for UTP are likely candidates for substitution in the Index. The NYSE has indicated that UTP on the stocks in its application will be used for the limited purpose of trading these securities as part of the NYSE's ESPs and then only to the extent these securities are actually included in the ESP. The Chicago Board Options Exchange, Inc. ("CBOE") also has requested UTP on the 500 stocks comprising the S&P 500 Index for the purpose of trading these securities as part of a market basket. *See* Securities Exchange Act Release Nos. 27237, September 11, 1989 and 27327, October 2, 1989 and 54 FR 36475.

[5] *See* letters from Kenneth R. Leibler, President, American Stock Exchange, Inc. to Jonathan G. Katz, Secretary, SEC, dated September 22, 1989 and from Joseph R. Hardiman, President, National Association of Securities Dealers, Inc. ("NASD") to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated October 9, 1989.

[6] *See* NYSE Rule 390 which prohibits members from effecting any transaction in any listed security off the exchange floor. Rule 19c-3 under the Act, however, prevents exchange rules from prohibiting members from effecting transactions off an exchange floor in securities that have been listed or traded pursuant to UTP on or after April 26, 1979.

[7] We note that unlike the registration requirements for exchanges under section 12(a) of the Act, there is no Section of the Act that actually would prohibit the NASD from trading exchange listed stocks as part of a market basket approved by the Commission. We recognize, however, that the application on exchange off-board trading restrictions that prohibit exchange members from trading certain securities off an exchange floor could have a severe impact on the trading market for an OTC market basket comprised of stocks subject to these restrictions.

[8] *See* Securities Exchange Act Release No. 27382, October 26, 1989.

[9] *See* Securities Exchange Act Release No. 22417 (September 16, 1985), 50 FR 38640 which announced

[FR Doc. 89-25607 Filed 10-30-89; 8:45 am]
BILLING CODE 8010-01-M

[Rel. No. 34-27387; File No. 7-5301 and 7-5357]

Self-Regulatory Organizations; Findings and Order Granting Applications for Unlisted Trading Privileges; Chicago Board Options Exchange, Inc.

October 26, 1989.

The Chicago Board Options Exchange, Inc. ("CBOE") has filed application with the Securities and Exchange Commission ("Commission") pursuant to sections 12(f)(1)(B) and (C) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 12f-1 [2] thereunder for unlisted trading privileges ("UTP") in 500 securities [3] for the purpose of trading market baskets on the Standard & Poor's ("S&P") 500 and 100 Stock Price Indexes ("Index").[4]

The CBOE originally applied for UTP on 462 stocks registered on the New York Stock Exchange ("NYSE"), 7 registered on the American Stock Exchange, Inc. ("Amex") and 31 over-the-counter securities ("OTC") that are quoted on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") but that are not listed and registered on any national securities exchange.[5] Last sale information relating to the exchange-listed stocks is reported in the consolidated transaction reporting system. Last sale information on the OTC stocks is reported through NASDAQ facilities.

One comment lette was submitted on the CBOE's UTP application.[6] The NASD letter expressed concern that the application of exchange off-board trading restrictions [7] to the proposed market baskets of both the New York Stock Exchange ("NYSE") [8] and CBOE would prohibit the NASD from trading exchange-listed stocks as part of a similar market basket product. In their view, the approval of the UTP applications only would be appropriate if the Commission conditioned such approval on "reciprocal unlisted trading privileges [9] to all NYSE securities included in future basket products that may be traded in the NASDAQ market, free of any off-board trading restrictions applicable to such basket products." The NASD stated that, without such a condition, the Commission could not find that the grant of UTP would have no anti-competitive effect as required under section 12(f)(2) of the Act.

Under section 12(f) of the Act the Commission may approve UTP applications if it finds, after notice and opportunity for hearing, that the extensions of UTP pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors. Further, in considering the CBOE's application

[1] 15 U.S.C. 78l(f)(1) (1982).

[2] 17 CFR 240.12f-1 (1989).

[3] *See* Securities Exchange Act Release No. 27237 September 11, 1989. Notice of the application was given by publication in the **Federal Register** (54 FR 38475). As discussed below, the Commission received two comment letters regarding this application. The Commission also received applications for UTP in four additional securities. *See* Securities Exchange Act Release Nos. 27327 (October 2, 1989) 54 FR 41357.

[4] *See* File No. SR-CBOE-88-20. The CBOE requested UTP in the 500 stocks comprising the S&P 500 Index at the time of their initial application. Subsequent to the submission of CBOE's UTP application, S&P replaced four stocks in the Index. The replacement stocks were not part of CBOE's original UTP request. Although the Commission has noticed for comment the UTP request for the four replacement securities, the 10 day notice period required by Section 12(f)(5) of the Act has not expired on two of the replacement securities. Accordingly, the Commission is only considering a grant of UTP in the 498 stocks listed on the attached *Exhibit A* that are currently included in the Index and for which the 10 day notice requirement has been fulfilled. *But see* letter from Richard G. Ketchum, Director, Division of Market Regulation, SEC to Nancy R. Crossman, General Counsel, CBOE, dated October 26, 1989 granting no-action relief from compliance with Section 12(f) of the Act to the CBOE under certain conditions for replacement securities.

[5] For the reasons discussed in note 4 *supra*, the Commission is only considering CBOE's request for UTP in the 498 stocks listed in *Exhibit A*. This list includes 460 NYSE registered stocks rather than 462. The list continues to include 7 Amex registered stocks and 31 OTC securities.

[6] *See* letter form Joseph R. Hardiman, President, National Association of Securities Dealers, Inc. ("NASD") to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated October 9, 1989.

[7] *See* NYSE Rule 390 which prohibits members from effecting any transaction in any listed security off the exchange floor. Rule 19c-3 under the Act, however, prevents exchange rules from prohibiting members form effecting transactions off an exchange floor in securities that have been listed or traded pursuant to UTP on or after April 26, 1979.

[8] The NYSE also has requested UTP in 205 stocks for the purpose of trading these securities as part of Exchange Stock Portfolios ("ESPs"). *See* Securities Exchange Act Release Nos. 27248, September 15, 1989 and 27328, October 2, 1989 and 54 FR 38778. In a separate order the Commission is approving the NYSE's UTP request. *See* Securities Exchange Act Release No. 27386.

[9] We note that unlike the registration requirements for exchanges under section 12(a) of the Act, there is no Section of the Act that actually would prohibit the NASD from trading exchange-listed stocks as part of a market basket approved by the Commission. We recognize, however, that the application of exchange off-board trading restrictions that prohibit exchange members from trading certain securities off an exchange floor could have a severe impact on the trading market for an OTC market basket comprised of stocks subject to these restrictions.

for extension of UTP in the 31 NASDAQ stocks, section 12(f)(2) of the Act required the Commission to consider, among other matters, the public trading activity in such securities, the character of such trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system. The commission may not grant such application if any rule of the national securities exchange making an application under section 12(f)(1)(C) of the Act would unreasonably restrict competition among dealers in such securities or between such dealers acting in the capacity of market makers who are specialists and such dealers who are not specialists.

After careful review, the Commission has determined that granting the CBOE's UTP application for the limited purpose of accommodating trading on the CBOE's market basket contracts is consistent with the maintenance of fair and orderly markets and the protection of investors. As noted above, the CBOE's UTP application is not intended to (nor does it) permit them to make individual markets in the stocks on which UTP has been requested, but rather to permit the CBOE to trade its market basket product. The Commission today approved the CBOE's proposal to trade a basket of stocks at a single trading location on the exchange.[10] The Commission's approval order concludes that the CBOE proposal could offer a means to enhance the efficient execution of portfolio trades and, possibly, the market's ability to absorb institutional portfolio trading. In particular, the order notes that liquidity increases resulting from trading in basket products could help absorb the volume and velocity of trading associated with index/related trading strategies thereby reducing volatility. Based on the above, the Commission believes that the granting of UTP on the requested stocks for the sole purpose of accommodating trading on CBOE's proposed market basket product is consistent with the maintenance of fair and orderly markets and the protection of investors.

The Commission also believes that approval of the CBOE's request for UTP on the 31 OTC stocks is appropriate and meets the requirements under section 12(f)(2) of the Act. First, because the grant of UTP on the OTC securities is limited to effecting transactions in market baskets, the Commission does not believe the concerns that have been previously raised relating to the extension of UTP on OTC stocks to a national securities exchange are directly applicable.[11] For example, among other things, the Commission has been concerned with preocedures for assuring coordinated market information if OTC issues were traded on an exchange.[12] Because the OTC issues on which the CBOE has requested UTP only will trade as part of a market basket and not individually, however, these concerns are not raised. Further, because the grant of UTP does *not* permit market making in the individual securities by the NYSE, the other factors which section 12(f)(2) directs the Commission to consider do not raise concerns. For example, the trading of the OTC securities as part of a basket should not have any negative impact on the public trading activity in such securities or their existing market and should not have any potential to change the existing primary market for the individual stocks.[13] In this regard, we note that the 31 OTC issues that currently comprise the CBOE's market basket product make up a small component of the composite index value, thus assuring that any impact on the underlying NASDAQ market will be minimal. Finally, the Commission is cognizant of the competitive implications raised by the NASD about approving UTP on the OTC issues without limiting the application of exchange off-board trading restrictions to market baskets. In this context, the commission would be concerned about any exchange restrictions that would limit the ability of any market to quote and trade a market basket product similar to the market baskets approved for trading on the NYSE and CBOE.

Accordingly, it is ordered, pursuant to section 12(f) of the Act, tha the CBOE's application for unlisted trading privileges in the securities listed in the attached *Exhibit A* for the limited purpose of trading such securities as part of the CBOE's market basket contracts and only to the extent that the securities actually are included in the Index on which the market baskets will be based is hereby approved.

By the Commission.

Jonathan G. Katz,

Secretary.

[Rel. No. 34-27388; File No. SR-NSCC-89-08]

Self-Regulatory Organizations; National Securities Clearing Corporation; Order Approving Proposed Rule Change Providing for the Processing of Basket Trades

On June 7, 1989, the National Securities Clearing Corporation ("NSCC") filed a proposed rule change (SR-NSCC-89-08) with the Commission pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").[1] On July 18, 1989, the Commission published notice of the proposal in the **Federal Register** to solicit comments from interested parties.[2] On August 24, 1989, NSCC submitted an amendment to its filing. No comments were received. As discussed below, the Commission is approving the amended proposal.

I. Description

NSCC proposed to revise its rules to enable it to clear and settle basket trades.[3] NSCC will accept locked-in basket trade data from an exchange[4] or a marketplace selfregulatory organization ("SRO"). NSCC will net reported basket trades so that each member will have either a net long position or a net short position in basket trades. After netting a member's basket trades, NSCC will "burst" the member's net basket position into its individual security components based on information received from the exchange or marketplace SRO.

The extent to which NSCC must burst a member's net basket position depends on the quotation off of which the member's basket trades were executed. For example, if a member executes a basket trade off of a quote established by a competitive basket market maker,[5] NSCC will receive a locked-in basket trade from the NYSE into its comparison system, and thus will be responsible for bursting the basket into its 500 component securities. If, on the other hand, a member executes a basket trade off of a Tier 1 or Tier 2 quote,[6] the NYSE will burst the basket into 461 separate locked-in trades for securities traded on the NYSE and one locked-in trade of a mini-basket of 39 securities that are not traded on the NYSE. NYSE will submit the 461 separate locked-in trades and the locked-in mini-basket trade to NSCC's comparison system. NSCC will then be responsible for bursting the mini-basket into its 38 component securities.

NSCC will issue a report ("Basket Trade Detail Report") to members showing the results of their basket trades on the day after the trade date ("T+1"). This report will contain, among other things, the member's net position with respect to basket trades, the individual security components of such net position, the individual and aggregate settlement value [7] for such components and any adjustment to basket trades or component securities as described below.

At the same time NSCC issues the Basket Trade Detail Report to its members, it also will issue a report to

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] *See* Securities and Exchange Act Release No. 27021 (July 11, 1989), 54 FR 30125.

[3] In its proposed rules, NSCC defines a "basket trade" as a trade in a group of securities that an exchange or marketplace self-regulatory organization [as defined in § 3(a)(26 of the Act. *See* 15 U.S.C. 78c (1982)] designates as eligible for execution in a single trade. The Commission has approved a proposal by the New York Stock Exchange ("NYSE") to begin trading a market basket product called Exchange Stock Portfolios ("ESPs"). *See* Securities Exchange Act Release No. 27382 (October 20, 1989), File No. SR-NYSE-89-05 ("Exchange Approval Order"). Although this Release refers only to the NYSE's ESPs, NSCC's filing is generic and its proposed rules would apply to all market basket products cleared and settled through NSCC.

[4] All comparison of ESP trade data will occur at the NYSE. The NYSE's method for comparing basket trades and its format for submission of data to NSCC depends upon whether the trade occurred between two market makers or between a market maker and the basket book broker ("BBB"). For example, two market makers who agree to a basket trade must bring the trade to the BBB for execution. The BBB executes the trade by entering it into his terminal on the floor of the NYSE. Entry of the trade will result in a report showing the two market makers as the counterparties to a locked-in basket trade. The NYSE takes this report, adds it to a file containing all of these reports, and passes this file to NSCC at the end of the day. Consequently, for market maker to market maker basket trades, NSCC receives basket trade reports from the NYSE that show the market makers as the counterparties to locked-in basket trades.

NYSE will use an omnibus comparison system for trades between market makers and the BBB, and has established a new omnibus account, TAB, for this purpose. After a market maker agrees to trade a basket with the BBB, the BBB will enter the trade into his terminal. This will create a report showing that the market maker bought or sold a basket from TAB. This also will automatically send a message to the specialists in the 461 component stocks traded on the NYSE informing them that their bids have been hit or their offers have been taken. Each specialist will see TAB as his counterpart, and must take or provide the appropriate number of shares either from his inventory or off his book. Similarly, the BBB also is notified that he must take or provide the 39 stocks that do not trade on the NYSE to TAB. All trades executed against TAB are locked-in trades.

The NYSE will create a file comprised of all NYSE locked-in omnibus basket trades and pass this file to NSCC at the end of the day. Thus, NSCC will see the market maker v. TAB on one side of the trade, and will see the appropriate specialist v. TAB, and the BBB v. TAB on the other side of the trade. NSCC will burst the market maker v. TAB position into 500 "pieces" and burst the BBB v. TAB position into 39 "pieces", thus allowing it to zero out the TAB account. Telephone conversation between John Limerick, NYSE, and Ross Pazzol, Attorney, Branch of Clearing Agency Regulation, Division of Market Regulation, SEC, on October 12, 1989.

[5] A competitive basket market maker has four specific market-making obligations: (1) Establish and maintain a course of dealings consistent with a fair and orderly market; (2) help alleviate temporary disparities between supply and demand; (3) effect proprietary trades in a reasonable and orderly manner in relation to the market in general and the basket market in particular; and (4) maintain a continuous, two-sided quotation in the basket within specified bid-ask parameters. *See* Exchange Approval Order at 8.

[6] Under NYSE's basket trading rules, each NYSE specialist has the obligation to contribute quotes in his specialty stock(s) for the purpose of facilitating market basket transactions. All of these contributed specialist quotes will comprise aggregate "Tier 1" and "Tier 2" basket quotes, and will consist of the prevailing bids and offers in all basket stocks as disseminated through the consolidated quotation system. When an aggregate Tier 1 quote is hit, a specialist must take or supply the number of shares of his specialty stocks needed to complete one basket. Similarly, when a Tier 2 quote is hit, each specialist must take or supply the number of shares of his specialty stocks needed to complete three baskets.

[7] The aggregate settlement value for each component security is equal to the product of the settlement price (*i.e.*, the current NSCC system price) of the component security and the number of shares of the component in the basket as reported by the exchange or marketplace SRO.

the BBB,[8] for its position in mini-baskets arising from trades executed off of Tier 1 or Tier 2 quotes. This report will contain the same information for mini-baskets that the Basket Trade Detail Report contains for basket trades as a whole. NSCC makes this information available to the BBBs so they can determine their net deliver and receive obligations for the securities comprising the mini-basket. If, however, a BBB executes a basket trade for his own account, the mini-basket component of his proprietary trades will not be netted with the mini-basket trades he executes pursuant to his function as a passive market maker for trades executed off of Tier 1 and Tier 2 quotes.

One result arising from a basket trading system in which a member must deliver or receive the component securities comprising the basket is that the value of the basket contract may differ from the settlement value of the component securities.[9] To eliminate that disparity, NSCC will make a cash adjustment for the difference between the contract value [10] of the market basket and the aggregate settlement values of all of the component securities. The cash adjustment will be collected and paid to the appropriate party on the settlement date.

After the component stocks are separated and assigned a settlement value, they are processed through NSCC with the member's other trades. Securities acquired or sold through basket trading will be netted with all of the member's other transactions in the same securities and entered into either NSCC's continuous net settlement ("CNS") system or balance order accounting system, as appropriate. The results of the processing cycle will be reported to the members on the appropriate compared trade summary on the morning of T+4.

Throughout the basket trade processing cycle, NSCC will be able to accept adjustment data from the exchange or marketplace SRO with respect to market basket transaction prices and the prices of the component securities. If NSCC makes an adjustment on T+4 or later which causes a change in the quantity of securities to be received or delivered, or the value to be received or delivered for a CNS-eligible security, the trade will settle two business days after such adjustment. If a similar adjustment is made to a component security which is a balance order security, NSCC will issue a trade-for-trade ticket between the original parties to the basket trade.

II. Rationale for the Proposal

NSCC believes its proposed rule change is consistent with the purposes and requirements of section 17A of the Act. Specifically, NSCC believes that its proposal will promote the prompt and accurate clearance and settlement of securities transactions by increasing the number of securities transactions that are subject to its efficient clearance and settlement procedures. NSCC also believes that its proposal will promote the safeguarding of funds and securities within its possession or control by subjecting market basket transactions to its risk assessment procedures and safeguards.

III. Discussion

The Commission believes that NSCC's proposal is consistent with section 17A of the Act and NSCC's obligation to promote the prompt and accurate clearance and settlement of securities transactions and to safeguard securities and funds in NSCC's custody and control. Accordingly, for the reasons discussed below, the Commission is approving NSCC's proposal.

Since the October 1987 market break, a number of studies have recommended creating a market basket product.[11] These studies suggest that such a product may, among other things, address the volatility and steep price declines experienced during and since October 1987.[12] These studies did not discuss the clearance and settlement issues raised by the development of a market basket product. It appears, however, that the feasibility of developing a workable market basket product is directly related to the development of a system that provides for the safe and efficient clearance and settlement of such products.[13] This order focuses on NSCC's proposed system.

The Commission believes that NSCC's procedures for processing market basket transactions will promote the prompt and accurate clearance and settlement of securities transactions. In general, NSCC's proposed procedures are substantially similar to its existing procedures for the clearance and settlement of equity securities transactions.

Notwithstanding the similarity between the procedures set forth in NSCC's proposal and its existing processing procedures, NSCC's proposal does contain some items that are unique to the clearance and settlement of market baskets. The first of these items concerns the manner in which NSCC will deal with the possibility that the aggregate value of the securities comprising the basket may differ from the value of the market basket contract. As described above,[14] NSCC will account for the possible disparity between these values by creating a cash adjustment equal to the amount of the disparity between the market basket contract price and the aggregate settlement values of the underlying component securities. The Commission believes this is appropriate because it enables NSCC to combine obligations arising out of market basket with obligations arising out of individual stock transactions for netting purposes while simultaneously allowing the purchaser or seller of the market basket to deliver or receive the agreed value of the component stocks comprising the basket.[15] Thus, the Commission believes NSCC's market basket cash adjustement mechanism enhances NSCC's ability to clear and settle securities transactions in a timely and accurate manner.

The second new item presented by NSCC's proposal is the fact that NSCC will be responsible for "bursting" a basket of 500 stocks into its individual security components within a relatively short time frame. NSCC will receive

[8] The BBB performs many of the same functions for market baskets performed by specialists for individual stocks. *See* Exchange Approval Order at 13-16.

[9] For example, assume a basket is comprised of two stocks, A and B, and that the market price of A is $50 and the market price of B is also $50. Assume also that the purchaser buys a market basket for $100 and that the last sale price of A and B at the end of the day was $50½. Because the purchaser would be obligated to deliver $101 on the settlement date, the purchaser would be entitled to receive a $1.00 cash adjustment from NSCC.

[10] At present, the current contract value of a NYSE market basket is $5 million.

[11] *See, e.g.*, N. Katzenbach, *An Overview of Program Trading and Its Impact on Current Market Practices* (December 21, 1987) and Division of Market Regulation, *The October 1987 Market Break* (February 1988). *See also* Report of the Presidential Task Force on Market Mechanisms (January 1988) and the Interim Report of the Working Group on Financial Markets (May 1988) for other reccommendations arising out of the October 1987 market break.

[12] *See* Exchange Approval Order, *supra*, note 7, for a more detailed discussion of the benefits of market basket products.

[13] This is because settlement of the ESP will involve the actual transfer of the component stocks underlying the ESP. *See* Exchange Approval Order at 2. Similarly, settlement of the Chicago Board Options Exchange's market basket product also will result in the transfer of the component stocks comprising the basket. *See* Securities Exchange Act Release No. 27383 (October 20, 1989), File No. SR-CBOE-89-20.

[14] *See* note 8, *supra*.

[15] The Commission notes that NSCC's cash adjustment procedure for market baskets is similar to NSCC's existing cash adjustment mechanism used in connection with its balance order and CNS systems. *See* NSCC Procedures at V and VII.

VOL 54 ISS 209 OCT 31 1989 UMI

data by 2:00 a.m. (Eastern Time) and for those members with automated output capacity, will be responsible for reporting a member's positions by 4:00 a.m. (Eastern Time). NSCC has represented to the Commission that its computer systems have the capacity to perform such functions and that such performance will not adversely affect NSCC's processing capabilities.[16] Thus, the Commission believes that this aspect of NSCC's proposal will not detract from NSCC's ability to promote the prompt and accurate clearance and settlement of securities transactions.

The Commission also believes that NSCC's procedures enable NSCC to safeguard securities and funds in its custody and control consistent with its obligations under the Act. Members desiring to trade market baskets are subject to the same financial responsibility and reporting requirements currently imposed on all NSCC members.[17] In addition, member's equity security deliver and receive obligations arising out of basket trading will be guaranteed by NSCC on midnight of the day after the trade date.[18] Members, therefore, will be exposed to the credit risk of their counterparty for only a short period of time. Moreover, NSCC will add a member's deliver and receive obligations arising out of basket trading to all of the member's other obligations for the purposes of calculating the member's required clearing fund contribution. In this way, NSCC will ensure that it will be covered for any additional exposure resulting from its member's market basket trading.[19]

For the reasons stated above, the Commission believes that NSCC's proposal is consistent with section 17A of the Act.

IV. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change (SR–NSCC–89–08) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30-3.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 34-27389; File No. SR-OCC-89-10]

Self-Regulatory Organizations; Options Clearing Corporation; Order Approving Proposed Rule Change Providing for the Clearance and Settlement of Market Baskets

On August 14, 1989, the Options Clearing Corporation ("OCC") filed a proposed rule change (SR–OCC–89–10) with the Commission pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act").[1] Notice of the proposal was published in the **Federal Register** on August 29, 1989 [2] to solicit comments from interested parties. On September 21, 1989 and October 13, 1989, OCC filed amendments to its proposal. No comments were received. As discussed below, the Commission is approving the amended proposal.

I. Introduction

OCC proposes to revise its rules to provide for the clearance and settlement of market baskets traded on the Chicago Board Options Exchange ("CBOE").[3] OCC's proposed By-laws define a "market basket" as a contract obligating the seller to sell and the purchaser to purchase a designated number of shares of each of the stocks comprising the index group on which the market basket is based.[4] Although market basket trades are purchases and sales of the component basket stocks, OCC will process market basket trades as if market baskets were exercised equity options, but will include market baskets as a class group within the non-equity option system for other purposes. To account for the differences between market baskets and options, OCC also proposes to add a new set of rules and procedures designed specifically to accommodate market baskets. These are described more fully below.

II. Description

OCC proposes to revise its rules so that clearing members involved in basket trading ("market basket clearing members") are subject to the same general requirements as OCC clearing members that trade non-equity options. For example, any clearing member desiring to trade market baskets first would have to obtain OCC's approval to do so. Before receiving such approval, each clearing member, among other things, would be required to meet OCC's minimum initial net capital requirements.[5] After receiving approval to trade market baskets, a market basket clearing member would have to deposit the minimum required contribution to OCC's non-equity securities clearing fund,[6] and maintain the level of minimum net capital required by OCC.[7] A market basket clearing member also would be required to maintain the records prescribed by OCC [8] and maintain a bank account in a clearing bank [9] for each of its market basket accounts.[10]

---

[16] *See* letter from Robert A. Schultz, Executive Vice President, NSCC, to Ross Pazzol, Attorney, Branch of Clearing Agency Regulation, Division of Market Regulation, SEC, dated October 19, 1989.

[17] *See* NSCC Rule 15.

[18] NSCC will treat the burst stock positions of members involved in basket trading as being reported to NSCC as compared. Thus, NSCC will guarantee the performance of these transactions at midnight on T+1. *See* letter from Allison Hoffman, Associate Counsel, NSCC, to Ross Pazzol, Attorney, Branch of Clearing Agency Regulation, Division of Market Regulation, dated October 24, 1989. *Accord,* Securities Exchange Act of Release No. 27192 (August 29, 1989), 54 FR 37070.

[19] *See* NSCC Procedure XV. The Commission is concerned that NSCC's clearning fund calculation may not reflect a member's actual mark-to-the-market exposure because it allows NSCC to collect only a percentage of a member's mark-to-the-market exposure. NSCC currently calculates each member's mark-to-the-market exposure daily, but only collects mark-to-the-market payments on the settlement date. The Commission believes that NSCC should consider collecting marks on all of its members' open obligations from the time of guarantee through the scheduled settlement date. *See* Securities Exchange Act Release No. 27192 (August 29, 1989), 54 FR 37070.

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] *See* Securities Exchange Act Release No. 27157 (August 21, 1989), 54 FR 35743.

[3] OCC's proposal is generic and would apply to all market basket products cleared and settled through OCC. However, because OCC's proposal was submitted concurrently with CBOE's proposal to begin trading two market basket products based on the Standard and Poor's 100 Stock Price Index and the Standard and Poor's 500 Stock Price Index, this release will discuss OCC's proposal as it relates to CBOE's market basket products. *See* Securities Exchange Act Release No. 27383 (October 26, 1989), File No. SR–CBOE–88–20, approving CBOE's proposal ("CBOE Approval Order").

[4] *See* Article 1, Section 1( ) of OCC's proposed By-laws.

[5] *See* OCC Rule 301.

[6] *See* OCC By-laws, Article VIII, section 2. Under Rule 1001(b), a market basket clearing member's minimum required non-equity securities clearing fund contribution is equal to the greater of (1) $75,000; or (2) the member's proportionate share of 7% of the average daily aggregate margin requirement for non-equity securities options contracts, and market baskets outstanding during the preceding month. Under OCC's proposal, a market basket clearing member's proportionate share is determined by calculating the member's daily average long and short positions in non-equity securities options contracts and the daily average of the net number of market baskets purchased or sold during the preceding month and dividing it by the same sum as calculated for all non-equity securities clearing members.

[7] *See* OCC Rule 302.

[8] *See* OCC Rule 207.

[9] A "clearing bank" is a bank located in a city in which OCC has a clearing office and which has entered into an agreement with OCC for settlement of transactions on behalf of a clearing member. *See* OCC Rule 101(c).

[10] *See* OCC Rule 203.

OCC's proposal also adds new provisions to its rules and By-laws that apply specifically to market baskets. In many areas, these rules and By-laws parallel those for processing equity option transactions. For example, under OCC's proposal, each exchange must report to OCC each exchange transaction in market baskets for which the purchasing clearing member and the selling clearing member have submitted matching trade information. This report must identify the purchaser and seller of the market baskets, the number of market baskets bought and sold, and the class [11] and trade price of each market basket. This report also must identify the transaction to the clearing member's firm, market maker or customer account. After OCC receives this report, OCC will calculate the difference between the price at which a member purchased or sold a market basket and the closing price of the component securities on that day ("cash adjustment"). OCC will net the member's cash adjustments across accounts to arrive at a net cash adjustment credit or requirement.

After calculating each member's net cash adjustment, OCC will net out each member's market basket trades to either a net long or short position, burst each member's net position into its underlying component securities,[12] and assign each component security a price equal to its closing price as determined by OCC's reporting authority. OCC then will report the above information to each market basket clearing member's designated clearing corporation by 2:00 a.m. (Central Time). If OCC does not receive the closing price of any of the component securities, OCC may either set the market price of the securities based on the most recent market price available for such securities or suspend the settlement obligations of its clearing members for such securities.[13]

Each market basket clearing member must deposit margin at OCC for its net basket position by 9 a.m. (Central Time) on the day after the trade date.[14] Members with a net cash adjustment requirement also must pay this amount to OCC at this time. Members with a net cash adjustment credit may offset their required margin deposits by this amount.

Each member must pay the required margin on its net basket position on a daily basis. In addition, members with net cash adjustment requirements must maintain such amounts on deposit with OCC until the settlement date.[15] Although members with net cash adjustment credits may use these credits to offset their daily margin obligations, they may not collect these amounts until the settlement date.

After members pay their margin and net cash adjustment requirements, OCC will "accept" (*i.e.*, guarantee) their market basket transactions and interpose itself between the parties to the transactions. OCC will deem all accepted market basket positions to be in the member's firm account. OCC will report each member's net market basket settlement obligations to the member's designated clearing corporation by 2:00 a.m. (Central Time) on the day after the trade date.[16]

At 1:00 p.m. (Central Time) on the day before the settlement date, OCC's settlement obligations for accepted market basket transactions will be transferred to each member's designated Clearing Corporation. From that point forward, each member's designated Clearing Corporation will guarantee its member's market basket settlement obligations.[17]

Money and securities settlement of market baskets will occur at the member's Clearing Corporation on the settlement date. Members also will settle their net cash adjustment credits on the settlement date through OCC's cash settlement system. Any member with a net cash adjustment credit will receive this amount from OCC at or before 10:00 a.m. (Central Time).

If a certain component security is ineligible for settlement through a member's Clearing Corporation, OCC may require that the security be settled outside the Clearing Corporation on a broker to broker basis. In addition, OCC may postpone settlement of one or more component securities comprising the basket if, in its opinion, such action is required because of unusual market conditions or is in the public interest. If OCC determines that, because of extraordinary conditions, delivery of such securities is impossible or unduly burdensome for the delivering member, OCC may relieve the delivering member from its obligation to deliver such security and adjust the aggregate value of the market basket accordingly.[18]

If OCC suspends any member obligated to deliver the securities comprising a market basket before the member's Clearing Corporation becomes obligated to effect settlement (*i.e.*, before 1:00 p.m. (Central Time) on the day before the settlement date), OCC will direct a receiving member to buy-in the securities and report the execution price of the buy-in to OCC. If the member buying in suffers a loss, OCC must satisfy the loss by 10:00 a.m. (Central Time) the following business day. If such a buy-in results in a gain, the buying member must pay the gain to OCC, and OCC will deposit the amount in the suspended member's Liquidating Settlement Account.[19] If a member is suspended after his designated clearing corporation is obligated to effect settlement on his behalf, any amount the member is entitled to receive is paid

---

[11] OCC's proposal amends OCC Rule 602A(b)(2) to set market baskets in a seperate class group from the other non-equity options products issued, cleared and settled at OCC. Market baskets will, however, be included in OCC's broad-based index product group.

[12] The CBOE will determine the particular securities comprising the market basket and the number of shares of each such security in the basket at or prior to the opening of trading on each exchange on which the market basket is traded.

[13] *See* OCC proposed By-Law XIX, section 5.

[14] OCC will calculate margin requirements for market baskets in essentially the same manner it makes such calculations for non-equity options. Accordingly, each member must pay margin consisting of two components: (1) "Premium margin" (which covers OCC's exposure resulting from the one day price movement in the market value of the member's net basket position), and (2) "additional margin" (which covers any exposure OCC may have as a result of liquidating a member's net basket position). After OCC calculates a member's margin requirement (credit) for market baskets, it will determine the member's product group margin requirement (credit) by combining such requirement (credit) with the member's margin requirements (credits) for other broad-based index options. OCC will determine a member's aggregate margin requirement by adding the member's aggregate class group and product group margin requirements and (1) subtracting 50% of any credits attributable to such class groups and product groups; (2) adding (subtracting) any mark-to-market payments which the member has paid (collected) for its net basket position; and (3) subtracting any margin credit attributable to the member's position in equity options. *See* OCC proposed Rule 602A.

[15] All market basket transactions will settle on the fifth business day after the trade date ("T").

[16] Each market basket clearing member must designate either National Securities Clearing Corporation ("NSCC"), Midwest Clearing Corporation ("MCC") or the Stock Clearing Corporation of Philadelphia ("SCCP") ("Clearing Corporation(s)") as its designated clearing corporation for the purpose of settling the deliver and receive obligations arising out of the member's market basket activity. OCC has supplemented its options exercise settlement agreements with the Clearing Corporations to provide for settlement of these obligations.

[17] *See* Supplement to Options Exercise Settlement Agreements between OCC and NSCC, MCC and SCCP dated October 26, 1989. After OCC's market basket settlement guarantees are transferred to each member's designated Clearing Corporation, OCC will continue to calculate and collect margin from market basket clearing members until the settlement date. *See* discussion at p. 18, *infra.*

[18] *See* OCC proposed By-Law XIX, Section 4.

[19] After a member is suspended, OCC promptly converts all of the member's margin deposits, clearing fund contributions and other funds subject to OCC's control to cash and deposits these funds in a Liquidating Settlement Account in the name of the clearing member. OCC then uses these funds to satisfy the member's outstanding liabilities. *See* OCC Rule 1104.

directly into his Liquidating Settlement Account. These same procedures apply in reverse to a situation in which a member obligated to receive securities is suspended from OCC.[20]

Advocates of such a product believe that trading baskets of portfolios of stock may reduce the volatility and dramatic price changes in the market that are associated with index-related

Although OCC's proposal relies heavily on its existing equity option exercise and settlement procedures, some aspects of OCC's proposal are tailored to fit the unique characteristics

adjustment to eliminate this disparity.[20] This cash adjustment will settle through OCC's cash settlement system on the settlement date. The Commission believes this mechanism is appropriate

to which they are subject. It also allows them to gauge their financial commitments and allows them to adjust their trading strategy accordingly.

The Commission, however, believes

default in a manner that does not impose unnecessary costs on clearing members. Until such revised agreements are in effect, however, the Commission believes that OCC and the Clearing

directly into his Liquidating Settlement Account. These same procedures apply in reverse to a situation in which a member obligated to receive securities is suspended from OCC.[20]

III. OCC's Rationale for the Proposed Rule Change

OCC believes its proposed rule change is consistent with the purposes and requirements of the Act. Specifically, OCC believes that its proposal will promote the prompt and accurate clearance and settlement of securities transactions by applying to market basket transactions rules and procedures comparable to those that have been used successfully for the clearance and settlement of options transactions. OCC also believes that its proposal will promote the safeguarding of funds and securities because it will apply to market baskets a system of safeguards which is substantially the same as those that OCC currently uses for options.

IV. Discussion

The Commission believes that OCC's proposal is consistent with section 17A of the Act and with OCC's obligation to promote the prompt and accurate clearance and settlement of securities transactions and to safeguard funds and securities in OCC's custody and control. Accordingly, the Commission is approving OCC's proposal for the reasons provided below.

The Commission believes that market basket trading will benefit the financial markets. Indeed, one of the many recommendations in the aftermath of the October 1987 market break was the creation of a market basket product.[21] Advocates of such a product believe that trading baskets of portfolios of stock may reduce the volatility and dramatic price changes in the market that are associated with index-related trading strategies.[22] They also believe that a specific post or posts for trading market baskets will enhance the liquidity of the markets by providing a mechanism for the efficient trading of portfolios of stocks.[23]

The Commission is satisfied that OCC's proposal to clear and settle the market basket product to be traded on the CBOE is well designed to promote the prompt and accurate clearance and settlement of these transactions consistent with section 17A(b)(3) of the Act. As stated in OCC's proposal, a market basket is not a separate security;[24] instead, it is a contract to purchase and sell a designated number of shares of each of the stocks comprising the index group on which the market basket is based.[25] Thus, because the assets underlying market baskets are equity securities, and because the purchase and sale of a market basket results in an obligation to deliver or receive equity securities, the Commission believes that the clearance and settlement of market basket transactions should be similar to the exercise and settlement of equity option transactions. As described above, OCC's proposed rules, for the most part, follow OCC's well-established system for processing equity option transactions. Therefore, the Commission believes that OCC's proposed rules facilitate the same prompt and accurate clearance and settlement of market basket transactions that OCC's rules presently provide for equity option transactions.[26]

Although OCC's proposal relies heavily on its existing equity option exercise and settlement procedures, some aspects of OCC's proposal are tailored to fit the unique characteristics of market baskets. For example, unlike purchases and sales of equity options, a clearing member who buys or sells a market basket is obligated to purchase or deliver the stocks comprising the basket. Consequently, the Commission believes it is appropriate that OCC's proposed rules require both the purchasing clearing member and the selling clearing member to deposit margin on the morning of the day after the trade date.[27] Moreover, although settlement of market basket transactions results in the delivery or receipt of stock, OCC proposes to margin its members' positions in market baskets under its non-equity option margin system. The Commission believes this is appropriate because OCC's non-equity option margin system, unlike its present equity option margin system, is a "portfolio-based" system that provides a sophisticated method of calculating the amount of margin necessary to cover the risk posed by the member's positions.[28] OCC's proposal also recognizes that the contract price of the basket may be greater or less than the aggregate settlement value of the individual stocks comprising the basket.[29] OCC will use a cash

[20] The Commission has received an opinion from OCC's counsel stating that in the event of a suspension of a clearing member, the rights of OCC as set forth in proposed section 3(b) of Article XIX of OCC's By-Laws would be enforceable by OCC against the clearing member and any receiver, examiner or trustee appointed for the clearing member's estate under the Securities Investor Protection Act of 1970 or the Bankruptcy Code, to the same extent as if such transaction had originated in the clearing member's firm account and without regard to whether market basket transactions effected by such clearing member are or have been identified in any of OCC's reports as having originated in the customer, market-maker or other account of the clearing member. *See* letter from James R. McDaniel, Schiff, Hardin & Waite, to Jonathan Kallman, Assistant Director, Division of Market Regulation, dated October 24, 1989.

[21] *See, e.g.*, Division of Market Regulation, *The October 1987 Market Break* (February, 1988) ("Staff Report") and N. Katzenbach, *An Overview of Program Trading and its Impact on Current Market Practices* (December 21, 1987) ("Overview of Program Trading"). *See also* Report of the Presidential Task Force on Market Mechanisms (January 1988) and The Interim Report of the President's Working Group on Financial Markets (May 1988) for other recommendations arising out of the market break.

[22] *See* Overview of Program Trading at note 20. *See also* H. Stoll, *Portfolio Trading*, Working Paper No. 87–14 (September 1987) (available at the Owen Graduate School of Management, Vanderbilt University).

[23] *Id.* For a more complete discussion of the benefits provided by the creation and trading of market basket products, *see* CBOE Approval Order note 3, *supra*, and Securities Exchange Act Release No. 27382 (October 26, 1989), File No. SR–NYSE–89–05, approving the New York Stock Exchange ("NYSE") proposal to trade a market basket product.

[24] *See* proposed section 1 (mmmm) of Article I of OCC's By-Laws.

[25] *See* CBOE approval order at 26.

[26] Section 31 of the Act requires each national securities exchange to pay certain transaction fees to the Commission. *See* 15 U.S.C. 78ee (1982). OCC and CBOE have agreed in writing that OCC will collect the so-called Section 31 fees attributable to market basket trading on CBOE's behalf and pay them to the Commission as CBOE's agent. Although Section 31 does not specifically contemplate this arrangement, the Commission does not believe that it is inconsistent with the requirements of Section 31. The Commission also notes that this arrangement does not affect CBOE's obligation to pay Section 31 fees. *See* Section 18 of the Market Basket Supplemental Agreement between OCC and CBOE dated October 26, 1989.

[27] *See* OCC proposed Rule 602A(a).

[28] Both OCC's equity and non-equity option margin calculations are based, in part, on options premiums. In both systems, open positions are marked to market daily based on closing ask prices. The second component of equity options margin, however, is based on a flat 30% of the current value of the underlying securities. The second component of non-equity option margin is more flexible and is adjusted according to the current risk posed to OCC by the member's position. *See* Staff Report at 10–50.

OCC's non-equity option margin system uses options price theory to project the cost of liquidating a member's positions in the event of an assumed "worst-case" change in the price of the underlying asset or index. The margin requirement on the same class of options equals the premium plus the additional margin calculated by determining the assumed maximum one-day price movement in the underlying assets and by projecting the liquidating value of such position. To provide additional protection, OCC presumes that the cost of liquidating a member's out of the money positions would increase by a minimum of 25% of the margin interval. For a further discussion of OCC's non-equity options margin system, *see* OCC, *The Back-up System, A Special Study by the Margin Committee Subcommittee* ("Backup Report") (August 3, 1988) at 24–41. *See also* Staff Report at 10–36.

[29] For example, assume a basket comprised of one share each of two separate stocks. Assume each stock has a fair market value of $50½ and that

Continued

adjustment to eliminate this disparity.[30] This cash adjustment will settle through OCC's cash settlement system on the settlement date. The Commission believes this mechanism is appropriate because it simultaneously ensures that market basket clearing members pay the agreed upon price for a market basket while facilitating netting by allowing OCC to combine transactions in the same securities executed at different prices in a single netting process.[31]

Finally, OCC's proposal is designed so that market participants who buy and sell stocks through individualized stock transactions in the exchange and over-the-counter markets and who buy or sell stock through basket trading will have a report that summarizes all of their previous day's trading activity before the beginning of trading on the following day. OCC will report market basket transaction data to the Clearing Corporations in time for them to include this data in position reports that are made available to members before the opening of trading on the following day.[32] The Commission believes that this aspect of OCC's proposal is beneficial because it allows market participants to have a report that reflects all of their previous day's compared stock trades regardless of the marketplace in which such trades were executed or the trading vehicle used to acquire such stocks before trading commences on the following day. This, in turn, provides market participants a complete and accurate picture of their market exposure and the credit risk [33] to which they are subject. It also allows them to gauge their financial commitments and allows them to adjust their trading strategy accordingly.

The Commission, however, believes that there is room for further improvement in OCC's market basket processing procedures. For example, as discussed below, the Commission believes that OCC and the Clearing Corporations could enhance their protection against the credit risk associated with market basket transactions.

Under OCC's proposal, OCC will assume the credit risk involved in market basket transactions by guaranteeing transactions upon payment of the margin on the morning of T+1 at 9:00 a.m. (Central Time). OCC also will protect against the market risk [34] associated with market basket transactions by collecting market-to-market payments daily through its margin system. On T+4, each Clearing Corporation will take over OCC's guarantee by becoming the counterparty to every market basket transaction settled through its facilities. This guarantee will remain in effect until settlement occurs on T+5.

Under the Clearing Corporations' current rules, locked-in equity trades are guaranteed as of midnight on T+1.[35] This trade guarantee policy does not apply to exercise and settlement of equity option transactions. Thus, because OCC's proposal treats the clearance and settlement of market basket transactions in much the same way as the exercise and settlement of equity options, the Clearing Corporations' guarantee will not become effective until T+4. The Commission understands that OCC will be revising its exercise settlement agreements with the Clearing Corporations to reflect the Corporations' earlier trade guarantees. The Commission encourages OCC to do so with a view toward providing adequate protection against Member default in a manner that does not impose unnecessary costs on clearing members. Until such revised agreements are in effect, however, the Commission believes that OCC and the Clearing Corporations can take certain steps to increase their protection against clearing member default within the framework of their existing arrangements.

As explained above, the Clearing Corporations' trade guarantee with respect to equity option transactions and market basket transactions is currently effective from 1:00 p.m. on T+4 (Central Time) until settlement on T+5. OCC, however, collects margin from T+1 until settlement on T+5. The Commission believes OCC should explore ways to make the margin deposited in connection with equity option and market basket transactions available to the Clearing Corporations (to the extent necessary to satisfy losses arising out of equity options exercise settlement obligations and market basket transactions) from the time the Clearing Corporations' guarantee becomes effective until settlement. OCC could make this amount available by giving the Clearing Corporations a perfected, first lien on such amounts deposited at OCC.[36] This would provide the Clearing Corporations with more direct protection against market risk than is currently provided under their existing financial safeguards.[37] OCC's exposure would not be increased under such an arrangement because its loss of control over the margin on deposit would coincide with the termination of its guarantee. After settlement of exercised equity options and market basket transactions at the appropriate Clearing Corporation, the Clearing Corporation's lien would be terminated and OCC would then release

the purchaser buys the basket for $101.00. Further assume that each stock has a system price (*i.e.*, the price used to facilitate netting) of $50 per share. Because each stock will settle at $50 per share, the seller is entitled to receive a $1.00 cash adjustment to account for the difference between the basket contract price and the settlement value of the underlying stocks.

[30] *See* OCC proposed Rule 2001(b)(3).

[31] NSCC intends to use a similar mechanism to facilitate the netting of transactions in the NYSE's market basket product. *See* Securities Exchange Act Release No. 27388 (October 26, 1989), File No. SR–NSCC–89–06.

[32] For example, NSCC will include market basket transaction data in the reports it provides to its members in automated form through the current Regional Interface Operation by 8:00 a.m. (Eastern Time) on the morning of T+1. *See* letter from Robert A. Schultz, Executive Vice President, NSCC, to Ross Pazzol, Attorney, Branch of Clearing Agency Regulation, Division of Market Regulation, dated October 19, 1989. MCC also will report market basket transaction data to its members by 9:00 a.m. on the morning of T+1. *See* letter from Jeffrey Lewis, Associate Counsel, MCC, to Ross Pazzol dated October 24, 1989.

[33] Credit risk is the risk that the counterparty to a transaction will not be able to meet its obligations under the terms of the transaction.

[34] Market risk is the risk associated with the change in the market price of a security. This risk arises where the price of the security rises or falls after trade execution but before settlement. If the price of the security rises and the seller does not deliver the security, the buyer may have to find another seller at a higher price. Conversely, if the price of the security falls and the buyer does not honor the trade, the seller may have to find another buyer at a lower price. Currently, stock clearing corporations such as NSCC calculate marks-to-the-market on a daily basis but do not collect such amounts until the settlement date. The Commission believes that requiring members to make daily mark-to-the-market payments would provide the clearing corporation (and its members) with the greatest degree of protection against the market risk. *See* Staff Report at 10–25.

[35] *See* Securities Exchange Act Release No. 27912 (August 29, 1989), 54 FR 37070.

[36] This proposal assumes that OCC would have no liability remaining with respect to the equity options and market basket settlement obligations it guaranteed after its guarantee is superceded by the Clearing Corporations' guarantee on T+4. If OCC retains some residual liability for performance of such guaranteed settlement obligations, OCC would want to maintain control over the margin deposited with it on T+4 and T+5 to satisfy any contingent liability it may have with respect to such obligations. The Commission urges OCC and the Clearing Corporations to resolve this issue expeditiously.

[37] OCC's margin calculations include a mark-to-market component. *See* note 14, *supra*. By contrast, each Clearing Corporation's current clearing fund calculations does not normally cover the full amount of its members' daily mark-to-market exposure. *See* Securities and Exchange Act Release No. 27912 (August 29, 1989), 54 FR 37070. The Commission and NSCC are currently exploring, in a separate proceeding, the appropriate calculation of clearing fund requirements.

the margin to the appropriate clearing member.[38]

For the reasons stated above, the Commission believes that OCC's proposal is consistent with Section 17A

report transactions in reported securities and to disseminate on a consolidated basis the total trading volume for each component stock in ESP transactions.[5] Notice of the proposal was provided by

executions in the NYSE-listed component stocks will be disseminated to market data vendors in the same manner as individual executions in the component stocks.[11]

The Alliance of Floor Brokers ("AFB"),[12] criticized certain aspects of the ESP market structure as anti-competitive. The AFB believes that ESP trading may exacerbate structural market risks that exist because of the

asset market. The Exchange believes that the rules supporting ESP trading are designed appropriately to accommodate the particular needs of the portfolio market in a fair and competitive market

figures merits modification in light of actual trading experience.[21]

At the end of the first six months of basket trading, however, the NYSE has committed to submit to the Commission

VOL 54 ISS 209 OCT 31 1989 UMI

the margin to the appropriate clearing member.[38]

For the reasons stated above, the Commission believes that OCC's proposal is consistent with Section 17A of the Act.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change (SR–OCC–89–10) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.20.3.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. 34–27390; File No. SR–NYSE–89–05]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Granting Exemptions Relating to Basket Trading

I. Introduction

On June 2, 1989, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to trade "Exchange Stock Portfolios" ("ESPs"), standardized baskets of stocks, on the floor of the Exchange.[3] As part of the proposal, the Exchange requested certain exemptions under Rule 11Aa3–1 [4] from the Rule's requirements to report transactions in reported securities and to disseminate on a consolidated basis the total trading volume for each component stock in ESP transactions.[5] Notice of the proposal was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26908, June 8, 1989), and by publication in the **Federal Register** (54 FR 25516, June 15, 1989). Seven comment letters were received regarding the proposed rule change, three of which dealt with transaction reporting.[6]

II. Description of the Proposed ESP Service and Exemption Requests

The ESP Service will allow NYSE members to trade standardized baskets of stocks at an aggregate price in a single execution on the Exchange's stock floor.[7] Given the increased institutionalization of the stock market and the growth of index-related trading strategies, the Exchange has proposed the ESP Service to address the need for an institutional stock basket trading system with physical delivery of the underlying component stocks.[8] The Exchange intends to disseminate basket last sale information and quotations to market data vendors, thereby assuring that all ESP market participants will have ready access to the ESP transaction reports and quotations. In addition, Tier 1 [9] and Tier 2 [10] executions in the NYSE-listed component stocks will be disseminated to market data vendors in the same manner as individual executions in the component stocks.[11]

Further, proposed Rule 803 will impose on members obligations that are consistent with those that Commission Rule 11Ac1–1 [12] and Exchange Rule 60 impose on quotations for individual stocks. Basket quotations, with one exception, will be firm under Rule 803. Outside of the existing markets in the individual component stocks trading on the Exchange in compliance with Rules 11Aa3–1 and 11Ac1–1, however, no quotes or last sale reports will be available for the individual component stocks that comprise a stock basket when it trades under the ESP market structure, unless, as discussed above, an order is executed against a Tier 1 or Tier 2 aggregate quotation. This, however, is inconsistent with paragraphs (c)(1) and (c)(2) of Rule 11Aa3–1, which require that the Exchange disseminate transaction reports in individual reported securities. In addition, the Exchange will not provide a mechanism for consolidating transaction volume in the individual reported securities, which is inconsistent with Rule 11Aa3–1(b)(2)(iv). That paragraph requires the Exchange to disseminate transaction reports pursuant to a plan that provides for the consolidation of transactions in the same securities executed on other exchanges. Thus, the NYSE filed its request that the Commission grant exemptions from those requirements.

III. Comments

The Commission received seven comment letters in response to its request for comments on the proposed rule change, three of which addressed transaction reporting.

---

[38] The Commission notes that OCC has not completed action with respect to some of the recommendations made in the Backup Report, including guaranteeing trades as they are compared, instead of making OCC's guarantee conditional on payment of the premium. OCC has represented that it will assess the feasiblity of moving to an earlier trade guarantee and the corresponding increase in risks by the end of this year. Conversation between James Yong, Deputy General Counsel, OCC and Jonathan Kallman, Assistant Director, Division of Market Regulation, on September 25, 1989. Thus, the Commission expects OCC to inform the Commission of the results of its assessment and set a timetable for completing action of Backup Report recommendations by January 1, 1990.

[1] 15 U.S.C. 78(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1989).

[3] The Commission approved the proposed rule change submitted by the NYSE to establish ESPs in a separate order issued today. *See* Securities Exchange Act Release No. 27382 (October 26, 1989).

[4] Rule 11Aa3–1, the Transaction Reporting Rule, generally requires that exchanges file transaction reporting plans governing the collection, processing and dissemination of last sale data on securities traded on the exchanges. Paragraph (g) of the Rule gives the Commission authority to grant exemptions from the Rule's requirements. 17 CFR § 240.11Aa3–1 (1989).

[5] *See* letter from Richard A. Grasso, President and Chief Operating Officer, NYSE, to Brandon C. Becker, Associate Director, Division of Market Regulation ("Division"), SEC, dated October 4, 1989; and letter from Michael J. Simon, Milbank, Tweed, Hadley & McCloy, counsel for the NYSE, to Kathryn V. Natale, Assistant Director, Division of Market Regulation, SEC, dated October 13, 1989.

[6] *See* notes 13–15, *infra* and accompanying text.

[7] Initally, ESP trading will be available for executions of a standardized basket of 500 stocks comprising the Standard & Poor's 500 ("S&P 500") Portfolio Index. At the commencement of ESP trading, each 500-stock ESP will have a value of approximately $5 million.

[8] The Exchange contends that the ESP Service will address market inefficiencies resulting from the fragmented executions that currently characterize program trading. Furthermore, the Exchange believes that the ESP Service may reduce the price volatility associated with institutional demands and the selling pressures their index-oriented trading strategies currently transmit to individual component stocks.

[9] "Tier 1 component stock quotation" refers to the price of the best published bid and published offer for each basket component stock that is listed on the Exchange. An "aggregated Tier 1" quotation will be derived from the weighted summation of the prevailing bids and offers for each of the component stocks as disseminated through the consolidated quotation system, plus Tier 1 "mini-basket" bids and offers for the non-NYSE component stocks.

[10] "Tier 2 component stock quotation" refers to the bid or offer for the number of shares of a basket's component stocks necessary to comprise three baskets. An "aggregated Tier 2" quotation will be derived from the weighted summation of the prevailing bids and offers for each of the component stocks necessary to fill three baskets, plus the Tier 2 "mini-basket" bids and offers for the non-NYSE component stocks.

[11] When a basket order is executed at the aggregated Tier 1 quote, upon receiving the basket execution notice through the ESP Service, each component-stock specialist must assign, take or supply the number of shares of the component stock at the execution price needed to complete one basket and must report the size and price as a trade in the same manner as all reported stocks. If a basket order is executed at the aggregate Tier 2 quote, each component-stock specialist must assign, take, or supply at the execution price the number of shares of his specialty stock needed to complete three baskets.

[12] 17 CFR § 240.11Ac1–1 (1989). The Commission notes that Rule 11Ac1–1 applies to quotations on ESP baskets.

The Alliance of Floor Brokers ("AFB"),[13] criticized certain aspects of the ESP market structure as anti-competitive. The AFB believes that ESP trading may exacerbate structural market risks that exist because of the different regulatory treatment accorded derivative products. The AFB argues that, in comparison to existing equity auction market trading procedures, the alternative trading procedures evisioned by the ESP System ultimately would result in a fragmented securities market structure with increased market volatility.

Richard Ney & Associates Asset Management Inc. ("Ney"), an investment management company, criticizes the configuration of ESP transaction reporting.[14] The Commission also received letters from Thomas G. and Ruth M. Roberts ("the Roberts"), and Burton Roger ("Roger"), individual investors residing in California, who similarly criticized the Exchange's proposed transaction reporting plan as it would apply to the basket's component stocks.[15] Specifically, Ney, Roger and the Roberts criticized the lack of real time price and volume reporting for the ESP stock companies when NYSE specialists do not participate in a basket execution. Further, the Ney letter questioned the usefulness of the consolidated tape when such information is not included.[16]

The Exchange generally addressed these commentators' concerns and other issues raised by Commission staff in a letter to Commission staff ("September 6 letter"), which, among other things, further explained the rationale underlying ESP trading and its accompanying market structure.[17] In its September 6 letter, the Exchange notes that ESP trading is structured with the goal of providing institutional customers and member firms with a trading vehicle suited for an institutional, composite-asset market. The Exchange believes that the rules supporting ESP trading are designed appropriately to accommodate the particular needs of the portfolio market in a fair and competitive market structure. Because ESP trades are executed at aggregated prices, the Exchange contends that a last sale reporting requirement for the price and volume of a basket's individual component stocks does not translate well into the ESP context.

IV. Discussion

Pursuant to Commission Rule 11Aa3–1 [18] the NYSE is required to collect and disseminate transaction data on securities listed and traded on the exchange. More specifically, Rule 11Aa3–1 requires that the Exchange disseminate transaction reports for individual reported securities traded on the Exchange,[19] and that the Exchange disseminate on a consolidated basis trading volume for each of the component stocks represented by ESP transactions.[20]

The NYSE will provide trading facilities through the ESP Service for reported securities (as components of baskets) but will not report transactions in the individual component stocks, as is required by paragraphs (c)(1) and (c)(2) of Rule 11Aa3–1. The Commission agrees with the Exchange that, with the exception of specialist Tier 1 and Tier 2 executions, real-time last sale and volume reporting for the individual component stocks underlying a basket trade would not be appropriate in the ESP context. Pricing of the baskets is based on the aggregate value of the underlying securities and, thus, any assignment of a "price" to any of the component stocks in the basket would be derivative of the aggregate price.

Further, for the first six months, the NYSE will not disseminate on a consolidated basis the total daily trading volume for each component stock. The NYSE believes that its proposal to exclude end-of-day transaction volume in the ESP component stocks from the consolidated transaction volume figures is appropriate to provide the Division and the Exchange with an opportunity to assess whether the absence of individual basket component stocks in the end-of-day consolidated volume figures merits modification in light of actual trading experience.[21]

At the end of the first six months of basket trading, however, the NYSE has committed to submit to the Commission a proposed rule change that will provide for the inclusion of end-of-day transaction volume in the ESP component stocks in the consolidated transaction volume figures. The Exchange has reserved the right to provide views and information that would express and support its continued opposition to the inclusion of end-of-day transaction volume in the ESP component stocks in the consolidated transaction volume figures, which would be reflected in the publication of the proposed rule change for comment. The Exchange would withdraw the amendment should the Commission concur with the Exchange at that time. The Commission believes that a six-month delay is reasonable in order to determine whether the absence of the consolidated reporting of end-of-day transaction volume in the basket components stocks merits modification.

The Commission believes that the ESPs will provide institutional investors with a cost-efficient means to make investment decisions based on the direction of standardized measures of stock market segments and the stock market as a whole, and may provide stock market participants several advantages over existing methods of effecting program trades of stocks and transactions in portfolios of securities. The Commission believes that appropriate conditional relief from Rules 11Aa3–1 is necessary and appropriate if the benefits of trading in market basket contracts are to be achieved.

V. Conclusion

The Commission believes that the ESP market structure balances appropriately the competing concerns of various Exchange constituencies and is consistent with the maintenance of fair and orderly markets and the protection of investors. Accordingly, based upon the aforementioned factors, the Commission finds that the requested exemptions under Rule 11Aa3–1 are consistent with the requirements of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 11A of the Act, and Rule 11Aa3–1(g) thereunder, that the following requested exemptions from Rule 11Aa3–

BILLING CODE 8010–01–M

[Release No. 34–27391; File No. SR–CBOE–88–20]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Granting Exemptions Relating to Market Basket Trading

I. Introduction

On May 12, 1988, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change that establishes Exchange rules governing the trading of "market basket contracts" on the floor of the Exchange.[3] As part of the proposal, the Exchange requested certain exemptions under Rules 11Aa3–1 and 11Ac1–1.[4] The Exchange requested, pursuant to Rule 11Aa3–1(g) an exemption from the Rule's requirements to report transactions in reported securities pursuant to an effective transaction reporting plan and to disseminate on a consolidated basis the total trading volume for each component stock of the market basket contracts.[5] CBOE also requested, pursuant to Rule 11Ac1–1(d), an exemption from the Rule 11Ac1–1 requirement that disseminated quotations include the size associated with those quotations.[6] The proposal was published for comment in Securities Exchange Act Release No. 26882 (June 1, 1989), 54 FR 24442 (June 7, 1989).[7] No direct comment letters were received regarding the proposed rule change, however, commentators did discuss the CBOE proposal in responding to proposals by other exchanges to trade baskets of stock.[8] The Commission considered those comments in reviewing the CBOE proposal.[9]

II. Description of the Proposed Basket Product and Exemption Requests

CBOE's proposed market basket contract will enable CBOE members to trade standardized baskets of stocks at an aggregate price in a single execution on the Exchange's floor. A market basket trade will result in a transfer to the buyer of ownership of each of the component stocks. When the transaction is completed, the buyer will be entitled to all rights attending ownership of the basket stocks (including rights to vote and receive dividends), and will be free to sell or hold each stock separately. The CBOE proposes to trade market basket contracts based on the Standard & Poor's 100 Stock Price Index ("S&P 100") and the Standard & Poor's 500 Stock Price Index ("S&P 500").

The Exchange intends to disseminate quotation and last sale information for market basket contracts but not for the individual component stocks comprising the market basket.[10] This is, however, inconsistent with paragraphs (c)(1) and (c)(2) of Rule 11Aa3–1, which require CBOE to disseminate transaction reports in individual reported securities. In addition, CBOE will not provide a mechanism for consolidating transaction volume in the individual reported securities, which is inconsistent with Rule 11Aa3–1(b)(2)(iv). That paragraph requires CBOE to disseminate transaction reports pursuant to a plan that provides for the consolidation of transactions in the same securities executed on other exchanges.[11] Further, the Options Price Reporting Authority ("OPRA"), which CBOE will use to disseminate last sale and quotation information, does not have the capacity to show sizes for bids and offers. This also is inconsistent with the Act, specifically Rule 11Ac1–1(b)(1), which requires that the Exchange disseminate the size associated with quotations published on the floor. The CBOE, therefore filed its request that the Commission grant exemptions from these requirements.

III. Discussion

As noted above, paragraphs (c)(1) and (c)(2) of Rule 11Aa3–1 require the CBOE to disseminate last sale transaction reports for individual reported securities pursuant to an effective transaction reporting plan. Because CBOE proposes to trade reported securities only as part of standardized market basket contracts and not individually, the last sale information to be made available for market baskets will be limited to the price at which the basket last traded and the size of the trade. No last sale reports will be generated or disseminated for the individual component stocks comprising a market basket during the trading day. The CBOE proposes to disseminate basket last sale information and quotations through OPRA; thus providing ready access to market basket transaction reports and quotations to all market participants.[12] The Commission agrees with the Exchange that real-time last sale and volume reporting for the individual component stocks underlying a basket trade would not be appropriate in the market basket context. Pricing of the baskets is based on the aggregate value of the underlying securities and, thus, any assignment of a "price" to any of the component stocks in the basket would be derivative of the aggregated price.

Additionally, for the first six months of basket trading, the CBOE will not disseminate on a consolidated basis the total daily trading volume in individual securities represented by basket trades. Volume in market basket contracts will be reported over the OPRA system, as a result of reporting each market basket transaction as it takes place, and in the end-of-day message.[13] While the Commission is aware of the limited usefulness of price information on the underlying securities in the baskets, it believes that dissemination of the share volume in the underlying securities is important information and should be included in the daily consolidated volume for each of the underlying securities. Because this presents a number of technological difficulties for CBOE, CBOE has represented that it will evaluate trading in the baskets over a six-month period and, at the end of that period in consultation with the Commission, CBOE will reconsider whether its volume dissemination procedures should be modified.[14] Thus, the Commission has decided to grant CBOE a six-month exemption from the requirement. At the end of the exemption period, CBOE will be required to file with the Commission a proposal describing how it will consolidate the total daily trading volume for component stocks with volume from the other markets trading those securities, or submit to the Commission the reasons why its exemption should be extended.

Finally, the Exchange requested an exemption from Rule 11Ac1–1(b)(1), which requires that disseminated quotations include the size associated with the quote. Because OPRA, the facility through which CBOE basket quotes will be reported, cannot disseminate size, the Commission has agreed to grant a temporary exemption from the Rule for a six-month period.[15] It is important to note that other than the requirements to disseminate the size associated with quotations, all other requirements of Rule 11Ac1–1 will apply to market basket quotations; including, most notably, the requirement that quotations for baskets be firm. Thus, if basket market makers are disseminating quotes on the CBOE floor that are good for greater than one contract, regardless of the fact that this size will not be disseminated through OPRA, market makers will have to honor their size quotes.

The Commission believes that the CBOE market baskets will provide institutional investors with a cost-efficient means to make investment decisions based on the direction of standardized measures of stock market segments and the stock market as a whole, and may provide stock market participants several advantages over existing methods of effecting program trades of stocks and transactions in portfolios of securities. The Commission believes that appropriate conditional relief from Rules 11Aa3–1 and 11Ac1–1 is necessary and appropriate if the benefits of trading in market basket contracts are to be achieved.

IV. Conclusion

The Commission believes that the proposed transaction and quotation reporting mechanisms for trading market baskets on CBOE are designed to provide accurate, timely information on basket trading. Moreover, given the institutional character of stock portfolio trading for which market basket trading is designed, the Commission believes that the Exchange's chosen reporting mechanisms are consistent with the maintenance of fair and orderly markets and the protection of investors. Accordingly, based upon the aforementioned factors, the Commission finds that the requested exemptions under Rules 11Aa3–1 and 11Ac1–1 are consistent with the requirements of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 11A of the Act and Rules 11Aa3–1(g) and 11Ac1–1(d) thereunder, that the following exemptions be, and hereby are, granted: (1) an exemption from the requirement of paragraphs (c)(1) and (c)(2) of Rule 11Aa3–1 that the CBOE disseminate last sale transaction reports for individual reported securities pursuant to an effective transaction reporting plan; (2) a temporary exemption for a six-month period commencing on the date of this order, from the requirement of paragraph (b)(2)(iv) of Rule 11Aa3–1 that the CBOE provide for the dissemination of the total daily trading volume of the component stocks on a consolidated basis; and (3) a temporary exemption for a six-month period commencing on the date of this order from the requirement of paragraph (b)(1) of Rule 11Ac1–1 that the CBOE disseminate the quotation sizes associated with quotations on market basket contracts.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 26, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–17186; 812–7359]

Boston Financial Qualified Housing Tax Credits L.P. V, a Limited Partnership and Arch Street IV, Inc.; Notice of Application

October 19, 1989.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Boston Financial Qualified Housing Tax Credits L.P. V, a Limited Partnership, a Massachusetts limited partnership (the "Partnership"), and its managing general partner, Arch Street V, Inc., a Massachusetts corporation ("Managing General Partner").

Relevant 1940 Act Sections: Exemption under Section 6(c) from all provisions of the 1940 Act.

Summary of Application: Applicants seek an order exempting the Partnership from all provisions of the 1940 Act and the rules thereunder to permit the Partnership to invest in other limited partnerships that in turn will engage in the development, rehabilitation, ownership, and operation of housing for low and moderate income persons.

Filing Date: The application was filed on July 18, 1989 and amended on October 16, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 13, 1989. Request a hearing in

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1989).

[3] The Commission approved the proposed rule change submitted by CBOE to establish the trading of market basket contracts in a separate order issued today. *See* Securities Exchange Act Release No. 27383.

[4] 17 CFR 240.11Aa3–1(g) and 240.11Ac1–1(d) (1989).

[5] *See* letter from Nancy R. Crossman, First Vice President and General Counsel, CBOE, to Howard L. Kramer, Assistant Director, Division of Market Regulation, SEC, dated October 11, 1989.

[6] *See* letter from Nancy R. Crossman, First Vice President and General Counsel, CBOE, to Teresa Fink, Attorney, Branch of National Market System Regulation, Division of Market Regulation, SEC, dated October 19, 1989.

[7] The substance of the proposed rule change was filed with the Commission in Amendment No. 2 to File No. SR–CBOE–88–20 on May 20, 1989.

[8] The New York Stock Exchange, Inc. ("NYSE") filed with the Commission a proposal that sets forth a framework for trading "Exchange Stock Portfolios", standardized baskets of stocks, on the floor of the NYSE. *See* Securities Exchange Act Release No. 26908 (June 8, 1989), 54 FR 25516 (June 15, 1989). Additionally, the Midwest Stock Exchange, Inc. ("MSE") filed with the Commission a proposal to establish a secondary trading session for the execution of transactions in portfolios of securities. *See* Securities Exchange Act Release No. 26887 (June 2, 1989), 54 FR 24779 (June 9, 1989).

[9] The Commission received comment letters from the Alliance of Floor Brokers ("AFB") on the NYSE proposal and the MSE proposal. The AFB comments regarding the NYSE proposal are discussed in Securities Exchange Act Release No. 27382, (October 26, 1989) at notes 62–63 and accompanying text. The AFB comments regarding the MSE proposal are discussed in Securities Exchange Act Release No. 27385, (October 26, 1989) at notes 21–24 and accompanying text.

[10] The transactions in each basket will be reported within 90 seconds of their occurrence. *See* letter from Robert P. Ackermann, Vice President, CBOE, to Mark McNair, Attorney, Options Branch, Division of Market Regulation, SEC, dated September 20, 1989.

[11] "Reported securities" are securities for which there is in effect a transaction reporting plan (*e.g.*, the Consolidated Tape Association Plan). The securities that make up the baskets that will trade on CBOE are all reported securities.

[12] OPRA collects from the options exchanges last sale and quotation information for all standardized options and disseminates that information to vendors and other subscribers.

[13] In addition, the end-of-day total number of shares of all component stocks represented by market basket trading and the number of shares of each individual component stock represented by market basket trading will be provided through the CBOE Newswire to the Associated Press, Dow Jones and Reuters, for the six-month period.

[14] *See* letter from Nancy R. Crossman, First Vice President and General Counsel, CBOE, to Howard L. Kramer, Assistant Director, Division of Market Regulation, SEC, dated October 11, 1989.

[15] The Commission intends to evaluate with the exchanges all aspects of quotation and last sale reporting for the three market basket proposals (*i.e.*, the CBOE, MSE and NYSE proposals) during this six-month period to assess the adequacy of the reporting mechanisms for all three.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. The Partnership was organized on June 16, 1989, under the Uniform Limited Partnership Act of the Commonwealth of Massachusetts as a vehicle for equity investment in apartment complexes to be qualified, in the opinion of counsel, for the low income housing tax credit (the "Low Income Housing Credits') under the Internal Revenue Code of 1986, as amended ("Code"). It is anticipated that the Partnership will invest both in apartment complexes that receive operating and financing subsidies and in apartment complexes that do not receive such subsidies.

2. The Partnership will operate as a "two-tier" entity, *i.e.*, the Partnership, as a limited partner, will invest in other limited partnerships ("Local Limited Partnerships") which, in turn, will engage in the development, rehabilitation, ownership, and operation of apartment complexes in accordance with the purposes and criteria set forth in Investment Company Act Release No. 8456 (August 9, 1974) ("Release No. 8456"). The Partnership's investment objectives are: (i) to provide current tax benefits in the form of tax credits which Qualified Investors (defined herein) may use to offset their federal income tax liability; (ii) to preserve and protect the Partnership's capital; (iii) to provide limited cash distributions which are not expected to constitute taxable income during Partnership operations; and (iv) to provide cash distributions from sale or refinancing transactions, as defined in the Partnership's partnership agreement (the "Partnership Agreement").

3. The Partnership will normally acquire at least a 90% interest in the cash distributions, profits, losses and tax credits of the Local Limited Partnerships, with the balance remaining with the local general partners. However, in certain cases, at the discretion of the Managing General Partner, the Partnership may acquire a lesser interest in a Local Limited Partnership. Should the Partnership invest in any Local Limited Partnership in which it acquires less than 50% of the limited partnership interest, the Partnership Agreement will provide that the Partnership will have at least a 50% vote to: amend such partnership agreement of such Local Limited Partnership; dissolve such Local Limited Partnership; remove the local general partner and elect a replacement; and approve or disapprove the sale of substantially all of the assets of such Local Limited Partnership. In addition, the Partnership will require that the Local Limited Partnership agreements provide to the limited partners of the Local Limited Partnerships substantially all of the rights required by Section VII of the guidelines adopted by the North American Securities Administrators Association, Inc. ("NASAA").

4. On July 13, 1989, the Partnership filed a registration statement under the Securities Act of 1933 (the "Securities Act") for the sale of up to 100,000 units of limited partnership interest ("Units") at $1,000 per Unit with a minimum subscription of five units ($5,000) per investor.

5. Subscriptions for Units must be approved by the Managing General Partner, and such approval will be made conditional upon representations as to suitability of the investment for each subscriber. The form of subscription for Units provides that each subscriber will represent, among other things, that he meets the general investor suitability standards established by the Partnership and set forth in the Prospectus under the heading "Who Should Invest." Such general investor suitability standards provide, among other things, that investment in Partnership is suitable only for an investor (a "Qualified Investor") who meets the following requirements: (a) in the case of an investor that is a corporation, other than a corporation subject to Subchapter S of the Code, such corporation (a"C Corporation") has a net worth of not less than $75,000; (b) in the case of a noncorporate investor, such investor reasonably expects to have substantial unsheltered passive income or, if an individual, such investor reasonably expects to have adjusted gross income of *less* than $250,000 in the next twelve years and reasonably expects to have income tax liability during those years in respect of which the tax credits can be utilized and either (1) has a net worth (exclusive of home, furnishings, and automobiles) of at least $50,000 ($35,000, if such investor is a resident of New Hampshire) and an annual gross income of not less than $30,000 ($35,000, if such investor is a resident of New Hampshire) in the current year and estimates he will maintain these levels for the twelve succeeding years and that (without regard to investment in the Partnership) some part of his income for the current year and the twelve succeeding years will be subject to federal income tax at the rate of 28% or more, or (2) irrespective of annual taxable income, he has a net worth (exclusive of home, furnishings, and automobiles) of at least $75,000, or (3) is purchasing in a fiduciary capacity for a person or entity having such set worth and annual gross income as set forth in clause (1) or such net worth as set forth in clause (2); or (c) in the case of an investor that is a corporation subject to Subchapter S of the Code, each of its shareholders (or if a partnership each of its partners) meets the criteria applicable to non-corporate investors. Units will be sold in certain states only to persons who meet additional or alternative standards which will be set forth in the Prospectus, any supplement to the Prospectus, or the Subscription Agreement; *provided, however,* that in no event shall the Partnership employ any such suitability standard which is less restrictive than that set forth above. The Partnership Agreement also imposes certain restrictions on transfer and assignment of the Units, including that each proposed assignee must deliver to the Managing General Partner evidence of his suitability. The Partnership will not redeem or repurchase Units, does not anticipate formation of a public market for the Units, and thus believes purchases of Units should be considered illiquid investments.

6. The Partnership will be controlled by its general partners, the Managing General Partner and Arch Street V Limited Partnership (collectively, the "General Partners"). The Limited Partners, consistent with their limited liability status, will not be entitled to participate in the control of the business of the Partnership. However, the majority in interest of the Limited Partners will have the right to amend the Partnership Agreement (subject to certain limitations), dissolve the Partnership, and remove any General Partner and elect a replacement therefor. In addition, under the Partnership Agreement, each Limited Partner is entitled to review all books and records of the Partnership at any and all reasonable times.

7. The Partnership Agreement provides that certain significant actions cannot be taken by the Managing General Partner without the express consent of a majority in interest of the Limited Partners. Such actions include: (a) until the end of the 10-year period commencing on the date of the Prospectus, the sale in a 12-month period of Local Limited Partnership interests constituting more than 33% of the Partnership's then existing total investment in Local Limited Partnership interests; (b) the sale at any one time of all or substantially all of the assets of the Partnership, except for sales in connection with the liquidation and winding up of the Partnership's business upon its dissolution; (c) dissolution of the Partnership; and (d) causing the Partnership to merge or be consolidated with any other entity. The admission of a successor or additional General Partner would also require express consent under the Partnership Agreement.

8. Boston Financial Securities, Inc., an affiliate of the General Partners (the "Selling Agent"), will receive customary commissions and an underwriting advisory fee on the sale of the Units, together with an expense allowance to defray accountable due diligence activities. The Selling Agent may authorize other members ("Soliciting Dealers") of the National Association of Securities Dealers, Inc. (" NASD") to sell Units. The Selling Agent will pay a concession to each Soliciting Dealer on all sales of Units by such Soliciting Dealer and may reallow all or any portion of its underwriting advisory fee and expense allowance to such Soliciting Dealer. Such selling commissions and fees are customarily charged in securities offerings of this type and are consistent with NASD guidelines.

9. During the offering and organizational phase, the Managing General Partner and its affiliates (as defined in the Partnership Agreement) will receive from the Partnership reimbursement of organizational and offering expenses.

10. Acquisition phase fees payable to all persons, including the General Partners or their affiliates, in connection with the acquisition of interests in Local Limited Partnerships, will be limited by the guidelines adopted by NASAA. During the operating phase, the Partnership may pay additional fees or compensation to the General Partners or their affiliates including, without limitation, an asset management fee. Such asset management fee is paid in consideration of the administration of the affairs of the Partnership in connection with each Local Limited Partnership in which the Partnership invests. Such other fees may be paid in consideration of property management services rendered by the General Partners or their affiliates as the management and leasing agent for some of the Local Limited Partnerships and for consulting services rendered by the General Partners or their affiliates as consultants to some of the Local Limited Partnerships. All such fees shall be subject to the terms of the Partnership Agreement. In addition, the General Partners or their affiliates may receive amounts from Local Limited Partnerships to the extent permitted by applicable law and regulations. Such amounts shall be subject to the terms of the Partnership Agreement. Compensation to the General Partners or their affiliates during the liquidating stage will be in the form of distributions of the sale or refinancing proceeds of Local Limited Partnership projects or interests, or of real or personal property of the Partnership. In addition to the foregoing fees and interests, the General Partners and their affiliates will be allocated generally 1% of profits and losses of the Partnership for tax purposes.

11. All compensation to be paid to the General Partners and their affiliates is specified in the Partnership Agreement and Prospectus, and no compensation will be payable to the General Partners or their affiliates not so specified. The substantial fees and other forms of compensation that will be paid to the General Partners and their affiliates will not have been negotiated through arm's length negotiations. Terms of all such compensation, however, will be fair and not less favorable to the Partnership than would be the case if such terms had been negotiated with independent third parties. In addition, compensation in various forms will be paid to the local general partner of each Limited Partnership.

12. All proceeds of the public offering of Units will initially in an escrow account with Shaumut Bank, N.A. ("Escrow Agent"). Pending release of offering proceeds to the Partnership, the Escrow Agent will desposit escrowed funds in the "Shawmut Interest Bearing Account," a federally insured money market deposit account. The offering of Units will terminate not later than one year from the date upon which the Partnership's Registration Statement shall have been declared effective. If subscriptions for at least 5,000 Units have not been received by such termination date, no Units will be sold and funds paid by subscribers will be returned promptly, together with a pro rata share of any interest earned thereon. The Partnership will not admit any subscribers as Limited Partners to the Partnership until the exemptive order applied for herein is granted or the Partnership receives an opinion of counsel that it is exempt from registration under the 1940 Act. Upon receipt of the prescribed minimum number of subscriptions, funds in escrow will be released to the Partnership and held in trust pending investment in Local Limited Partnerships. Any net proceeds not immediately utilized to acquire Local Limited Partnership interests or for other Partnership purposes will be invented and held in highly liquid, non-speculative securities set forth in the application and which provide adequately for the preservation of capital ("Temporary Investments"). The Partnership intends to apply capital raised in its public offering to the acquisition of Local Limited Partnership interests as soon as possible and does not intend to trade or speculate in Temporary Investments.

13. The Partnership Agreement provides that, subject to certain limitations including negligence and misconduct, the Partnership shall indemnify the General Partners and certain affiliates for losses sustained by them or their affiliates in connection with the business of the Partnership. However, the Partnership has been advised in the opinion of the SEC indemnification for liabilities under the Securities Act is contrary to public policy as expressed in the Securities Act and is therefore unenforceable.

Applicant's Legal Conclusions

1. The exemption of the Partnership from all provisions of the 1940 Act is both necessary and appropriate in the public interest, because: (a) investment in low and moderate income housing in accordance with the national policy expressed in Title IX of the Housing and Urban Development Act of 1968 is not economically suitable for private investors without the tax and organizational advantages of the limited partnership form; (b) the limited partnership structure provides the only means of bringing private equity capital into such housing; (c) the limited

BEST COPY AVAILABLE

VOL 54 ISS 209 OCT 31 1989 UMI

partnership form insulates each Limited Partner from personal liability and limits his financial risk to the amount he has invested in the program, while also allowing the Limited Partner to claim on his individual tax return his proportionate share of the tax credits, income and losses from the investment; (d) the limited partnership form of organization is incompatible with fundamental provisions of the 1940 Act, such as the requirement of annual approval by investors of a management contract and the requirements concerning election of directors and the termination of the management contract; and (e) real estate limited partnerships such as the Partnership generally cannot comply with the asset coverage limitations imposed by Section 18 of the 1940 Act. Also, an exemption from these basic provisions is necessary and appropriate so as not to discourage use of the two-tier limited partnership entity or frustrate the public policy established by the housing laws.

2. Interests in the Partnership will be sold only to, and transfers will be permitted only to, investors who meet specified suitability standards (as described above) which the Partnership believes are consistent with the requirements in Release No. 8456, with the guidelines of those states which prescribe suitability standards, and with the securities laws of all states where the Units will be sold. Such investors will receive extensive reports concerning the Partnership's business and operations. Although the interests of the General Partners and their affiliates may conflict in various ways with the interests of Limited Partners, Limited Partners are adequately protected through disclosures of all political conflicts in the Prospectus, including competition by Local Limited Partnerships with affiliates for properties and the participation by an affiliate as the Selling Agent for the offering. To address this conflict, the General Partners agree, in Section 5.7 of the Partnership Agreement, that each General Partner and each affiliate thereof, prior to entering into an investment which could be suitable for the Partnership or recommending such investment to others, must present to the Partnership the opportunity to enter into such investment and my not enter into such investment on its own behalf nor recommend it to others unless the Partnership has declined to enter into such investment. Further protection for the interests of Limited Partners is provided by the numerous provisions of the Partnership Agreement designed to prevent overreaching by the General Partners and to assure fair dealing by the General Partners vis-a-vis the Limited Partners. The Partnership will also file with the SEC and distribute certain financial documents and reports on its activities.

3. Release No. 8456 lists two conditions, designed for the protection of investors, which must be satisfied in order to quality for the type of exemptive relief which the Partnership seeks: (1) "interests in the issuer should be sold only to persons for whom investments in limited profit, essentially tax-shelter, investments would not be suitable * * *," and (2) "requirements for fair dealing by the general partner of the issuer with the limited partners of the issuer should be included in the basic organizational documents of the company." The Partnership will comply with these conditions and will otherwise operate in a manner deisigned to ensure investor protection.

4. The contemplated arrangement of the Partnership is not susceptible to abuses of the sort the 1940 Act was designed to remedy. The suitable standards described above, the requirements for fair dealing provided by the Partnership's governing instruments, and pertinent governmental regulations imposed on each Local Limited Partnership by various federal, state and local agencies, provide protection to investors in Units comparable to and in some respects greater than that provided by the 1940 Act. An exemption would therefore be entirely consistent with the protection of investors and the purposes and policies of the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[Rel. No. IC-17187; 811-5481]

Templeton Constant Pay-Out Fund, Inc. (Formerly, Templeton Emerging Growth Stock Fund, Inc.); Application for Deregistration

October 20, 1989.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Templeton Constant Pay-Out Fund, Inc. ("Applicant").

Relevant 1940 Act Section: Section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

Filing Dates: The application on Form N-8F was filed on September 18, 1989.

Hearing or Notification of Hearing: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 15, 1989, and should be accompanied by proof of service on the Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, 700 Central Avenue, St. Petersburg, Florida 33733-8030.

FOR FURTHER INFORMATION CONTACT: Patricia Copeland, Legal Technician, (202) 272-3009, or Karen L. Skidmore, Branch Chief, (202) 272-3023 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant is an open-end diversified management investment company incorporated under the laws of the state of Maryland. On February 25, 1988, Applicant filed a Notification of Registration pursuant to Section 8(a) of the 1940 Act on Form N-8A. On that same date, Applicant filed a registration statement on Form N-1A (33-20320) with respect to an indefinite amount of common stock. The registration statement never became effective and was withdrawn by Applicant on March 21, 1989. Applicant has never made a public offering of its securities.

2. Applicant has no shareholders, assets or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not engaged nor does it propose to engage in any business activities other than those necessary to wind up its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 89–079]

Omega Validation of the Indian Ocean

AGENCY: U.S. Coast Guard, Headquarters, Treasury.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. Coast Guard has completed a validation study of the Omega Radionavigation System coverage in the Indian Ocean. The study shows that the measured Omega system performance generally conforms to theoretical expectations and that the system provides continuous, all weather navigation coverage, with typical position fixing accuracy of 2 nautical miles, 95% of the time. The study also provides information about anomalies and model interference patterns in the region. The report of the study's findings is available through the National Technical Information Service, Springfield, Virginia 22161. The report is identified by Government Accession number AD–A194458.

DATE: The report is available after October 31, 1989.

ADDRESS: The address of the Coast Guard command responsible for the report and the Omega validation effort is: Commanding Officer, Omega Navigation System Center, 7323 Telegraph Road, Alexandria, Virginia 22310–3998.

FOR FURTHER INFORMATION CONTACT: Verbal inquiries may be made to Mr. Randolph J. Doubt, Signal Analysis Division, Omega Navigation System Center; telephone (703) 866–3880, FTS 398–0990.

SUPPLEMENTARY INFORMATION: Omega validations are intensive studies of radionavigation propagation in specified geographical regions. Actual signal data are collected, analyzed and compared to the theoretical coverage model for a respective region. The result of the comparison provides information as to the signal coverage and accuracy of the Omega system in the region.

Dated: October 19, 1989.

R.T. Nelson,

Rear Admiral, U.S. Coast Guard Chief, Office of Navigation, Safety and Waterway Services.

BILLING CODE 4910–14–M

Federal Highway Administration

National Highway Traffic Safety Administration

[FHWA Docket No. 89–18]

RIN 2125–AC39

Handicapped Parking Regulatory Negotiation Advisory Committee

AGENCY: Federal Highway Administration (FHWA) National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of public meetings.

SUMMARY: This notice announces the time and place of the next meetings of the Handicapped Parking Regulatory Negotiation Advisory Committee. These meetings are open to the public.

DATES: The meetings of the Handicapped Parking Regulatory Negotiation Advisory Committee will be held as follows:

Monday, October 30, 1989, noon to 5:00 p.m.

Tuesday and Wednesday, October 31 and November 1, 1989, 9:00 a.m. to 5:00 p.m.

Wednesday, November 29 through December 1, 1989, 9:00 a.m. to 5:00 p.m.

ADDRESS: The meetings of the advisory committee will be held at the Department of Transportation, Room 4200, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Agency contact: Mr. Vincent Nowakowski, FHWA, Office of Traffic Operations (202) 366–2146, Ms. Judith S. Kaleta, FHWA, Office of the Chief Counsel (202) 366–0764, or Mr. E. William Fox, NHTSA, Office of the Chief Counsel, (202) 366–1834, 400 Seventh Street, SW., Washington, DC 20590. *Mediator:* Robert Robertory, Deputy Chief Administrative Judge, Board of Contract Appeals, 400 Seventh Street, SW., Washington, DC 20590 (202) 366–4305.

SUPPLEMENTARY INFORMATION: Pub. L. 100–641 directs the Secretary of Transportation to establish a uniform system for handicapped parking. This authority has been delegated to the FHWA and the NHTSA. To implement this law, the FHWA and the NHTSA have established an advisory committee for regulatory negotiation. 54 FR 24908 and 40770 (1989). The committee will develop a report concerning the establishment of a uniform system for handicapped parking to enhance the safety of persons with disabilities. This report will include a recommended rulemaking proposal and will be submitted to the Administrators of the FHWA and the NHTSA. After the agencies issue a notice of proposed rulemaking (NPRM), the committee will review any comments submitted to the rulemaking docket, and write a second report which will include a recommended final rule.

This advisory committee will consider the following issues:

1. The adoption of the International Symbol of Access (ISA) as the only recognized symbol for the identification of vehicles used for transporting individuals with handicaps that limit or impair the ability to walk.

2. The issuance of license plates displaying the ISA for vehicles which will be used to transport individuals with handicaps which limit or impair the ability to walk.

3. The issuance of removable windshield placards (displaying the ISA) to individuals with handicaps which limit or impair the ability to walk.

4. The fees charged for the licensing or registration of a vehicle used to transport individuals with handicaps.

5. The recognition of licenses and placards, which display the ISA and are issued by other States and countries.

We anticipate that this advisory committee will discuss matters that are ancillary to the issues set forth above.

In the notice of establishment of the advisory committee, which was published on October 3, 1989, 52 FR 40770, we noted that notices of the meetings will be published in the **Federal Register**, if time permits. We noted that publication may not be possible in cases when the committee decides to meet for a few days, break for a few days, and then resume negotiations. However, through this notice, we are attempting to advise all interested parties of the committee meetings.

Issued on: October 24, 1989.

E. Dean Carlson,

Acting Federal Highway Administrtor, Federal Highway Administration.

BILLING CODE 4910–22–M

DEPARTMENT OF THE TREASURY

[Number: 150–02]

Establishment of Certain Offices in the National Office of the Internal Revenue Service

October 12, 1989.

Subject: Establishment of certain offices in the national office of the Internal Revenue Service.

1. Authority. By the authority vested in me as Secretary of the Treasury by 31 U.S.C. 321(b); sections 7601(a), 7802 and 7803 of the Internal Revenue Code of 1986; and Reorganization Plan No. 1 of 1952, pursuant to section 7804(a) of the Internal Revenue Code, all offices in the National Office of the Internal Revenue Service continue uninterrupted except as follows:

a. The positions of Assistant Commissioner (Planning, Finance and Research), under the Deputy Commissioner (Planning and Resources), are abolished.

b. The Deputy Commissioner (Planning and Resources) is retitled Deputy Commissioner (Planning and Resources)/Chief Financial Officer (CFO). Three new positions are established under the Deputy Commissioner (Planning and Resources)/CFO. These are Assistant Commissioner (Finance)/Controller; Assistant Commissioner (Planning and Research); and Deputy Assistant Commissioner (Planning and Research).

c. A new position of Chief Information Officer is established under the Senior Deputy Commissioner. The Assistant Commissioner and Deputy Assistant Commissioner (Information Systems Development) are retitled Assistant Chief Information Officer and Deputy Assistant Chief Information Officer (Systems Design and Development); and the Assistant Commissioner and Deputy Assistant Commissioner (Computer Services) are retitled Assistant Chief Information Officer and Deputy Assistant Chief Information Officer (Systems and Applications Management). The Assistant Chief Information Officers will report to the Chief Information Officer.

2. Office of Commissioner of Internal Revenue. The Office of the Commissioner shall consist of the Commissioner, Senior Deputy Commissioner, Deputy Commissioner (Planning and Resources)/Chief Financial Officer, Deputy Commissioner (Operations), Chief Information Officer, Assistant Commissioner (Inspection), and Assistants to the Commissioner and Senior Deputy Commissioner. Except for the specific positions and titles in paragraphs 1. through 7. of this Order, the Commissioner may create, abolish, or modify offices and positions within the Internal Revenue Service as may be necessary to effectively and efficiently administer the tax laws or other responsibilities assigned to the Internal Revenue Service. The authority of the Commissioner to create, abolish, or modify offices under this delegation is subject only to limitations that exist by law or Department of Treasury rules and regulations.

3. Senior Deputy Commissioner. The Senior Deputy Commissioner serves as chief operating officer of the Service. This official is the highest career official in the Service and is responsible for the following activities.

a. Assists and acts for the Commissioner in planning, directing, coordinating, and controlling the policies, programs and other activities of the Internal Revenue Service.

b. Assists the Commissioner in establishing tax administration policy and developing strategic issues and objectives as a basis for strategic management of the Service.

c. Supervises the Deputy Commissioners, Chief Information Officer, and Assistants to the Commissioner and Senior Deputy Commissioner.

4. Deputy Commissioner (Operations). The Deputy Commissioner (Operations) is the principal advisor to the Commissioner and Senior Deputy Commissioner on policy and operational matters affecting field functions. The Deputy Commissioner is responsible for the following activities.

a. Serves as national spokesperson for the field operations functions which are:

(1) Assisting taxpayers in complying with the tax laws;

(2) Processing tax returns and information documents;

(3) Accounting for revenue collected by the Service;

(4) Collecting delinquent accounts;

(5) Investigating delinquent taxpayers;

(6) Investigating criminal tax fraud;

(7) Examining tax returns;

(8) Approving and examining employee plans and exempt organizations;

(9) Tax treaty administration; and

(10) Foreign tax administration assistance and disclosure.

b. Supervises the regional commissioners and the following assistant commissioners: Collection, Criminal Investigation, Employee Plans and Exempt Organizations, Examination, International, Returns Processing, and Taxpayer Services.

VOL 54 ISS 209 OCT 31 1989 UMI

c. As designated by the Commissioner, represents the Service to other Executive Branch agencies, the Congress, other tax authorities and the public on field operations and major cross-functional issues.

5. Deputy Commissioner (Planning and Resources)/Chief Financial Officer. The Deputy Commissioner (Planning and Resources)/Chief Financial Officer is the principal advisor to the Commissioner and Senior Deputy Commissioner on Servicewide planning and the management of human and financial resources. The Deputy Commissioner is responsible for the following activities.

a. Serves as national spokesperson for the planning and management of resources functions which are:

(1) Administering the Strategic Management System;

(2) Conducting research;

(3) Formulating budgets and controlling their execution; and

(4) Administering human resource policies, facilities and logistical support, and contracting.

b. Serves as the Service's chief financial officer and establishes practices, procedures, standards and controls for the Service's financial systems.

c. Supervises the following assistant commissioners: Finance/Controller; Human Resources Management and Support; and Planning and Research.

d. As designated by the Commissioner, represents the Service to other Executive Branch agencies, the Congress, other tax authorities, and the public on Servicewide planning, management of resources, and major cross-functional issues.

6. Chief Information Officer. The Chief Information Officer is the principal advisor to the Commissioner and Senior Deputy Commissioner on Servicewide information resources and technology management. The Chief Information Officer is responsible for the following activities.

a. Serves as the national spokesperson for the functions of strategic technology planning, data administration, technology standards, and telecommunications.

b. Establishes policies and standards affecting these functions and the development and acquisition of computer hardware and software.

c. Provides the focus for technology management within the Service and plays an essential role in shaping Servicewide technology goals and programs and fostering a shared commitment to them.

d. Supervises the following assistant chief information officers: Systems Design and Development, and Systems and Applications Management.

e. As designated by the Commissioner, represents the Service to other Executive Branch agencies, the Congress, other tax authorities, and the public on Servicewide information resources and technology management and major cross-functional issues.

7. Assistant Commissioner (Inspection). The Assistant Commissioner (Inspection) will, to ensure objectivity and integrity, report directly to the Commissioner.

8. The changes shall be implemented at a date determined by the Commissioner of Internal Revenue. Effective immediately, the Commissioner of Internal Revenue is authorized to effect, at appropriate times and in an orderly manner, such transfers of functions, personnel, positions, equipment and funds as may be necessary to implement the provisions of this Order.

9. The Chief Counsel. The Chief Counsel, pursuant to delegated authority from the General Counsel, is authorized to take necessary action on all personnel and administrative matters pertaining to the Office of Chief Counsel, including but not limited to those for the appointment, classification, promotion, demotion, reassignment, transfer or separation of officers or employees; however, all personnel and administrative matters concerning Senior Executive Service or Performance Management Recognition System employees in the Offices of Associate Chief Counsels (International) and (Technical) whose primary duties do not involve litigation, and the Office of National Director of Appeals, shall be approved by the Commissioner of Internal Revenue prior to implementation.

a. The National Director of Appeals is supervised by the Chief Counsel. The Commissioner of Internal Revenue exercises line supervision over the Chief Counsel for this function.

b. The Commissioner of Internal Revenue will exercise the Service's final authority concerning substantive interpretation of the tax laws as reflected in legislative and regulatory proposals, revenue rulings, letter rulings, and technical advice memoranda.

10. Cancellations. This Order supersedes the following:

a. Treasury Order 150-02, "Establishment of Certain Offices in the National Office of the Internal Revenue Service," dated July 2, 1987; and

b. Treasury Order 150-31, "Establishment of the Office of Assistant Commissioner (Taxpayer Services)," dated May 8, 1989.

Nicholas F. Brady,

Secretary of the Treasury.

[FR Doc. 89-25520 Filed 10-30-89; 8:45 am]

BILLING CODE 4830-01-M

Fiscal Service

Treasury Current Value of Funds Rate

AGENCY: Fiscal Service, Financial Management Service, Treasury.

ACTION: Notice of rate for use in Federal debt collection and discount evaluation.

SUMMARY: Pursuant to section 11 of the Debt Collection Act of 1982 (31 U.S.C. 3717), the Secretary of the Treasury is responsible for computing and publishing the percentage rate to be used in assessing interest charges for outstanding debts on claims owed the Government. Treasury's Cash Management Regulations (I TFM 6-8000) also prescribe use of this rate by agencies as a comparison point in evaluating the cost-effectiveness of a cash discount. Notice is hereby given that the applicable rate is 9% for calendar year 1990.

DATES: The rate will be in effect for the period beginning on January 1, 1990 and ending on December 31, 1990.

FOR FURTHER INFORMATION CONTACT: Inquiries should be directed to the Cash Management Division (Program Compliance Branch), Financial Management Service, Department of the Treasury, 401 14th Street SW., Washington, DC 20227 (Telephone: (202) 287-0745).

SUPPLEMENTARY INFORMATION: The rate reflects the current value of funds to the Treasury for use in connection with Federal Cash Management systems and is based on investment rates set for purposes of Public Law 95-147, 91 Stat. 1227. Computed each year by averaging investment rates for the 12-month period ending every September 30 for applicability effective January 1, the rate is subject to quarterly revisions if the annual average, on the moving basis, changes by 2 per centum. The rate in effect for calendar year 1990 reflects the average investment rates for the 12-month period ended September 30, 1989.

Dated: October 25, 1989.

Michael T. Smokovich,

Assistant Commissioner Federal Finance.

[FR Doc. 89-25559 filed 10-30-89; 8:45 am]

BILLING CODE 4810-35-M

Internal Revenue Service (IRS)

Assistant Commissioner (EP/EO) Employee Plans Ad Hoc Group; Open Meeting

A meeting of the Assistant Commissioner (Employee Plans and Exempt Organizations) Employee Plans Ad Hoc Group will be held on December 7, 1989 at the IRS Baltimore District Office. The office is located at 31 Hopkins Plaza in the Fallon Federal Building, Baltimore, Maryland. The meeting will begin at 9:00 a.m. on Thursday, December 7, 1989. The agenda will include the following topics:

Discussion of Employee Plans Determination and Examination Programs.

Discussion of Service Center Processing Issues

Discussion of Employee Plans Technical Issues

Member Forum

Due to limited conference space, notification of intent to attend the meeting must be made with Jane Baniewicz, Staff Assistant to the Assistant Commissioner, no later than November 27, 1989. Ms. Baniewicz may be reached on (202) 566-9204 (not toll-free).

FOR FURTHER INFORMATION CONTACT: Jane Baniewicz, Staff Assistant to Assistant Commissioner (EP/EO), (202) 566-9204 (not toll-free).

Assistant Commissioner (E).

[FR Doc. 89-25503 Filed 10-30-89; 8:45 am]

BILLING CODE 4830-01-M

DEPARTMENT OF VETERANS AFFAIRS

Cost-of-Living Adjustments and Headstone or Marker Allowance Rate

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: As required by law the Department of Veterans Affairs (VA) is hereby giving notice of cost-of-living adjustments (COLAs) in certain benefit rates and income limitations. These COLAs affect the pension and parents' dependency and indemnity compensation (DIC) programs. These adjustments are based on the rise in the Consumer Price Index (CPI) during the one year period ending September 30, 1989. VA is also giving notice of the maximum amount of reimbursement that may be paid for headstones or markers purchased in lieu of Government-furnished headstones or markers in fiscal year 1990 which began on October 1, 1989.

DATES: These COLAs are effective December 1, 1989. The headstone or marker allowance rate is effective October 1, 1989.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service (211B), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233-3005.

SUPPLEMENTARY INFORMATION: Under the provisions of 38 U.S.C. 3112 and section 306 of Public Law 95-588, VA is required to increase the benefit rates and income limitations in the pension and parents' DIC programs by the same percentage, and effective the same date, as increases in the benefit amounts payable under title II of the Social Security Act. The increased rates and income limitations are also required to be published in the **Federal Register.**

The Social Security Administration has announced that there will be a 4.7 percent cost-of-living increase in social security benefits effective December 1, 1989. Therefore, applying the same percentage, the following increased rates and income limitations for the VA pension and parents' DIC programs will be effective December 1, 1989.

Table 1—Improved Pension

Maximum annual rates

(1) Veterans permanently and totally disabled (38 U.S.C. 521).
Veteran with no dependents, $6,767.
Veteran with one dependent, $8,864.
For each additional dependent, $1,150.

(2) Veterans in need of aid and attendance (38 U.S.C. 521).
Veteran with no dependents, $10,824.
Veteran with one dependent, $12,922.
For each additional dependent, $1,150.

(3) Veterans who are housebound (38 U.S.C. 521).
Veteran with no dependents, $8,271.
Veteran with one dependent, $10,368.
For each additional dependent, $1,150.

(4) Two veterans married to one another; combined rates (38 U.S.C. 521).
Neither veteran in need of aid and attendance or housebound, $8,864.
Either veteran in need of aid and attendance, $12,922.
Both veterans in need of aid and attendance, $16,977.
Either veteran housebound, $10,368.
Both veterans housebound, $11,873.
One veteran housebound and one veteran in need of aid and attendance, $14,424.
For each dependent child, $1,150.

(5) Surviving spouse alone and with a child or children of the deceased veteran in custody of the surviving spouse (38 U.S.C. 541).
Surviving spouse alone, $4,335.
Surviving spouse and one child in his or her custody, $5,941.
For each additional child in his or her custody, $1,150.

(6) Surviving spouses in need of aid and attendance (38 U.S.C. 541).
Surviving spouse alone, $7,254.
Surviving spouse with one child in his or her custody, $8,656.
For each additional child in his or her custody, $1,150.

(7) Surviving spouses who are housebound (38 U.S.C. 541).
Surviving spouse alone, $5,544.
Surviving spouse and one child in his or her custody, $6,947.
For each additional child in his or her custody, $1,150.

(8) Surviving child alone (38 U.S.C. 542), $1,150.

Reduction for income. The rate payable is the applicable maximum rate minus the countable annual income of the eligible person. (38 U.S.C. 521, 541, and 542).

Mexican border period and World War I veterans. The applicable maximum annual rate payable to a Mexican border period or World War I veteran under this table shall be increased by $1,530. (38 U.S.C. 521(g))

Parents' DIC

DIC (dependency and indemnity compensation) shall be paid monthly to parents of a deceased veteran in the following amounts. (38 U.S.C. 415)

Table 2

One parent. If there is only one parent the monthly rate of DIC paid to such parent shall be $318 reduced on the basis of the parent's annual income according to the following formula:

The $318 monthly rate shall be reduced by	For each $1 of annual income: Which is more than	But not more than
$0.00	0	$600
.08	$600	7,697

No DIC is payable under this table if annual income exceeds $7,697.

One Parent Who Has Remarried. If there is only one parent and the parent has remarried and is living with the parent's spouse, DIC shall be paid under table 2 or under table 4, whichever shall

result in the greater benefit being paid to the veteran's parent. In the case of remarriage, the total combined annual income of the parent and the parent's spouse shall be counted in determining

The $214 monthly rate shall be reduced by	For each $1 of annual income: Which is more than	But not more than

(5) Child (no entitled veteran or surviving spouse), $8,291 (Pub. L. 95-588, section 306(a)).

(6) Spouse income exclusion (38 C.F.R. § 3.262), $2,454 (Pub. L. 95-588, section

Sunshine Act Meetings

Federal Register
Vol. 54, No. 209
Tuesday, October 31, 1989

VOL 54 ISS 209 OCT 31 1989 UMI

result in the greater benefit being paid to the veteran's parent. In the case of remarriage, the total combined annual income of the parent and the parent's spouse shall be counted in determining the monthly rate of DIC.

Two parents not living together. The rates in table 3 apply to (1) two parents who are not living together, or (2) an unmarried parent when both parents are living and the other parent has remarried. The monthly rate of DIC paid to each such parent shall be $228 reduced on the basis of each parent's annual income, according to the following formula:

Table 3

For each $1 of annual income		
The $228 monthly rate shall be reduced by	Which is more than	But not more than
$0.00	0	$800
.06	$800	900
.07	900	1,100
.08	1,100	7,697

No DIC is payable under this table if annual income exceeds $7,697.

Two parents living together or remarried parents living with spouses. The rates in table 4 apply to each parent living with another parent; and each remarried parent, when both parents are alive. The monthly rate of DIC paid to such parents will be $214 reduced on the basis of the combined annual income of the two parents living together or the remarried parent or parents and spouse or spouses, as computed under the following formula:

Table 4

For each $1 of annual income		
The $214 monthly rate shall be reduced by	Which is more than	But not more than
0.00	0	$1,000
.03	$1,000	1,500
.04	1,500	1,900
.05	1,900	2,400
.06	2,400	2,900
.07	2,900	3,200
.08	3,200	10,350

No DIC is payable under this table if combined annual income exceeds $10,350.

The rates in this table are also applicable in the case of one surviving parent who has remarried, computed on the basis of the combined income of the parent and spouse, if this would be a greater benefit than that specified in table 2 for one parent.

Aid and attendance

The monthly rate of DIC payable to a parent under tables 2 through 4 shall be increased by $169 if such parent is (1) a patient in a nursing home, or (2) helpless or blind, or so nearly helpless or blind as to need or require the regular aid and attendance of another person.

Minimum rate

The monthly rate of DIC payable to any parent under tables 2 through 4 shall not be less than $5.

Table 5—Section 306 Pension Income Limitations

(1) Veteran or surviving spouse with no dependents, $7,697 (Pub. L. 95–588, section 306(a)).

(2) Veteran with no dependents in need of aid and attendance, $8,197 (38 U.S.C. 521(d) as in effect on December 31, 1978)

(3) Veteran or surviving spouse with one or more dependents, $10,350 (Pub. L. 95–588, section 306(a))

(4) Veteran with one or more dependents in need of aid and attendance, $10,850 (38 U.S.C. 521(d) as in effect on December 31, 1978)

(5) Child (no entitled veteran or surviving spouse), $6,291 (Pub. L. 95–588, section 306(a)).

(6) Spouse income exclusion (38 C.F.R. § 3.262), $2,454 (Pub. L. 95–588, section 306(a)(2)(B)).

Table 6—Old-Law Pension Income Limitations

(1) Veteran or surviving spouse without dependents or an entitled child, $6,738 (Pub. L. 95–588, section 306(b)].

(2) Veteran or surviving spouse with one or more dependents, $9,716 (Pub. L. 95–588, section 306(b))

Headstone or Market Allowance

Under 38 U.S.C. 906(d) the VA may provide reimbursement for the cost of non-Government headstones or markers at a rate equal to the actual cost or the average actual cost of Government-furnished headstones or markers during the fiscal year preceding the fiscal year in which the non-Government headstone or marker was purchased, whichever is less.

The average actual cost of Government-furnished headstones and markers during any fiscal year is determined by dividing the sum of the VA costs during that fiscal year for procurement, transportation, Monument Service and miscellaneous administration, inspection and support staff by the total number of headstones and markers procured by the VA during that fiscal year and rounding to the nearest whole dollar amount.

The average actual cost of Government-furnished headstones or markers for fiscal year 1989 under the above computation method was $85. Therefore, effective October 1, 1989, the maximum rate of reimbursement for non-Government headstones or markers purchased during fiscal year 1990 is $85.

Dated: October 25, 1989.

Edward J. Derwinski,

Secretary.

Sunshine Act Meetings

Federal Register
Vol. 54, No. 209
Tuesday, October 31, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FARM CREDIT ADMINISTRATION

Farm Credit Administration; Special Meeting

AGENCY: Farm Credit Administration.

SUMMARY: On January 26, 1989, a notice (54 FR 3900) was published stating that no further regularly scheduled meetings of the Farm Credit Administration Board (Board) would be held due to lack of a quorum. A quorum has been constituted with the recent appointment of Harold B. Steele as Chairman of the Board. Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), that the regular meeting of the Board scheduled for November 7, 1989 will not be held and that a special meeting of the Board has been scheduled for Tuesday, November 21, 1989, starting at 10:00 a.m. An agenda for this meeting will be published at a later date.

FOR FURTHER INFORMATION CONTACT: David A. Hill, Secretary to the Farm Credit Administration Board, (703) 883–4003, TDD (703) 883–4444.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

Dated: October 26, 1989.

David A. Hill,

Secretary, Farm Credit Administration Board.

[FR Doc. 89–25753 Filed 10–27–89; 1:25 am]

BILLING CODE 6705–01–M

FEDERAL ENERGY REGULATORY COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: October 24, 1989, 54 FR 43214.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: October 25, 1989, 10:00 a.m.

CHANGE IN THE MEETING: The following Docket Numbers have been added to Item CAG–9 for the agenda of October 25, 1989:

Item NO., Docket No, and Company

CAG–9—RP89–46–000 and RP89–222–000, Transwestern Pipeline Company

Lois D. Cashell,

Secretary.

BILLING CODE 6717–02–M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 9:30 a.m., Friday, October 27, 1989.

The business of the Board required that this meeting be held with less than one week's advance notice to the public, and no earlier announcement of the meeting was practicable.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Proposed 1990 Federal Reserve Board officer and employee salary structure adjustments.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: October 27, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Monday, November 6, 1989.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: October 27, 1989.

Part II

Department of Labor

Occupational Safety and Health Administration

29 CFR Part 1926

Occupational Safety and Health Standards—Excavations; Final Rule

VOL 54 ISS 209 OCT 31 1989 UMI

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1926

[Docket No. S-204]

RIN 1218-AA36

Occupational Safety and Health Standards—Excavations

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Final rule.

SUMMARY: The Occupational Safety and Health Administration (OSHA) hereby amends its Construction Standards for Excavations, 29 CFR part 1926, subpart P.

The existing standards regulate the use of support systems, sloping and benching systems and other systems of protection as means of protection against excavation cave-ins. In addition, the standards regulate the means of access to and egress from excavations, and employee exposure to vehicular traffic, falling loads, hazardous atmospheres, water accumulation, and unstable structures in and adjacent to excavations.

The revised standard uses performance criteria where possible, rather than specification requirements; consolidates and simplifies many of the existing provisions; adds and clarifies definitions; reformats the standard to eliminate duplicate provisions and ambiguous language; provides a consistent method of soil classification; and gives employers added flexibility in providing protection for employees. This Final Rule is being issued after appropriate consultation with the Advisory Committee on Construction Safety and Health (ACCSH).

OSHA initiated this rulemaking action to establish clearly the requirements for protection of employees in excavations. The intended effect of this regulation is to increase safety for these workers.

EFFECTIVE DATE: January 2, 1990.

ADDRESS: In compliance with 28 U.S.C. 2112(a), the Agency designates for receipt of petitions for review of the standard, the Associate Solicitor for Occupational Safety and Health, Office of the Solicitor, Room S-4004, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-3637, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 523-8151.

SUPPLEMENTARY INFORMATION:

I. Background

A. History

Congress amended the Contract Work Hours Standards Act (CWHSA) (40 U.S.C. 327 et seq.) in 1969 by adding a new section 107 (40 U.S.C. 333) to provide employees in the construction industry with a safer work environment and to reduce the frequency and severity of construction accidents and injuries. The amendment, commonly known as the Construction Safety Act (CSA) (Pub. L. 91-54; August 9, 1969), significantly strengthened employee protection by providing for occupational safety and health standards for employees of the building trades and construction industry in Federal and federally-financed or federally-assisted construction projects.

Accordingly, the Secretary of Labor issued Safety and Health Regulations for Construction in 29 CFR part 1518 (36 FR 7340, April 17, 1971) pursuant to section 107 of the Contract Work Hours and Safety Standards Act. Included in these regulations were the existing safety standards for trenches and excavations.

The Occupational Safety and Health Act (the Act) (84 Stat. 1580; 29 U.S.C. 650 et seq.) was enacted by Congress in 1970, and authorized the Secretary of Labor to adopt established Federal Standards issued under other statutes, including the Construction Safety Act, as occupational safety and health standards. Accordingly, the Secretary of Labor adopted the Construction Standards in 29 CFR part 1518 as established Federal Standards in accordance with section 6(a) of the Act (36 FR 10466, May 29, 1971). Part 1518 was redesignated as part 1926 later in 1971 (36 FR 25232, December 30, 1971). The standards in existing subpart P of part 1926, titled § 1926.650—General Protection Requirements; § 1926.651—Specific Excavation Requirements; § 1926.652—Specific Trenching Requirements; and § 1926.653—Definitions Applicable to this subpart, were adopted as OSHA standards as part of this process.

The need for review and revision of §§ 1926.650 through 1926.653 has been recognized by OSHA since the earliest days of the Agency's existence. Consequently, after a Notice of Proposed Rulemaking (36 FR 19083, September 28, 1971) and after a review by the Advisory Committee on Construction Safety and Health (ACCSH), several amendments of a technical nature were made to subpart P (37 FR 3512, February 17, 1972). Subsequent to the adoption of those amendments, OSHA found it necessary to further amend the standard. After a Notice of Proposed Rulemaking (37 FR 15317, July 29, 1972) § 1926.652 was amended to require ladders as a means of access and egress in trenches greater than four feet (1.2 m) in depth—instead of three feet (.9 m) in depth (37 FR 24345, November 16, 1972).

In 1976, OSHA, in response to continued complaints concerning the adequacy of the standards in subpart P, engaged the National Bureau of Standards (NBS) to study the compatibility of the technical provisions in the regulations with actual construction practice. In addition, NBS was to examine the state of the knowledge in geotechnical and structural engineering; to review the field experience accumulated since the promulgation of the standards; and to recommend potential modifications that could improve the effectiveness of the standards.

Findings and preliminary recommendations of the NBS studies were presented and discussed at a federally-sponsored workshop in September 1978. Six reports were then completed as a result of NBS' work, and these were published in 1979 and 1980. Copies of these reports are part of the public record (Exs. 2-1 through 2-6).

As a result of the development of these recommended changes, private industry proposed and sponsored a series of five workshops in the spring and summer of 1981 to discuss and comment on ways to implement the NBS recommendations. An unpublished text was used at these workshops (Ex. 2-7). Final recommendations for technical changes to the standards incorporating the comments from the industry-sponsored workshops were prepared by NBS in May 1983 (Ex. 2-26).

Excavation-related accidents resulting in injuries and fatalities have continued to occur at construction sites despite the development and promulgation of the OSHA Construction Standards in 1971 and 1972. Based on a careful review of compliance problems and public comments received since 1972, OSHA believed that the present standard needed updating. Therefore, the Agency developed a proposed revision to the existing standard.

A draft of the proposed changes to the standard was reviewed by ACCSH in October 1982. Transcripts of this meeting are part of the public record (Ex. 2-8). The Committee's comments and recommendations, and those of

other interested parties, were carefully analyzed in connection with the proposed rulemaking. Many of the changes in the proposed standard reflected the recommendations and suggestions of these participants. Relevant ACCSH comments are discussed below in section III—"Summary and Explanation of the Final Rule." Committee discussions that were inconclusive have been considered, but are not discussed in this preamble. Several suggestions for changes to the draft standard were made by members of the ACCSH. OSHA sought more discussion on these suggestions and, therefore, raised individual points as issues in the preamble of the proposal.

On April 15, 1987, OSHA issued a notice of proposed rulemaking (NPRM) on excavations (52 FR 12288). The NPRM established a sixty day period, which ended June 15, 1987, for submission of written comments. Several commenters requested an extension of the written comment period. Therefore, on June 16, 1987 (52 FR 22799), the Agency extended the written comment period until October 14, 1987.

On August 5, 1987, OSHA consulted with the ACCSH for a second time, regarding the issues raised in the NPRM. In addition to making recommendations regarding these issues, the ACCSH suggested changes to the proposed regulations. The transcript of this meeting is part of the record of this rulemaking (Ex. 4-119).

During the extended comment period, OSHA received requests for an informal public hearing. On February 23, 1988, OSHA announced it would convene an informal public hearing on April 19, 1988, and extended the period for submitting testimony, documentary evidence, and additional comments until April 1, 1988 (53 FR 5280). The hearing was held on April 19, 1988, with Administrative Law Judge Michael Schoenfeld presiding. At the close of the hearing, Judge Schoenfeld set a period, ending May 20, 1988, for the submission of additional data, and a period ending June 20, 1988, for the submission of briefs and arguments.

At the request of one participant at the public hearing, Judge Schoenfeld extend the comment period until June 24, 1988, for the submission of additional data and until July 29, 1988, for the submission of additional views and arguments (Ex. 31).

On December 15, 1988 Judge Schoenfeld certified the hearing transcript and related submissions, closing the record for this proceeding.

OSHA received over 150 comments in response to its NPRM and hearing notice. A wide range of employers, businesses, labor unions, trade associations, state governments and other interested parties contributed to the development of this record. OSHA appreciates the efforts interested parties have made to help develop a rulemaking record which would provide a sound basis for the promulgation of a Final Rule.

B. Problems with the Existing Standards

OSHA's efforts to revise its excavation and trenching standards were initiated primarily because the Agency has experienced difficulty in enforcing the existing standards. Several of these problems are discussed in detail below.

(1) "Specific Excavation"/"Specific Trenching Requirements"

The first major problem with the existing standards is that because §§ 1926.651 and 1926.652 are two separate sections, one entitled "Specific Excavation Requirements" and the other "Specific Trenching Requirements," the standards are not clear as to whether the excavation requirements must also be followed when digging trenches. It was intended by OSHA that many of the excavation standards would also apply to trenches since a trench is a type of excavation, but that intention is not clearly stated.

The Occupational Safety and Health Review Commission (OSHRC), and two United States Court of Appeals, have sanctioned the application of the excavation standards in § 1926.651 to trenches (Dobson Brothers Construction Company, 3 BNA OSHC 2035 (R.C. 1976); *Texas Eastern Products Pipeline Co.* v. *OSHRC*, 827 F. 2d 46 (7th Cir. 1987); and *D. Federico Company, Inc.* v. *OSHRC and Usery*, 558 F. 2d 614 (1st Cir. 1977) 5 BNA OSHC 1528, respectively). However, other Courts of Appeals have held, to the contrary, that excavation standards cannot be applied to trenches (*Lloyd C. Lockrem, Inc.* v. *OSHRC*, 609 F. 2d 940 (9th Cir 1979) 8 BNA OSHC 1316; *Kent Nowlin Construction Co.* v. *OSHRC*, 593 F. 2d 388 (10th Cir. 1979)).

This Final Rule resolves the uncertainty left by these decisions and by the ambiguous language of the existing standards by establishing one set of requirements which are applicable to all excavations, including trenches. Where there are requirements intended to be applicable only to trenches—such as the requirement that ladders or equivalent means of egress be provided every 25 feet horizontally—the Final Rule makes it clear that the requirement applies only to those excavations which are also trenches (see § 1926.651(c)(2)).

(2) Excavations (Non-Trench)

A second major problem with the existing standards involves the requirements for protecting employees in non-trench excavations from the hazards of cave-ins. Existing § 1926.651(c) currently requires that "The walls and faces of all excavations in which employees are exposed to danger from moving ground shall be guarded by a shoring system, sloping of the ground, or some other equivalent means." The term "danger from moving ground" is not defined in the standard and, thus, the standard does not specify when an employer must take precautions to protect employees from a cave-in. Furthermore, the standard does not specify what degree of precaution an employer must take even when employees are exposed to a "danger from moving ground." Requirements contained in existing § 1926.651 (e), (f), (g), and (h), discuss employee protection again, however, only in very general terms.

The language was resolved somewhat when the OSHRC, in agreement with the Secretary of Labor, interpreted the standard to require shoring or sloping in accordance with Table P-1 of subpart P, whenever employees are exposed to unstable soil in excavation sides (M.J. Lee Construction Company, 7 BNA OSHC 1140 ((R.C. 1979)); Terra Motus Company, Inc., 5 BNA OSHC 1696 ((R.C. 1977)); D. Federico Company, Inc., 3 BNA OSHC 1970 ((R.C. 1976)) affirmed on other grounds 558 F. 2d 614 ((1st Cir. 1977)) 5 BNA OSHC 1528). However, this problem was revived by two OSHRC decisions which are inconsistent with the cases mentioned above. In the first case, Seaward Construction Company, Inc., 5 BNA OSHC 1422 ((R.C. 1977)), the OSHRC interpreted § 1926.651(c) to require sloping and shoring only if OSHA establishes that the ground to which employees are exposed is actually moving. In the second case, Pipe-Rite Utilities Ltd., Inc., 10 BNA OSHC 1289 ((R.C. 1982)), the OSHRC, relying on Seaward vacated a citation and did not address the other cases interpreting existing § 1926.651(c). These decisions reestablished the uncertainty as to when and to what degree an employer must slope, shore or otherwise protect employees in a non-trench excavation. OSHA has long maintained that employees exposed to potential cave-ins must be protected by shoring or sloping long before the excavation face is in imminent danger of collapse.

VOL

OC
31
1989
UMI

Another problem with the existing standards for non-trench excavations (§ 1926.651) is that the degree of protection required is not always easily determined. With regard to sloping, the existing § 1926.651(g) provides that "All slopes shall be excavated to at least the angle of repose except for areas where solid rock allows for line drilling or presplitting." To find the angle of repose an employer must consult Table P–1, which appears at the end of § 1926.652, "Specific Trenching Requirements." Table P–1 is titled "Approximate Angle of Repose for Sloping of Sides of Excavations." The difficulty with table P–1 is that it describes the approximate angle of repose for various soil types in terms that are not the same as terms commonly used in the industry to classify soils. In addition, the terms are not defined in the standard. Thus, it is sometimes very difficult to determine what OSHA considers to be the appropriate degree of sloping from this table.

OSHA recognizes a problem with the term "angle of repose." The term is used in the standard in a manner which is inconsistent with its meaning in the civil engineering profession. In the American Society for Testing and Materials (ASTM) Standard D653–87, "Standard Definitions of Terms and Symbols Relating to Soil and Rock Mechanics," the term "angle of repose" is defined as follows: "The angle between the horizontal and maximum slope that a soil assumes through natural processes. For dry granular soils the effect of height is negligible; for cohesive soils the effect of height is so great that the angle of repose is meaningless." Thus, to talk in terms of a single "angle of repose" is technically inaccurate. The "angle of repose" for cohesive soil depends on the depth of the excavation, whereas the "angle of repose" for granular soil depends largely on its density and changes in environmental conditions of exposure, such as the drying process.

This Final Rule resolves the uncertainty created by the ambiguous language of the existing standard by establishing requirements for the sloping of all excavations that convey clearly when precautions must be taken to protect employees and the degree of protection that is necessary. The Final Rule uses terms that are consistent with both the civil engineering profession and the construction industry.

(3) Need for Clarification of Trench Requirements

OSHA learned from its enforcement experience with § 1926.652, "Specific Trenching Requirements" that much needed to be done to clarify the meaning and intent of these standards.

The key provisions of the current specific trenching standards are § 1926.652(b) (for trenches in soft or unstable material) and § 1926.652(c) (for trenches in hard or compact soil). The main difficulty with existing § 1926.652 (b) and (c) is that the terms "soft or unstable" soil and "hard or compact" soil do not, in some instances, provide sufficient guidance to employers as to the requirements applicable to digging a trench. The OSHRC has held that any trench requiring a slope less steep than 63 degrees from the horizontal under table P–1 must be considered to be in soft or unstable soil, within the meaning of § 1926.652(b). The OSHRC has ruled:

> Since § 1926.652(c) requires a slope of not steeper than ½ to 1 for hard or compact soil, it is evident that these materials listed in Table P–1 as having a less steep angle of repose must be considered soft or unstable, and are therefore regulated by § 1926.652(b). (*Connecticut Natural Gas Corporation*, 6 BNA OSHC 1796, (R.C. 1978)).

Although the OSHRC ruling harmonized the existing regulations, OSHA prefers employers to know which requirements they are subject to before determining the extent to which they must slope, rather than determining the slope first and then determining the regulation with which they must comply. In some instances, this determination is not a difficult problem under the current standard. For example, for many granular soils, an employer is not going to have a problem determining that a slope of ½ to 1 (approximately 63 degrees from the horizontal) is inadequate, and that § 1926.652(b) applies to the trenches excavated in such soil. Indeed, the OSHRC has ruled that there is a rebuttable presumption that predominately sandy soils, unless cemented, are soft or unstable within the meaning of 1926.652(b). (Duane Meyer d/b/a D.T. Construction Company, 7 BNA OSHC 1560 [(R.C. 1979)). However, there are situations in which under the existing standard it is not easily determined which sloping angle applies. For example, if a trench is excavated in previously disturbed cohesive soil, the existing standard gives little guidance as to which standard applies or what constitutes an adequate slope under table P–1. And, since the sloping requirements of § 1926.652 are contained in table P–1, the shortcomings of that table (previously discussed above under non-trench excavations) are also a problem with the existing standards regulating trenches. In addition to the technical misuse of the term "angle of repose," the table classifies soils in a manner that is difficult to relate to the soil descriptions used in § 1926.652(b) and (c), and the terms used are not the same as terms generally used in the construction industry.

The Final Rule rectifies these problems in two ways. First, it provides employers with a soil classification system in appendix A which describes the variables in soil composition an employer can encounter; and secondly, it sets forth sloping and shoring requirements in accordance with the types of soil, as determined with respect to the soil classification system. In OSHA's opinion, the soil classification system in appendix A will make it much easier for employers to determine whether their slopes comply with OSHA's requirements.

Paragraph 1926.652(c) has caused compliance problems in one other important respect. The standard requires sloping of at least ½ to 1 (horizontal to vertical), but requires only that sloping begin five feet (1.52 m) from the bottom of the trench. This standard has been interpreted as permitting a trench dug in hard or compact soil to be vertical for the first five feet (1.52 m) from the bottom, and sloped not more than 63 degrees from the horizontal beginning at the five feet (1.52 m) level (Horowitz Brothers, Inc., 3 BNA OSHC 1131 [(R.C. 1975)). OSHA believes that this interpretation is inadequate because it is, in most instances, dangerous to allow employees to work in a trench excavated in soils in which the sides are vertical for the bottom five feet (1.52 m) portion and then sloped starting at the five foot level. This is particularly true in a relatively deep trench in which the weight of cohesive soils adversely affects the stability of the trench side. OSHA has always interpreted and enforced this provision to require shoring or a trench shield in the unsloped, vertical sided portion of the trench.

The proposed standard required that trenches and excavations be sloped or benched from the bottom instead of from the five foot (1.52 m) level, unless a qualified person or qualified engineer designs an alternate configuration. Acceptable configurations for sloped excavations were illustrated in Figure B–1 of appendix B of the proposal.

OSHA still believes that sound engineering principles dictate that a five foot deep vertical-sided portion should be shored in most instances. The Agency notes that the National Bureau of Standards depicts a similar situation in Figure A–2 (Ex. 2–3), but recommends only a three foot maximum vertical-sided portion and a slope of not more than 1 horizontal: 1 vertical (45°). Additionally, Figure A–7 depicts another similar situation where the depth of the vertical-sided portion is approximately four feet deep, shored, and the slope is 1 horizontal : 1 vertical (45°). OSHA solicited comment on the appropriateness, and costs and benefits of the configurations discussed above with special emphasis on the OSHA interpretation.

The Final Rule addresses this situation by allowing employees to use trench configurations with a vertical portion in the bottom of the trench in accordance with the limitations that have been successfully used in the State of California, or with the approval of a registered professional engineer.

(4) Trench Boxes and Shields

The requirements for trench boxes and shields are contained in existing § 1926.652(k). The requirements are not clear as to their intent with regard to the design of shields. For example, the standard requires that such devices "shall be designed, constructed, and maintained in a manner which will provide protection equal to or greater than the sheeting or shoring required for the trench." In addition, the standard defines a trench shield as "A *shoring system* (emphasis added) composed of steel plates and bracing * * * which support the walls of a trench * * *." Shields may be constructed of steel, but need not be, and they may provide support to the side of a trench. However, shields are more often used in a manner where they do not support the side of a trench but rather act as a barrier in the event a cave-in occurs. Because of the restrictive nature of the existing definition, and since the design of sheeting and shoring is tied to the requirements for timber shoring and sheeting set forth in Table P–2 "Trench Shoring—Minimum Requirements," some observers have perceived a lack of flexibility on the part of OSHA regarding the design of trench shields.

Another problem with the existing requirements for trench shields is the lack of coverage addressing hazardous situations that arise out of the use of shields. Shields are used differently than shoring, and situations can arise when using shields that do not arise when using shoring. For example, shields are moved into position by sliding them along the trench bottom or by lowering them into position. Employees who are within the confines of a shield being repositioned by other than horizontal movement are subject to being injured if the shield suddenly shifts in an unintended way—a hazard not generally arising when timber shoring is used.

The requirements for trench boxes and shields in existing § 1926.652(k) were changed in the proposal to allow employers more flexibility in the design of trench shields. The Final Rule also clarifies the way in which an employer must assure that shields provide equivalent protection to sloping or shoring required by the standard. It allows an employer to use a trench box or shield that is either designed or approved by a registered professional engineer or that is based upon tabulated data prepared or approved by a registered professional engineer.

For manufactured rather than job-made trench boxes or shields, the revised standard requires that employers comply with all manufacturer's warnings and instructions which might affect the safety of employees. Because of concerns with product liability, the manufacturers typically include instructional materials that establish a method or methods which the manufacturer has determined will provide for safe installation and use of a product. The employer is on notice of the precautions set forth in these materials, and is responsible for implementing them. Additionally, requirements were added that address the hazardous situations that arise during the course of using a shield, but are not addressed in the existing standard. In OSHA's opinion, these requirements will assure that shield systems will adequately protect employees.

II. The Nature of Excavation Accidents

Accidents and Injuries

Studies show that excavation work is one of the most hazardous types of work done in the construction industry (Ex. 2–9 and Ex. 2–10). Accidents in excavation work occur more frequently than do accidents in construction in general. The primary type of accident of concern in excavation-related work is a cave-in. The actual number of cave-in accidents is not large when compared to the total number of accidents occurring in all of construction. However, those that do occur tend to be of a very serious nature. Cave-in accidents are much more likely to be fatal to the employees involved than other construction-related accidents.

The true extent of excavation-related injuries and deaths cannot be readily determined from available accident data such as those maintained by the Bureau of Labor Statistics (BLS). This is because a large number of cave-in accidents are classified under a general "accident-type" heading that does not specifically identify whether the accident involved a cave-in. For example, cave-in accidents are most likely to be recorded under the "accident-type" categories of "caught in, under, or between" or "asphyxiation," which encompass many accidents that are not excavation-related, such as those in which an employee becomes caught in the moving parts of machinery. There is no apparent way to separate out those accidents that are cave-ins. Furthermore, many cave-ins are not reported to BLS. OSHA received testimony at the public hearing asserting that the exemptions for small employers from the BLS reporting and recordkeeping requirements contributes significantly to the undereporting of excavation injuries and fatalities (Tr. 4/19/88 pp. 62–69).

Nevertheless, estimates of the number of injuries and fatalities occurring in excavations have been made. In a 1975 study, based primarily on a previous study of newspaper articles and other data made available from OSHA files, it was estimated that more than 100 persons were killed in excavation cave-ins each year (Ex. 2–11). In a recent report prepared by NIOSH, based on OSHA's inspection data, it was estimated that at least 73 persons were killed each year in cave-in accidents, and at least 97 persons were killed as a result of all excavation-related accidents (Exs. 2–24, 2–30, 2–31 and 2–32). Using the same inspection data, OSHA has estimated a fatality rate due to excavation-related work injuries of .318 per 1,000 full time workers for all SIC's involved and .508 per 1,000 full-time workers for SIC 1623. These rates are at least similar to, if not higher than the fatality rate of .248 per 1,000 full time workers due to all types of work injuries occurring in construction SIC's in general. The fatality rate for trenching work was estimated to be as high as 112 percent greater than the rate for construction in general.

Estimates of non-fatal injuries in excavation and trenching work have also been made. California has reported that the ratio of non-fatal, lost-time injuries to fatalities for all types of accidents in sewer, pipeline, and trenching work was 50 to 1. That is, one fatality occurred for every 50 non-fatal, lost time injuries. In contrast, the ratio for all contract construction was 174 to 1 (Ex. 2–9).

In another report specifically related to cave-ins, California reported that the ratio of lost-time injuries to fatalities due only to cave-in accidents was 17 to 1. In contrast the lost-time work injuries

VOL 54 ISS 209 OCT 31 1989 UMI

to fatalities for all types of accidents in all industries in California was 250 to 1 (Ex. 2–10).

As a measure of the seriousness of cave-in accidents, Thompson and Tannenbaum stated that ratios of injuries to fatalities due to cave-ins as high as 10 to 1 and 14 to 1 have been reported (Ex. 2–11).

OSHA has determined that the available accident and injury data clearly establish a significant risk to employees working in and around excavations. A high rate of injuries has continued to occur in excavations throughout the years since subpart P was first adopted by OSHA. OSHA believes that this revision of subpart P will help reduce the current accident toll associated with excavation work.

III. Summary and Explanation of the Final Rule

In order to solicit desired public comment, OSHA identified fifteen issues in the preamble of the proposal on which the Agency needed additional information. These issues, the comments received relating to these issues, and OSHA's determination on the appropriate way to address these issues are discussed below.

Issue 1, raised in the preamble of the proposed rule (52 FR 12293), solicited public input on the suggestion that OSHA include a "standard practice" in its revision of Subpart P in addition to those set forth in the appendices. These data, in the form of charts and tables, would be used to protect employees against cave-ins, and would be capable of being understood and used by the journeyman worker. As an alternative, the employer could have a qualified engineer design the protective system. These data (standard practice) would include generic tables and charts for metal hydraulic shoring, timber shoring, trench shields, protection for footing excavations (bell-bottom pier holes), and sloping and benching systems.

OSHA received 13 comments on this issue. Several commenters supported the incorporation of a standard practice and suggested that OSHA adopt the CAL–OSHA Title 8 standards as the National "standard practice" (Exs. 4–28, 4–35, 4–37, 4–82, 4–102, 4–106 4–109 and 4–115). Another commenter (Ex. 4–96) favored OSHA providing this type of data as an alternative to the use of an engineer, but made no suggestions as to a specific source that OSHA should use for these data.

On the other hand, several commenters disagreed with the incorporation of a standard practice. In particular, the Building and Construction Trades Department (BCTD) of the AFL–CIO (Ex. 4–17) noted that the approach was feasible, but not recommended because of the difficulty of making revisions, and the difficulty of incorporating the necessary flexibility. Union Electric Company (Ex. 4–35) commented that "We do not see the need for such charts and/or tables in addition to that already included." In addition, the National Utility Contractors of America (NUCA) (Ex. 3–91) contended that it would be inappropriate for OSHA to sponsor any particular set of charts or tables, and that this approach would not be feasible because regional work practices are different. NUCA also expressed support for the flexibility of the performance-oriented approach of the proposal.

The Washington Metropolitan Area Construction Safety Association (WMACSA) (Ex. 4–101) commented that "Standard practices appear to have been provided for by the options provided by OSHA." WMACSA also pointed out the difficulty of revision and in deciding, regionally, what was appropriate.

Finally, Lone Star Gas Company, (Ex. 4–105), commented that charts and tables need to incorporate flexibility and permit the option of individual design to meet unique circumstances.

OSHA notes that many responses to this issue included comments on other sections of the proposal. These comments will be addressed later in this preamble as appropriate.

Based on the above discussion, OSHA has determined that a "standard practice," in the context of Issue 1, would not be appropriate because it would limit flexibility and would not recognize regional work practices. The Agency believes that the current format, as revised, provides the necessary degree of flexibility; provides a mechanism for the recognition and use of regional shoring and sloping practices; and allows rapid introduction and use of new products and technology, while insuring that appropriate employee protection is provided.

OSHA believes that adoption of CAL–OSHA standards as the National "standard practice," as suggested by some commenters, would not be appropriate as those standards were developed regionally for local interests, and are not recognized nationally as appropriate for all regions. However, OSHA notes that the flexibility of the final rule permits California contractors to use any standard approved by a registered professional engineer, while contractors in other states may choose to use other standards which are equally effective, and which reflect the necessary regional differences in soils, climate, and work practices.

Therefore, with respect to this issue the agency makes no change and promulgates the standard as proposed.

In Issue 2 of the NPRM (52 FR 12294), OSHA requested comment on whether or not it should limit design responsibility to a "qualified engineer," which was defined in the proposal as "A person who has attained (through engineering education and experience) a special knowledge of mathematical, physical, and engineering sciences and the principles and methods of engineering analysis and design; and who, therefore, is qualified to practice engineering, i.e., apply the principles and methods of engineering analysis and design to specific problems." The proposal permitted design by either a "qualified person or a qualified engineer." The Agency also solicited information, opinion, and comment on costs; the rationale for requiring or not requiring a "qualified engineer;" situations which would require a "qualified engineer;" the proposed definition; criteria to evaluate experience; impacts on small businesses; the rationale for requiring or not requiring a "registered professional engineer;" and any evidence supporting or disproving that requiring a "qualified engineer" decreases the risk of injuries and fatalities.

OSHA received 30 comments on this issue, including input from the ACCSH (Tr. 8/5/87 pp. 456–470). Some comments supported the idea that a "qualified person" could properly perform design work. Several comments, like that of H. J. Schneider Construction, Inc. (Ex. 4–3), expressed support for "qualified person," but provided no rationale. Other commenters, like the Underground Construction Co. and the Associated Builders and Contractors, Inc. (ABC) (Exs. 4–57 and 4–78), argued that allowing only a "qualified engineer" to do design work would deprive contractors of the ability to use capable supervisors to do such work. However, ABC also stated that a qualified engineer would be appropriate in complex cases such as excavations under foundations and trenches deeper than 15 feet.

Several other commenters, such as W. M. Lyles Co., Kaweah Construction Co., ARB, Inc., and Herman Weissker, Inc. (Exs. 4–5 and 4–82, 4–13, 4–102 and 4–109), objected to the suggestion of limiting design responsibility to a "qualified engineer" because of severe cost implications; however, they supplied no specific cost data or supporting rationale. These commenters also objected to the suggested use of a registered professional engineer, stating that they felt experience and training were more important than registration as an engineer. However, the commenters did not indicate what amount of experience or training would qualify a person to do this type of work. In addition, these commenters apparently misinterpreted the proposal as requiring an engineer's involvement with every excavation because they also noted that their firms do not employ engineers to be involved with every excavation.

Three commenters (Exs. 4–82, 4–102 and 4–109) noted that the State of California has laws which require such design to be done by engineers, but they objected to this becoming a national standard. The three commenters argued that they knew of no evidence that requiring a "qualified engineer" to do design work would reduce the risk of fatality or injury. They also contended that the proposed definition of "qualified person" contained adequate criteria for evaluation of an individual's qualifications.

Union Electric Company (Ex. 4–35) objected to limiting design responsibility to engineers, noting that their designs were often developed in the field or adapted to field conditions on site, within accepted parameters. The Company also noted that the adequacy of their design was verified by company engineers.

The Carolina Branch of the Associated General Contractors (CBAGC) (Ex. 4–54) objected to limiting design responsibility to engineers in "routine situations." However, they noted that a "qualified engineer" should be required in complicated situations, such as excavations under foundations and trenches deeper than 15 feet. The CBAGC also stated that they have no evidence that a qualified engineer would improve safety.

The Laclede Gas Company (Ex. 4–88) commented that it was unnecessary to limit design responsibility to qualified engineers, considering the definition of "qualified person," and noted that field experience is as important as formal training.

The Public Service Electric and Gas Co. (Ex. 4–89) commented that company supervisors trained in the proper application of existing standards and aware of field conditions are their primary means of controlling on-the-job safety. The commenter recognized the need for a "qualified engineer" to do basic planning and design on large projects such as building construction, tunnel construction, and major infrastructure installation and noted that this is a current business practice. The commenter also stated that they knew of no evidence to support the fact that injuries and fatalities would decrease by the presence of a "qualified engineer" at the excavation site.

Lone Star Gas Company (Ex. 4–105) stated that limiting design responsibility to "qualified engineers" would exclude individuals who are fully capable of performing the required duties, but do not possess an engineering degree. Lone Star also noted that the risk of injury in an excavation designed by an unqualified engineer or person would be high, and that design of high risk excavation, i.e., excavations under the foundations of buildings, should very likely be performed by a "qualified engineer." Lone Star also emphasized experience, training, number of years of apprenticeship, and the type of soil in which these individuals gained their experience as being "objective criteria" to determine qualification. Lone Star commented that the cost would range from $30,000 on up for each job because each job would require an engineer on site at all times. Lone Star also commented that it knew of no evidence to support the conclusion that requiring a "qualified engineer" would decrease the risk of injuries and fatalities.

Underground Contractors, Inc. (Ex. 4–115), objected to limiting design responsibility to "qualified engineers," citing a financial burden. They estimated the cost for engineers would be $80 to $100 per hour. The commenter also objected to the use of "registered professional engineer" for the same reason. Underground Constructors, Inc. also suggested OSHA consider experience or specific safety training as proof of qualification for designing protective systems. As an example, the commenter suggested qualification requirements of 10–20 years experience, and noted that individuals who feel directly responsible for employees in the field may in fact be better suited to this duty and more safety conscious than an outside "card-carrying engineer."

One other commenter, Schield Construction Co. Inc. (Ex. 4–56), although not specifically addressing Issue 2, commented that a registered professional engineer would not always be more qualified than a contractor who has the experience with trench protective systems.

The Agency notes that many of the commenters opposed to a requirement limiting design responsibility to a "qualified engineer" misinterpreted the proposed requirement, and concluded, as evidenced by many of the above comments, that such a requirement would require an engineer to be on site at every excavation, and that experienced supervisors would no longer be able to determine the selection of protection systems. This was not OSHA's intent, and, as discussed later in the preamble, the Final Rule will clarify the point.

Most of the commenters on this issue, as well as the ACCSH, supported limiting design responsibility to an "engineer." However, many of the commenters, along with the ACCSH, recommended that the proposed "qualified engineer" be changed to "registered professional engineer." In order to solicit public input on a requirement for the use of a registered professional engineer, the Agency again raised this topic in its Notice of Informal Public Hearing (53 FR 5280).

Many of these commenters noted the shortcoming of allowing design by a "qualified person" and pointed out the difficulty of determining who is, in fact, qualified (Exs. 4–17, 4–27, 4–28, 4–37, 4–75, 4–91, 4–101, and 4–114). In particular, Granite Construction Company (Ex. 4–28) stated that "While there may be 'qualified persons' who by experience and/or education can perform design function, we feel the majority of people who may fit the broad definition of 'qualified person' lack the qualifications necessary for design of excavation protective systems, in the absence of standard practices." Granite did not support a requirement for a registered professional engineer, and noted that the cost for hiring a "qualified engineer" should not fall disproportionally on small businesses because it would be passed on to the consumer.

Griswald Machine and Engineering, Inc. (GME) (Ex. 4–27) noted that "a 'qualified person' is too subjective a level of expertise," and recommends that OSHA require that only a qualified engineer, or a person working under the direction of a qualified engineer, be allowed to do design work.

The Washington Metropolitan Area Construction Safety Association (WMACSA) (Ex. 4–101) pointed out that dropping "qualified person" from the standard "* * * would appear to be in the best interest of the industry. There is no way to decide if a person is in fact qualified. Anyone can say he or she is qualified by reason of extensive experience, knowledge, and training. The lack of any method to prove or disprove this could be very expensive to any employer." WMACSA also noted that under the proposal, if a company could not afford to hire an engineer, there were a great many other options available for providing protection which would not require the services of an

VOL 54 ISS 209 OCT 31 1989 UMI

engineer. WMACSA commented that it would be difficult to prove that requiring a "qualified engineer" would decrease injuries and fatalities. WMACSA also recommended that a "qualified engineer" be a professional engineer registered in the state where he or she works, because the registered engineer works with a license that can be withdrawn for cause. The commenter also pointed out the difficulty for OSHA to set standards for an individual designing protective systems and evaluate and certify candidates, and notes that this would be impractical. Finally, the commenter also noted that with all the options available, the use of an engineer should seldom, if ever, be required.

Speed Shore Corporation (Ex. 4–114) stated that allowing a "qualified person" to design an intricate, detailed safety system would provide a "loophole," explaining that terms such as "extensive knowledge, training and experience" are too general to use for properly qualifying individuals. Speed Shore strongly recommended that protective systems not utilizing the other more specific options should be designed by a qualified engineer who works under registration and a code of ethics applicable to his field.

The Building and Construction Trades Department (BCTD) of the AFL–CIO (Ex. 4–17) recommended eliminating "qualified person" from the standard because, in their view, there is no way to determine if a person is in fact qualified. They also supported the use of a registered professional engineer, noting that registration is a state prerogative, and that engineers are registered to protect the public for the same reasons and in the same manner as physicians and attorneys. BCTD argued that it would be hard to find "prima facie" evidence to support the conclusion that requiring an engineer would decrease the risk of injury and noted that it would be just as hard to prove that an attorney practicing at the bar decreases client risk. The commenter also pointed out the difficulty of incorporating criteria into the standard to define who would be qualified to design protective systems, and, as an example, suggested that OSHA consider the difficulty of incorporating a surgeon's education into a health standard. BCTD also notes that the options available in the standard would avoid the necessity for hiring engineers in most cases.

Rader, Addision and Story (Ex. 4–1) supported the use of "qualified engineer" but pointed out the potential controversy as to who is a qualified engineer. The commenters suggested that a qualified engineer should be a registered professional engineer, for legal reasons. The commenter noted that licensed engineers carry insurance which is negated if all applicable laws, ordinances, rules and regulations of any Federal, state or local government are not followed. Additionally, the commenter noted that improperly designed excavations can only be cured by proper design and accurate construction. The commenter also pointed out that solving design problems in the beginning (before digging begins) decreases costs.

Pacific Gas Transmission Co. (PGT) (Ex. 4–37) supported a requirement for design by a qualified engineer. The commenter noted that:

> While we respect the importance of qualified persons in the development of the area of trench protection, we feel it is now time to rely on the training and tools of the qualified engineer to provide this service. Both the qualified engineer and the qualified person have the same physical tools to work with: soil type, plasticity, water content, weight, compaction, etc. The difference is in how these tools are used. Through his training the engineer is able to apply sometimes complex engineering techniques to design a trench protection system. The qualified person gets his engineering training through trial and error. The preamble to the PRM indicates that this trial and error process is costing time and lives.

Although the commenter did not directly recommend the use of a registered professional engineer, several comments indicated that PGT did in fact support this concept. For example:

> First of all, if the qualified engineer is also a registered engineer, he is legally liable for his work. If he continues to provide faulty design he is no longer allowed to practice. And the preamble to this PRM indicates that the majority of excavation accidents result from the use of designs or systems selected, prepared or implemented by unqualified personnel.
>
> PGT feels that this responsibility should be given to qualified engineers. It should be noted that this responsibility may already be delegated to registered engineers in some states (e.g., California) and that under most extraordinary conditions it would be prudent for the employer to hire a consultant or use in-house engineers to protect his employees as well as avoiding damage to adjoining properties.
>
> In certain states only registered engineers may call themselves "engineer." The registration process is the only nationwide certification program in place that attests to the suitability, through education and experience, of a person to do the required work. As we said earlier, the registered engineer is legally liable for his work and in some states personally liable.

PGT also noted that an engineer would be required only if site conditions required specific expertise in evaluation, or if the employer felt that through special design he or she could realize a project savings. PGT further commented that in neither case would this requirement adversely impact small business, and that without such a requirement costly and fatal accidents would continue to occur.

The National Utility Contractors Association (NUCA) (Ex. 4–91) endorsed the use of a registered professional engineer or a person working under the direction of a registered professional engineer. NUCA pointed out the difficulty of proving or disproving the qualifications of a qualified person. NUCA also noted the liability consequences of using a qualified person. Cost figures provided by the commenter indicate total design of a protective system would cost approximately $3,000, but did not provide specfic details as to the type of system or size of project this cost represents. In addition, the commenter pointed out that small contractors do not bid work where such levels of expertise are necessary.

The Los Angeles Section of the American Society of Civil Engineers (LAASCE) (Ex. 4–75) supported the use of registered professional engineers. The commenter noted that under the California State Plan, an alternate shoring design (i.e., one not specifically permitted in the California standard) for excavations under 20 feet in depth, and all shoring designs for excavations over 20 feet in depth, must be prepared by a civil engineer registered in California. The commenter also noted that because of this requirement, the safety record of California has been exemplary compared to the rest of the nation. The LAASCE also commented that allowing design preparation by a "qualified person" would be considered a significant lowering of safety standards for the construction industry and also a possible undermining of professional engineering standards. The commenter also stated:

> We would prefer to see registration as a civil engineer a requirement in the definition. This would totally relieve OSHA of the responsibility of determining a person's qualifications to design shoring. Each State has its own criteria of what is acceptable to them for a person to practice engineering. It would also make enforcement by OSHA inspection personnel much easier when questioning the qualifications of the person responsible for a shoring design.
>
> Qualified engineers use the physical laws of nature to estimate applied loads and the strength of construction materials with

appropriate factors of safety to ensure against all possible failures of a proposed shoring system. A wealth of data is available to help a qualified engineer predict the behavior of a proposed shoring system. A person designing by "experience" has but one method to establish his limiting design criteria. That method is to encounter a design failure in actual practice and relate that to future designs. Unfortunately, the application of this design technique may come at a high price in injuries and lives. This method of design should be as totally unacceptable to OSHA as it is to us.

The commenter did not support including criteria for qualifications of persons designing protective systems, noting that it would require the establishment of an "OSHA Board of Registration." Such a board would duplicate State licensing boards, which are currently an adequate means of setting qualification criteria. Cost data supplied by the commenter indicated that the cost for shoring drawings for a typical $500,000 project would run about $800, and noted that often these cost were recovered by increased efficiency. Finally, the commenter raised the following legal issue:

> One other question not asked in your proposed rulemaking, but one that is certainly pertinent, is "Does the recognition of experience as a qualification for shoring design conflict with any existing laws?
>
> In the State of California, the practice of civil engineering requires that an individual be licensed with the Board of Registration for Professional Engineers. Other states have similar statutes which would be in conflict with your proposed rulemaking. In the event of a civil action regarding a trench bracing failure, what will be a defendant's position regarding compliance with the law if a workman is injured or killed while working in a trench shored in accordance with an unprofessionally prepared shoring plan?

The Structural Engineers Association of Southern California (Ex. 4–80) commented in support of the LASACE position, favoring the use of a registered professional engineer.

Consultant Services Institute, Inc. (CSI) (Ex. 4–64) was strongly opposed to the use of a qualified person, and recommended that the standard require a qualified civil or soils engineer licensed in the state where the work is being done.

Neyer, Tiseo and Mundo, Ltd. (Ex. 4–71) also opposed allowing design by anyone who is not an engineer. The commenter noted that design tables and charts should not be used by people who are unfamiliar with soil mechanics since the user must know how soils will behave in order to use the charts and tables properly.
